|  |  | •   | This property was in the possession of the ass't engineer of the 3d division, the army corps. While on the march from Fish river to Spanish Fort, Alabama, he disappeared and was reported absent: but it was ascertained afterwards that he and the property were cantured by the "rebs." | Captured October 13, 1864, near Marietta, Georgia.  |

NOTE.—This statement is compiled from the annual reports of officers for the past fiscal year. The estimated value is inserted as far as stated, but it does not show the full value of the property by at least one-third of the amount reported.

In addition to the above statement Brevet Major General Donaldson reports the total loss and destruction of public property in the department of Cumberland during the past year by fires the, by freshet, captured, abandoned, or destroyed, to prevent its falling into the hands of the rebels, at \$3,500,000.

No. 59

Summary statement of transportation furnished during the fiscal year ending June 30, 1865.

In order to bring up the arrears in the examination of these accounts, I have the honor, respectfully, to recommend that there be employed, temporarily, one hundred and fifty clerks. If this additional force is authorized, an additional building for their accommodation will be required.

Very respectfully, &c.,

BENJ. C. CARD,

Colonel Quartermaster's Department, in charge of Division.
Brevet Major General M. C. Meigs,

Quartermaster General U. S. Army.

No. 70.

[General Orders No. 35.]

QUARTERMASTER GENERAL'S OFFICE, Washington City, August 29, 1864.

The following act of Congress, approved July 4, 1864, entitled "An act to restrict the jurisdiction of the Court of Claims, and to provide for the payment of certain demands for quartermasters' stores and subsistence supplies furnished to the army of the United States," and the following "rules and regulations to govern in the submission and examination of claims to be presented to the Quartermaster General and to the Commissary General of Subsistence, respectively," under the act aforesaid, are published for the information and guidance of the officers and agents of the Quartermaster's department.

M. C. MEIGS,
Quartermaster General and Brevet Major General.

AN ACT to restrict the jurisdiction of the Court of Claims, and to provide for the payment of certain demands for quartermasters' stores and subsistence supplies furnished to the army of the United States.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the jurisdiction of the Court of Claims shall not extend to or include any claim against the United States growing out of the destruction or appropriation of, or damage to, property by the army or navy, or any part of the army or navy engaged in the suppression of the rebellion from the commencement to the close thereof.

SEC. 2. And be it further enacted, That all claims of loyal citizens in States not in rebellion, for quartermasters' stores actually furnished to the army of the United States and receipted for by the proper officer receiving the same, or which may have been taken by such officers without giving such receipt, may be submitted to the Quartermaster General of the United States, accompanied with such proofs as each claimant can present of the facts in his case; and it shall be the duty of the Quartermaster General to cause such claim to be examined, and, if convinced that it is just, and of the loyalty of the claimant, and that the stores have been actually received or taken for the use of and used by said army, then to report each case to the Third Auditor of the Treasury, with a recommendation for settlement.

SEC. 3. And be it further enacted, That all claims of loyal citizens in States not in rebellion, for subsistence actually furnished to said army, and receipted for by the proper officer receiving the same, or which may have been taken by such officers without giving such receipt, may be submitted to the Commissary General of Subsistence, accompanied with such proof as each claimant may have to offer; and it shall be the duty of the Commissary General of Subsistence to cause each claim to be examined; and, if convinced that it is just, and of the loyalty of the claimant, and that the stores have been received or taken actually for the use of and used by said army, then to report each case for payment to the Third Auditor of the Treasury, with a recommendation for settlement.

Approved July 4, 1864.

The following rules and regulations to govern in the submission and examination of claims to be presented to the Quartermaster General, and to the Commissary General of Subsistence, respectively, under the act of July 4, 1864, entitled "An act to restrict the Court of Claims, and to provide for the payment of certain demands for quartermasters' stores and subsistence supplies furnished to the army of the United States," and the evidence or proofs which must accompany them, are hereby established.

T.

CLAIMS TO BE SUBMITTED TO AND EXAMINED BY THE QUARTERMASTER GENERAL.

All claims of loyal citizens in States not in rebellion, for quartermasters' stores actually furnished to the army of the United States, and receipted for by the proper officer receiving the same, or which may have been taken by such officers without giving such receipts.

TT.

CLAIMS TO BE SUBMITTED TO AND EXAMINED BY THE COMMISSARY GENERAL OF SUBSISTENCE.

All claims of loyal citizens in States not in rebellion, for subsistence actually furnished to said army, and receipted for by the proper officer receiving the same, or which may have been taken by such officer without giving such receipts.

III.

PROOFS REQUIRED IN SUPPORT OF THE ABOVE CLASSES OF CLAIMS.

1st. That the claimant is a loyal citizen of a State not in rebellion. Claims of citizens of the following States and parts of States declared by the President of the United States, by his proclamation of the 1st day of January, 1863, to be in rebellion, will not be considered, viz: Arkansas, Texas, Louisiana, (except the parishes of St. Bernard, Plaquemines, Jefferson, St. John, St. Charles, St. James, Ascension, Assumption, Terre Bonne, Lafourche, St. Mary, St. Martin, and Orleans, including the city of New Orleans,) Mississippi. Alabama, Florida, Georgia, South Carolina, North Carolina, and Virginia, (except the forty-eight counties designated as West Virginia, and also the counties of Berkeley, Accomac, Northampton, Elizabeth City, York, Princess Anne, and Norfolk, including the cities of Norfolk and Portsmouth.)

2d. Citizenship.—The claimant will be required to show by his own affidavit, supported by the certificate of the clerk or recorder of the town or county of which he claims to be a citizen, that said claimant is a citizen of said town or

ounty.

3d. Loyalty.—The claimant will be required to file with his claim the oath of allegiance to the government of the United States, as prescribed by the President's proclamation of the 8th of December, 1863, supported by the certificate of a United States officer, civil or military, that the said claimant was, at the date his claim originated, and has been ever since, loyal to the United States; or the sworn statement of the same facts of at least two witnesses, whose loyalty and credibility shall be vouched for by the certificate of the officers before mentioned.

1V.

Claims arising under this act must be presented by the claimant, or his authorized attorney; and in the latter case it must be shown by the certificate of the assessor or collector of his district that he has been duly licensed and authorized to act as claim agent.

V.

### VALIDITY OF CLAIMS.

1st. When quartermasters' stores or subsistence supplies have been taken by

officers and receipted for, such receipts or vouchers must be filed.

2d. When such stores or supplies have been taken by officers without giving such receipts, the claim must set forth the kinds and quantity of stores or supplies; when, where, and by what officer taken; the price or value thereof; and must be supported by the affidavit of the claimant as to the correctness of the claim; that the articles named in the claim were actually delivered to or taken by said officer for the use of the army; that no receipt or voucher has been received therefor; that no payment has been made, or compensation received in any way, or from any source whatever, for the whole or any part of said claim; that it has not been transferred to any person or persons whomsoever, and that the rates or prices charged are reasonable and just, and do not exceed the market rate or price of the article at the time and place stated.

3d. In all cases, whether or not receipts have been given for the stores or supplies, the affidavit required by the next preceding paragraph must be supported by such additional affidavits, or other proofs in relation to the facts stated, as may be attainable. The credibility of the claimant and of the witnesses must be vouched for by the certificate of an officer of the United States, civil or military.

4th. Proof must be furnished, as far as attainable, that the quartermasters' stores or subsistence supplies mentioned have been actually used by the army of the United States.

 $\mathbf{v}_{\mathbf{I}}$ 

Under the internal revenue law each affidavit and certificate must have affixed to it a five-cent internal revenue stamp, which must be cancelled by the party affixing it by writing across thereof his initials and the date.

### VII.

Claims for damages or for losses sustained by thefts or depredations committed by troops will not be considered under the act above referred to.

(Signed) M. C. MEIGS,

Brevet Major General and Quartermaster Gen

Brevet Major General and Quartermaster General.
(Signed)
A. E. SHIRAS,

Colonel, Acting Commissary General of Subsistence.

Approved: By order of the Secretary of War. (Signed)

C. A. DANA, Assistant Secretary of War.

WAR DEPARTMENT, August 26, 1864.

No. 71.

[General Orders No. 43.]

QUARTERMASTER GENERAL'S OFFICE, Washington, D. C., September 23, 1864.

The Secretary of War having approved (16th September, 1864) the following rules and regulations relating to the purchase, procurement, and disposition of horses and mules for the army, they are published for the information and guidance of officers and agents of the Quartermaster's department.

M. C. MEIGS,

Brevet Major General and Quartermaster General.

### RULES AND REGULATIONS.

The following rules and regulations to govern in the purchase, procurement, and disposition of horses and mules for the public service are hereby established:

Cavalry horses must be sound in all particulars, well broken, in full flesh, and good condition, from fifteen (15) to sixteen (16) hands high, from five (5) to nine (9) years old, and well adapted in every way to cavalry purposes. Horses between nine (9) and ten (10) years of age, if still vigorous, sprightly, and healthy, may be accepted.

Artillery horses must be of dark colors, sound in all particulars, strong, quick, and active, well broken, and square trotters in harness; in good flesh and condition, from six (6) to ten (10) years old; not less than fifteen and one-half (15½) hands high; each horse to weigh not less than ten hundred and fifty (1050) pounds.

Mules must be over two (2) years of age; strong, stout, compact, well-developed animals, in full health, free from any blemish or defect which would unfit them for severe work, and must have shed the four front colt's teeth and developed the corresponding four permanent teeth—two in each jaw.

The foregoing specifications must be rigidly adhered to. No discretion is allowed to an inspector to accept any animal which these specifications would

reject.

All animals, when inspected and received, must be branded with the letters U. S. on the near shoulder, and on the neck with the initial letters of the name

of the officer purchasing.

All officers and inspectors will be held to a strict accountability for their purchases. Their attention is specially directed to section 6 of the act of Congress approved July 4, 1864, "for the better organization of the Quartermaster's department," as follows:

"Sec. 6. And be it further enacted, That all inspectors of horses, mules, clothing, fuel, forage, lumber, hired transports, and other supplies of the Quartermaster's department, shall be sworn (or affirmed) to perform their duties in a faithful and impartial manner; and shall, for any corruption, wilful neglect, or fraud, in the performance of their duties, be liable to punishment by fine and imprisonment by sentence of court-martial or military commission; and if any contractor or person furnishing such supplies or transportation shall give, or offer to give, to any inspector of such supplies or transportation, or to any other person for his use, directly or indirectly, any money or other valuable consideration, such person giving or offering to give such money or other valuable consideration shall forfeit to the United States the full amount of his contract or contracts with the United States, and the name and offence of such person shall be published in general orders, and also in one newspaper of general circulation nearest to his place of residence."

All officers receiving public animals by transfer or invoice will, immediately upon receiving them, and before signing receipts, inspect them carefully, and will enter upon their receipts the condition of the animals when received, and state wherein they fail, if at all, to fulfil the requirements of the foregoing spe-

cifications.

When animals unfit for the public service are received, a full report will be made to the Quartermaster General at Washington.

The purchase of animals for the public service will be made only on author-

ity received from the Quartermaster General's office.

Vouchers for payments for public animals must be accompanied by the authority or order for the purchase, and by the certificate of the properly authorized inspectors. (Blank forms, copy herewith, will be furnished from the Quartermaster General's office.)—(A.)

The special attention of all officers of the Quartermaster's department is called

to the following extract from General Orders of the War Department No. 392. series 1863, viz:

"When officers give or issue certified accounts for purchases made or services rendered in the Quartermaster's department, they will immediately send an abstract of them to the principal officer of the department in which they are serving, and to the Quartermaster General at Washington. Any officer failing to forward these abstracts will have his pay stopped until he sends them."

Estimates of funds for the purchase of public animals will be made direct upon the Quartermaster General, and must be accompanied by the authority for the purchases. Blank form of estimate (copy herewith) will be furnished from

the Quartermaster General's office. 9—(A.)

Tri-monthly reports of purchasing and inspecting officers must be promptly mailed to the Quartermaster General, marked on the envelope "Tri-monthly reports—Division for supply of horses and mules." Blank forms, copies herewith, will be furnished from the Quartermaster General's office, (Nos. 1, 2, 3, 4, 5.\*)

All communications relating to the purchase, procurement, and disposition of horses and mules, addressed to the Quartermaster General, must be indorsed on the envelope, "Division for supply of horses and mules."

### REGULATION.

All officers of the Quartermaster's department, whose duty it may be to make advances or transfers of funds to disbursing officers, will, with their monthly estimate, (form No. 9, ) send to the Quartermaster General an additional estimate in the form herewith, (No. 9, A,) specifying the names of officers to whom it is expected to make such advances or transfers, their stations, the sums they have asked for, and the sum proposed to be advanced to them for disbursement.

No. 72.

[General Orders No. 276.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,

Washington, August 8, 1863.

To secure and preserve discipline, provide against disaster from the elements or attack by the enemy, the senior officer in the military service of the United States, present with troops upon any transport, will assume command, unless he finds, on going on board, a commander already designated by proper authority.

All troops on board the transport will, at the earliest moment after embarking, be inspected and organized into detachments or companies. The senior officer will assign officers to each detachment or company, and take all measures necessary to put his command into the best state of efficiency to meet any emergency.

This order applies to all troops on board of transports, whether on duty or furlough, or in separate detachments; and the senior officer on board will be held responsible for any failure in the performance of the duties above imposed upon him, and for the enforcement in his command of strict observance of the article 37, revised army regulations, for the government of troops on transports.

He will require, when arriving in sight of port, a report of the voyage from the senior officer or acting officer of each staff department on board, and will transmit it with his own report, through the proper channel, to the Adjutant

General of the army.

These reports should give any facts of interest touching the accommodation and health of the troops, the manner in which the officers and crew of the transport have performed their duties, and the length of the voyage, and any observations which may enable the War Department to detect and correct abuses and punish neglect.

This order will be placed in a conspicuous position in every chartered or pur-

chased transport.

By order of the Secretary of War:

E. D. TOWNSEND,
Assistant Adjutant General.

No. 73. [General Orders No. 24.]

QUARTERMASTER GENERAL'S OFFICE, Washington, D. C., April 29, 1865.

I. In carrying out the provisions of General Orders No. 77, from the War Department, Adjutant General's office, dated 28th April, 1865, so far as relates to the Quartermaster's department, all chartered steamers, both ocean and river, which, under the new military situation, can be spared, will be discharged immediately.

II. Ocean steamers at distant ports will be loaded with the supplies which are no longer needed at such ports, and returned either to the depots of New York

or of Washington.

III. Troops under orders to return north will be transported in the returning

steamers, or in the steamers which are the property of the department.

IV. The chiefs of divisions of this office and the chiefs of the principal depots will immediately report to the Quartermaster General the extent of the reduction which they are able to make in the force of laborers, operatives, clerks, and agents, under their command.

V. It is understood that troops will be made available for most of the work at the depots, and that thus very large reductions in the rolls of employés will

be possible.

VI. All railroad construction and repairs, except those needed on lines by which troops are still supplied, or by which troops may be marching, will cease.

VII. Construction and extension of all barracks, hospitals, and other buildings will cease, unless authorized upon special report, which, in all cases of necessity, should be made immediately by telegraph.

VIII. Property returns of all property on hand on the 30th April should be made up immediately, and forwarded to this office, with recommendations as to the dispositions to be made thereof, whether to be stored or to be sold, and where

to be stored or sold in each case.

1X. The efforts of all officers of this department will be directed to the greatest possible reduction of expenditure consistent with the efficiency and comfort of the troops now about to be withdrawn from active operations in the field.

X. Attention of all officers of the Quartermaster's department is specially called to paragraph II and IX, of General Orders No. 77, which are herewith republished, as follows:

Digitized by Google

"II. That the Quartermaster General discharge all ocean transports not required to bring home troops in remote departments. All river and inland transportation, except that required for necessary supplies to troops in the field. Purchases of horses, mules, wagons, and other land transportation, will be stopped: also purchases of forage, except what is required for immediate consumption. All purchases for railroad construction and transportation will also be stopped.

"IX. The chiefs of the respective bureaus will immediately cause property returns to be made out of the public property in their charge, and a statement of the property in each that may be sold upon advertisement and public sale

without prejudice to the service."

M. C. MEIGS.

Quartermaster General, Brevet Major General,

No. 74.

[General Orders No. 25.1

QUARTERMASTER GENERAL'S OFFICE. Washington, D. C., April 29, 1865.

The chief of the inspection division will direct the inspectors to visit all depots and posts within their respective districts, and report the reductions which may be possible in expenditure, and make such suggestions therefor as may seem to them necessary.

Officers not on duty in the field or at important posts will also be selected, to be placed temporarily on inspection duty, in order that this inspection may be

the more general and speedy.

M. C. MEIGS.

Quartermaster General, Brevet Major General.

No. 75.

[General Orders No. 28.]

QUARTERMASTER GENERAL'S OFFICE. Washington, D. C., May 8, 1865.

All horses and mules on hand in the Quartermaster's department not fit for immediate issue will be advertised and sold at public sale as soon as the necessary public notice can be given.

Brevet Brigadier General Ekin, chief of the 1st division of the Quartermaster General's office, will telegraph the necessary instructions to each depot of

Sales should be commenced within one week, and continued at regular intervals, until all unserviceable animals are disposed of.

They should be sold at the depots at which, or near which, they are kept at

the time the order is received.

M. C. MEIGS,

Quartermaster General, Brevet Major General.

No. 76.

[General Orders No. 42.]

QUARTERMASTER GENERAL'S OFFICE. Washington, D. C., July 15, 1865.

Large quantities of property belonging to the Quartermaster's department of the United States army are now being sold by order of the War Department. Special reports of such sales will be made and sent to the Quartermaster General at Washington.

These reports will state the kind of articles sold, and the amount realized by said sale, according to the annexed form.

They will be forwarded to the Quartermaster General's office daily, so long

as the sales continue.

These reports are not intended to supersede the regular accounts of the sales of public property to be sent with officers' accounts and returns as required by the army regulations, which must be sent as heretofore.

The first reports after the receipt of this order will embrace all sales made

since the 1st of May last.

Sales should be made at auction by persons employed for that purpose by the officers of this department or by clerks already employed who may be competent.

The compensation to be allowed to persons specially employed to make such sales should be a reasonable daily or monthly salary, not a commission or per-

centage on the amount sold.

M. C. MEIGS, Quartermaster General, Brevet Major General.

### No. 77-A.

[General Orders No. 56.]

QUARTERMASTER GENERAL'S OFFICE, Washington, D. C., September 28, 1865.

The following order, by the President of the United States, in relation to the relinquishment of the government's control over all railroads in the State of Tennessee, and their continuations in adjoining States, now occupied by the

Digitized by Google

United States military authorities, and no longer needed for military purposes, is published for the information of all officers and agents of the Quartermaster's department.

M. C. MEIGS, Brevet Major General U. S. A., Quartermaster General.

# WAR DEPARTMENT,

Washington, August 8, 1865.

GENERAL: It having been determined by the government to relinquish control over all railroads in the State of Tennessee, and their continuations in adjoining States, that have been in charge of and are now occupied by the United States military authorities, and no longer needed for military purposes, you are hereby authorized and directed to turn over the same to the respective owners thereof at as early a date as practicable, causing, in all cases of transfer as aforesaid, the following regulations to be observed and carried out:

1. Each and every company will be required to reorganize and elect a board

of directors, whose loyalty shall be established to your satisfaction.

2. You will cause to be made out in triplicate, by such person or persons as you may indicate, a complete inventory of the rolling stock, tools, and other materials and property on each road.

3. Separate inventories will be, in the same manner, made of the rolling stock and other property originally belonging to each of said roads, and that furnished

by and belonging to the government.

4. Each company will be required to give bonds satisfactory to the government that they will, in twelve months from the date of transfer as aforesaid, or such other reasonable time as may be agreed upon, pay a fair valuation for the government property turned over to said companies, the same being first appraised by competent and disinterested parties at a fair valuation, the United States reserving all government dues for carrying mails and other service performed by each company until said obligations are paid; and if at the maturity of said debt the amount of government dues retained as aforesaid does not liquidate the same, the balance is to be paid by the company in money.

5. Tabular statements will be made of all expenditures by the government for repairing each road, with a full statement of receipts from private freights, passage, and other sources; also a full statement of all transportation performed on government account, giving the number of persons transported, and amount of freight, and the distance carried in each case; all of said reports or tabular statements to be made in triplicate, one each for the Secretary of War, the mili-

tary headquarters of the department, and the railroad company.

6. All railroads in Tennessee will be required to pay all arrearages of interest due on the bonds issued by that State prior to the date of its pretended secession from the Union, to aid in the construction of said roads, before any dividends are declared or paid to the stockholders thereof.

7. Buildings erected for government purposes on the line of railroads, and not valuable or useful for the business of said companies, should not form a legitimate charge against such companies; nor should they be charged for rebuilding houses, bridges, or other structures which were destroyed by the federal army.

8. You are authorized to give any orders to quartermasters within your divi-

sion which you may deem necessary to carry into execution this order.

By order of the President:

EDWIN M. STANTON, Secretary of War.

Major General GEORGE H. THOMAS,

Commanding Military Division of Tennessee, Nashville, Tenn.

No. 77—B.
[General Orders No. 62.1

QUARTERMASTER GENERAL'S OFFICE, Washington, D. C., October 23, 1865.

The following order by the President of the United States, in relation to executive order of 8th of August, 1865, extending the provisions and benefits of the same to all railroads within the limits of the military division of the Tennessee desiring to purchase railroad rolling stock and material from the United States, for the purpose of repairing the losses of the war, is published for the information of all officers and agents of the Quartermaster's department.

M. C. MEIGS.

Brevet Major General U. S. A., Quartermaster General.

WAR DEPARTMENT, Washington, D. C., October 14, 1865.

GENERAL: The provisions and benefits of the executive order of 8th of August are hereby extended to all railroads within the limits of your command desiring to purchase railroad rolling stock and material from the United States, for the purpose of repairing the losses of the war.

You are also authorized to direct the sale to any such railroads of rolling stock now within the limits of your command, and not needed by the United States for actual use, upon the following conditions, if they are preferred to the terms of the order of 8th August, and the individual security required by you under that order.

You will take care that this property is distributed among the several roads in proportion to their actual needs, and that none is sold to any railroad in excess of the reasonable requirements of its business, or to be used for purposes of speculation, sale, or hire to other roads.

You will require from all such railroad companies satisfactory bonds, in the form herewith enclosed, binding them to the payment to the United States of the full appraised value of the property sold to them, in equal monthy instalments, with interest at the rate of seven and three-tenths per cent. per annum, within two years, credit being allowed to them, on the first of each month, for any service of military transportation rendered by them during the preceding month, at the established rates now allowed to northern railroads for such service.

Full reports of all sales under this order will be made to the War Department from time to time, as required by existing orders.

The serviceable railroad iron in possession of the Quartermaster's department at Chattanooga and Nashville is excepted. It will be sold only for cash, at the prices fixed by the War Department.

By order of the President:

EDWIN M. STANTON, Secretary of War.

Major General GBORGB H. THOMAS,

Commanding Military Division of the Tennessee,

Headquarters, Nashville, Tennessee.

### Bond.

Know all men by these presents, that the ——— Railroad Company, duly incorporated by the act of the ———, of the State of ———, by ———, its president, acting for and in behalf of said railroad company, do hereby acknowledge itself and its successors held and firmly bound unto the United States of America, in the full and just sum of ——— dollars, lawful money

Digitized by Google

of the United States, for which payment, well and truly to be made to the disbursing quartermaster of the United States military railroads, at his office in Nashville, or to such other disbursing quartermaster as may be designated by the War Department, within two years from the date of these presents, the said railroad company, by its president, hereby binds itself and its successors firmly by these presents.

The nature of the above obligation is such, that whereas the above-bounden railroad company has purchased and received, or shall receive, from the War Department of the United States, rolling stock, iron rails, cross-ties, chairs, spikes, timber, and other materials for repairing and operating its railroad, in quantities, at prices, and to an amount and value which shall be evidenced by the receipts given for the same by the said railroad company to the proper officer of the said War Department, upon a credit of two years from the date of these presents, payable in equal monthly instalments, with interest at the rate of seven three-tenths per cent. per annum, within the said two years, either in cash to the disbursing quartermaster of the United States military railroads, at his office in Nashville, or to such other disbursing quartermaster as may be designated for this purpose by the War Department, or in transportation of the troops or military supplies of the United States, under the orders of the proper military authorities, at the rates of fare and tolls allowed for such service to northern railroads; and whereas the said railroad company desires, and by these presents intends, to secure to the United States the complete and punctual payment as aforesaid of the amounts which may be due for the said materials received or to be received by it from the United States:

Now, therefore, if the said railroad company shall well and truly pay as aforesaid, either in cash, in equal monthly instalments, or in transportation as aforesaid, to the United States, within two years from the date of these presents, all that shall be due as aforesaid to the United States on account and in payment for all the materials received as aforesaid from the United States,

then this obligation shall be void and of no effect.

But if the said railroad company shall fail to pay to the United States all or any portion of what may be due to the United States, on account of the said materials received from the United States, within two years from the date of these presents, either in cash as aforesaid, or in transportation as aforesaid, or shall fail to pay any of the monthly instalments aforesaid punctually when due, then this obligation shall remain in full force and effect to the extent that may be necessary to fully repay to the United States for the full amount which may be due on account of the said materials so received as aforesaid, and all loss or damage which may have been incurred by the United States by reason of the said railroad company's failure to pay for the same, what shall be due therefor, when the same shall be due.

And as a further security for such payment and indemnity to the United States, the United States shall have a lien upon the property sold to said company; and in default of such complete and punctual payment of all moneys which may be due on account of the aforesaid purchase of materials, be fully authorized to take possession of and sell said property, and also to place in charge and control of the said company's railroad an agent of the said United States, who shall be fully empowered, and by these presents is fully empowered, in case of such default as aforesaid, to collect all the revenues of the said company, and apply the same to the payment to the United States of all the moneys which shall be due at the times of such application of such revenues to the United States for any such materials which shall have been delivered by the United States to the said railroad company, or by reason of any loss or injury to the

United States resulting from such default in payment of the same. And the said company shall have no authority to sell or convey out of its possession, without the consent of the United States, first in writing obtained, any of the property referred to in this agreement, but shall hold and retain the same to the exclusive use of said company, in carrying on the business of transportation of persons and property over its line of road, until the whole is fully paid for as aforesaid.

In witness whereof, the corporate seal of said railroad company is affixed hereto, by authority of its directors, and attested by its president.

Witness:

Note.—The amount of this bond to be double the valuation of the property sold and delivered. Internal revenue stamps should be affixed, to the amount of fifty cents for every thousand dollars.

### No. 78.

Annual report of Colonel Anson Stager, chief United States military telegraphs, for the fiscal year ending June 30, 1865.

CLEVELAND, OHIO, September 15, 1865.

General: In obedience to General Orders No. 39, Quartermaster General's department, Washington, D. C., July 1, 1865, I have the honor to submit my annual report of the operations and condition of United States military telegraphs for the fiscal year ending June 30, 1865, &c. I have the honor to hand you, also, herewith, the reports of such of the officers serving under me as have been received up to this time. That of Captain J. C. Van Duzer, marked A; Captain R. C. Clowry, B; Captain W. G. Fuller, C; Captain W. L. Gross, D; Captain J. R. Gilmore, E; Captain S. G. Lynch, F. The report of Major Thomas T. Eckert has not yet reached me. My annual report for 1864 was forwarded to your department in the latter part of October, 1864, accompanied by the reports of the several officers acting as assistant superintendents and assistant quartermasters, attached to this branch of the public service.

It has been my duty during the past year to act as chief officer of United States military telegraphs, having a general superintendence over all the lines, providing the necessary funds, and supervising the purchase of material required for the operation and construction of the same. I have been very ably and energetically assisted in the discharge of my duties as general superintendent of United States military telegraphs by the several officers acting as assistant superintendents in the various military departments, and I desire to accord to them the greater portion of whatever merit attaches to this branch of the public service. I have the honor to call attention to the reports of those officers, herewith transmitted, and to ask the consideration of the department to the merits of the officers respectively.

The demands of the proper military authority for telegraphic communication have always been promptly answered, and, I believe, fully satisfied. The military telegraph, under the immediate charge of the several assistant superintendents thereof, has kept company with our armies wherever they have gone, and upon all important expeditions; and it is a well-established fact that the mobility of the army has been greatly accelerated by its usefulness and assist-

tance.

The military telegraph has been an invaluable assistant in the construction and operation of the various military railroads. Trains have been run and many of the roads operated almost exclusively by telegraph. The military railroads and the military telegraph have been great auxiliaries to the gigantic and successful efforts of the government in suppressing the rebellion.

The military telegraph has operated frequently in the field in conjunction with

Digitized by Google

the signal corps, and has rendered efficient aid in this respect by diffusing information from advanced signal stations simultaneously to the headquarters of the commanding general and the different corps headquarters. The military telegraph could be made the means of establishing the signal corps of the army for active operations upon a much more useful basis than heretofore. The telegraph depends not upon the atmosphere, nor the weather, but flashes its thoughts alike unheeded, through storm or sunshine, darkness or light. I am, however, of the opinion that the field telegraph, which we have operated independently as well as in connexion with the signal corps, could be so perfected and operated as to completely and advantageously supplant the use of a signal corps for

military operations.

In May, 1865, it was decided by the War Department that all commercial telegraph lines throughout the southern States, lately in armed resistance to the United States authorities, should be supervised and controlled by the officers of the United States military telegraph, subject to specified conditions favorable to the different telegraph companies, which privileges, however, were to be ignored under certain circumstances. Previous to cessation of hostilities these lines had been operated to a great extent by the rebel authorities, making it necessary therefore, on account of the morale of the former employés and the peculiar power of the telegraph for public good or evil, for the government to exercise its prerogative in regard to the operations of the lines referred to. Under the present arrangement the telegraph companies are called upon to repair their lines and put them in good working order, furnishing all labor and material therefor, the United States to be at no outlay beyond the expense of maintaining purely military lines and military stations. An account is to be kept of all government business passing over the lines. The account, however, is not assumed as an indebtedness by the government, but is left open for future consideration or settlement.

The amount of supplies which will be required for the future operations of the military telegraph, so far as I am at present informed, will be such as is necessary only for maintaining the lines at present in use. It is supposed that the government will require no more lines constructed, unless, perhaps, in Texas or upon the western frontier.

The amount of money expended during the year ending June 30, 1865, for the purchase of material and supplies required for the United States military telegraph was about \$300,000. \$130,000 of this amount, however, was for the purchase of 285 miles of Euglish submarine cable, the greater portion of which is still on hand. Probably not more than from \$1,000 to \$1,500 per month will hereafter be required for the purchase of necessary material and supplies.

So long as the military telegraph lines in present use are needed by the government, it will require about \$75,000 per month to supply, maintain, and operate the same. As the usefulness of some of these telegraph lines to government shall cease from time to time, and the lines are taken down or otherwise disposed of, the expenditures for maintaining the United States military telegraph will be proportionately reduced. A considerable revenue to government will probably be derived from the sale of the material now on hand so soon as the same shall be of no further use to the government. Such of the lines as may be located most advantageously for commercial purposes can undoubtedly be disposed of to the owners of the "telegraph right of patent" within the territory through which the lines pass, and at a reasonable consideration. The less important lines can be taken down, and the material sold.

The number of miles of land and submarine United States military telegraph lines in operation July 1, 1864, was, after deducting error in former report, as follows:

|  | Land.                       | Submar             | ine.                |  |

|  | 6, 1523                     | 751                |                     |  |
| Total  |                             |                    | 6, 228              |  |
|  |                             |                    |                     |  |

It is estimated that from the commencement of the rebellion up to June 30, 1865, there has been constructed and operated about fifteen thousand miles of United States military telegraph—land, submarine, and field lines.

From May 1, 1861, up to December 31, 1862, \$22,000 per month sufficed to construct and maintain United States military telegraphs. For the year 1863 about \$38,500 per month was required for the same purpose. During the year

Digitized by Google

1864 the military telegraph was greatly extended, and required about \$93,500 per month. From May 1, 1861, to June 30, 1865, \$2,655,500 has been received by me from the United States treasury, and disbursed or transferred by me for the construction, maintenance, and operation of United States military telegraphs.

Herewith please find statement of public moneys received during the year, and form A, embracing all the articles of property received by me during the same period. I have no occasion to use forms B, C, CC, D, E, F, nor G.

I have the honor to be, general, very respectfully, your obedient servant, ANSON STAGER,

Colonel, and Chief United States Military Telegraphs.

HEADQUARTERS UNITED STATES MILITARY TELEGRAPH, Military Department of Tennessee, Nashville, Tenn., July 20, 1865.

GENERAL: In obedience to General Orders No. 39, current series, Quartermaster's department, dated July 1, 1865, I have the honor to report that at the commencement of the year which ended on the 30th of June last I was on duty at headquarters, army and department of the Cumberland, Major General G. H. Thomas commanding, then in the field near Marietta, Georgia, in the capacity

Digitized by GOOGLE

of assistant superintendent United States military telegraph, having acted in that capacity since the date of my appointment, October 27, 1863.

During the month of July I accompanied the advance from Marietta to the position in front of Atlanta, keeping open communication with the rear by an ordinary line of telegraph of two wires, and throwing field lines to the right and left as ordered—to the right as far as the Sweetwater from Pace's ferry, and to the left from Pace's to Powers's ferry, and from Marietta to Roswell-in all about forty-five miles of lines. These lines were all constructed during the first eight days of the month, and were intended to facilitate the crossing of the Chattahoochie, becoming useless and being removed as soon as that movement was completed. Immediately after the engagement of the 20th at Peach Tree Creek, my working parties crossed the Chattahoochie at the railroad bridge, and pushed the reconstruction of the permanent line along the railroad to the third mile-post, which brought it within three-fourths of a mile of the rebel defences. From this point a field line to the right and left connected the headquarters of Generals Sherman and Thomas with those of such officers as they desired, and with the points of observation established by the signal corps. This line extended to the left as far as the position south of the Augusta railroad which was attacked by the enemy on the 22d, and to the right as far as the right was extended before the abandonment of the attack in front and the movement on Jonesboro'. This line was at one time twenty miles long—was continued in use twenty-eight days-offices having been opened and worked at twenty-three different points, more than one-half of which were exposed to the fire of the When the army moved on the communications of the enemy south of Atlanta this line became useless, and was taken down, the work being done after the movement had commenced, the party accompanying the march of the army until it had reached Campbellstown, where it re-crossed the Chattahoochie, and returned to the camp of the 20th army corps, north of the river, near Pace's ferry, and there awaited the result of the movements. During the month of August I also rebuilt entirely, using new poles and insulators, and, to a large extent, new wire, the lines upon the railroad to Chattanooga, that I might be able to render that assistance to the United States military railroad management which the necessities of the service demanded.

On the morning of September 2 I again crossed the Chattahoochie river at the railroad bridge, and on the next morning opened an office in Atlanta. During this month I built a line from Roswell, through Crosskeys and Decatur, to Atlanta, and thence, via East Point, to Campbellton, along the line occupied by our forces, with offices at the headquarters of the army corps and cavalry com-This work was completed by the 13th, and on that day, by the permission of the major general commanding, I left Atlanta to return to this post, having been absent from my office nearly five months. The line along the East Tennessee and Virginia railroad from Strawberry Plains to Bull's Gap was also repaired and put in operation during this month. During October the lines in front and to right and left of Atlanta were abandoned, as well as that from Strawberry Plains eastward, and no new work was ordered or undertaken. The enemy destroyed the lines between Kenesaw mountain and Alatoona, and between Tunnel Hill and Resaca, in the attempt to force the abandonment of Atlanta by destroying the communications with Chattanooga; and these lines were replaced as rapidly as possible after the repulse at Alatoona and the retreat from Dalton westward. In re-establishing these lines at this time I was so fortunate as to receive the commendation of the major general commanding in his report of the operations of the forces under his command.

During the latter part of the month all materials and men not absolutely needed to maintain communication with Atlanta were removed to Chattanooga, and the field train and equipment brought to Nashville and refitted. Nine men (all operators) were selected to accompany General Sherman's march through

Georgia, and placed at the different headquarters they were to accompany, being furnished with ciphers (as they were needed for the ciphers chiefly) and the proper instruments to enable them to tap and use the enemy's lines, if any should be found working.

In November, General Sherman's columns having left Atlanta, the lines of telegraph south of Dalton were entirely abandoned, the men and property being concentrated at Chattanooga. I was also compelled by the advance of the enemy from Florence, Alabama, towards Middle Tennessee to abandon the lines between Nashville, Tennessee, and Decatur, Alabama, between Nashville and Johnsonville, Tennessee, and between Decatur and Stevenson, Alabama, while that between Nashville and Murfreesboro' was in the actual possession of the enemy, and used by him for several days. At the close of the month there was no communication south from Nashville, but the lines under my charge from Chattanooga to Dalton, Georgia, to Strawberry Plains, Tennessee, and Murfreesboro', Tennessee, were in operation, and communication, via Louisville and Cumberland Gap, with Knoxville was undisturbed. The only work done during the first fourteen days of December (except maintenance of working lines) was the construction of a field line around the defences of Nashville, connecting department headquarters with the headquarters of the different subordinate commanders; and this line, constructed on the 4th, was used until the 16th, when the enemy, having been defeated and driven across the Harpeth, it was taken down and the reconstruction of the lines south and west commenced. Using my field equipments as auxiliary, I pressed south upon the line of the enemy's retreat, and was able to keep pace with the pursuit and to open an office at General Thomas's headquarters every evening until the pursuit ceased at the crossing of Richland creek. All the lines abandoned in November were reoccupied and opened by the close of the month, except that between Nashville and Johnsonville, Tennessee.

During January, 1865, the line on the Nashville and Northwestern railroad was restored and measures were taken to reopen the line between Fort Donelson and Smithland, Kentucky, which, though not abandoned, had been practically of no value by reason of the presence, in the wild country between the Cumberland and Tennessee rivers, of various smuggling and guerilla parties, and the entire want of protection by our forces. No new work was undertaken during February, though my force was fully employed in thoroughly repairing the lines so lately in the possession of the enemy and hastily rebuilt on his retreat; and the same is true of the month of March, until near its close, when, in view of the proposed operations in East Tennessee, the lines between Strawberry Plains and Bull's Gap were again (for the fourth time) rebuilt and preparations made to add a second wire to the line between Chattanooga and Knoxville, for the purpose of affording increased facilities for the handling of trains upon the United States military railroad, and generally assisting in the military operations. During April this work was completed, and the line rebuilt along the East Tennessee and Virginia railroad as far as Carter's station, and along the Memphis and Charleston railroad from Germantown, West Tennessee, to Lafayette. Captain S. Bruch, assistant quartermaster, having died on the last day of March, I was directed by Colonel A. Stager to superintend the preparation and rendition of his accounts, and was assigned to the duties performed by the deceased officer, in addition to those already devolving on me.

During the month of May the line along the Memphis and Charleston rail-road, between Decatur, Alabama, and Lafayette, Tennessee, was rebuilt, giving a connexion by telegraph with Memphis, and, by taking possession of the existing lines in Mississippi and Louisiana, opening communication with Mobile and New Orleans, and the system of telegraph lines under Captain W. G. Fuller in the department of the Gulf. The line along the Chattanooga and Atlanta railroad was also rebuilt from Dalton to the Etowah river, and a short line built between Luke and Esectuart.

between Iuka and Eastport, Mississippi.

Digitized by Google

In June my lines were extended from Carter's station to Bristol, Virginia, at which point I connected with lines established by Major Eckert, and thus completed the connexion, via Lynchburg and Richmond, to Washington. A line was constructed from Memphis, Tennessee, to Senatobia, Mississippi, to complete the connexion between Memphis and New Orleans; and the line rebuilt from the Etowah river to Atlanta, connecting these with the lines under charge of Captain J. R. Gilmore, closing the labors of the year by closing the last gap in the system of lines which extended by two routes, seaboard and inland, from Washington to New Orleans, and the cross route from Savannah and Charleston to Louisville, Kentucky, and St. Louis.

I submit herewith statements of the quartermasters' stores on hand at the beginning of the year, received and disposed of during the year, and on hand at its close; the same statement as to clothing and camp and garrison equipage; the same as to public moneys; and a statement of the number of miles of telegraph line in operation at the beginning of the year, constructed, abandoned, and work-

ing at the close of the year.

I have nothing to report upon forms C, CC, D, E, F, or G. Very respectfully.

JOHN C. VAN DUZER,

Captain and A. Q. M. and Sup't U. S. Military Telegraph. Brevet Major General M. C. Meics,

Quartermaster General, Washington, D. C.

A true copy:

JOHN V. FUREY, Captain and Assistant Quartermaster.

Statement of public moneys for the fiscal year ending June 30, 1865.

| Balance on hand July 1, 1864   |            |
|--|------------|
| Total receipts   | 320,020 86 |
| Amount of expenditures during the year  Transferred to officers during the year  Balance on hand June 30, 1865 |            |
| Total accounted for  | 320,020 86 |

The balance on hand is deposited in the First National Bank, Nashville, Tennessee.

JOHN C. VAN DUZER,

Captain, Assistant Quartermaster.

#### No. 79.

Annual report of Major Thomas T. Eckert, assistant quartermaster and assistant superintendent United States military telegraph, for the fiscal year ending June 30, 1865.

WASHINGTON CITY, D. C., October 9, 1865.

GENERAL: I have the honor to submit herewith my annual report for the fiscal year ending June 30, 1865, pursuant to General Orders No. 39, dated Quartermaster General's Office, July 1, 1865.

My annual report for the fiscal year ending June 30, 1864, was forwarded

to your office December 8, 1864.

I have been on duty during the year as assistant superintendent United States military telegraphs, in charge of all telegraph lines in the departments of Potomac, Virginia, North Carolina, and the south. My headquarters have

been at Washington, D. C.

At the beginning of the fiscal year the armies under Lieutenant General Grant were operating in the vicinity of Richmond and Petersburg, and communication was had from Washington via Wilmington, Delaware, thence along the eastern shore to Cherrystone Point, connecting there with cable to Fort Monroe, and thence via Yorktown, Jamestown island, Surrey Court House, Fort Powhatan, and City Point.

The line from Swan's Point, opposite Jamestown island, via Surrey Court House, being frequently interrupted by guerillas, and as a sufficient force could not be spared for its proper protection, it was decided to lay a cable from Jamestown island to Fort Powhatan, a distance of twenty-two miles by water. This cable was laid in July, 1864, and, with but few interruptions occasioned by passing vessels, has worked even more successfully than was anticipated. total number of miles of cable in the line between Washington via Wilmington to City Point is fifty-two, (52,) and this circuit has been worked direct (that is, without repeating stations) and almost continually.

The headquarters of the different corps of the armies were in direct communication with each other and with Lieutenant General Grant's headquarters, by means of the field telegraph. In case of a temporary advance of our troops the field telegraph wire, arranged on reels placed on the backs of mules, was strung out and supported by small poles prepared for the purpose, and offices established at the advance posts almost simultaneously with the advance.

During the month of July, 1864, a rebel force, under General Early, made a raid into Maryland, cutting the telegraph line leading from Washington to Harper's Ferry, a short distance from this city, and all the lines connecting Washington with the north at a point near Beltsville, nine miles from Washington, on the Baltimore and Ohio railroad. Field-lines were rapidly built to the forts around Washington, and offices opened at Forts Lincoln, Totten, Stevens, Reno, Corcoran, and at Chain bridge and Arlington. These offices were kept open until the rebel army had retreated, and were of great service in affording a means of rapid communication between all parts of our line. The military telegraph line to Point Lookout was the only line extending from the city any considerable distance, and for three days all telegrams for the army of Lieutenant General Grant, and for the north, were sent to Point Lookout and thence by despatch boat to Fort Monroe, from which point they were transmitted to their destination. By this means but little delay was occasioned in reaching the Lieutenant General by telegraph.

As our forces gradually advanced towards Richmond, by way of Chapin's farm, and to the southwest of Petersburg, across the Weldon railroad, the telegraph lines were thrown forward to all of the advanced positions.

Until the movement by General Grant, about the latter part of March, the

lines remained in about the same condition.

Immediately after the evacuation of Richmond the line was extended to that city, and an office opened there early on the morning of April 4. An office was also opened in Petersburg on the same day, and the telegraph line on the Southside railroad was repaired as fast as the troops advanced in pursuit of Lee, communication being had direct from City Point to headquarters of Lieutenant General Grant each evening.

An office was opened at Appomattox Court House two hours after the sur-

render of Lee with the army under his command.

Measures were at once taken to repair the telegraph lines leading west and south. An office was opened at Lynchburg April 16 and at Danville April 21.

The lines in the department of the Potomac and department of Virginia were in charge of A. H. Caldwell, chief operator, and D. Doren, superintendent of construction, both of whom, with the men under their charge, deserve great credit for the skill and energy displayed in establishing and maintaining communication with the advance of the army.

When General Schofield went to North Carolina, in January, a telegraph party, under Richard O'Brien, chief operator, was sent with him. A line was already built from Morehead City to a short distance beyond Newbern, North Carolina, connecting the different military posts with district headquarters.

As General Schofield advanced, the line was extended from Newbern to-

wards Goldsboro'.

To assist in the operations of the force advancing against Wilmington, by way of Fort Fisher, a line was built from the fort up the peninsula towards the city, and, immediately after its capture, was extended into the city and an office opened there February 23. From there the line was extended to Goldsboro' and thence to Raleigh; the office at the former place being opened March 23 and at the latter place April 14.

Mr. O'Brien is deserving of special notice for his energy and perseverance in establishing prompt communication by telegraph in this department, and the men under him, for their vigilance and faithful attention to the interests of the service.

After the surrender of General Johnston and the forces under his command, arrangements were made to open telegraphic communication with all important points in the south as speedily as possible.

In April a line from Petersburg to Weldon was built, and the line from there to Raleigh and to Goldsboro' repaired. The lines from Raleigh to Greensboro'

and from Danville to Greensboro' were also repaired.

In May a new line was built from Alexandria to Fredericksburg, and the railroad line thence to Richmond repaired.

During June a line was built from Richmond to Williamsburg, Virginia, con-

necting there with the line to Fort Monroe.

By these means communication was had with all important points south, and the telegraph lines placed under direct supervision of the War Department,

through the military telegraph.

For a report of the operations of the military telegraph in department of the south, I respectfully refer you to the annual report of Captain James R. Gilmore, assistant quartermaster and assistant superintendent United States military telegraph, who had charge, under my direction, of the lines in that department.

I am, general, very respectfully, your obedient servant.

THOMAS T. ECKERT,

Major, Ass't Q. M. and Ass't Sup't U. S. Mil. Telegraph.

Brevet Major General M. C. MEIGS,

Quartermaster General U.S.A., Washington, D. C.

#### B-No. 80.

Report of Captain R. C. Clowry, assistant quartermaster, for the fiscal year ending June 30, 1865.

United States Military Telegraph, Assistant Quartermaster's Office, St. Louis, Mo., July 31, 1865.

Colonel: I have the honor to transmit herewith my annual report for the fiscal year ending June 30, 1865, comprising—

A statement of public money received, expended, and transferred.

A statement of quartermasters' property on hand, received from officers, purchased, manufactured, captured, taken up, &c., issued and transferred, sold, died, lost, expended, &c.

A statement of clothing, camp and garrison equipage, ditto, ditto.

A statement of the number of miles of land and submarine telegraph line constructed, repaired, abandoned, &c., and a statement of the number of telegrams transmitted over said line.

Since my last annual report I have been on duty as assistant quartermaster and assistant superintendent United States military telegraph from June 30, 1864, to September 30, 1864, in charge of lines in department of Arkansas, and from October 1, 1864, to June 30, 1865, in charge of lines in departments of Missouri, Kansas, and Arkansas, as per your orders.

My monthly and annual "line and cable reports" give a detailed statement of the number of miles of line constructed, repaired, abandoned, &c.

Although the lines under my control for the last nine months of the year ending June 30, 1865, embrace a large territory, we have managed to keep them almost constantly in operation, day and night, to the full satisfaction of all officers from the division to the post commanders.

As the country became more settled and peaceable I gradually reduced my expenses, and although I have always had sufficient force for emergencies, I

have rarely permitted a man to be idle a single day.

Since I have had charge of the lines in Missouri, Kansas, and Arkansas, (1,702 miles,) I have operated, constructed, and repaired them at about an average cost of \$15,000 per month, and I am weekly reducing expenses without detriment to the service.

When it is taken into consideration that these lines are all single—that is, one wire on one set of poles, (which require twice as many operators and repairers as double wires,) and that the country has been full of thieving, wire-cutting guerillas, while United States troops have been "few and far between," I think that my expense account will compare favorably with any other telegraphic department in the United States.

Very respectfully, your obedient servant,

R. C. CLOWRY.

Captain, Ass't Q. M. and Ass't Sup't U. S. Mil. Telegraph, Missouri, Kansas, and Arkansas.

Colonel Anson Stager,

Ass't Q. M., Chief U. S. Military Telegraph.

A true copy:

JOHN V. FUREY, Captain and A. Q. M.

Statement of public moneys received, transferred, and expended, during the fiscal year ending June 30, 1865, by Captain R. C. Clowry, Assistant Quartermaster and Assistant Superintendent United States Military Telegraphs, department of Missouri, Kansas, and Arkansas.

| On hand July 1, 1864     | \$4,984 40<br>135,986 72<br>123 56<br>3,809 50 |
|--------------------------|--|
| Total                    |  |
| Expended during the year | \$130,929 06<br>856 22<br>13,118 90            |
| Total                    | 144,904 18                                     |

The balance on hand is deposited in my safe, at Little Rock, Arkansas.

I certify that the above statement is correct.

R. C. CLOWRY,

Captain and A. Q. M., Ass't Sup't U. S. Military Telegraphs.

#### No. 81.

Second annual report of Captain W. G. Fuller, assistant quartermaster of volunteers.

NEW ORLEANS, LA., July 25, 1865.

The close of the fiscal year ending June 30, 1864, found me in charge of military telegraph lines in the department of the Tennessee, with headquarters

at Memphis, Tennessee.

July 20, 1864, I received orders from Colonel Anson Stager, chief of military telegraphs, to proceed to New Orleans, Louisiana, and relieve Captain C. S. Bulkley, assistant quartermaster and assistant superintendent of military telegraphs in the military division of west Mississippi. After transferring the portions of lines under my charge lying in the district of Cairo to Captain S. Bruch, of Louisville, Kentucky, and three days at home on leave, I proceeded to New Orleans, and received the transfer from Captain Bulkley on the 1st day of August, 1864. During the month of August, 1864, by order of Major General Washburn, a line of telegraph was constructed from Grand Junction, Tennessee, to Abbeville, Mississippi, forty-five miles; about half of the poles of an old line were used, and all new wire.

September 5, received an order from Major General Canby to lay a submarine cable between Forts Morgan and Gaines, Mobile bay. September 8, left New Orleans in person with the cable. September 11, succeeded in laying the cable between Forts Morgan and Gaines, using 23,530 feet of No. 9 iron wire cable, galvanized armor. During the month of September General Washburn's forces fell back from Abbeville, Mississippi, towards Memphis, abandoning the lines from Abbeville to Grand Junction; and from Saulsbury, Tennessee, to White Station, Tennessee, 97 miles of wire was lost, it being operated until the last moment, and Forcest's forces advancing as fast as General Washburn's fell back.

In October, 1864, constructed a line from Fort Morgan, Alabama, to Pilot Town, Alabama, four miles. The submarine cable across Pass Chef Mentour, at Fort Macomb, Louisiana, failed and could not be resuscitated. A new cable

800 feet long was laid.

In November, 1864, constructed a line from headquarters, Memphis, Tennessee, to outpost stations, five miles; repaired the New Orleans and Fort Pike line, putting up a large number of new poles, and abandoned the line from White Station to Memphis, Tennessee; also received orders from Major General Canby to survey a route for a telegraph line from New Orleans to Ship island and thence to Forts Gaines and Morgan, Mobile bay; made the survey in person on tug Blossom.

December 6, 1864, made report to General Canby that the route for a line from New Orleans to Ship Island and Fort Morgan could be made available for temporary purposes, but was too difficult a route for a permanent line; that it would require eleven submarine crossings between New Orleans and Ship island,

over twenty-three miles in length in all.

December 9, received orders from General Canby to proceed with the construction of the line from New Orleans to Ship island. Constructed a loop in Baton Rouge line to Plaquemine, Louisiana, ten miles long, and laid 150 feet of cable across Tallafairo canal, on Balize line.

December 15, received twenty miles of "Red sea" submarine cable, but was unable to pass a current through it; after testing it in about a dozen places the imperfect spot was discovered. No sign of imperfection could be seen in the armor wires, but the conductor was parted at least two inches, and the gutta-

percha covering whittled. But very little progress was made upon the Ship island line during December for want of water transportation.

In January, 1865, reconstructed the line from Memphis, Tennessee, to Collierville, Tennessee, twenty-four miles, and abandoned it again after a few days, operations, by order of General Washburn.

January 7, the cable between Forts Morgan and Gaines was broken by a bark

dragging her anchors over it in a gale.

January 18, repaired the cable in person. Constructed line from Fort Macomb to Cat island, forty-five miles. This line was built across marshes which overflow at high tide, and poles had to be rafted along the shore, water

being too shallow for steamers. A very difficult line to construct.

In February, 1865, transferred the Memphis, Tennessee, and outpost lines to Captain S. Bruch, assistant quartermaster, Louisville, Kentucky; completed the land portion of line from Ship island, across Horn island, Petit Bois island, Hurricane island, and Dauphine island, to Fort Gaines, forty-five miles, and laid the following submarine cables: Across Lake Borgne, nine miles in length; across bayous Catharine, Biloxi, Little Cable, Dixon, False bay, Nine-mile bayou, Boudreaux, Three-mile bayou, Lagoon, Jones, Grand Pass, Blind bay, Johnson's, Dead Man's bayou, and the pass between Isle bu Pied and Cat island, four and a half miles in length, and between Cat and Ship islands, six and a half miles; total 23 miles 1,540 feet. The cable used was "Red sea" cable for the long crossings, and cable prepared from old core at New Orleans, armored with worthless wire taken down from abandoned lines.

In March, 1865, extended line from Navy cove, Mobile bay, to Fish river, thirty-five miles, which was soon after abandoned and a field line constructed between each headquarters, surrounding Spanish fort and Fort Blakely, fifteen miles. These lines were run with the pack-mule train, and did valuable service. Constructed a line from New Orleans to Hickox landing, eight miles, and laid submarine cables from Ship island to Horn island, twelve miles, and from Horn island to Petit Bois island, four miles. This exhausted all the submarine cable on hand that could be made available. The laying of these cables was very much delayed by hard and continuous southeasterly gales, and the "Red sea" cable proved too frail for the strong currents and quicksands of these island passes. In "dead" water, across Lake Borgne, it worked perfectly, and when first laid across the island passes it worked clear and fine, but the "three-day storms," such as frequent this coast, destroyed the cable ends with each recurrence, in spite of all the wrappings and preventives that could be placed upon them with the means at hand. I risked the lives of myself and men several times in the surf, in endeavoring to keep the cables in working order, and make them perform the designed mission. I have the consciousness that everything was done that promised success, to accomplish the work of keeping New Orleans and the army advancing up Mobile bay in telegraphic communication, but the frail nature of the armor wires covering the "Red sea" cable, and the action of the currents and quicksands in the island passes, could not be overcome, nor could the constant and severe southeasterly gales, which prevailed to a very unusual extent during this season, be avoided. To these causes alone can the slow progress of the work and final failure of the scheme be attributed.

The cable across the Mississippi river, at New Orleans, was destroyed this

month by the sloop-of-war Portsmouth dragging her anchors across it.

In April, 1865, constructed a line from Mobile, Alabama, to Spring Hill, eight miles, and repaired the line from Mobile to Spanish fort, and from Mobile to Citronelle, and took down the lines from Navy cove to Fish river, and surrounding Forts Spanish and Blakely. Laid a new cable across the Mississippi

river at New Orleans, which was a second time destroyed by the sloop-of-war Portsmouth dragging her anchors.

In May, 1865, constructed lines from Mobile, Alabama, to Fort Pike, Louisiana, 130 miles, all new line, and from Baton Rouge to Clinton, Louisiana, forty-three miles, all new line, and repaired lines throughout Mississippi and Alabama, using about 150 miles of new wire upon them; also took up lines from Mobile to Spanish fort, and from Fort Macomb, Louisiana, to Fort Gaines, Alabama. Much of the line from Baton Rouge, Louisiana, to the mouth of Red river, upon the west bank of the Mississippi, was washed away by extensive crevasses. Much of the wire was saved and coiled up for future use. During the month eleven cables were laid upon the line between Fort Pike and Mobile, upwards of thirteen miles in length, and most of the cable between Fort Macomb and Mobile bay was taken up and saved.

In June, 1865, seven hundred and twenty-five miles of line in Texas were repaired and put in operation, mostly by their former managers, under the direction of my agents sent to Galveston, Houston, and Shreveport. The necessary material was ordered, and the work commenced upon a line extending from Shreveport, Louisiana, to Vicksburg, Mississippi, and also upon a line extending from Houston, Texas, via Hempstead, Brenham, La Grange, Bastrop, Austin, San Marco, New Brunfels, to San Antonio. Upon the completion of these lines, which are being pushed forward rapidly, nearly all the important sections of Texas will be in direct communication with the other States of the Union. I give a general summary of the work performed during this fiscal year, as follows:

| give a general summary of the work performed during this usual year,                   | as tol                                | iows:             |

## No. 82.

## HEADQUARTERS U. S. MILITARY TELEGRAPH, Military Division of the Gulf, New Orleans, August 23, 1865.

GENERAL: In obedience to General Orders No. 39, dated at your office July 1, 1865, I have the honor to submit the following detailed report of my official action during the fiscal year ending June 30, 1865, and do enclose herewith a statement of public moneys, in the prescribed form, together with statements "A" and "B." which are all that are required by the operations of my office.

My annual report for the fiscal year ending June 30, 1864, was mailed from Danville, Kentucky, October 13, 1864, in which will be found a detailed account of my official action prior to July 1, 1864, from the time last above mentioned until June 22, 1865. I continued on duty as assistant superintendent United States military telegraph, headquarters at Danville, Kentucky, my jurisdiction embracing central and eastern Kentucky and East Tennessee. With the exception of a few insignificant guerrilla raids, the lines under my control have not been molested by the enemy during the year.

The following United States military telegraph lines were in operation, under my charge, July 1, 1864:

| From Mount Sterling, via Lexington and Danville, to Camp Burnside, Kentucky  | 127<br>216    | miles.      |
|--|---------------|-------------|
| Total in operation July 1, 1864  | 410           | miles.      |
| During the year the following lines have been constructed and r  | epaire        | ed:         |
| From Lexington, Kentucky, to Richmond, Kentucky  | 26<br>4<br>30 | miles.<br>" |
| Total constructed and repaired   | 60            | miles.      |
| During the year the following lines have been abandoned: From Camp Burnside, Kentucky, to Somerset, Kentucky From Burksville, Kentucky, to Columbia, Kentucky Connecting fortifications in and around Knoxville, Tennessee | 7<br>30<br>4  | miles.      |
| Total abandoned  | 41            | miles.      |
| The following United States military telegraph lines were in the close of the year, June 30, 1865:   | operat        | tion at     |
| From Mount Sterling, Kentucky, via Lexington and Danville, to Somerset, Kentucky   | 190           | miles.      |
| Knoxville, Tennessee   | 216           | 66          |
| From Lebanon, Kentucky, to Burksville, Kentucky  | 67            | "           |
| From Lexington, Kentucky, to Richmond, Kentucky  | 26            | 44          |
| Total in operation June 30, 1865   | 429           | miles.      |

#### RECAPITULATION.

| Lines in operation June 30, 1864              | 410<br>60 | miles. |
|---|-----------|--------|
| Total  Deduct lines abandoned during the year |           | miles. |
| Total in operation June 30, 1865              | 429       | miles. |

My headquarters have been, during the entire year, at Danville, Kentucky-Have engaged in no marches, battles, sieges or skirmishes. Beyond the steady, uniform assistance I was able to afford the military authorities by supplying them with a quick, reliable means of communication, but little has been required within my jurisdiction. My operation on the lines of the enemy in the months of December, 1864, and January, 1865, in southwestern Virginia, however, are deserving of mention.

Mr. E. T. Chapman, under my instructions, accompanied Major General Stoneman on his celebrated raid, in the capacity of cipher clerk and operator. The truly valuable assistance he rendered the expedition was duly acknowledged by the second officer in command, Major General S. G. Burbridge. Indeed there can be little doubt that the entire success of the expedition resulted from the invaluable information as to the position and numbers of the enemy which Mr. Chapman obtained while he held the telegraph office at Bristol. For several hours he held the office while despatches were passing to and from General Breckinridge and his subordinates, which he carefully copied and laid before General Stoneman. By causing the regular operator at that place, whom he captured in his office, to manipulate the instrument, and dictating to him what should be said, Mr. Chapman was enabled to deceive the operators at Lynchburg and Richmond, and received a long press report from Richmond, and gathered much valuable information.

The general condition of the lines under my control was much better at the close than at the commencement of the year. A great deal of pains has been taken in their repairs, and for steady, constant working, through all kinds of weather, I challenge comparison with any military telegraph lines. One thing in particular I desire to call the department's attention to, and that is the very small cost of maintaining so extended a district as that under my control. Not a man was employed that could be dispensed with, nor a dollar expended unnecessarily. When, therefore, the general orders for retrenchment were received, I was unable to operate the lines at a less cost than I had been doing.

On the 22d of June, 1865, I received an order from Colonel Anson Stager, chief of the United States military telegraph corps, directing me to turn over my public property and employés to Captain John C. Van Duser, assistant quartermaster and assistant superintendent United States military telegraph, Nashville, Tennesse, and to relieve Captain W. G. Fuller, assistant quartermaster and assistant superintendent United States military telegraph, New Orleans, Louisiana, and assume the control of the lines in charge of that officer. From the 22d of June to the 30th of June, 1865, I was engaged in making the transfer to Captain Van Duser. All of which is respectfully submitted.

Very respectfully, general, your obedient servant,

W. L. GROSS.

Capt. and A. Q. M., and Assist. Sup't U. S. Military Telegraph. Major General M. C. Meigs,

Quartermaster General U. S. Army, Washington, D. C.

### No. 83.

OFFICE A. Q. M., AND ASS'T SUPERINTENDENT
U. S. MILITARY TELEGRAPH, H. Q. DBP'T SOUTH CAROLINA,
Hilton Head, South Carolina, August 12, 1865.

COLONBL: In compliance with General Orders No. 39, Quartermaster General's office, Washington, D. C., July 1, 1865, I have the honor to report as follows:

On the 28th of July, 1862, I was mustered into the service of the United States as a private in company A, one hundred and twenty-sixth regiment Pennsylvania volunteers, first brigade, third dvision, fifth army corps.

December 23, 1862, reported to Major Thomas T. Eckert, assistant quarter-

master, and assistant superintendent United States military telegraph, in compliance with Special Orders No. 397, War Department, Adjutant General's office, series of 1862, was assigned to duty as operator at Hagerstown, Maryland. February 13, 1863, in compliance with orders from Major T. T. Eckert. reported for duty as operator at Fortress Mouroe, Virginia. May 14, 1863, in compliance with orders from Major T. T. Eckert, reported to L. F. Sheldon, assistant superintendent United States military telegraph, department of the south, and was assigned to duty as chief operator of the department. June 14, 1863, in compliance with orders from L. F. Sheldon, assistant superintendent, I proceeded to Newberne, North Carolina, and constructed a line from that city to the headquarters of the various sub-districts of the district of North Carolina, remaining in charge of said line until November 3, 1364, when I was appointed as assistant quartermaster of volunteers, with the rank of captain, and ordered to report to Major T. T. Eckert, assistant quartermaster, and assistant superintendent United States military telegraph. December 5, 1864, in compliance with orders from Major Eckert, I relieved Captain L. F. Sheldon, assistant quartermaster and assistant superintendent United States military telegraph, and took charge of the lines in this department. By order of Major General John G. Foster, commanding department of the south, I immediately proceeded to construct a line of telegraph from Deveaux Neck to the headquarters of Brigadier General Hatch, commanding provisional brigade, to facilitate operations against the enemy at Pocotaligo, South Carolina. December 18, 1864, by order of Major General Foster, I reported to Major General Sherman, at his headquarters near King's bridge, Georgia, to build such lines as he might require in his operations against Savannah, Georgia. By order of Major General Sherman I repaired, constructed, and operated lines from his headquarters in Savannah to the headquarters of General Hazen, near Fort McAllister, to the headquarters of General Kilpatrick, on the Ogeechee roads, and to Fort Pulaski, Georgia, and from Port Royal ferry to Pocotaligo, South Carolina. The building and operation of these and other lines in this department, extending, as they do, through forest, swamp, and river, was attended with almost insurmountable difficulties, and the work was greatly retarded by the troops, who frequently destroyed the lines for miles, using the poles for firewood.

In May last, in compliance with orders from Major Thomas T. Eckert, I assumed control of all telegraph lines in the States of South Carolina and Georgia, north to Charlotte, North Carolina, and west to Montgomery, Alabama. Most of these lines had been destroyed by General Sherman's army in its march through the country, and the railroads along which they were built having been destroyed at the same time, the repair and reconstruction of the lines has been a difficult and laborious work. It is progressing, however, as rapidly as cir-

cumstances will permit, and it is hoped that before the 1st of September next all the lines in these States will be in reliable, working order. Referring to the annexed statements as an exhibit of their extent, &c.,

I have the honor to be, colonel, very respectfully, your obedient servant, JAMES R. GILMORE.

Capt. and A. Q. M., and Ass't. Sup't U. S. Military Telegraph. Colonel Anson Stager.

A. Q. M., and Ass't Sup't U. S. Military Telegraph.

A true copy:

JOHN V. FUREY, Captain and Adjutant General.

JOHN V FUREY, Captain and Assistant Quartermaster.

### No. 84.

Annual report of Captain S. G. Lynch, assistant quartermaster and assistant superintendent of United States military telegraphs, department of West Virginia, for the fiscal year ending June 30, 1865.

CLEVELAND, OHIO, September 1, 1865.

GENERAL: I have the honor to submit to your department, through Colonel A Stager, chief, &c., (pursuant to General Orders No. 39, Quartermaster General's department,) my annual report for the fiscal year ending June 30, 1865. My annual report for 1864 was rendered to your department through Colonel A. Stager, chief of United States military telegraphs, in the latter part of October, 1864.

It has been my duty during the past year to act as assistant superintendent of United States military telegraphs within the department of West Virginia and the State of Ohio, and to be chief purchasing officer for the supplies required by the different officers connected with this branch of the public service for the operation and construction of United States military telegraphs within the several departments. My headquarters have been at Cleveland. Ohio.

Military operations have not been extensively active within the department of West Virginia during the last year, and, with the exception of two or three important movements, the operations have been confined to maintaining a line of military posts adjacent to the Baltimore and Ohio railroad and along the Kanawha river.

Whenever our troops have been despatched upon expeditions or raids within the enemy's lines cipher operators have generally been furnished to accompany such movements. The expedition of Major General Crooks in May, 1864, was not referred to in my report for that year, and allusion to the same is therefore made herein. A portion of General Crooks's command, comprising three brigades of infantry and about three hundred cavalry, left Fayetteville, West Virginia, during the first week of May and proceeded to Lexington, where they destroyed the camp and garrison equipage of two rebel regiments which had been left in charge of rebel guards. On the evening of the 8th the expedition arrived at Shannon's cross-roads, ten miles from Dublin depot. At Shannon's cross-roads a rebel telegraph line was intercepted by the cipher operator accompanying the expedition, but owing to the precaution of the rebel operators but little information of interest to our forces was obtained beyond the fact that a considerable rebel force was posted at Cloyd's mountain, on our line of march. On the morning of the 9th our forces reached Cloyd's mountain, five miles from Dublin depot, and General Crooks at once made an attack upon the rebels, who were protected by earth-works; but after two hours' determined resistance the enemy fled in utter confusion, leaving their dead and wounded. During this engagement the telegraph operator acted as aide-de-camp to the general, and received a complimentary notice from that officer in his official report of the affair. eral Crooks pushed on for Dublin depot, and when within three miles of the town met a force of Morgan's men, numbering about one thousand, who had come from Saltville to re-enforce the rebels at Cloyd's mountain, but were not in time to effect a junction. After a skirmish the rebels retreated, and our forces entered Dublin depot, on the Virginia and Tennessee railroad, about three p. m. The depot buildings, rebel government property, and telegraph office here were destroyed, and General Crooks pushed on to destroy the long railroad ten miles from Dublin depot, which, after an engagement of two hours, was accomplished. The object of the expedition having been attained, the command started upon its return, via Salt Pound and Peters's mountain, through Union, across Green Brier river to Meadow bluffs, reaching there May 23d, having marched about three hundred miles. At Meadow bluffs we were in telegraphic communication, and cipher messages, detailing operations, &c., were forwarded to headquarters, Washington, D. C.

On the first of June following, General Crooks started with his command for Staunton, Virginia, via Lewisburg, Hot and Warm Springs, through Panther Gap, into Augusta valley. At Panther Gap a soldier in rebel uniform was captured, claiming to belong to Imboden's command, but upon being brought to headquarters was found to be the bearer of cipher messsages from General Hunter, ordering General Crooks to join him at Charlottesville. The order, however, was afterwards countermanded, and our forces joined the other command at Staunton. From Staunton the expedition moved, via Lexington and Buckhannon, crossing the Blue Ridge at the foot of Peaks, of Otter, via Liberty, for Lynchburg. On arriving in the vicinity of Lynchburg we encountered the rebel force and whipped it during the first day's engagement. At night the rebels were re-enforced by troops under General Early. After successfully resisting the rebel attack on the second day, our forces fell back, under cover of the night, and started for the Shenandoah valley, but finding that the rebels were pursuing actively, and that probably we could not get out in the direction taken, our column turned towards the Kanawha valley, and marched out, via Salem, Saints' Springs, and Lewisburg, to Gauley Bridge. At the latter place orders were received to move the troops on to Charleston, where they took transports for Parkersburg, and from thence by railroad to Martinsburg, Virginia. From Martinsburg the troops were ordered to Harper's Ferry and into Maryland after General Early, who had come down the Shenandoah valley and crossed the Potomac into Maryland. At Hillsborough it was ascertained that Early had fallen back, going towards Snickers's Gap and Winchester, Virginia. Near Hillsborough the 6th corps joined us, and the command moved to Snick-The 6th corps moved from here to Washington and General er's Gap. Crooks's for Winchester. At Kearnestown, three miles from Winchester, General Crooks fought General Early on the 24th of July; Crooks was defeated and at night retreated to Bunker Hill. The cipher operator was employed all night in putting the general's official despatches into cipher for transmission from the nearest telegraph station to Washington and other points. Next morning we marched from Bunker Hill to Williamsport, through Shepherdstown to Pleasant valley, and from there to Frederick, and thence to Harper's Ferry and up the Shenandoah valley to Strasburg, but again fell back to Halltown. After remaining at Halltown five days, the command again moved up the valley to Berryville, at which place the cipher operator received orders to return to the department of West Virginia.

On the 26th September, 1864, the military telegraph line from Clarksburg, Virginia, to Weston, was intercepted at Weston by a rebel operator, who, under the pretence of being the regular United States military telegraph operator stationed at that post, transmitted a telegram in the name of the commandant of that post, addressed to the commandant of the post at Clarksburg, stating that three thousand rebels under General Basil Duke were advancing on Weston, and asking how many troops were at Clarksburg, and how many could be sent to Weston. The military operator at Clarksburg felt satisfied from the peculiarity of the manipulation of the telegraph key at Weston, that the telegram was a fraud, and that it had been transmitted by a rebel operator, and so informed Colonel Wilkinson, then in command at Clarksburg. This suspicion, however, was kept from the rebel operator, and an answer regularly transmitted to Weston stating that two thousand troops had just arrived by railroad, and that more were expected during the night. Subsequent facts proved that the rebels were under command of Colonel Wilcher, nine hundred strong, who retreated after plundering Weston and its inhabitants, although the original intention of the rebels had been to capture Clarksburg, and destroy the large amount of government property at that depot, which they could very easily have accomplished, only two companies of troops being stationed at Clarksburg at that time. Whether the subterfuge resorted to on our part was the means of saving Clarks-

burg and its supplies or not, is unknown.

On the morning of September 27, 1864, the rebels under Colonel Wilcher, about nine hundred strong, captured the town of Buckhannon, burned bridges, and several dwellings, and plundered the inhabitants. Most of the small garri-

son stationed at this place cluded capture.

On the morning of October 29, 1864, a force of rebel infantry, three hundred strong, under Captain Hill, attacked the federal forces at Beverly, Virginia; but after a sharp contest were repulsed. After the rebels had retreated, the military telegraph repairer stationed at Beverly, having a thorough knowledge of the country, took the lead of our pursuing force, and by taking a short by-road, got to the front of the rebels, when a charge was made, driving the rebels across a creek, taking ninety-three prisoners, and recapturing about forty of our own men, taken in the attack on Beverly. The telegraph employed was complimented in the official report of the affair.

At about eleven a. m., November 28, the rebels in United States uniform. under General Rosser, surprised the federal force at New Creek, Virginia, and took possession of the place. The rebel force consisted of a division of cavalry. Much government property was destroyed. The military telegraph office was seized so quickly that the operator had not time to escape, and was carried off by the retreating rebels. He was robbed of his valuables and clothing, compelled to march barefoot to Harrisonburg, given nothing to eat until the third day of his captivity, and then merely three-quarters of a pound of fresh beef, which had to suffice until the evening of the 5th day, was confined in Castle Thunder, Richmond, and by sharing the blanket of a prison companion was kept from freezing.

On the 11th of January, 1865, at about five o'clock in the morning, a rebel force of about six hundred, under command of General Rosser, surprised and captured the picket post at Beverly, Virginia, passed quietly towards the federal camp, surprised it and captured the whole force, numbering some eight hundred men, under command of Colonel Youart, 8th Ohio volunteer corps. A

very humiliating affair.

Herewith will be found my property statement, "A," embracing all the property which has come into my possession during the year.

I have nothing to report on form "B."

Herewith will also be found my statement of public moneys received, &c., during the year. Out of the total amount expended, \$149,799 76 was applied to purchases, and \$124,564 76 to service account.

Have nothing to report on forms "C," "CC," nor "D."

Herewith will be found form "E," showing the articles of property which the enemy has captured during the year while in my possession, and the estimated value thereof.

Have no use for form "F," nothing having been captured from the enemy,

and come into my possession.

The following United States military telegraph land and submarine lines were in operation July 1, 1864, under my supervision in the department of West Virginia and the State of Ohio.

JOHN V. FUREY, Captain and A. Q. M.

A true copy;

### No. 85.

OFFICE OF THE CHIEF QUARTERMASTER, Louisville, Ky., October 19, 1865.

GENERAL: I have the honor to transmit herewith a retrospective report of the transactions of the department under my direction for the period commencing October 1, 1861, and ending June 30, 1865. I regret that I have been unable to make it more complete. I am sensible that it is only an outline, and conveys a very inadequate idea of the actual amount of labor performed.

I enclose, also, a statement of receipts and disbursements of public moneys

for the fiscal year ending on the 30th of June, 1865.

Please acknowledge the receipt.

Very respectfully, your obedient servant,

ROBT. ALLEN,

Brevet Major General and Chief Quartermaster.

Major General M. C. MEIGS,

Quartermaster General U. S. A., Washington, D. C.

Official copy:

H. A. ROYCE, Captain and A. Q. M.

| Total  | 4, 951, 906                | 65       |

I certify that the above statement is correct.

ROBT. ALLEN, Brevet Major General and Chief Quartermaster, Valley of Mississippi.

OFFICE OF THE CHIEF QUARTERMASTER, Louisville, Ky., July 1, 1865.

GENERAL: The close of the last fiscal year being virtually a termination of the rebellion, I deem it proper to take a general but very brief retrospect of the transactions of the department over which I have had control since I entered upon duty at St. Louis in October, 1861. To write a full history of these transactions would be, in effect, to write a history of the war in the west and southwest during this period. The scope of an official report would be insufficient to give even an index to a full record of the labor accomplished and the duties performed.

Commencing my labors with supplying the scattered and destitute forces under the command of Major General Frémont, I afterwards transported them

to points designated for concentration and organization, when the command of the west devolved upon Major General Halleck. Under the active and energetic administration of this officer, the fragments of armies rapidly assumed shape, no time being lost in preparing them for the field, and transporting them to the theatre of action; and now commenced the movements along the Tennessee and Cumberland rivers which resulted in the capture of Forts Henry and Donaldson, the battle of Shiloh, the driving of the enemy from Corinth, and the

taking of Columbus, New Madrid, and Island No. 10.

Simultaneously I supplied the army under Major General Curtis, moving against the rebels led by Price in Missouri, terminating in the battle of Pea Ridge, and the utter discomfiture of the enemy in that region. Following the order of events in this meagre outline, I furnished supplies to the armies of Major Generals Grant and Sherman in the interior of Kentucky, Tennessee and Mississippi, and to forces operating along the Mississippi river under their command, leading to the battles of Chickasaw bluff, Grand Gulf, Raymond, Jackson, Champion Hills, the investment and fall of Vicksburg and capture of Pemberton's army.

Next I supplied and transported the command which moved up the Arkansas river and captured Arkansas Post, outfitting the expedition under the command of Major General Steele which operated in Arkansas, kept it constantly supplied, as also the remote and almost inaccessible depots at Forts Smith and Gibson.

I transported the command of Major General Sherman (on his return from Meridian) to Memphis; and on his march across the country to join Major General Grant at Chattanooga, I had steamers in readiness at Eastport to cross the command over the Tennessee river without an hour's delay—a foresight which facilitated the march, and enabled the command to reach Chattanooga just in season to participate in the battle and victory of Mission Ridge.

I fitted out the several cavalry expeditions which operated in eastern Tennessee, Kentucky, southwestern Virginia and North Carolina, under the com-

mand of Major Generals Stoneman, Burbridge, and others.

I furnished the supplies for the troops in New Mexico, and on the plains, and fitted out the several Indian expeditions under the command of Major General

Sully.

The depot at Nashville derives its principal stores from purchases made by myself and officers serving under my orders. It drew heavily upon the resources of the country, already partially exhausted by the requisitions from other quarters. The heaviest items were purchased at remote points—remote, I mean, from the base of operations—and the transportation monopolized and taxed to their utmost capacity all the steamboats on the western waters, and all the rolling stock on the western and southwestern railroads. It was a herculean task to collect, transfer and concentrate at one point horses and mules by the hundreds of thousands, corn and oats by the millions of bushels, hay by the tens of thousands of tons, wagons and ambulances by the tens of thousands, fitted out with harness, subsistence stores by the hundreds of thousands of tons, and miscellaneous articles, in the aggregate, proportionably large. At the same time immense trains of railroad stock, engines and cars, were brought from the east, crossed over the Ohio river at Louisville, and sent forward to transfer the stores from Nashville to the front.

It was from the depot at Nashville, thus stocked, that Major General Sherman drew the supplies for his grand army, from the beginning of its march to the end, save the requisitions he made upon the enemy. The arduous task of transferring these immense supplies to the ever-changing front devolved upon the present Brevet Major General Donaldson, then chief quartermaster of the department of the Cumberland, and how well that task was performed is known to you and the army.

I have now given a skeleton outline of the operations of the department

directed by myself, but a more distinct conception of the magnitude of the business may be derived from an exhibit of the cash expenditure.

From the 1st of October, 1861, to the 30th of June, 1865, I have received and expended \$106,694,657 24, while there were expended during the same time at St. Louis, under my direction, \$90,799,435 88, making an aggregate expenditure of one hundred and ninety-seven million four hundred and ninety-four thousand and ninety-three and twelve one-hundredths dollars. (\$197,494.093 12.)

As I have before stated, to enumerate the supplies purchased by this vast sum of money is impracticable, but some of the prominent items may be men-

tioned.

At the two points of St. Louis and Louisville, alone, within the dates given, were purchased 8,864,173 bushels of corn, 26,234,423 bushels of oats, 377,518 tons of hay, 6,638 wagous, 1,269 ambulances, 60,854 sets of harness, 100,364 horses, and 75,329 mules.

But the purchases made by myself or under my immediate supervision, vast as they are, were accomplished with less labor to myself than the task, self-imposed, of revising the vouchers of the inexperienced quartermasters stationed at remote points, or attached to troops in the field. I have not only revised my own accounts, but I have performed the part of auditor in the examination of the accounts of others. Not less than 250,000 vouchers have passed through my hands, and by this system of surveillance millions have been saved to the treasury.

It is no fault of mine that I have not served with marching columns. Major General Sherman did me the honor to apply for my assignment to his command, proposing to confide to me a wide discretion at the commencement of his last memorable march, and it was a service which I sought; but the application was denied, for reasons complimentary to myself—that my services were of more value to the government in the position I occupied as the chief quartermaster of the valley of the Mississippi, in which several armies were operating, than directing

the transportation of a single army, already equipped and provided.

In the general direction of my whole business I have received most efficient and able aid from the chief quartermaster of the department of the Missouri, Brevet Brigadier General William Myers. The depot at St. Louis, the largest in the west, has been in his immediate charge. His own reports will show the enormous amount of stores of all kinds which have passed through his hands. His disbursements, second only to my own, amount to \$90,799,435 88, running through 122,088 vouchers. At the depot a very large amount of clothing has been manufactured, and extensive repair shops have been kept in constant operation. More work, with less pretension, has been accomplished at this point than at any other under my control, and I accord to General Myers the chief merit of its performance. He has never been appalled by the magnitude or complication of his duties, but has done his work with cheerfulness and alacrity, every requisition upon him being promptly and successfully met.

At the head of the transportation division was General Lewis B. Parsons, of whose capacity and extent of service I have had occasions before to speak. This meritorious officer being transferred to Washington, and reporting directly to you, will render his own account of his transactions. His zeal, devotion to duty, intelligence, and activity in its performance have been recognized by the

government in his promotion.

As individual reports are made to you by each officer, whether serving at depots or not, I need not recount their services. I may mention, however, that from the second of September, 1862, until the thirteenth of July, 1864, the transportation office at St. Louis was in the immediate charge of Captain Charles Parsons, who went out of service by resignation at this latter date. This officer deserves special commendation. He bore the brunt of the labor in this

branch when it was arduous in the extreme; was never found wanting; always ready for duty, day and night, and always prompt in its performance.

At the depot in this city the duties were divided as follows:

Chief of depot for the last nine months-Colonel George F. Clark.

In charge of railroad transportation—Captain John H. Ferry, until October, 1864, since which time. Captain J. R. Del Vecchio.

In charge of river transportation—Captain Franklin Ernst.

In charge of forage and miscellaneous supplies—Captain D. O. De Wolf.

In charge of quarters and fuel and miscellaneous disbursements—Captain A.

M. Tucker.

In charge of clothing, camp and garrison equipage—Captain G. A. Hull, military storekeeper.

In charge of animals, corrals, and city transportation—Captain J. T. Allen

for the principal period; subsequently, Captain J. H. Belcher.

All these officers have been faithful public servants, and it affords me pleasure to bear testimony to their merits.

At St. Louis there were like divisions:

In charge of river and railroad transportation—Captains Charles Parsons and L. S. Metcalf.

In charge of forage—Captains E. D. Chapman and William Currie.

In charge of animals, corrals, city transportation, miscellaneous supplies, quarters and fuel, &c.—Captains G. W. Ford, Edmund Wuerpel, F. A. Seely, John L. Woods, and D. N. Welch—the latter in charge of miscellaneous disbursements.

In charge of clothing, camp and garrison equipage—Captains S. E. Meigs

and R. S. Hart.

The vast business transacted at this depot is a warrant of the efficiency of these officers, whose immediate chief has, I presume, set forth their several merits.

The depot at Memphis was ably conducted by Captain A. R. Eddy, and subsequently by Colonel R. E. Clary; at Cairo by Captain A. C. Woolfolk; at Bowling Green by Captain D. Heaney—officers who deserve well of their country.

The clothing branch at St. Louis, first under Captain S. C. Meigs and subsequently under Captain R. S. Hart, you will find, makes a highly satisfactory exhibit in the quantity of the clothing, as well as in the quality of the work. The clothing branch at this depot, under Captain G. A. Hull, military store-

keeper, has likewise a praiseworthy record.

In conclusion, I must be permitted to remark that history furnishes few, if any, examples of armies so great, traversing territories so wide, and having their every want, at every step, supplied. It demonstrates how vital to the success of military operations is an efficient Quartermasters' department, a department that it has long since become a habit to abuse. Every officer and every private constitutes himself its accuser and judge. No failure in this department escapes the Argus eyes of censure or the prolific tongues of reproof. It is not only accountable for its own sins, but it is the great scape-goat upon which blundering generals pack their own errors. In view of these facts, I say, it is a proud reflection for the department in the west that its faults, subject to this ordeal, were "past finding out."

Respectfully submitted:

ROBERT ALLEN,

Brevet Major General and Chief Quartermaster, Valley of the Mississippi

Major General M. C. MEIGS,

Quartermaster General U.S. A., Washington, D. C.

Official copy: H. A. ROYCE, Captain and A. Q. M.

No. 86.

HEADQUARTERS ARMIES OF THE UNITED STATES, Washington, D. C., September 28, 1865.

GENERAL: I have the honor to submit my annual report for the fiscal year ending June 30, 1865, called for in you General Orders No. 39, of July 1, of

the present year.

By reference to my report of last year, rendered on the 28th August, 1864. and which you did me the honor to publish with your own, together with my report for the previous fiscal year, and the Chancellorsville campaign, it will be observed that on the 1st of July, 1864, I was on duty at City Point, Virginia, at the headquarters of the Lieutenant General commanding the armies of the United States, as chief quartermaster armies operating against Richmond. These armies were composed of the Army of the Potomac and Army of the James, and our lines extended from the north side of the James river, near Richmond, to the southeast of Petersburg, a distance of over twenty-five miles, along the whole length of which was almost constant skirmishing night and Several attempts had been made before the 1st of July to carry the enemy's works, and to find and turn his flanks, sometimes bringing on severe conflicts, but without material success on our side. I refer to the attacks of the 16th, 17th and 18th of June, and to Generals Wilson and Kautz's expedition to Ream's Station, June 22 to 28, more particularly. It became manifest that the defence of Richmond and Petersburg would be as protracted and stubborn as the resources and ability of the rebel commander could render it.

I proceeded, therefore, under the written orders of the Lieutenant General, to create suitable depots for receiving, storing and issuing necessary supplies for The principal depot was established at City Point, on the James, at the mouth of the Appomattox, and was made one of the most convenient. commodious, economical and perfect ever provided for the supply of armies. I have already rendered you a special report, on the 24th June last, of this depot, showing amount of wharfage, storehouses, railroad shops, tracks, &c.. with a recommendation how to dispose of the same. A secondary depot was kept up at Bermuda Hundred, and a still lesser one at Deep Bottom, more especially for the army of the James. There was an average of some 40 steamboats of all sorts, including tugs, 75 sail vessels, and 100 barges, daily in the James river, engaged in the transportation of supplies, and plying between that river and the northern ports. With such facilities an army of 500,000 men could have been fully supplied within any reasonable distance of our base. do not know the whole number of vessels employed in our supply. A daily line of boats was established between City Point and Washington for mail and passenger service. Besides this, our transport fleet was constantly engaged in bringing cavalry and artillery horses, mules, clothing, ammunition, subsistence, &c., and in carrying back to Washington broken-down animals and other unserviceable property. The depot was placed under the charge of Colonel P. P. Pitkin, who held the position of chief quartermaster of the depot until November 7, 1864, when he resigned to accept the position of quartermaster general of the State of Vermont, and was succeeded by Colonel George W. Bradley. Both of these gentlemen were highly experienced, vigorous and accomplished officers, and performed their very arduous and responsible duties with great credit to themselves and advantage to the service.

The chief quartermaster at the principal depot always kept direct charge of the water transportation in James river. The other branches of the department, however, such as employés, forage, clothing and railroad transportation, were in charge of subordinate quartermasters, selected for peculiar fitness, subject to the supervision of the chief depot quartermaster, who was required to report to me

in writing, every day, such as arrivals and clearances of shipping, receipts and issues of clothing, forage, &c. The chief quartermaster of each army was required to render, on or before the 25th of every month, a detailed consolidated estimate, revised and approved by the army commander, of the supplies required for issue to the army the month following. Upon this data I prepared and submitted my estimate for the combined forces on or before the first of each month. This method had very many good results. It compelled all interested to ascertain the real wants of the troops, and to secure their regular and prompt supply. No quartermasters' stores were permitted to be sent to the armies except over my signature. The funds were generally deposited to the credit of Brevet Lieutenant Colonel William T. Howell, on duty in my office as disbursing officer, on my requisition, and distributed by him to division and brigade quartermasters, on their estimates duly approved by the various commanders and countersigned by me. My printed orders and circulars in the hands of my subordinates prescribed the manner in which they should perform their duties on

all points where the regulations and general orders were silent.

An extensive repair depot was established near City Point, and placed in charge of Brevet Lieutenant Colonel E. J. Strang, who received all serviceable animals and means of transportation from the Washington depot, and made the issues to the armies, and who received from the armies unserviceable stock, wagons, ambulances, &c., and shipped back all that could not be repaired in his shops. He employed a force of about 1,800 carpenters, wheelwrights, blacksmiths, saddlers, corral hands, teamsters, laborers and guards. During the year ending June 30, 1865, he had repaired 3,653 army wagons, and 2,414 ambulances. He had shod 19.618 horses, and 31.628 mules. He received 27.116 serviceable horses, and 10,893 mules, 436 wagons, and 36 ambulances. He received from the troops 16,344 unserviceable horses, 9,684 mules, 1,392 wagons, and 400 ambulances. He received also by the surrender of Lee's army, 400 horses, 1,300 mules, 101 wagons, and 90 ambulances. He issued to the troops 31,386 horses, 18,891 mules, 1,536 wagons, and 370 ambulances. He sent back for recuperation and repair 13,575 horses, 4,313 mules, 743 wagons, and 36 ambulances, besides a great amount of harness and other property. I mention these items simply to convey an idea of the duties to be performed at depots; this was only one branch.

As soon as we occupied City Point General McCallum, the able officer in charge of United States military railroads, had a strong construction corps on the spot prepared to rebuild the railroad up to our lines near Petersburg; and afterwards, as fast as the army gained ground to the southeast, a temporary extension was laid close to our forces, until finally it extended to Hatcher's run, a distance of about nineteen miles. Along this road were stations, as described in my last report on the Orange and Alexandria railroad, where sidings and platforms were made for the prompt distribution of supplies to the different com-This road saved much wear and tear of the wagon trains, and enabled the Lieutenant General to concentrate troops rapidly at any desirable point After the surrender of Lee, this road—the new portion—was dismantled and

the material placed in depot, to be disposed of in proper time.

The great field hospital at City Point has been described in other reports. It was a very perfect one for the purpose. The medical officers in charge exercised great taste and judgment in its management. There was a somewhat similar field hospital for the army of the James, at Point of Rocks, on the Appomattox. The medical department of each army had its own wharves, storehouses, transports, and hospitals, under the control of its medical officers. The ordnance and subsistence departments had special wharves and storehouses; so also had General Abbott, who had charge of siege guns and material for the entire line—all constructed by the Quartermasters' department.

Colonel Strang and the other depot officers showed great energy, assiduity,

and good judgment in the management of these heavy duties.

On the 1st of the fiscal year the organization of the Quartermasters' department in the "armies operating against Richmond" was complete, and never for a moment has it failed during the year to meet the orders and expectations of the Lieutenant General and the principal commanders in the field, so far as I have

had opportunity of being informed.

It is undeniable that the officers of the Quartermasters' department, both in the field and at our depots, have been charged with most important and responsible duties during the rebellion. Had they failed at any time we had no general who could have moved an army. I submit that more consideration is due to a department upon which so much is devolved, and higher grades should be created in order that the chief officers may have a rank that corresponds more nearly with that held by those who fight the troops. It is a noticeable fact that no quartermaster who has served as such during the war has risen by substantial promotion above the old grade. And still there are quartermasters who have done the army and republic as great service as any brigadier general, and, with very few exceptions, any major general. Officers of the department who are old, too infirm, inert, or otherwise disqualified to take their tours of hard work in the field and on frontier stations, should at least be retired, in order that the active and business quartermasters who have borne the brunt of the service during the war may have the rank due the positions they have occupied.

I beg to suggest you will deem it expedient to recommend an increase of the Quartermasters' department in your annual report to the honorable Secretary of War—such an increase as will meet the wants of a peace establishment. There have been 400 or 500 volunteer quartermasters appointed during the war. According to the statutes the last of these will go out of service in one year after the termination of the war, which is not yet, however, proclaimed at an end. The increase which I would suggest, and which would be satisfactory, in my opinion, to the principal officers of the department, and would be sufficiently large for the army as it will probably stand in a year's time, is as follows:

1 Quartermaster General United States army, rank of major general.

3 division quartermaster generals, rank of brigadier general.

3 assistant quartermaster generals, rank of colonel.

4 deputy quartermaster generals, rank of lieutenant colonel.

12 quartermasters, rank of major.

48 assistant quartermasters, rank of captain.

This would only add one major general, two brigadier generals, and one major to the present establishment. I suggest three brigadier generals as "division quartermaster generals" for the three grand divisions, to wit: the Atlantic division, Mississippi division, and Pacific division. The list of majors will be an increasing one under the law that promotes assistant quartermasters for fourteen consecutive years' service. Such promotions will, of course, create vacancies in the list of captains.

On the 1st of July, 1864, there were on hand in the armies operating against Richmond means of land transportation as follows: 41,329 horses, 23,961 mules, 4,440 army wagons, 57 2-horse light wagons, and 915 ambulances.

At the beginning of the last campaign my returns show on hand as follows: 24,192 horses, 23,356 mules, 4,071 army wagons, 144 2-horse light wagons, and 907 ambulances.

After the close of the final campaign—say on May 1, 1865—the means of transportation was as follows: 33,948 horses, 25,093 mules, 4,007 army wagons, 140 2-horse light wagons, and 820 ambulances.

This property was used as prescribed in the orders of the Lieutenant General, a copy of which accompanied my last report, and most of it came to Washington with the troops last May and June, and was turned into the depot, as the

troops were discharged, for final disposition under your orders. This transportation was in most excellent condition, and rendered services of vital importance on the last grand campaign from Petersburg and Richmond to Appomattox Court House.

There were many partial movements of the armies from July 1, 1864, to the opening of the last campaign, but they did not render many new dispositions

necessary in our department as to the trains.

On the 30th of July the "battle of the mine" was fought. On the 9th of August, near noon, there occurred a fearful explosion in the midst of the City Point depot, killing and wounding some 250 employés and soldiers; throwing down over 600 feet in length of warehouses, and tearing up some 180 lineal feet of the wharf. It was found that a barge laden with ordnance stores had been blown up. Immense quantities of shot and shell were thrown into the air, and much of it fell in the encampment of the Lieutenant General, wounding, however, only one—Colonel Babcock, of his staff. The Lieutenant General himself seems proof against the accidents of flood and field. It was assumed at the time that the explosion was the result of carelessness on the part of some one in or near the barge, but the developments made in the trial of the assassins of the late President would show that it was the dastardly work of that infernal rebel "torpedo bureau" in Richmond. The damages of the depot were soon repaired.

August 18 to 20 the Weldon road was seized and thereafter held. An attempt was also made on our right at Deep Bottom. September 30 the 5th and 9th corps of the army of the Potomac were engaged at Poplar Grove church, and the army of the James captured Fort Harrison and one line of works. October 24 and 25 the army of the Potomac was engaged at Hatcher's run. December 5 the 5th corps, supported by the 9th, made a march towards Weldon. On such occasions the moving columns were generally directed, in orders, to be provided with a small stated allowance of subsistence, forage and ammunition, wagons and ambulances. The main trains remained parked in safe and convenient positions near the outer defences of the City Point depot, but always loaded and fully prepared to move forward whenever and wherever needed. It was the rule, after having passed the James in June, 1864, that each corps

should generally be followed by its own trains.

On the evening of the 23d of January, 1865, it was known that the rebels were apparently preparing to make a raid down the James, with their fleet of iron-clads and wooden boats, for the purpose of destroying our depots on the river, particularly that great one at City Point, where supplies had been accumulated and stored to meet the wants of the armies in case the James river and northern ports should be closed by ice. The weather was already very inclement, and the Potomac and Delaware were then, or shortly afterwards, rendered entirely unnavigable by ice. Early on the 24th the rebel fleet approached our obstructions, and one of the iron-clads passed them, but the one following got foul upon them. Our batteries made obstinate resistance and blew up one of the smaller gunboats. Our men even were led with great effect to the bank of the river, and poured volleys of musketry into the ram that had passed the The navy at that point was not prepared at the moment for any effective resistance. Had the rebels persisted at that time, they could, had they succeeded, have inflicted upon us incalculable losses, the result of which no one can pretend now to estimate; but most fortunately for us they abandoned the raid and retired to their former position. Two or three days later it was impossible for these boats to make a descent. The navy was thoroughly prepared, and I had sent, by order of the Lieutenant General, my aide-de-camp, Brevet Captain J. W. French, 8th infantry, up the river with vessels laden with coal, who sunk two on the night of the 25th to fill up the gap made in the obstructions. He performed the service under the enemy's guns with great

gallantry.

Our lines were extended to Hatcher's run on the 7th of February. The enemy attacked and carried Fort Steedman, within the lines of the 9th corps, on the morning of the 25th of March, but were shortly driven out with a loss of some 4,500 killed, wounded, and prisoners. Meantime, the Lieutenant General was preparing to strike the decisive blow of the whole war. The sick were sent to the rear; the different staff departments were ordered to be in readiness with all necessary supplies for the expected march. The arrangements made by me were similar to those described in my reports of other great battles. The trains were laden with ten days' subsistence and forage, and sixty rounds per man of ammunition. The troops were fully supplied with clothing and were required to carry five days' subsistence and forty rounds of ammunition on their persons. The trains were to remain in park, as usual, until the result of the attack should be known.

The movement commenced by the left on the 29th of March. On the evening of April 1, Sheridan overthrew the enemy at Five Forks, and gave us possession of the Southside road. On the next night and morning the 6th corps, under General Wright, carried the enemy's works in its front. The enemy was driven from his works around Petersburg and Richmond, and fled towards the Danville road. He was pursued with such vigor that our forces reached Burk's Junction in advance of him, and obliged him to attempt some other road. At Amelia Court House he lost many of his wagons and troops. Our cavalry hung on his rear and destroyed a great amount of his transportation. The rebel army became utterly demoralized, beaten, dispirited, and was surrendered entire to the Lieutenant General at Appomattox Court House on the memorable 9th of April.

Immediately after the surrender I inspected the rebel trains and saw they were in a horrible condition. I gave orders for the supply of forage to the animals, and that the transportation should be sent in to the City Point depot. Permission had been given that all private horses and mules might be taken away by their owners. I was not greatly surprised to learn afterwards that the greater portion of all the animals, particularly all the good ones, were taken away on this pretext; it was very natural to expect it, and I am told the same

was observed after the surrender of other rebel armies.

There finally reached the City Point depot from General Lee's army only 400 horses, 1,300 mules, 101 wagons, and 90 ambulances.

Doubtless many animals, wagons, and ambulances were loaned to confederate officers to enable them to reach certain points, where they probably turned

them over.

Having made all the necessary dispositions, the Lieutenant General left on the 10th, to return to City Point. On the 3d, I had directed the superintendent of the railroad to repair it at once as far as Burksville Junction, a distance of 54 miles. The gauge had to be reduced to four feet eight and a half inches from Petersburg. When the Lieutenant General and staff reached Burksville, at noon on the 11th, a special train was in waiting for us, and we arrived at City Point that same night. Supplies were forwarded and the sick and wounded were taken in at once over this road. Subsequently, the road was worked by the government to Danville and Lynchburg.

It is proper to record that I personally accompanied the Lieutenant General and staff on all the campaigns of the year past, and was present in all the prin-

cipal engagements and battles.

I remained on duty at City Point, directing the reduction of employés, the discharge of transports, and the diminution of expenses generally in the Quartermaster's department, until the 8th of May, when I received a telegraphic order from the Lieutenant General, to report in person to him in Washington. I reported accordingly on the 10th, and since that date have held myself directly

subject to his orders from day to day. I established an office for the settlement of outstanding accounts of the armies lately operating against Richmond, and continued it until yesterday, when Colonel Howell, who was my disbursing officer, was ordered to report to you. The office is no longer necessary for that

purpose

The Treasury Department is now engaged in the settlement of my accounts, which have not been entirely settled since 1856. I request the privilege of attending to this duty before I am again assigned to any permanent station outside of this city. It is important to me and to the government that my accounts shall be closed. I am not responsible now, according to my returns, for any public funds or property, so a better opportunity can never be presented for the settlement. I have stated to you that, in addition, I will cheerfully attend to any duty in this city, such as service on boards, to which you may wish to have me assigned.

My money accounts for the fiscal year are correctly stated below as follows:

Expended during the year:

Transferred to other officers during the year.....\$312,000 00

The officers who have served under me will furnish you the information called for by paragraphs 2d, 3d, 5th, 6th, 7th, 8th, 9th, and 11th of your order. My duties have been chiefly administrative.

As all the data for a "statistical report" should be in your office, and as such a report of the operations of the Quartermaster's department during the war would be of great interest and value, I would respectfully suggest that two or more competent officers be charged with the duty of compiling it. My observations during the past year have only confirmed me in the opinions expressed in previous reports relative to the outfit of our troops and our means of land transportation.

Brevet Brigadier General R. N. Batchelder succeeded me as chief quartermaster of the army of the Potomac, and continued on that duty until the disbandment of that army. He merited the very high commendations awarded him by all bis superiors. He, like myself, has served continuously in the field during the

War

Colonel Charles E. Fuller was acting chief quartermaster of the "army of the James" on our arrival at James river. Subsequently, and at different dates, Colonel J. B. Howard and Brevet Brigadier General George S. Dodge were chief quartermasters of that army, and gave me cordial support. I am very thankful to all the quartermasters who served under me for the uniformly cheerful co-operation extended to me. I have mentioned them more particularly in a special letter asking for brevets, &c.

I beg to repeat my obligations to you and General Rucker and the officers of the Quartermaster's department in Washington for the support and attention given me in the transaction of my official business during the fiscal year.

With high respect, I am your most obedient servant,

RUFUS INGALLS,

But. Maj. Gen. Vols., Chief Q. M. Armies before Richmond.

Brevet Major General M. C. MRIGS,

Quartermaster U. S. A., Washington, D. C.

# No. 87.

HEADQUARTERS DEPARTMENT OF THE CUMBERLAND, Chief Quartermaster's Office, Nashville, Tenn., June 30, 1865.

GENERAL: In compliance with General Orders No. 39, Quartermaster General's office, current series, I have the honor to submit my report of the operations of the Quartermaster's department for the fiscal year ending June 30, 1865.

My report for the year ending June 30, 1864, was mailed to you April 28, 1865. The 1st of July, 1864, found me on duty as chief quartermaster, department of

the Cumberland, and of the depot in Nashville.

The department of the Cumberland comprised the State of Tennessee east of the Tennessee river, and west of the Hiawassee river, and such parts of northern Alabama and Georgia as were already in possession of our troops, or might be taken possession of by the armies then actively operating at the front.

Large quantities of stores had been accumulated at Nashville, the great depot, and Chattanooga. Knoxville, and Johnsonville, the minor depots, as well as at

Allatoona and Big Shanty, Georgia, along the line of operations.

The depots at Allatoona and Big Shanty were intended solely for the immediate use of the army. Forage, clothing, ordnance, hospital stores, and repairing material for the trains, were accumulated at these points as they were needed. The depots of Nashville and Chattanooga had been expanded to meet any possible emergency, and buildings were erected at Johnsonville, the terminus of the northwestern railroad from Nashville to the Tennessee river. These buildings were necessary from the fact that the Tennessee river is the most reliable channel of communication at all seasons of the year to this portion of the southwest. Supplies can be safely transported to Johnsonville, and a comparatively small body of troops will suffice to protect the northwestern railroad thence to Nashville.

At certain seasons of the year the water in the Cumberland is too low for navigation, and previous raids on the Louisville and Nashville railroad made it expedient to establish a third line. This line was obtained by the construction

of the northwestern railroad, and the depot at Johnsonville.

On the 1st of July, 1864, General Sherman's army was in front of Kenesau mountain, two hundred and fifty miles from Nashville. He had, in round numbers, one hundred thousand (100,000) men, and eighty thousand (80,000) animals; but notwithstanding this formidable force, and its great distance from its base by a single line of rail running through mountain fastnesses, liable to be cut at any time, it never suffered for any essential supply. On the contrary, it had abundance of everything needed from the moment it left Chattanooga to the fall of Atlanta. The Quartermaster's department has reasons to congratulate itself on this result, for it was a grave question, at the time, whether it would be possible to accumulate sufficient supplies at Nashville, and send them by a single line of rail to a huge army operating at such a distance from its base, so that it would not only be able to take Atlanta, the objective point of the campaign, defended as it was by a powerful army behind formidable earthworks, but be enabled to march thence to the sea.

Soon after the occupation of Atlanta, the rebel cavalry, under Wheeler, made a raid on the railroad in rear of the army, and severed its communications between Atlanta and Chattanooga, as also between Chattanooga and Nashville. On the 10th of September communications were restored, and the utmost capacity of military railroads taken to forward supplies. A fortnight brought news of plenty at all points. The army was equipped in time for the brief campaign against Hood early in October, and the 20th corps, which held Atlanta, did not

suffer for anything needed.

The great damage sustained by the railroad from Tunnel Hill to Marietta, Georgia, by the movements of the enemy, crippled the department temporarily but on the 1st of November everything went regularly forward, and the seaward-bound army was preparing for its march. All kind of stores were in Atlanta at the proper time. The nature of the approaching campaign made it necessary to releave the army of its surplus transportation and material. The officer of the Quartermaster's department deserve great credit for the industry they displayed in collecting this property and shipping it to the rear. I have no knowledge that any large amount was lost, although independent commanders at isolated points, in a few instances, ordered the destruction of stores. In a range of country several hundred miles in extent, with troops using public property at innumerable points, it was difficult to withdraw them without incurring some loss.

Hood threatened Decatur in November, and compelled the evacuation of its garrison. A considerable amount of public stores was sacrificed; but take the thing as a whole, and it may be said that comparatively few stores were lost in a movement of such magnitude, upsetting as it did all the previous arrangements.

General Thomas's army, in front of Nashville, drew its supplies direct from the depot; and its gallant attack, defeat and pursuit of the enemy's forces (December 15 and 16, 1864,) did not overtask the capacity of the Quartermaster's department.

It so happened that the army concentrated at Nashville deficient, for the most part, of transportation left behind at Chattanooga and elsewhere; but by the extraordinary foresight and exertions of Brevet Colonel Charles H. Irvin, assistant quartermaster, an officer of great resources, the army was re-equipped and enabled to pursue Hood's shattered forces to the Tennessee river.

With the departure of the 23d and 16th corps south and east, the forces remaining in the department were stationed as follows: the 4th corps at Huntsville, Alabama, and the calvary corps at Eastport, Mississippi.

Early in March orders were given for a probable campaign in East Tennessee. I directed Captain M. D. Wickersham, assistant quartermaster, then inspecting quartermaster army of the Cumberland, to proceed to Knoxville and report upon the wants of the department. He communicated freely by telegraph and letter, and subsequently submitted a full report of affairs in that direction.

About the middle of March the 4th corps was transferred from Huntsville, Alabama, to East Tennessee. A switch was built at Knoxville from the main railroad, storehouses commenced, and stores pushed forward. This work was in progress when intelligence came that Richmond had fallen, and the army which had so stubbornly defended it surrendered. The 4th corps was at once withdrawn to Nashville and re-equipped; and in June a fleet of steamers was collected at Johnsonville to move it to New Orleans. The embarcation was superintended in person by Colonel Mackay, chief quartermaster army of the Cumberland.

# LOSS AND DESTRUCTION OF PUBLIC PROPERTY.

The loss and destruction of public property in the department of the Cumberland during the past year has been, comparatively speaking, very small. The total value of property destroyed by fire, by fieshet, captured, abandoned, or destroyed to prevent its falling into the hands of the rebels, will not, I believe, exceed three and a half million dollars—(\$3,500,000) a small sum when the time and extent of operations are considered. In no instance that I am aware of has the loss occurred through the neglect of my subordinate officers. In every case it was occasioned either by the movements of the enemy, the orders of superior military commanders, or causes beyond the control of any one.

The first loss sustained was in August, at Cleveland, during the raid of the rebel General Wheeler into East Tennessee, but the amount of property was small, having been destroyed to prevent its falling into the hands of the enemy

For similar reasons, and during the advance northward of the rebel army under

Hood, in November, property was destroyed at Decatur.

On the 4th of November the rebel General Forrest attacked Johnsonville. the terminus of the Nashville and Northwestern railroad, from the west bank of the Tennessee river. He had a large force of cavalry and artillery, and although the Quartermaster's department made strenuous exertions, sending one of its own regiments from Nashville, in addition to the regular garrison, to defend the place, he succeeded in establishing batteries above and below the depot, shutting in three navy gunboats, eight transports loaded with stores, and eleven After sustaining a heavy cannonading and some severe fighting, the gunboats were disabled, fired and abandoned by Acting Volunteer Lieutenant King, United States navy; and following this example, the officer commanding the garrison ordered the transports to be fired. This being done, the flames spread to the stores on the levee and involved them in a common ruin. large warehouse, with the engine and machinery for hoisting freight, escaped uninjured. The value of the transports destroyed is estimated at \$300,000; of the barges, \$35,000; total loss estimated at a million and a half of dollars. (\$1,500,000,) five hundred thousand of which were commissary stores. The enemy did not cross the river, but withdrew the next day, satisfied with the mischief he had done.

I am not prepared to believe that the destruction of the property at Johnsonville was necessary, or warranted by circumstances. I think there was a want of judgment on the part of the officer who ordered the transports to be fired. It may be said he apprehended their falling into the hands of the enemy; but the answer to this is, the transports were under his fire, and could have been destroyed at any time.

For months before this occurrence the N. and NW. railroad had been worked to its full capacity, and the few stores remaining after the fire were shipped to Nashville as rapidly as possible. On the 30th of November the post was

evacuated without further loss.

The defeat of Hood's army in December, and its retreat across the Tennessee river at Florence, necessitated the establishment of a depot at Eastport, Mississippi. The 16th corps, and cavalry corps. military division of the Mississippi, were transferred there at once. Soon after heavy rains set in, and swelled the Tennessee to the unprecedented heighth of thirty (30) feet above low-water mark. So sudden and unexpected was the rise, that about twenty thousand sacks of forage and some miscellaneous stores were submerged, and proved a total loss. I do not believe that the loss will exceed one hundred and fifty thousand dollars in value, and it is but just to say that it occurred through no neglect of the officers of the Quartermaster's department; and it was owing to the energy dis-

played by them that it was not greater.

On the 9th of June the south half of the immense government storehouse in Nashville known as the "Taylor depot," and located at the terminus of the Tennessee and Alabama railroad, was destroyed by fire. It was filled at the time with a large amount of quartermasters' stores, but was fortunately separated from the larger portion of the depot by two massive fire-walls, fifty feet apart, which I had caused to be erected. This precaution saved the larger portion of the building, in which the chief commissary informed me four million dollars of subsistence was stored. The origin of the fire is unknown, though the affair was thoroughly investigated and reported upon by a board of officers. The most plausible theory is, the building took fire from sparks of a locomotive drifting in at one of the sliding doors. It is directly on the railroad track, and a locomotive had been observed passing to and fro only a few minutes before the fire broke out. I am satisfied that extraordinary precautions had been taken to guard the building against fire—such precautions, I venture to say, as are only used in powder magazines; but it was so frail that it went like a flash,

and it was found impossible to save it, though there were three fire-plugs inside the building with the hose attached day and night. The plugs, however, proved of service, as their natural flow of water, after the hose was burnt off, saved a great deal of property around them. The loss of stores will not exceed a million of dollars, most of the iron being saved, and, strange to say, over two hundred barrels of wagon grease, and one hundred and fifty boxes of glass have been recovered from the debris of the ruins. The fire department rendered valuable services at the fire, and but for it the larger half of the depot containing a vast amount of subsistence stores would also have gone. Captain Wainwright, assistant quartermaster, in charge, fortunately had his office detatched from the building, and his books and papers escaped uninjured. The closest scrutiny of the case compels me to acquit him from any charge of criminalty or neglect.

On the same day two "forage sheds" at Chattanooga were destroyed by fire, the principal loss being some two million pounds of hay. An explosion at the arsenal was the cause of the fire. Total lost estimated at \$47,814. Here, as at Nashville, the government fire-engines were promptly on hand and rendered

good service.

### FIRE DEPARTMENT.

An efficient fire department in a crowded city is absolutely necessary to safety. The department of Nashville in the fall of 1863 was wholly inadequate to the purpose, and I organized one of my own, consisting of one steamer, four hand-engines, and one hook and ladder company, the whole under Brevet Colonel (then Captain) Charles H. Irvin, assistant quartermaster.

A like organization was effected at Chattanooga and Knoxville, and the services these organizations rendered at various times, and particularly at the great fire of the 9th of June in Nashville, amply paid for their expense. I am satisfied that it is true economy to always have a steamer on hand at points where great amounts of public stores are accumulated.

#### HOSPITAL QUARTERS AND STOREHOUSES.

Buildings for hospitals, for the quartering of troops and employés and for the storage of quartermaster, hospital, ordnance and subsistance stores, were extensively erected in the department during the year, and were eminently necessary for the work then in hand. Having fulfilled the purpose for which they were erected, they can now be dispensed with, and sold for a considerable portion of the cost of building them.

But even if they sell for nothing at all, they have amply paid for their expense in the comforts they have afforded our armies, and the security and pro-

tection they have given the public stores.

### WORKSHOPS.

The repairs of trains and material, and a vast amount of building necessitated the erection of workshops at various points in the department, but chiefly at Nashville and Chattanooga. A large amount of repaired transportation was kept constantly on hand at the former point, and the expediency of doing so was illustrated in the battle of the 15th and 16th of December, 1864, when General Thomas's army having concentrated at Nashville, deficient for the most part of transportation, was refitted from the depot, and was thus enabled to fight the battle and to pursue the enemy to the Tennessee river.

# GUNBOATS AND TRANSPORTS ON THE UPPER TENNESSEE.

On the 1st of July, 1864, there were four gunboats and thirteen transports on the upper Tennessee, constructed chiefly at Bridgeport, Alabama, under the

supervision of Brevet Colonel (then Captain) Arthur Edwards, assistant quarter-

master, an officer of decided ability in that branch of the service.

The gunboats were transferred to the navy August, 1864. cost \$76,000, and rendered valuable services in patrolling the river between Chattanooga and Decatur. The transports were useful in supplying the army, and moving troops and material to various points on the river.

# RMPLOYÉS.

In March, 1864, the number of employés at the depot of Nashville was fifteen thousand seven hundred and fifteen, (15,715,) of which four thousand five hundred and ten (4,510) were employed on military railroads. April 30, 1865, the number of employés was twelve thousand nine hundred and seventy-two, (12,972;) and June 30, 1865, five thousand nine hundred and one; the number diminishing with the importance of operations. In making reductions, officers were instructed to retain old soldiers, refugees and contrabands, in preference to northern labor, as this last was the most costly of all, and at the same time, in the general reductions, could better take care of itself.

# MILITARY ORGANIZATION OF QUARTERMASTER EMPLOYÉS.

I early recognized the advantage of organizing my employés into a military force, and in May, 1864, when General Sherman advanced from Chattanooga and the garrison of Nashville was reduced to a low figure, I perfected the organization, and regularly drilled it. (See my Order No. 17, of May 17, 1864, and subsequent reports forwarded to your office.)

The first practical advantage derived from this force was in September, when Nashville was threatened by the rebel General Wheeler. My men turned out with alacrity, and no doubt would have behaved well had the necessity arisen. As it was, the enemy retreated after coming within six miles of the city.

Later, when Johnsonville, Tennessee, was attacked by General Forrest, one of my regiments volunteered to defend it, took its place in the trenches, was under heavy fire, lost several of its members, and behaved well, as all concur in saying. Again on the 30th of November, when Hood advanced on Nashville, my entire force of nearly seven thousand men was moved into the trenches, and in eight days had constructed more than two miles of work. The service thus rendered was acknowledged in the following note from Brigadier General Z. B. Tower, inspector general of fortifications, military division of the Mississippi:

HEADQUARTERS MILITARY DIVISION OF THE MISSISSIPPI, Office Inspector General of Fortifications, Nashville, Tenn., December 8, 1864.

GENERAL: It gives me great pleasure to acknowledge and thank you for the services of your department in throwing up a girdle of rifle pits, infantry intrenchments, and batteries around the city of Nashville during the past eight days, and for furnishing lumber and other materials so much needed. A large part of this line is connected with the adopted line of defence of the city, and will be finished as a permanent construction. Please express to your department my cordial thanks and appreciation of their invaluable services.

With respect, your obedient servant,

Z. B. TOWER.

Brigadier General, Inspector General of Fortifications, M. D. M.

Brevet Brigadier General J. L. DONALDSON,

Chief Quartermaster, Department of the Cumberland.

Finally, General Thomas assigned the forces of the Quartermaster's department a position in his line of battle before Nashville, December 15 and 16, 1864, (see his order of battle marked Exhibit No. 1,) and it took its place in the trenches while the battle lasted, holding two miles of works and releasing a like number of troops who would otherwise have been held in reserve.

This is the first time the department has been thus recognized by a commanding general, and I desire to thank General Thomas for the compliment

paid it.

Other military service was performed by the organization, but it was of small moment, such as scouting and furnishing sentinels and escorts when the garrison of Nashville was unable to funish them from its own forces. All things considered, I think the organization was a decided success, and recommend it to be generally adopted where there are a sufficient number to make it an object.

## HOSPITAL FOR BMPLOYES.

The large number of men in the employ of the Quartermaster's department at Nashville and elsewhere early necessitated the establishment of hospitals. Heretofore the men when taken sick were sent to some one of the numerous army hospitals. The consequence was, the department lost sight and sometimes trace of the men, who after a long time would be found acting as nurses or mechanics in some general hospital, when they should have been sent to their proper duties—an expensive arrangement to say the least. To obviate this trouble, and to prevent shirking, malingering, &c., the quartermaster's hospital was established, and I am satisfied it was an economical and valuable adjunct to the department. I will only add, that the institution was made self-sustaining by a tax of one per cent. on the monthly pay of the employés. The fund arising from this tax was transferred to Captain C. T. Wing, assistant quartermaster, my general disbursing officer, and paid out by him on vouchers certified to by the quartermaster and senior surgeon in charge, monthly. Abstracts and vouchers of this fund have been regularly transmitted to your office.

### UNITED STATES PRINTING HOUSE.

The "Methodist Publishing House," confiscable property, in the city of Nashville, was taken possession of in January, 1864, by order of Major General George H. Thomas, commanding the department, and used as a government printing house. The operations of the establishment up to June 30, 1864, were given in my last annual report. During the year ending June 30, 1865, over 5,300,000 impressions were made; 4,352 forms printed; 100,000 quires of paper used, and 22,380 quires of blanks furnished, at a total cost to the United States, including pay, commutation, &c., of enlisted men, of \$29,261 40; actual cost to the Quartermaster's department, \$25,456 45. (These figures are shown by the monthly reports of the officer in immediate charge of the printing house, heretofore forwarded to your office.)

The details of the establishment have been under the direction of Brevet Major A. W. Wills, assistant quartermaster, who deserves great credit for its

economical management.

The average saving to the government, taking Cincinnati, Chicago, Pittsburg, and Nashville prices, as shown by the monthly reports heretofore sent, is 82½ per cent., though it is believed the actual saving is fully 100 per cent. No work of any description is allowed until a requisition is first approved at this office. At this writing it is being turned over to the "Bureau of Refugees, Freedmen, and Abandoned Lands," as no longer needed for the public service.

The concern merits my warmest praise, and I recommend it to your favorable

notice and consideration.

# REPAIR OF UNSERVICEABLE TENTAGE.

Since June, 1863, the unserviceable tentage turned in at this depot, and repaired under the supervision of Captain Thomas J. Cox, assistant quartermaster, has been as follows:

| REPURI OF THE SECRETERS OF WAR.                                | 001          |
|--|--------------|
| Bell tents   | 2, 825       |
| Common tents   | 1, 146       |
| Wall tents   |              |
| Sibley tents   |              |
| Hospital tents   |              |
| Total  | 8, 673       |
| If condemned and sold would have realized probably \$13,000 00 | \$650,000 00 |
| Cost of repairing  | 23, 590 00   |
|  | 626, 440 00  |

Showing a saving to the government of over \$625,000.

Great credit is due to Captain Cox for the economical management of this matter.

#### PURCHASES.

Purchases of horses, mules, forage, straw, fuel, and small items of material not on hand at the depot, were made from time to time in the department during the year. The chief items of purchase were horses and mules, and it is believed they were had at rates from five to ten dollars below prices north, to say nothing of the cost of transportation, and danger of depreciation from a long journey in cars, or on bosts.

# REDUCTIONS. ETC.

April 17, 1865, Orders No. 25 were issued to officers of the Quartermaster's department in the department of the Cumberland to forthwith cease all logging and building operations; to reduce the number of employés to the lowest figure compatible with the interest of the service, and to ship all surplus property and articles for repair to the chief depots at Nashville, Chattanooga, and Knoxville.

The further purchase of animals and supplies was prohibited, and officers

urged to reduce expenses.

In consequence of this order, immense quantities of camp and garrison equipage, quartermasters' stores and serviceable transportation were poured into the depots. The storehouses were filled to repletion, and the labor incident to the receipt and proper disposal of such a vast amount of material increased the labor of the department for a while; but with the disposal of this property came a lull, which was taken advantage of to further systematize and reduce expenses.

Simultaneous with the order above alluded to, circulars were issued directing immediate steps to be taken to cause all unserviceable property to be inspected with a view to its condemnation and sale. So well was this matter attended to, that at the time General Order 113, War Department, current series, was received, a large quantity of stores at Nashville, already duly inspected and condemned, were advertised for sale. The sale was at once postponed and the list of stores submitted for action in accordance with the order. In the mean time the vast amount of stores accumulated at the depots were concentrated in as few warehouses as possible, and all private buildings not required for the public service returned to their owners. At the depot of Nashville quite a number of hospitals were vacated by the medical department. The most of these buildings were churches, and in several instances orders were given for their repair.

In a number of cases, however, and solely with a view to reduce the number of employés, I had an estimate made by my master mechanic of the damage done and the cost to repair, and then proposed to the trustees that they should take a certain sum of money—say fifteen per cent. less than the estimate of my master mechanic—and forego all claims against the United States for damages. When such propositions were accepted, I have submitted the same to you, with the recommendation that the money be paid. I have no doubt that ultimately all claims for damages to buildings occupied by the United States belonging to loyal owners will be paid. As time rolls by these claims will swell in amount, and my opinion is that they had better be settled at once, on estimates made by ourselves, instead of allowing them to be made by others, who will be interested in presenting them.

### STATEMENT OF PUBLIC MONRYS.

In this connexion I wish to call your attention to statement marked Exhibit No. 2, of my disbursing officer, Captain Charles T. Wing, assistant quartermaster, appended to this report.

Captain Wing has performed his responsible duties with ability and faithfulness, and the system he has introduced into his office has been of the greatest

service to the department.

Paragraphs III and IV, and paragraph V, except sections 1 and 4, and also paragraphs VII and VIII, of General Order No. 39, and the forms accompanying the order, do not come under the scope of my duties. I however transmit herewith the reports of my depot officers, showing the amount of materials and supplies received and issued during the year at the depot at Nashville, marked, respectively, Exhibits Nos. 3, 4, 5, 6, 7, 8, 9, 10, 11, and 12.

The officers of the department have performed their duties during the year in a creditable manner. Some cases of malfeasance in office have occurred, which have been punished by court-martial and dismissal; but as a general rule, when the magnitude of operations and the large amount of public money and material handled are considered, it must be acknowledged that the Quartermaster's department in the department of the Cumberland has been as faithfully administered as any other department in the vast area of operations.

It only remains to mention the officers who have served under my immediate

orders, and whom I deem worthy of notice.

Colonel A. J. Mackay, chief quartermaster, army of the Cumberland, served with the army through all its brilliant operations from the march to Atlanta to the battle before Nashville; witnessing its gradual and final dissolution as an army. During this time he performed his complicated duties to the entire satisfaction of Major General George H. Thomas, commanding, and I need hardly say of mine; and I cannot speak too highly of his ability, faithfulness and devotion to duty.

Captain James F. Rusling, assistant quartermaster, was my chief assistant quartermaster from July 1, 1864, to May 7, 1865, when he received his appointment as inspector Quartermaster's department. During the Atlanta campaign, and afterwards, he was of great assistance to me in the work of supplying the

army, and I witnessed his well-earned promotion with pleasure.

Captain F. J. Crilly, assistant quartermaster United States army, was under my orders as disbursing officer, United States military railroads, military division of the Mississippi. He performed these responsible duties satisfactorily, disbursing a vast amount of public money with discretion and despatch; bringing his office down to an admirable system, and displaying large administrative abilities—abilities which were invaluable in his position, as it was a new field, and he could have easily saved or squandered a million and no one be the wiser. I carnestly recommend him for the brevet of lieutenant colonel.

Captain M. D. Wickersham, assistant quartermaster, served on the staff of Major General George H. Thomas, commanding army of the Cumberland, from July 1 to September 16, 1864, as inspecting quartermaster, army of the Cumberland, from September 15 to May 18, 1865, and from May 18 to June 30, 1865, in my office as chief assistant quartermaster, department of the Cumberland. In these several positions he has displayed industry and ability, and no young officer of his grade has a handsomer or more creditable record of services.

Brevet Colonel Charles H. Irvin, assistant quartermaster, and Captain Charles T. Wing, assistant quartermaster, have already been noticed in this report; both

have been invaluable in their positions.

Captain C. K. Smith, jr., assistant quartermaster, was in charge of the depot of Chattanooga from July 1, 1864, to June 30, 1865. During all this time, and particularly during the Atlanta campaign, he performed his duties with ability and despatch.

Captain S. B. Brown, assistant quartermaster, has had charge of freight and passenger transportation on all the railroads centring in Nashville. In a work involving such a variety of detail he has succeeded in preserving order and system, and I commend him to your favorable notice and consideration.

Captain T. J. Cox, assistant quartermaster, has had charge of clothing, camp and garrison equipage, for the large armies operating in the department. His duties, in consequence, have been extensive, and it is sufficient praise for me to say that during the year I have not received a single complaint of the want of these essential supplies at any point.

Captain George B. Hibbard, assistant quartermaster, has had charge of forage at the depot, Nashville. It comprises a vast amount, and the care he took of it, working over several hundred thousand sacks of grain which bid fair to spoil,

entitles him to my warmest commendation.

Captain W. A. Wainwright, assistant quartermaster, has had charge of receiving and issuing quartermaster stores. In this position he showed zeal and ability; anticipating the wants of the army, so that it never suffered at any time.

Captain E. B. Kirk, assistant quartermaster, served from July to October, 1864, as chief quartermaster district of Etowah; from October, 1864, to May, 1865, in charge of corral, animals, and depot transportation at Chattanooga; and

from May to June 30, 1865, in charge of depot transportation, corral, &c., Nashville. He has displayed good judgment and ability in each of these positions; and his large sales of public animals and materials have been conducted with economy and fidelity.

I have already referred to the services of Brevet Major A. W. Wills, assistant quartermaster, in connexion with the government printing house. In addition to this, he has been in charge of the contraband camp, public buildings and quarters, and a variety of details, all of which have been well managed.

Captain H. M. Smith, assistant quartermaster, had charge of workshops and buildings at Chattanooga till March, 1865; from March to June 30, he had been in charge of cavalry depot, Edgefield; and his management of that concern, and particularly his care and sale of public horses, have been judiciously conducted.

Captain John H. James, assistant quartermaster of Tennessee troops, was under the immediate orders of Governor Andrew Johnson, military governor of Tennessee, though he reported to me for instructions. His duties were arduous and complicated, and he performed them to the satisfaction of Governor Johnson, as the governor personally assured me.

Captain Henry Howland, assistant quartermaster, served at the depots of Bridgeport, Johnsonville, and Nashville. He showed himself a valuable

officer at each of those points.

The only acting assistant quartermasters of whom I have any personal knowledge are Captain W. Mills, 74th Ohio volunteer infantry, and First Lieutenant S. H. Stevens, Chicago Board of Trade battery, Illinois volunteers. Both served at the depot, Nashville, and both displayed ability and faithfulness in their sphere. Captain Mills was post quartermaster, and Lieutenant Stevens was in charge of river and depot transportation, levees, fuel of steamers, &c. The duties of these officers were arduous and responsible, and Lieutenant Stevens, especially, deserves great credit for the manner he loaded and unloaded boats, and disposed of the enormous amount of public stores. I refer to his accounts as evidence of this.

Very respectfully, your obedient servant,

J. L. DONALDSON,

Brevet Major General U. S. A., Chief Quartermaster.

Brevet Major General M. C. MEIGS,

Quartermaster General U.S. A., Washington, D. C.

Exhibits Nos. 1 to 12, respectively, accompany this report.

A true copy:

JOHN V. FUREY, Captain and Assistant Quartermaster.

### EXHIBIT No. 1.

HEADQUARTERS DEPARTMENT OF THE CUMBERLAND, Nashville, Tennessee, December 14, 1864.

[Special Orders No. 342.]

IV. As soon as the weather will admit of offensive operations the troops will move against the enemy's position in the following order:

1st. Brevet Major General A. J. Smith, commanding detachment of the army of the Tennessee, after forming his troops on and near the Harding pike in front of his present position, will make a vigorous assault on the enemy's left.

2d. Brevet Major General J. H. Wilson, commanding the cavalry corps, military division of the Mississippi, with three divisions, will move on and sup-

port General Smith's right; assist as far as possible in carrying the left of the enemy's position, and be in readiness to throw his force upon the enemy the moment a favorable opportunity occurs. Major General Wilson will also send one division on the Charlotte pike to clear that road of the enemy, and observe in the direction of Bell's Landing, to protect our right rear until the enemy's position is fairly turned, when it will join the main force.

3d. Brigadier General Thomas J. Wood, commanding 4th army corps, after leaving a strong skirmish line in his works from Lamen's Hill to his extreme right, will form the remainder of the 4th corps on the Hillsboro' pike to support General Smith's left, and operate on the left and rear of the enemy's

advanced position on the Montgomery Hill.

4th. Major General John M. Schofield, commanding 23d army corps, will replace Brigadier General Kimball's division of the 4th corps with his troops, and occupy the trenches from Fort Negley to Lamen's Hill with a strong skirmish line. He will mass the remainder of his force in front of the works and co-operate with General Wood, protecting the latter's left flank against an attack by the enemy.

5th. Major General James B. Steedman, commanding district of the Etowah, will occupy the interior line in rear of his present position, stretching from the reservoir on the Cumberland river to Fort Negley, with a strong skirmish line, and mass the remainder of his force in his present position to act according to

the exigencies of the service during these operations.

6th. Brigadier General John F. Miller, with the troops forming the garrison of Nashville, will occupy the interior line from the battery on hill 210 to the extreme right, including the enclosed work on the Hyde's Ferry road.

7th. The quartermasters' troops, under command of Brevet Brigadier General J. L. Donaldson, will, if necessary, be posted on the interior line from Fort

Morton to the battery on hill 210.

The troops occupying the interior line will be under the direction of Major General Steedman, who is charged with the immediate defence of Nashville during the operations around the city.

Should the weather permit, the troops will be formed in time to commence

operations at six o'clock a. m., or as soon thereafter as practicable. By command of Major General Thomas:

WM. D. WHIPPLE,

Assistant Adjutant General.

The above report, owing to the fact of my returns not being made up, and a great many papers out, is not correct to the letter, but as near as can be got at.

Very respectfully, your obedient servant,

CHARLES H. IRVIN,
Brevet Colonel and A. Q. M.

A true copy:

J. L. DONALSON,
Brevet Major General, Chief Quartermaster.

No. 88.

### CHIEF QUARTERMASTER'S OFFICE, Depot Washington, August 31, 1865.

GENERAL: Pursuant to General Orders No. 39, current series, Quarter-master General's office, of July 1, 1865, I have the honor to submit my annual report for the fiscal year ending June 30, 1865.

My annual report of the duties performed at this depot for the fiscal year ending June 30, 1864, in accordance with General Orders No. 29, Quarter-

master General's office, July 6, 1864, was sent by messenger September 6,

For the purpose of expediting business and keeping the various operations at this depot distinct from each other, the organization of the several branches, as given below, has been continued during the year. They are as follows:

I. Army-wagon transportation, repair shops, &c., under the personal charge

of Brevet Colonel Charles H. Tompkins, quartermaster.

II. Ocean and river transportation, payments of freight, &c., under the super-

vision of Captain Edward S. Allen, assistant quartermaster.

III. Chartering and payment of chartered vessels, in charge of Captain John R. Jennings, assistant quartermaster, succeeded by Captain James G. Payne, assistant quartermaster.

IV. Contracts for victualling United States chartered transports, steamboat and ship supplies, transportation by canal, &c., under the care of Captain Henry B. Lacy, assistant quartermaster.

V. Railroad transportation, express, &c., under the charge of Captain Ben-

jamin Burton, assistant quartermaster.

VI. Transportation of ordnance and ordnance stores at United States arsenal,

in care of Captain Curtis S. Barrett, assistant quartermaster.

VII. Purchase and issue of quartermaster supplies, interment of deceased soldiers, with the manufacture of coffins, head-boards, stoves, tin-ware, desks, &c., care of cemeteries at Soldiers' Home, Arlington, Fort Stevens, &c, under the supervision of Captain James M. Moore, assistant quartermaster.

VIII. Receiving and issuing forage, in charge of Captain Edward S. Allen, assistant quartermaster, succeeded by Captain Samuel B. Lauffer, assistant

quartermaster.

1X. In charge of Soldiers' Rest, providing meals and quarters for soldiers

in transitu, &c., Brevet Major Erskine M. Camp, assistant quartermaster.

X. In charge of construction and repairs, hiring quarters, grounds, hospitals, offices, wharves, and payment of various employés, Captain Elisha E. Camp, assistant quartermaster, succeeded by Captain John H. Crowell, assistant quartermaster.

XI. Receiving and issuing clothing, camp and garrison equipage, &c., under

the direction of Military Storekeeper Daniel G. Thomas.

XII. The branch depot of Alexandria, Virginia, has been under the supervision of Brevet Lieutenant Colonel James G. C. Lee, assistant quartermaster.

XIII. The following named officers, in addition, have also been on duty at

this depot and Alexandria during the year, or for short periods of it.

1. Captain Calvin Baker, assistant quartermaster. 2. Captain R. S. Lacey, assistant quartermaster. 3. Captain John V. Furey, assistant quartermaster. 4. Captain Thomas G. Whytal, assistant quartermaster. 5. Captain S. R. Hamill, assistant quartermaster. 6. Captain W. W. Van Ness. 7. Lieutenant E. R. Graves, 3d West Virginia cavalry. 8. Captain S. H. Hoskins, assistant quartermaster. 9. Captain B. O. Carr, assistant quartermaster. 10. Captain Isaac N. Buck, assistant quartermaster; and 11. Captain James Gillis, assistant quartermaster, still remaining.

Defence of Washington.—At the commencement of this fiscal year a command of rebel troops invaded Maryland, burned Chambersburg, Pennsylvania, and threatened Baltimore. After the battle of the Monocacy, in which a portion of the 6th army corps, just arrived, were engaged, they advanced upon Washington. All available troops were ordered to meet them, guards in the city were withdrawn, and their places supplied, in part, by the quartermaster employés, who were armed for that purpose.

On the 11th of July, 2,500 of these employes were sent to occupy the rifle pits in the vicinity of Fort Slocum, where they remained until their services were no longer required. This was made the subject of a special report sent you on the 3d of August, 1864, to which you are respectfully referred for par-

ticulars.

The timely arrival of portions of the 6th and 19th army corps assured the safety of the city, and the rebels were driven back, but not without some loss.

Battle cemetery.—By your directions a cemetery, to contain the bodies of those who fell in defence of the nation's capital, was laid out near Fort Stevens,

on the spot consecrated by their blood.

Repairs to canal.—The Chesapeake and Ohio canal being necessary for the easy and rapid supply of the troops in pursuit of the discomfited rebels, a construction force was sent to repair the locks. &c., injured or destroyed by the rebel forces.

Stores issued and forwarded—The 6th and 19th army corps had their land transportation renewed and placed in effective condition before leaving and the canal was used as a means of forwarding supplies of grain and stores. At the same time, requisitions for artillery and ambulance horses and mules, to supply the wants of the armies operating against Richmond, were promptly filled and forwarded to City Point by water, and large numbers of vessels were in use forwarding forage and supplies to the same place, while grain, forage, and stores were forwarded by canal to Harper's Ferry and the mouth of the Monocacy.

Transters.—The number of teamsters at the depot being greatly reduced by fitting out the 6th and 19th army corps, I was obliged not only to advertise, but to send to Philadelphia and other portions of Pennsylvania to supply the want, as the services of contrabands could not be obtained in the department

of Washington.

Unclaimed clothing dyed for irregular issue.—The warehouses being filled with accumulations of unclaimed clothing, camp and garrison equipage, &c., and the room required for other stores, Captain Moore was ordered to turn it in to the military storekeeper, and to take receipts for the same; portions of which were afterwards washed and dyed for issue to contrabands and prisoners of war

during the approaching winter.

Employés sent to Manassas to fell timber.—In addition to the daily duties of the mechanics at the several repair shops in fitting up wagons and ambulances that had become unserviceable, constructing buildings, &c., they, with laborers and other employes, were engaged for about two weeks in felling timber for a distance of a mile on each side of the Orange and Alexandria railroad, in the neighborhood of Manassas, in order to break up the lurking-places of guerillas, under the direction of Brigadier General D. C. McCallum, superintendent of military railroads.

Horses turned over to cavalry bureau.—Early in September, the cavalry bureau having taken the entire charge of all horses, the artillery horses then in depot were turned over to it, and were afterwards, with necessary cavalry horses,

issued from Geisboro' depot.

Hospitals, quarters, &c., erected.—A large force of carpenters was employed by Captain Camp, assistant quartermaster, and after he was relieved, to take

charge of the depot at City Point, by Captain Crowell, assistant quarter naster in making additions and repairs to the various hospitals in and around the city, to render them comfortable for the winter, building quarters for regiments of Veteran Reserve Corps stationed in the city, and guards at the several hospitals, of which reports and drawings, with their cost, were forwarded to you each month. For details you are respectfully referred to the annual report on this subject sent you by Captain John H. Crowell, assistant quartermaster; but the amount of building, repairs, &c., during the first four months of this year, conducted by Captain E. E. Camp, assistant quartermaster, is, of course, not included therein.

Precautions against incendiaries.—Information having been received of an organization to burn the northern cities, the quartermaster employés, now regularly organized and drilled by company and battalion, were ordered on duty at night, and the number of watchmen increased. By my direction an officer of the depot was detailed each night to perform duty as officer of the day, visiting each shop, warehouse, and coral, from Georgetown to the Eastern Branch, including the Sixth street wharf and Kendall Green, which occupied their time from ten o'clock at night till daylight, to see that the guards and watchmen were on the alert; which duty they performed during a portion of the month of December, and until these guards were relieved by enlisted men of the Veteran Reserve Corps.

This vigilance prevented any attempt to destroy the large amount of stores

necessarily kept on hand.

To give a prompt alarm in case of fire, alarm-boxes were put up at different points to connect with the city telegraph lines, put in operation in February; fire-plugs were also erected at several of the repair shops and warehouses.

Troops to City Point.—Early in December, the 6th and General Cox's division of the 8th army corps were refitted in mules, wagons, and stores, and

shipped to City Point.

Danger from ice.—Apprehending inconvenience and delay to water transportation, by the formation of ice in the river during the winter, I applied for, and received two ice-boats, and ordered all the government transports to be plated with suitable iron, above and below the water-line, to prevent being cut through by the ice.

Troops forwarded.—During the months of December and January the water transportation branch, besides the routine duty of forwarding quartermasters' supplies, beef cattle, commissary stores, and ordnance, to City Point, was fully occupied in sending forward Hays's division, Cook's command, and the provisional brigade, West Virginia troops, from the Shenandoah valley, and General Schofield's command from Tennessee.

Hay barges frozen in.—My apprehensions in regard to icc proved well founded; forage barges passing through the canal from Philadelphia to the Chesapeake bay were frozen in, and the supply of hay on hand was soon exhausted by the increased number of animals belonging to above-mentioned

troops.

In want of hay.—Captain H. B. Lacey, assistant quartermaster, was despatched the latter part of January with tug-boats to extricate these barges, but without success. I was obliged, in consequence, to send trains of wagons into the country to bring what hay could be purchased from the farmers, by which means a supply sufficient for part of a ration was kept up; these purchases were continued throughout the month of March.

Ice blockade.—The cold weather still continuing, I was obliged to order the mail boats, which had during the year kept up a daily line of communication between this city and City Point, to land at Annapolis, and the mails and passengers were transported to and from that point by rail. This continued, with an intermission of about four days, from the 26th of January to the 21st of

February, inclusive, being twenty-three days of ice blockade, which had not oc-

curred before during the war.

General Schofield's army shipped.—It was during this period that the army of General Schofield arrived. The first shipment of the second division 23d army corps, animals and baggage, was made from Alexandria; but the ice having again formed, a brigade of 2,000 men, together with General Meagher's division, numbering 5,000 men, were forwarded by rail to Annapolis, and from thence by sea-going steamers. The rest of this command, after being refitted, embarked at Alexandria for North Carolina.

Coal exhausted.—At the commencement of winter I had laid in a store of 15,000 tons of stove coal for issue to hospitals, officers, &c., considering it sufficient for winter use; but early in the spring, this amount being exhausted, I was obliged to have a further supply sent daily by rail from Baltimore, amount-

ing in the aggregate to about 5,000 tons.

Forage barges released.—The weather having moderated and ice in the river fast disappearing, Captain Lacey was again ordered, on the 20th of February, to Chesapeake city to release the forage barges frozen in the canal, which ar-

rived here during the month of March.

Vessels for prisoners of war.—During the last week of February large shipments of cattle and stores, including the wagon transportation of General Schofield's army, were being sent to the front, when this depot was again called upon to furnish transportation for prisoners of war from Fort Delaware to City Point. Shipments of stores were also regularly made to supply the wants of the army of the Shenandoah.

Organized employés on duty.—On the 4th of March, owing to the great influx of persons into the city, some of whom might be contemplating mischief, the quartermaster employés, by request of Major General Hulleck, chief of staff, were kept on duty day and night at their several armories, and the quartermaster's steam fire brigade at their engine-houses, in readiness for any calls that might be made upon them.

Guards increased.—The guards at the warehouses and shops were doubled, and so continued for about a week, and every precaution was taken to insure

the preservation and security of the government property.

North Carolina, a force of carpenters was sent forward to Morehead city to erect warehouses for the reception of stores to be sent for the supply of the troops in that vicinity. Such light-draught steamers as could be obtained, with a number of barges, were loaded with supplies and forwarded by the Albemarle and Chesapeake canal.

Fires.—On the 1st of April, the fire at headquarters, department of Washington, occurred, which consumed the temporary buildings erected for its use. Here, as well as at the fire of the Smithsonian Institute, the quartermaster steam fire brigade did good service, and prevented these fires being more destructive, especially as no very effective assistance could be rendered by the common hand

engines of the city corporation, then in use.

Fall of Richmond.—The grand combinations of the Lieutenant General culminated early in April, in the fall of Richmond, the capitulations of the armies of Generals Lee and Johnston, and the subsequent collapse of the rebellion. Large numbers of prisoners were taken, and every available vessel was drawn from this depot to transport them from City Point to Point Lookout, &c.

Precautions against fire.—During the first week in April, when the loyal States were electrified by these successes, and illuminations were so frequent, unusual care and watchfulness were exercised to prevent any disasters from fire. Water buckets were placed in every building and filled ready for use, and watchmen were doubled. I am happy to be able to state that owing to this vigilance, no disaster occurred.

Assassination of the President.—The fourteenth of April will ever be memorable on account of the dastardly attempt to assassinate the chief officers of the government, which, in the case of the lamented President, proved too successful. The perpetrator of this infamous act having escaped from the city, it was supposed he would endeavor to find his way through Virginia to the more southern States. Tug-boats, with a few armed men on each, were ordered to patrol the waters of the Potomac and Patuxent, with instructions to examine all vessels and boats, with a view to the arrest of the criminal, and were continued on this duty until after his capture and death. Cavalry were also forwarded by water to Chapel Point, Maryland, and a daily line of steamers, carrying mails and stores, was put in operation during their stay.

· His funeral.—This depot also took an active part in the preparations made for the Pesident's funeral, and two battalions of its armed and drilled employes formed part of the mournful cortege that followed his remains to the Capitol.

Grand review.—On the 23d and 24th of May the review of the grand armies of the United States, assembled in the vicinity, took place; for which preparations had been made by the mechanics at this depot, in erecting sheltered seats for the occupancy of the President, cabinet officers, members of the diplomatic corps, &c., on both sides of Pennsylvania avenue opposite the Executive Mansion. Ambulances were also hitched up, and held in readiness to remove any of the troops who might be overcome by the heat upon this march.

Troops to be mustered out and sent home.—The War Department having ordered the muster out of service and return to their several homes of a large number of these troops, the railroad from this city was tasked to its utmost to provide them transportation; and, besides its ordinary traffic, in two months from the 29th of May, safely removed about 200,000 officers and men, with 12,000 horses and 4,000,000 pounds of baggage. For details of this movement, and all transportation by rail, I respectfully refer you to the annual report of Captain Benjamin Burton, assistant quartermaster, the officer in charge of that branch of the depot.

Transportation to refugees.—Transportation has also been furnished by rail and boat to indigent refugees and others to various points in the southern States upon the orders of General O. O. Howard, in charge of the Freedmen's Bureau.

Army transportation turned in.—Large numbers of mules and wagons, composing the transportation of the armies operating against Richmond, and General Sherman's army, being turned in, it was thought best to send the mules to graze, not only to improve their condition, but to save expense, and to prevent disease from having so large a number congregated together.

. Grazing camps.—Grazing camps were accordingly established at various points in Maryland and Virginia, contiguous to the city, from which the best results were obtained.

Trains to Louisville.—One thousand six-mule teams complete, with 2,000 extra mules, making 8,000 in all, were also, by order of the Lieutenant General, started from this point for Louisville, Kentucky, in four divisions, under the charge of Captains Whetsel, Winslow, Wilson, and Meade, of the Quartermaster's department.

Auction sales.—The accumulation of such a large amount of wagons of various patterns, harness, and animals, which were no longer necessary for army purposes, selections of the best were made by your order. Sales at auction of the remainder were commenced and continued through the month of June. For details of these sales, and all other matters connected with the land transportation branch of the depot, I most respectfully refer you to the annual report, to be made to you direct, by Brevet Colonel Charles H. Tompkins, quartermaster, the officer in charge.

Officers commended.—I take great pleasure in bringing to your notice the alility and energy displayed by the several officers stationed at this depot in

the discharge of duties which at times were peculiarly arduous and embarrass-

ing, and for which three of them have been rewarded by brevet rank.

Captain E. S. Allen, A. Q. M.—In this connexion, I cannot help asking your attention to my communication of May 5, recommending Captain Edward S. Allen, assistant quartermaster, in charge of water transportation, and whose duties have been so ably and satisfactorily performed, for brevet, which I think he so richly merits.

As these officers will report to you, direct, the operations of their respective branches during the fiscal year, I respectfully refer you to those reports for

details.

Conduct of quartermasters' employés.—I also desire to express my satisfaction at the willingness and unanimity that have characterized the conduct of the several employés, and the heartiness with which they entered upon the performance of duties not properly belonging to them as mechanics and laborers, in perfecting themselves in drill, and in going out under military organization to perform necessary labor that could not be supplied from any other source.

Shipments.—Besides the constant duty of supplying stores to the large armies before Richmond, and to the troops while in West Virginia and the Shenandoah valley, transportation has been furnished troops and stores to Newbern,

Wilmington, Hilton Head, and Savannah.

Assistance rendered.—Assistance of a more general character has been rendered, when necessary, during the year, of which I only mention the following: one hundred cords of wood and twenty-five tons of coal were loaned in the depth of winter, from the supply on hand at Alexandria, to the city corporation of that place, when it could not otherwise be obtained, and by the timely receipt of which a large amount of suffering to the poor was prevented. Five hundred barrels of flour were transported from Georgetown for the American Union Commission, destined for the poor of Petersburg and Richmond, and barracks at the Virginia end of the Long bridge were set apart for the shelter of refugees from the southern States whom the fortunes of war had thrown into the city.

Favors by the military railroad department.—I am indebted to the military railroad department for many favors, in furnishing pump logs, laying railroad track, and enlarging and placing in most excellent order the wharves at foot

of Sixth street.

Business of the depot.—The business of the depot has been very large during the year, as will be seen by reference to the detailed reports, and has been conducted with a view to the greatest efficiency, combined with the greatest economy.

No defalcation.—I am happy to be able to state, that although the large sum of eight and a half millions of dollars has been disbursed, yet no instance of

peculation or defalcation has occurred.

The officers' accounts have been sent in to the department with great regularity and promptness, and the numberless reports asked for, voluminous correspondence required, has been conducted with despatch.

I append a statement of moneys received and disbursed during the year,

which is the only form required of me by your Order No. 39.

Very respectfully, your obedient servant,

D. H. RUCKER,

Brevet Major General and Chief Quartermaster Depot, Washington, D. C.

Major General M. C. MHIGS,

Quartermaster General United States Army.

Brevet Major General and Quartermaster.

A true copy:

JOHN V. FUREY, Captain and Assistant Quartermaster.

No. 89.

HEADQUARTERS MILITARY DIVISION OF THE MISSISSIPPI, St. Louis, Missouri, August 18, 1865.

GENERAL: In accordance with General Order No. 39, from your office, current series, I have the honor to make the following annual report for the year ending June 30, 1865:

My report for the year ending June 30, 1864, was mailed to your office October 31, 1864, and a corrected one for the same period was mailed to you May 19, 1865.

July 1, 1864, I was on duty as chief quartermaster of the army of Major General W. T. Sherman and of the army of the Cumberland, which at that time were in front of Kenesaw mountain, Georgia, facing the rebel army of

General Johnston. The effective strength of our army in the field was about 100,000 men, with 28,300 horses, 32,600 mules, 5,180 wagons, and 860 ambulances. The enemy occupied a strong position, including Kenesaw and adjoining heights, and covering Marietta, and had maintained it for nearly three weeks, occasionally cutting the railroad which connected us with Chattanooga by means of small parties of guerillas or cavalry who operated between Dalton and Resaca, and could hide in the mountains and forests of the Chattanooga ridge. General Sherman had left garrisons at Tunnel Hill, Dalton, Resaca, and Kingston, and a division of cavalry at Adairsville, but the first attempts of the rebels at interrupting the road, which occurred in June, were successful. They would displace rails, wait until a train came along, which would be thrown from the track, and then burn it. In one or two cases they buried torpedoes under the rails, which exploded, throwing the locomotive from the track. Later, accidents from the removal of rails was prevented to a great degree by patrols, which went out from the posts regularly to examine the track. The enemy burned a small bridge near Dalton, and by frequent dashes at the road prevented to a great degree the passage of trains for about twenty days. Our dependence during that time was mainly on Resaca.

When the army abandoned the railroad at Kingston, May 24, and marched to Dallas, for fifteen days they were on half rations of grain, and three-quarters rations of subsistence, which had been loaded into the wagons at Kingston. During this time I had directed the chief depot quartermaster at Chattanooga, Captain E. L. Hartz, to accumulate at Resaca grain and subsistence. The latter place, around which numerous earthworks had been built by the enemy, was garrisoned pretty strongly to guard these supplies. Above ten days' grain and twenty days' subsistence for the army was collected there, and until breaks in the road were repaired, and the guerillas hunted from the region about Dalton, we lived on the supplies brought from Resaca. By the 30th of June, while we were still in front of the Kenesaw mountain, all the forage had been brought away from Resaca. Alatoona was named as the point where any future accumulation that was possible should be made, and by order of General Sherman earthworks were built to strengthen the position, which was naturally a strong

one.

From the 11th to the 19th of June the enemy had been forced back, step by step, till our men reached the base of Kenesaw mountain; but there our utmost efforts could not force them further. Kenesaw consists of two elevations; one about 900, the other about 800, feet high. They are very steep; and on the sides and summit the enemy had signal stations that could look down on us and report our every movement. Their batteries on the heights had a great advantage over ours on the low grounds, and an assault made on their lines on the 27th of June was repulsed with a loss to us of 3,000 men. After this General Sherman directed that the wagon trains should be filled up, as far as possible, at Big Shanty, and all cars and stores not taken by the wagons besent back to Alatoona; and while the armies of the Cumberland and the Ohio still continued to press the enemy's lines closely, the army of the Tennessee should march from our extreme left to the extreme right to Ruff's Mills, on Nickajack creek, threatening a crossing of the Chattahoochee river and the railroad. It was only by extraordinary exertions that we brought up to Big Shanty the necessary quantity of supplies in time; but they were brought up. The movement was entirely successful. The march of the army of the Tennessee had hardly commenced before the enemy withdrew from Kenesaw, our men following them closely and occupying Marietta, July 3. By the 6th we had forced them to the Chattahoochee, and partly across it.

The railroad, injured by the destruction of two miles of track and the removal of the frogs at Marietta, was repaired to that place by the 6th, and to Vining's Station a few days later. July 18 our army was all across the Chat-

tahoochee with wagons full, carrying about ten days' supplies. In the hardfought battles that followed, our army repulsed the desperate assaults of the

enemy at Peach Tree creek, about Decatur, and west of Atlanta.

Up to August 5 whatever stores were immediately wanted by the army were unloaded at the Chattahoochee river, (the remainder being left at Marietta,) at the point where the railroad bridge had stood before it was burned. Two wagon bridges had been built by our troops over the river, and a pontoon bridge captured from the enemy. August 5 the railroad bridge was completed by the construction corps, and supplies were brought over the river and unloaded on the bank south of it. At that date we had twenty days' subsistence and

twelve days' grain up with the army, and the men were well clothed.

During the month of July we had begun to feel some solicitude concerning the quantity of supplies at Nashville. The navigation of the Cumberland and Tennessee rivers was partially suspended on account of low water, and the light boats that could run received very inefficient protection on the Tennessee from the enemy's cavalry by our gunboats, being obliged to wait, collect in fleets, and he convoyed up the river, thus causing a great loss of time. The Louisville railroad was delivering hardly fifty cars of freight, daily, at Nashville, which would furnish the army much less than half its daily consumption of stores of all kinds. The consumption of grain by the army in the field alone was over 600,000 pounds daily, and Colonel Donaldson had barely enough to last until September 1 The quantity of subsistence was sufficient to supply us up to about the 15th of September. July 27 the chief commissary and myself united in a letter to Major General Sherman, representing these facts, and recommending that he issue orders to the construction corps to repair the railroad from Clarksville to Nashville, there being only about thirteen miles of it to put in order, and the Cumberland being navigable to that point (which is below Harpeth shoals) at all seasons. The order was given, and Colonel W. W. Wright sent north to carry it out. Colonel Donaldson reported that enough grain had been received during the season at Nashville to last until October, but that much had been destroyed. The quantity destroyed at the front was not large; in two or three cases railroad trains of forage had been burned by the enemy, but none was lost after it reached the army, and much of the time since leaving Chattanooga our animals had not received full rations. Considerable grain had been ruined by shipping it at Nashville and Chattanooga in platform cars without protection from the rain. It required some severe measures from me at Chattanooga to break up this practice and that of shipping grain already damaged. August 16 I put our animals on half rations of grain. August 24 Colonel Donaldson reported that he was not getting half rations from the Ohio, and that he had not more than six days' full rations on hand. Fortunately about this time the rivers had risen some. General Allen, at Louisville, reported that he was getting grain from every possible source, and in three days he started from the Ohio for Johnsonville and Nashville 94,000 bushels of oats and corn. On the 27th the crisis was passed. General Allen telegraphed me that forage was arriving rapidly at Nashville, and that I might feed full rations if they could be brought from that place.

Ever since the first break in the road in June the railroad had had difficulty in transporting enough for our wants. Our necessities had increased so as to require one hundred cars of supplies daily, instead of sixty, as at first. This was caused by the arrival of re-enforcements, (including the 17th corps,) and by the increased demand for clothing, equipage, and means of transportation, which the campaign had worn out. Our increased distance from Chattanooga, (107 miles at Big Shanty, 130 at the Chattahoochee,) of course, made a greater number of cars and engines necessary in order to deliver the same amount of stores daily. My orders were peremptory and frequent to have all cars returned promptly from the front, and from Chattanooga, and from all sta-

tions south of it. My officers all along the road reported that all cars were unloaded as soon as they arrived, and if they were not returned immediately the fault did not lie with the Quartermaster's department. It seems to have been supposed by some officers at the rear that cars could be unloaded and returned from the front in the same time that they could at a permanent depot with every facility, and I received a letter from the Quartermaster General urging that cars be promptly returned from the army. As the army advanced the road had to be rebuilt, water tanks to be constructed, and wood cut. The depot had to be established nearer the army, side-tracks to be constructed, and whatever accumulation there was at the last depot had to be brought forward; and orders were frequently given to bring stores from the depot up to our very lines by rail, and to take back the sick and the wounded. The commanding general would sometimes order ten days' subsistence and grain brought up immediately to fill the wagons; in such cases we would have to take some of the cars that were usually kept running between Nashville and Chattanooga. Some trains never returned to the north at all, as they were captured and burned by the enemy; they tore up the track and fired upon trains very frequently. When the length of our line is recollected, and that it ran through an intensely hostile country, it is strange that these interruptions were not still more numerous. When all these things are considered, I think it will not seem singular that some delay occurred in returning cars. There is no doubt but what more cars would have been desirable, and this was a point that I had urged upon Colonels Donaldson and McCallum as far back as January and February, 1864; but I think the most was made of the cars we had.

The difficulty of regulating the road, under the embarrassments detailed above, was great. Though forbidden by order of the Secretary of War, dated Louisville, October 19, 1863, from interfering with the running of trains, yet their movements when near the front were so frequently dependent upon those of the army that I found it necessary to telegraph frequently on this subject, and the commanding general made me the medium of most of his instructions

to the superintendents and to the construction corps.

After s ege operations of more than a month about Atlanta, during the latter part of July and August, it became evident that our army could not capture the rebel city in that manner. The rebel army was so large that investment was impossible, and the railroad to Macon furnishing them with recruits and supplies, was guarded strongly against all attack. Under these circumstances the commanding general determined to move upon the enemy's railroad with the main body of his army. All preparations having been completed, on the 26th of August the movement commenced, the 20th corps withdrawing to the Chattahoochee bridge, while the remainder of the army made a detour around the rebel left and arrived at Jonesboro' September 1. After some severe fighting, during which the enemy were evacuating Atlanta, they retreated south. The 20th corps entered Atlanta September 2, and the main army on the 8th. As soon as information reached me, at Jonesboro', that the enemy were out of Atlanta, I ordered my chief depot officer in the field, Captain John Stewart, to bring forward all stores at Marietta and the Chattahoochee bridge to Atlanta. The facilities of this place in the way of railroad depots, side tracks, and storehouses were most complete, it having been the largest depot for the supply of the rebel armies in the west. was directed to take possession of all buildings and all staple articles, such as cotton, animals, hardware, &c., found in the city or vicinity. All such property was collected, and in accordance with instructions from the commanding general, my depot officers gave receipts for everything, but made no payments, as the loyalty of any of the claimants was at least doubtful, and it was judged best to let the government decide in the future whether any of the coptured property should be paid for.

The whole army remained about Atlanta until the 4th of October, at which time the rebel army having made a detour completely around our right, crossing the Chattahoochee below Campbellton, struck the railroad at Big Shanty, and immediately commenced tearing it up and destroying the ties and rails. Our army immediately started north in pursuit, except the 20th corps, which was left to garrison Atlanta. The enemy destroyed the road up to Alatoona, and assaulted that place on the 5th, but were repulsed with severe loss. This saved two thousand cattle and fifteen days' bread for our army, and other stores. The enemy were reported to have very few wagons, and to be carrying with them scarcely anything except ammunition; at any rate, they moved with great rapidity, and marching around Rome, reached Resaca about the 12th. This place they were unable to capture, but destroyed the railroad from Tilton to Tunnel Hill. From this vicinity they retreated into northern Alabama, pursued

by General Sherman as far as Gaylesville.

The distance of railroad and telegraph broken was about twenty-three miles. and the work of destruction was most thorough. Until it was repaired the garrison at Atlanta received nothing from the north, until about the 28th October, when some grain was brought around the break in wagons. The garrison in the town and at the Chattahoochee bridge numbered 21,100 men, the number of animals was 9,400. There was stored in the town more than a month's subsistence for the troops, but very little forage; when that was consumed the animals suffered a good deal. Parties were sent out southeast of Atlanta who brought in much forage, but the amount to be procured in this way was not sufficient, for, besides the animals of the 20th corps, there were in Atlanta the depot teams and many unserviceable animals that had been turned in from the army. The parties had a long distance to go, (thirty miles,) and the enemy had a force hovering about Atlanta, which made it necesary to have very large guards for the trains. One thousand of the unserviceable animals were ordered to be driven to Chattanooga, and were started October 12. Only men enough to control the animals accompanied them. They ran great risk of capture, but it was judged better to take that chance than let them starve in Atlanta. October 18, all of them that remained were gathered up and started for Chattanooga in the None were captured by the enemy.

Returning from a brief leave of absence, I reached Chattanooga October 12, on my way to Atlanta. On the 19th General Sherman telegraphed me from Summerville, Georgia, to go in person to superintend the repair of the railroad, and authorizing me to give all orders in his name that would expedite its completion. I at once went down to the break and ordered the 1st Michigan engineers, 1,800 strong, from Adairsville to Tilton, to assist the railroad corps in getting out ties, and procured forty teams from a cavalry division at Calhoun to haul them to the road. Colonel W. W. Wright, chief of construction, was short of iron, and a partial supply was procured by taking up rails from the West Point road, near Atlanta, and bringing them up on the cars which remained south of the break. The gap between Alatoona and Big Shanty was repaired sooner than the other, and as General Sherman had directed the bringing back to the rear of everything south of Chattanooga, except what we could immediately use and carry in our wagons, to lose no time, many sick, wounded, negroes, &c., were carried to Resaca and brought around the break to Tunnel Hill, whence

they went to Chattanooga.

They were suffering so for grain at Atlanta that I determined to get some through without waiting for the completion of the road; and collecting all the teams that could be spared at Chattanooga, I sent them to haul grain from Tunnel Hill to Tilton, where it was carried to Atlanta by cars.

October 25, I went to General Sherman, at Gaylesville, by way of Rome, for consultation, and was put in possession of his entire plan of the intended

campaign to the sea-coast, and then immediately started for Atlanta, which I

reached on the 28th. The railroad was completed the same day.

The work now to be performed was to fit out the entire army for the march to the coast, and to carry everything not needed for this purpose back to Chattanooga, and the orders were to accomplish this in the shortest possible time; at the same time the 23d corps were being sent back to Nashville in cars, thus occupying a large part of the transportation. The accumulation of property at Atlant, Rome, Marietta, and other posts, was surprisingly large for the time we had occupied the country, and the number of sick and wounded, citizens and negroes, to be taken to the rear was large. It is unnecessary to describe all the details gone through in accomplishing this work, but it was the most arduous and difficult duty to perform successfully that I have ever had to do in the same period of time. It was complicated by the army being distributed along the road from Rome to Atlanta, and having to be supplied where it was: while, at the same time, just so much had to be accumulated at Atlanta as it would require when it arrived there. There were stores to be removed to the rear at every post below Ringgold. The army could not leave the railroad from Resaca down, and march to Atlanta, which would much simplify the task of supplying them, because the enemy's cavalry were ready to pounce upon and break the road as soon as it was uncovered. In addition to this the railroad was not working well. The superintendent at Atlanta was incapacitated by indisposition; his duties had to be performed by subordinates, and I found it necessary to give orders continually to the railroad officers mysel'. Many little accidents were occurring, causing delays. Every car was needed for public property, but the attempts to get private freight, tobacco, furniture, &c., to the rear upon cars were unceasing, and were aided in numerous cases by railroad employes, making the greatest vigilance necessary to prevent these attempts from being successful. I had two officers detailed especially to keep private property out of the trains.

The work of our department was successfully accomplished by the 11th of November, and the destruction of the railroad from the Etowah down was commenced the same day by our troops. The army had everything it needed, and the wagons were full. Everything of value had been got to the rear. Very little but worthless property was destroyed for want of transportation. A few old wagons and ambulances were burned, and some clothing drawn by an officer of the 15th corps, and not needed by the corps, was given away by him to any one who chose to take it. A few days' delay occurred while the army was marching down the railroad to Atlanta, during which that city was completely destroyed with the exception of its dwellings.

The march to Savannah commenced on the 15th of November.

The strength of the army was 63,680 men, and its transportation consisted of 14,468 horses, 19,410 mules, 2,520 wagons, and 440 ambulances.

The following was ordered as the allowance of transportation for baggage, and on the march:

One wagon to each regiment; one wagon to each battery; two wagons to each brigade headquarters; three wagons to each division headquarters; five wagons to each corps headquarters.

The remainder of the transportation was directed to be distributed as follows: three wagons to each division for hospital purposes; one wagon to every one hundred men, including artillery, for ammunition; and the remaining wagons, 1,256 in number, were used in carrying subsistence, forage, &c.

The army started from Atlanta with four days' grain. The subsistence

transported was-

Twenty days' rations of hard bread; five days' rations of salt meat; thirty days' rations of sugar and coffee; five days' rations of soap, rice, and candles; eighty days' rations of salt.

The quantity of salt taken proved unnecessary, as we found it in great abundance in the country we passed through. In addition to the above, 5,476 head of beef cattle were taken.

The first grain received at King's bridge, on the Ogeechee river, arrived there and was issued on the 18th December, 1864. So the animals of the army subsisted on the country twenty-nine days, which makes at least 11,000,000 pounds of grain and 15,000,000 pounds of fodder and hay taken from the country and consumed on the march. This is a low estimate of the forage taken, as the beef cattle were fed on the whole route as much as they would eat, and the number of horses, mules, and cattle was increasing every day.

After General Hood cut the Chattanooga and Atlanta railroad the animals of the army suffered for want of forage, and a large number of them became very much reduced in flesh, and were quite weak when the march commenced. This accounts for the large number of animals that gave out and were shot on the road. The character of the mules captured was superior, a small-sized or inferior one being seldom met with. On the arrival of the army before Savannah, the condition of the animals was far better than at the commencement of the march. Those that had strength sufficient at the start improved daily, and those that failed and gave out were replaced by better ones than we had in the trains at starting.

The army marched by corps, and on roads as near parallel to each other as could be found. Each corps had its pontoon train, and each division its pioneer force, and with these organizations streams were crossed, roads repaired, and sometimes made, without retarding the movements of troops.

The management of trains differed somewhat in each corps, but I think the best arrangement was where the train of the corps followed immediately after its troops, with a strong rear-guard in the following order:

1st. Corps head quarters baggage wagons.2d. Division headquarters baggage wagons.3d. Brigade headquarters baggage wagons.

4th. Regimental headquarters baggage wagons.

5th. Empty wagons, to be loaded with forage and other supplies taken from the country, and the proper details for loading them.

6th. Ammunition train.
7th. Ambulance train.
8th. General supply train.

As the empty wagons reached points where forage and other supplies could be obtained, a sufficient number were turned out of the road to take all at the designated place, and so on through the day until all the empty wagons were loaded, making it a rule to take the first supplies arrived at, and to leave none on the road until all the wagons were loaded. The empty wagons would be loaded by the time the rear of the general supply train came up to them, and they would fall into their proper places in the rear of their division trains if in time, or in the rear of the general supply train, without retarding the march. This arrangement worked well, and is probably as good as any that could be made. As a general thing the wagons were required to go but a short distance from the line of march to obtain supplies, there being sufficient near by.

The march proceeded most successfully, there being little resistance from the enemy, and an abundance of food for men and animals being found everywhere

until we took position before Savannah.

We arrived near Savannah on the 10th of December, and by the capture of Fort McAlister, on the 13th, communication with the sea was opened to us by the Ogeechee river. Supplies in limited quantities were brought up this river until the 21st December, when Savannah itself was occupied, and our vessels at once came up to the city by the south channel of the river.

The operations of your department, under my charge, from that time until General Sherman's army arrived at Washington, are so fully detailed in my report dated July 22, 1865, on file in your office, that a repetition of them here seems quite unnecessary. During the latter part of May General Sherman's army was broken up as an organization, and during the month of June I was ordered to St. Louis as chief quartermaster of the military division of the Mississippi.

Appended hereto is the statement of public moneys, required by General Order No. 39, from your office, current series. My duties as chief quartermaster in the field have been such that the other statements called for in the order are not required from me, having been responsible for no property, paid for no transportation, and furnished none, received no captured property, built

no railroads or telegraph lines, and chartered no vessels.

Very respectfully, your obedient servant,

L. C. EASTON.

Brevet Brigadier General, Chief Quartermaster.

Major General M. C. MEIGS,

Quartermaster General U. S. Army, Washington, D. C.

L. C. EASTON,

Brevet Brigadier General, Quartermaster U. S. A. St. Louis, Missouri, August 18, 1865.

A true copy:

JOHN V. FUREY, Captain and Assistant Quartermaster.

### No. 90.

HEADQUARTERS MILITARY DIVISION OF THE MISSISSIPPI,

Morehead City, N. C., March 16, 1865.

GENERAL: In obedience to instructions contained in your letter of the 26th

December, 1864, I have the honor to make the following report:

From the 14th to the 25th of October last found me at Chattanooga, Tennessee, hurrying and giving all the assistance in my power to the repair of the road from Chattanooga to Atlanta, which had been destroyed by General Hood's army. On the 26th I joined General Sherman at Galesville, a small town about thirty miles west of Rome, Georgia, where I received his orders, and proceeded the next day to Atlanta, Georgia, by his direction, to superintend the removal of all stores, citizens, sick, &c., from that place to Chattanooga. On entering upon this duty I found the accumulation of supplies and the number of sick, wounded, and negroes, surprisingly large for the short time we had occupied the place. The removal of the whole, except some property not worth transportation, was accomplished by the 12th of November, 1864, and the army of General Sherman commenced its march from Atlanta to Savannah, Georgia, on the 15th November, 1864.

The army consisted of four corps of infantry and one cavalry division, as

follows, viz:

14th corps: 15,680 men, 1,408 horses, 4,436 mules, 571 wagons, and 112 ambulances. 15th corps: 18,000 men, 2,164 horses, 5,726 mules, 666 wagons, and 146 ambulances. 17th corps: 11,000 men, 2,156 horses, 3,107 mules, 385 wagons, and 77 ambulances. 20th corps: 14,000 men, 1,740 horses, 4,341 mules, 598 wagons, and 105 ambulances. Cavalry corps: 5,000 men, 7,000 horses, 1,800 mules, and 300 wagons. Total: 63,680 men, 14,768 horses, 19,410 mules, 2,520 wagons, and 440 ambulances.

The following was ordered as the allowance of transportation for baggage,

&c., on the march:

One wagon to each regiment; two wagons to each brigade headquarters; three wagons to each division headquarters; five wagons to each corps headquarters; one wagon to each battery; (there was one battery to each division.)

The balance of the transportation was directed to be distributed as follows,

viz:

Three wagons to each division for hospital purposes; one wagon to every one hundred men, including artillery for ammunition, and the remainder, 1,476 wagons, was used in transporting forage and subsistence, &c.

The army started from Atlanta with four days' grain.

The subsistence transported for the whole army was as follows, viz:

Hard bread, twenty (20) days' rations; salt meat, five (5) days' rations; sugar and coffee, thirty (30) days' rations; soap, rice, candles, five (5) days' rations; salt, eighty (30) days' rations.

The quantity of salt taken proved unnecessary, as we found it in great abun-

dance in the country passed through.

The army started from Atlanta with 5,476 head of beef-cattle in addition to the above.

The first grain received was at King's bridge, on the Ogeechee river; it arrived there and was issued on the 18th of December, so the animals of the army subsisted on the country twenty-nine days, (we started with four days' grain.) which makes at least 11,145,792 pounds of grain and 15,177,344 pounds of fodder and hay taken from the country and consumed by the army on the march. This is a low estimate of the forage taken from the country, as beef-cattle were fed on the whole route as much as they would eat, and the number of horses, mules and beef-cattle varied from day to day, all increasing in numbers. I enclose you a statement of beef-cattle captured, &c., marked "B."

After General Hood cut the Chattanooga and Atlanta railroad, the animals of the army suffered for want of foragrand a large number of them became very much reduced in flesh and were quite weak when the army commenced its march from Atlanta. This accounts for the large number of animals that gave out and were shot on the road. The character of the mules captured was superior, a small-sized or inferior one being s ldom met with.

On the arrival of the army in front of Savannah the condition of its animals was far better than it was at the commencement of its march. Those animals that had strength sufficient at the start improved daily, and those that failed and gave out were replaced by a better class of mules than we found in the

trains at starting.

There is no way of arriving at the quantity of subsistence taken from the country; but the whole army fared sumptuously and the animals were never better fed. During the whole march and until we took a position before Savannah, both men and animals had all they could desire in the way of food.

The army marched by corps, and on roads as near parallel to each other as could be found. Each corps had its pontoon train and each division its pioneer force, and with these organizations streams were crossed, roads repaired, and

sometimes made, without retarding the movements of the troops.

The management of trains differed somewhat in each corps, but I think the best arrangement was where the train of the corps followed immediately after its troops, with a strong rear guard, in the following order:

1st. Corps headquarters baggage wagons.2d. Division headquarters baggage wagons.3d. Brigade headquarters baggage wagons.

4th. Regimental headquarters baggage wagons.

5th. Empty wagons, to be loaded with forage and other supplies taken from the country, with the proper details for loading them.

6th. Ammunition train.

7th. Ambulance train. 8th. General supply train.

As the empty wagons reached farm-houses and other points where supplies could be obtained, a sufficient number were turned out of the road to take all at the designated point, and so on through the day until the empty wagons were loaded, making it a rule to take the first supplies come to, and to leave none on the road until all the wagons were loaded. The empty wagons could be loaded by the time the rear of the general supply train came up to them, and they would fall into their proper places in the rear of their division trains, if in time, or in the rear of the general supply train, without retarding the march. This arrangement worked well and, is probably as good as any that could be made for procuring supplies. As a general thing the wagons were required to go but a short distance from the line of march to obtain supplies, there being sufficient near by.

Hogs, turkeys, geese, ducks, and chickens were killed and brought to the road by foraging parties sent out at the head of each column, and loaded into wagons as they came up. The captured beef-cattle and sheep were driven along in their proper places and killed as required. Sweet potatoes of the finest kind were found in great abundance immediately on the road; also turnips, which

were generally of an inferior quality.

The portable forge is almost entirely done away with in General Sherman's army. Nearly all the officers prefer carrying a small-sized bellows, using any ordinary box filled with dirt as a fire-box. The bellows is swung between two stakes, usually cut from the woods or taken from some fence, driven into the ground, with a piece nailed across the top to suspend the bellows handle. The box (usually a bread-box) is placed at its proper height on four forks or stakes driven into the ground, with pieces laid from one to the other to set the box on.

They transport simply the bellows, anvil and tools, making use of any empty box or barrel for a fire-box. Nearly all the iron-work on the march from Atlanta to Savannah was done with forges of this description. Officers prefer this arrangement to the portable forge, because it does not get out of order and gives a better heat. Since writing this I have received a circular describing Captain John H. Dickinson's portable forge, which is, I presume, got up from this idea. In the absence of portable forges, I would suggest the plan for a forge now

used in General Sherman's army, which answers every purpose.

There is one little thing which has been practiced by experienced officers for many years, which would be a great economy in both wagon-sheets and wagon-bows, if officers generally could be made to adopt it; that is, to put their sideboards ten or twelve inches wide on all wagons. Wagons are loaded far above their sides; heavy articles are frequently put on top, and over rough roads; ar against a bow, snapping it off, or coming between the bows, burst out the sheet. The side-boards running the whole length of the wagon and pressing against all the bows prevents this difficulty, and also prevents the loading from coming against a wet sheet. A thin light board of this kind adds very little to the weight of the wagon, and is a great protection to wagon bows and sheets.

For campaigning, I would much prefer a wagon made with standards to the bolster and over the hind axle, so that the body can be readily lifted off and removed from the running-gear; this will be a great economy in wagon-beds, as a great many of them are ruined on a march in hauling heavy timber for bridges, poles for corduroy, &c., to say nothing of the convenience of loading, particularly long timber, and making short turns in the woods to get the wagon into position to load. Another advantage is, that on a rainy day the wagon body can be set on the ground, and the loading kept in it as dry as if it were on its

wheels.

In camps and, in fact, about garrisons, where wood is obtained from the forest, and where officers do not take the trouble to make wood-racks, a great many wagon-beds are crushed out and ruined by loading firewood on them. With standards, wood could be cut long and loaded between them.

These are small things, but should the suggestions be followed I think they

would prove a convenience and economy in the end.

Immediately on the receipt of your letter of the 26th December last, directing me to call on the chief quartermasters of General Sherman's army for reports of the operations of the Quartermaster's department, on the campaign from Atlanta to Savannah, I called on the chief quartermasters of the two wings and of the different corps for reports. I have not as yet been able to get reports from either Colonel Conklin, chief quartermaster of the right wing. Lieutenant Colonel G. L. Fort or Lieutenant Colonel E. M. Jael, chief quartermasters of the 15th and 17th army corps. My report would have been forwarded sooner had I not waited to get reports from these officers. I have finally concluded to make it without them. I will forward these reports as soon as received.

I enclose you a statement of captured and abandoned animals, marked "A." I enclose also the reports of Major G. E. Dunbar, chief quartermaster of the cavalry corps, Captain J. E. Remington, chief quartermaster (acting) of the 14th army corps, and of Captain H. M. Whittlesey, acting chief quartermaster of the 20th army corps.

I am, general, your obedient servant,

L. C. EASTON,

Brevet Brigadier General, Uhief Quartermaster.

Major General M. C. MEIGS,

Quartermaster General U. S. A., Washington, D. C.

### No. 91.

OFFICE CHIEF QUARTERMASTER 20TH ARMY CORPS, Savannah, Ga., January 20, 1865.

GENERAL: In compliance with the requirements of the letter of the Quartermaster General of the 26th ultimo, I respectfully submit the following memoirs upon the march of the trains, and upon the operations of the quartermaster's department of this corps, since the army left Atlanta, including all operations up to the occupation of Savannah.

The tabular statements herewith enclosed are copies of a report made by me to the general commanding this corps, and embrace the following statements:

Digitized by Google

First. Of the amount of forage taken from the country in foraging expeditions sent out under my direction, by which the animals of the army were fed when supplies were cut off by the enemy's destruction of our railroad communications.

Second. Of the number of animals captured, lost, abandoned, and killed, and

of the amount of forage taken from the country on the march.

Third. Of the movements of the trains of this corps, the time of breaking and going into camp, showing the distance made each day, the place of encampment, the state of the weather, the condition of the roads, and remarks referring to the

operations of the troops, so far as they came under my observation.

The means of transportation of this corps on the 31st October consisted of seven hundred and ninety-four (794) army wagons, and one hundred and ten (110) two-horse ambulances. This number was reduced by turning in a large number of vehicles. We began the march with five hundred and ninety-eight (598) army wagons, and one hundred and five (105) ambulances; of these, we did not lose one.

The animals had, while in Atlanta, been kept at constant labor in transporting to Rough and Ready the baggage of persons going south when ordered to leave the city, and in work upon the fortifications thrown up by our own troops, while holding that place. They had suffered, too, greatly for the want of forage, before the foraging expeditions were sent out. Hence, on the march we lost or had to abandon a large number of animals, but were able to more than replace them with stock taken from the country. This was greatly superior to any I had ever seen in government service. We entered Savannah with animals, on an average, one hundred per centum better than those we started with; we brought to Savannah few empty wagons; we had on haud every pound of artivery ammunition, and almost every pound of small-arm ammunition. No large amount of subsistence stores, except hard bread, was taken from the train; whilst, on the other hand, a large amount of property of various kinds was added to the loadings.

The troops lived luxuriously, and the animals were generously fed. The composition of the column with which we moved was admirable; with a pontoon train, a corps of engineers, and the infantry in part unencumbered and in part distributed along the trains, no impediments delayed us long. We could corduroy many miles of road, rebuild or construct bridges, and bring our wagons through almost bottomless swamps, and over almost impracticable roads.

I cam ot suggest any defects in organization, personal or material, of the department, as shown by the results of this campaign; on the contrary, everything seemed to prove the ability, foresight, and skill of the generals commanding, and of the chiefs of the several staff departments. I am at a loss, too, within the limited space allowed me, to set forth the manifold incidents of the march, which was full of interest and information. The experience of commanding officers and of officers of every department was greatly enlarged. That experience will hereafter enable the one with wisdom, and the other with competent knowledge, to conduct campaigns which will add lustre to our arms, and greatly promote the interests of our government, with a small loss of life and little expenditure of means.

All of which is respectfully submitted.

Your obedient servant.

HENRY M. WHITTELSEY,

Captain and Acting Chief Q. M. 20th A. C.

Brevet Brig. Gen. L. C. EASTON, Chief Quartermaster M. D. M.

Report of movements of trains 20th army corps, left wing, army of Georgia, on the march from Atlanta to Sarannah, Georgia. November 15 to December 31, 1864.

Tuesday, November 15.—Left camp 9 a. m.; arrived at Stone mountain 5 p. m.; distance 16 miles; roads good; weather fine. Left Atlanta; the public buildings destroyed, and part of the city on fire.

Wednesday, November 16.-Left camp 9.30 a. m.: arrived at McGuire's farm 4.30 p. m.:

distance, 8 miles; roads good; weather fine.

Thursday, November 17. - Left camp 7.30 a. m.; arrived near Cornish creek 6.30 p. m.;

distance, 15 miles; roads good; weather fine.

Friday, November 18.-Left camp 7.30 a. m.; arrived at Jones's farm 7.30 p. m.; distance. 16 miles; roads good; weather, rained in the night. Destroying Georgia railroad-burned depots, tanks, &c., and destroyed track and wood at Social Circle and Rutledge

Saturday, November 19,-Left camp 7 a. m.; arrived at Brock's farm, beyond Madison, 1 . m.; distance, 7 miles; roads good; weather rainy. 2d division sent to burn bridge across

Oconce river.

Sunday, November 20 .- Left camp 8 a. m.; arrived towards Eatonton 4.30 p. m.; distance.

12 miles; roads good; weather cloudy—rained at 5 p. m.

Monday, Nortinher 21.—Left camp 7 a. m.; arrived five miles beyond Eatonton 12 m.; distance, 13 miles; roads very muddy—bad; weather very rainy. Hard frost this night. Tuesday, Norember 22.—Left camp 7.30 a. m.; arrived at Milledgeville 5 p. m.; distance.

15 n.i.cs; roads fair; weather very cold, but clear.

Wednesday, November 23.—In camp all day; weather very cold, but clear. Burnt arsenal

and penitentiary; destroyed arms and munitions of war.

Thursday, November 24.—Left camp 8 a. m.; arrived near Bluff creek 4 p. m.; distance. 13 miles; reads fine; weather fine—cold. Built bridge over Buffalo creek.

Friday. November 25 .- Left camp 8 a. m.; arrived at Buffalo creek 4.30 p. m.; distance. 8 miles: roads fine; weather fine-warmer. Skirmish with the enemy this evening.

Saturday, November 26.—Left camp 7 a. m.; arrived at Sandersville 10 a. m., by odometer: distance, 8 miles; roads good; weather fine-warm. Skirmishing on entering Sandersville. 14th corps train precedes ours.

Sunday, November 27.-Left camp 9 a. m ; arrived at Davisboro' 6.30 p. m.; distance, 15.27 miles; roads good; weather fine-warm. Burnt the court-house and jail at Sanders-

ville before marching.

Monday, November 28 .- Left camp 7.30 a. m.; arrived at Ogeechee river 12 m.; distance, 9.23 miles; roads swampy; weather fine—warm. 1st and 2d divisions sent to destroy the railroad from Davisboro' to the river; we found the bridge across Ogeechee burnt—rebuilt it.

Tuesday, November 29.—Left camp 12 m.; arrived beyond Louisville 5 p. m.; distance.

6.13 miles; roads good, except through the swamps, which we corduroyed; weather fine-

warm. Crossed on pontoons, passing through Louisville.

Wednesday, November 30.—Weather fine—warm; roads good, except through the swamps.

which we corduroyed. 1st and 2d division troops rejoin command.

Thursday, December 1.-Left camp 9 a. m.; arrived at Baker's creek, near Birdsville, 5.15 p. m.; distance, 13.17 miles; roads good, except through the swamps, which we corduroyed: weather fine-warm. Michigan engineers build bridges across creeks.

Friday, December 2.-Left camp 7.30 a. m.; arrived at Buckhend church 4.15 p. m.; distance, 10.89 miles; roads good, except through the swamps, which we corduroyed; weather

cloudy. Passed the Millen (prison) stockade on our left.

Saturday, December 3.-Left camp 8 a. m.; arrived at Horse creek 5.15 p. m.; distance. 15.52 miles; roads good, except swamps; weather fine. Some of our troops destroyed a mile half mile on left of road, burning the stuice gate and flooding the road, delaying the trains 12 bours.

Sunday, December 4.— Left camp 7 a. m.; arrived at pine woods 5 p. m.; distance, 14.73 miles; roads good, except swamps; weather fine. Train of cavalry division (211 wagons)

ordered to move with us.

Monday, December 5.-Left camp 4 p. m.; arrived near Little Ogeechee river 6 p. m.; distance, z.81 miles; roads good, except swamps; weather fine. Roads barricaded by fallen timbers.

Tuesday, December 6.—Left camp 6 a. m.; arrived at Cowpen creek 4.30 p. m.; distance, 16.26 miles; roads good, except swamps; weather, rained in night. Crossed Turkey creek. Collected captured horses and mules here to remount cavalry who had lost animals in late action at Waynesboro'

Wednesday, December 7 .- Left camp 8.30 a. m.; arrived at Ebenezer creek, near Spring-

field, 4 p. m. distance, 9.68 miles; roads swampy; weather fine.

Thursday, December 8.—Left camp 9 a. m.; arrived at Springfield 12 m.; distance, 0.93 mile; roads swampy; weather fine.

Thursday, December 8.—Left camp 3 p. m.; arrived at St. Augustine's creek 7 p. m.; dis tance, 5.55 miles; roads swampy; weather fine. Not much forage or subsistence stores found in the country passed over in the last two days-it is all rice fields and swamps.

Friday, December 9.—Left camp 9.30 a. m.; arrived near Monteith 5.45 p. m.; distance. 14.15 miles; roads, good tumpike; weather cloudy. Found forts in front and the roads barricaded; attacked the forts-rebels evacuated.

Digitized by Google

Sa'urdau, December 10.-Left camp 10 a m.; arrived five miles from Savannah 4.30 p. m.; distance, 10.53 miles; roads, good turnpike; weather cloudy. Captured General Harrison, commandant at forts, yesterday

Sunday, December 11.—Weather, fine till the 21st. First day's siege of Savannah.

Monday, December 12.—Winyar's Lattery captured the confederate steamer Resolute with 7 officers and 16 men.

Tusday, December 13.—Steamer Resolute turned over to me; manned her and commenced repairs. Fort McAllister captured. Running the rice mills in neighborhood.

Wednesday, December 14.-

Thursday, December 15.—Sent 150 wagons to King's bridge for supplies.

Friday, December 16.-

Saturday, December 17 .- Received our first mail.

Sunday, December 18 .-

Monday, December 19 .-

Tuesday, December 20 .- Savannah evacuated.

Wednesday, December 21.—Left camp 12. 30 p. m.; arrived 2. 30; distance 5. 50; moved into the city.

25 marching days, averaging 11.25 miles per day, 281.55 HENRY M. WHITTELSEY,

Captain, Acting Chief Quartermaster 20th Army Corps.

## OFFICE CHIEF QUARTERMASTER CAVALRY COMMAND. Swannah, Ga., Jinuary 19, 1865.

GENERAL: In accordance with instructions received from your office this date. I have the honor to submit the following report of the marches of the cavalry trains and operations of the Quartermaster's department from November 15, 1864. up to the time of reaching position before Savannah December 10, 1864:

Left Atlanta on the morning of the 15th November, marching toward McDon-Had a good road, with the exception of one bad hill, until we got within about seven miles of McDonough, when we had a bad creek to cross; here the road in wet weather must be very soft and bad. Passed through McDonough on the 17th; we had good roads from this on until we reached Ocmulgee mills, on the Ocmulgee river, November 19. On the south side of Ocmulgee river there is a very long, steep hill; it had been raining, and the mud was very deep and heavy on the steepest part of the hill; before my train arrived there nearly every wagon stalled. There was a large pioneer corps at the hill, but they only helped push when the wagons stalled. I took a small number of negro pioneers I had and shovelled all the mud off to the side of the road; this left the road very slippery; as the soil was clay, I then had the road picked up into the dry earth and made rough, and the trains went up the hill without any difficulty. I would here remark that I had organized a pioneer corps of fifty negroes, with picks, spades and axes, and all through the march I found their services invaluable. Indeed, without their services it would have been impossible for me to have got my train along. I think every division train should have a pioneer corps along with it on all marches, and then that quartermasters should see that any bad places in the road are repaired before a wagon is stalled or broken down in them; this is often not the case. My experience is that "one minute's work in time" repairing roads "saves more than nine."

The road from Ocmulgee to Milledgeville is very low and soil clayey In dry weather roads are very good; but when I moved over them it was raining and the roads were terrible, the wagons often going in up to the beds in mud. least one-half of the roads would have to be corduroyed in order to pass heavy trains in wet weather. Arrived at Milledgeville 24th November.

The road from Milledgeville to Sandersville I found very good until we got near Sandersville, where we had Buffalo swamp and Buffalo creek to pass This was a bad swamp, and had to be corduroyed for about half a mile. The road was good from Sandersville to the Ogeechee river, and soil sandy. Reached Ogeechee river at night, 28th November. Enemy attacked rear of my train, but were repulsed. On the south side of the Ogeechee river there is a very bad swamp, and between two and three miles of it had to be corduroyed. The marsh was so soft it required a force constantly at work on it, as the timber all sank down

into the ground.

Crossed Big Buck Head creek at Big Buck Head church; here was an admirable place, especially on the south side, for a force to prevent an enemy's crossing. December 3, passed to the east of Millen, roads very low and swampy; in wet weather they must be almost impassable. December 4, on the road from Millen to Springfield had to cross one very bad swamp, where it was necessary to build a cordurory road for half a mile; from this time until we reached Springfield we had a constant succession of swamps. About ten miles northeast of Springfield there is a swamp five miles wide, and, in order to make it available for military operations in wet weather, it would be necessary to cordurory the whole five miles. I saw more than one hundred wagons stalled in this swamp, and a number broken down. The pioneer corps of the army had gone on ahead before the roads were bad, consequently there were but very few men to repair the road.

The regular pioneers usually go in advance of the army and repair some of the worst places; by the time half of the trains have passed over the roads in this marshy country, places that were at first apparently good have become very bad; and as the pioneers are out of reach, the quartermaster has to rely upon his own resources, and I would urge this as another reason why each division quartermaster should be required to have a pioneer corps, and then repair the

roads where he sees that they need repairing.

I left Springfield on the 8th December, and arrived within six miles of Savannah on the night of 10th instant; roads mostly very good, but had two or three swamps to pass through. I would respectfully suggest that improvements might be made in running trains. Instead of moving large train, say 200 wagons, as an entire train, and on good roads hurrying the rear wagons up to "keep closed up," and jamming up together at bad places and waiting, I would divide the 200 wagons into sections of not more than 50 wagons in each; then place the slowest walking teams I had at the heads of each section and move the head of each section as slow as I possibly could, allowing for bad places and the little stops that always will occur through the train; this will keep the last team of each section on a fast walk, and will allow the gaps that must occur to be between sections instead of between wagons; this will give the wagon-masters a chance to attend better to the teams under their charge; the sections are bound to come together at every bad place, and by this means will move much more steadily, and avoid all hurry and trotting of teams. Owing to the scarcity of forage, and the impracticability of hitching the mules away from the wagons, the mules very often eat the wagon tongues and end-gates so as to spoil them; the iron to protect them cannot always be procured in the field, and I would suggest that all contractors be required to nail strips of iron along the tops of wagon tongues and end-gates to prevent the mules from eating them. I think it would be economy to manufacture jockey sticks out of 3-inch round iron instead of wood. as so many of them are broken.

I have made these few suggestions (as per invitation) because I think if acted upon they would benefit the service; and hoping they may not be amiss,

I am, general, very respectfully, your obedient servant, G. E. DUNBAR,

Major and Chief Q. M. Cavalry Command, Army of Georgia.

Bvt. Maj. Gen. M. C. MRIGS,

Quartermaster General U.S.A., Washington, D. C.

No. 93.

OFFICE CHIEF QUARTERMASTER 15TH ARMY CORPS, In the field, South Carolina, January 26, 1865.

GENERAL: I have the honor to respectfully report, in compliance with the order of the Quartermaster General, dated at Savannah, Georgia, December 26, 1864, that, on the 15th day of November last, the 15th army corps left Atlanta, Georgia, with about eight hundred and fifty six-mule teams, and one hundred and fifty two-horse and two-mule ambulances, divided among the four divisions of the corps, which amounted to about forty teams to the thousand troops for duty, not counting non-effectives or civil employés. About two hundred and twenty-five of these wagons were loaded with ammunition, each carrying 2,500 pounds, net, ammunition, which was not diminished much until we commenced the siege of Savannah.

About five hundred wagons were loaded with commissary stores, forty-eight

boxes of hard bread each, and other stores were more heavily loaded.

The remainder of the trains were loaded with hospital stores, pioneer tools and materials, a small quantity of camp and garrison equipage, and officers' private baggage. Eight wagons were loaded with shoes and socks.

Each wagon and ambulance, in addition, on the start carried five days' forage of grain, and three rounds of shoes for its team. Before this forage was expended, plenty was found in the country; and, until wagons were emptied by

issue, forage was gathered and brought in by mounted "bummers."

When we set out our mules were in bad condition, having been starved around Atlanta for want of forage, but soon recruited on the march by good care. Fresh mules were gathered to replace the broken down, from persons whose names are unknown, and when we arrived at Savannah our trains were very fine.

An active lieutenant and regimental quartermaster was detailed to assist the division quartermaster in the movement of his trains, and usually remained in the rear with a small detachment of negro pioneers, and good fresh mules ready harnessed, to help forward any wagon in distress. Miles of corduroy were built almost every day by organized pioneers, without which the trains could not have been moved.

The pontoon train belonging to the army of the Tennessee was badly appointed, and utterly without organization, and therefore caused much trouble and delay. The trains of the 15th corps were often called upon to go back a day and night's march and haul it up, and finally had to take one-half of it to haul all the time. Why it was in such condition is unknown to me. Had it not been for this matter the march would have been made by our trains with ease, and the mules improved every day until we entered Savannah; after which they were soon much reduced for want of forage, having nothing but a very little rice for a considerable time.

I have the honor to be, general, very respectfully, your most obedient

servant.

G. L. FORT,
Lieut. Colonel and Chief Quartermaster 15th Army Corps.

Major General M. C. MEIGS, Quartermaster General. Through Bigadier General L. C. EASTON, Chief Quartermaster.

JOHN V. FUREY, Captain and Assistant Quartermaste

#### No. 94.

OFFICE CHIEF QUARTERMASTER 15TH ARMY CORPS,

Louisville, Kentucky, July 1, 1865.

GENERAL: I have the honor to respectfully report, that at the close of my last annual report, June 30, 1864, I was on duty at Memphis, Tennessee, in charge of river transportation and what appertained thereto, by the assignment of Brigadier General Robert Allen, chief quarterm ster, and reporting to Captain A. R. Eddy, assistant quartermaster, in charge of the depot, and so continued on duty until September 1. Having been, by direction of the President, assigned to duty as chief quartermaster of the 15th army corps, with the rank of lieutenant colonel, from July 21, 1864, was therefore relieved from duty at Memphis, and after transferring the public property in my charge, on the 15th day of September, 1864, left Memphis to join the corps, and proceeded via Cairo, Illinois, Louisville, Kentucky, and Nashville, Tennessee, and arrived at Atlanta, Georgia, September 25, and reported to Major General P. J. Osterhause, then commanding the corps, and on the 28th September was announced as chief quartermaster, and immediately entered upon duty. The corps consisted of four divisions.

October 4, 1864.—The corps, with the other armies under the command of General Sherman, started in pursuit of the rebel army, under the command of the rebel General Hood.

The mules of the corps were poor and miscrable, and we had no forage. Hood was not overtaken, and General Sherman returned with his army to Atlanta, Georgia, early in November, and fitted out as well as possible, and loaded the trains with supplies, and on the 15th day of November, 1864, severed all communications with the north, and set out on a campaign, which, after continued skirmishing, hard marching, and a battle at Griswoldville, the assault of Fort McAllister, and the siege of Savannah, terminated in the capture of that city on the 21st day of December. We foraged upon the country, and recruited our animals on the campaign, but there being no forage to be had in Savannah, they soon became considerably reduced.

January 8, 1865.—Major General John A. Logan returned and resumed command of the corps, and a new campaign was begun through South Carolina.

The corps proceeded to Beaufort, South Carolina, partly by small ocean steamers and partly by water. It rained in torrents almost every day, and the whole country was flooded.

January 28.—The corps began to move from Beaufort; passed Pocotaligo, and then floundered on through the mud and water to Columbia, the capital of the State of South Carolina, which was captured, occupied, and burned on the 17th day of February, having had continued fighting and skirmishing from Savannah

February 21.—We again resumed our march, and thousands of refugees, white, black, and mixed, followed. The roads were worse. We had to corduroy and bridge miles of swamps every day. Captured Cheraw, South Carolina, Fayetteville, North Carolina, and on the 20th and 21st days of March had a battle at and near Bentonville, North Carolina, and entered Goldsboro', North Carolina, March 24, where we received supplies.

April 10.—Again set out on another campaign. The roads were very bad. We reached, captured, and entered Raleigh, the capital of North Carolina, April 13, and here we rested until the rebel General Johnston surrendered his army to General Sherman, when we made ready to march homeward.

April 29.—We set out lightly loaded for Washington city, and of course hav

ing no opposition, reached Alexandria, Virginia, via Petersburg and Richmond,

May 19, 1865.

Major General Logan having been assigned to the command of the army of the Tennessee, Major General Hazen assumed command of the 15th army

corps May 22.

May 24.—The corps was reviewed in Washington city, and immediately after commenced embarcation by the Baltimore and Ohio railroad, via Parkersburg and by the Ohio river, in transports to Louisville, Kentucky, where the corps went into camp, and now awaits orders.

No public property for which I was accountable has been lost, destroyed or captured during the year, and all forage gathered and all property captured during the year by the corps has been taken up and accounted for by the di-

vision quartermasters.

2. Reference is respectfully made to a statement made in accordance with form A, to be filed herewith.

3. Reference is respectfully had to a statement made in accordance with form

B, to be filed herewith.

- 4. Reference is respectfully made to a statement of public moneys to be filed herewith.
- 5. Reference is respectfully made to a statement of the amount of transportation furnished during the year, to be filed herewith.

6. I have the honor to respectfully state that I have performed no duties during the year that could be reported under this head.

7. Reference is respectfully made to a statement made in accordance with form C. to be filed herewith.

I have the honor to be, very respectfully, your most obedient sevant,

G. L. FORT.

Lieut. Colonel and Chief Quartermaster 15th Army Corps. Major General M. C. Meigs,

Quartermaster General U. S. A. Washington, D. C.

Statement made in accordance with paragraph 5, section 5. of General Orders
No. 29, Quartermaster General's office, series of 1864.

No amounts were paid by me for railroad or other land transportation during the year ending the 30th of June, 1865.

No amounts were paid by me for transportation on rivers or lakes, or for transportation by sail or steam vessels on the ocean, during this year.

The steamers chartered and employed by me on the rivers, as per my roll No. 2, were all paid on voucher, form No. 22.

Vessels seized and used, the rate of hire of which was not agreed upon, were given vouchers, stating the period of service, but not the rate of pay. This was left to be fixed by Colonel L. B. Parsons, chief quartermaster W. R. T.

The money received by these vessels for private freight and passengers carried by them was indorsed on their vouchers, to be deducted by Colonel Parsons upon settlement.

<sup>&</sup>quot; Not determined.

REMARKS.—The rate of pay of these steamers was determined, without my knowledge as to the amount, by Colonel L. wis B. Parsons, chief quartermaster W. R. T., to whom I reported the period of service, in accordance with existing orders, and who settled with all steamers employed by me.

#### No. 95.

### HEADQUARTERS FOURTEENTH ARMY CORPS,

Office Chief Quartermaster, Louisville, Ky., July 1, 1865.

In accordance with General Orders No. 29. Quartermaster General's office, dated Washington, D. C., July 6, 1864, I submit herewith my annual report for the fiscal year ending the 30th day of June, 1865.

My report as assistant quartermaster United States volunteers, on duty as such with the second division 14th army corps, for fiscal year ending the 30th day of June, 1864, was forwarded from in front of Atlanta, Georgia, during the month of July last. Concerning my services previously to the present report I have the honor to refer the department to that report, merely stating here that on the 1st day of July, 1864, I was still on duty, by order of the chief quartermaster of the department of the Cumberland, as assistant quartermaster second division 14th army corps.

July 1, 1864.—The second division 14th army corps was still laying in front of Kenesaw mountain, where it remained until the falling back of General Joe Johnston.

July 3.—Started at daylight with the train across Pine mountain, towards Marietta, Georgia, this place having been, during the night, evacuated by the rebel forces. Owing to the great number of transportation on the road leading from Big Shanty to Marietta, on the right of Kenesaw mountain, was unable to proceed further than to the neighborhood of Marietta; went in camp about one mile from Military Institute; water and grazing good; weather warm.

July 4.—S'arted at daylight; passed by Military Institute; took county cross-roads to the right of Marietta and Chattahoochee railroad bridge road; camped near a good large spring, about seven miles from Marietta; weather very warm;

distance of day's march eight miles.

July 5.—In camp.

July 6.—Started at daylight, on road leading towards Vinning's Station; camped about equal distance from the Chattahoochee river and Vinning's Station, to the right of wagon road from Marietta to Chattahoochee bridge; distance of day's march nine miles; weather very warm.

July 6 to July 17.—In camp; supplies drawn from depot at Marietta; refitted second division 14th army corps with the required estimates of clothing, &c.

July 18.—Started at 2½ a. m., Vinning's Station; camped half mile beyond Vinning's Station, near Chattahoochee river; distance of day's march four miles; weather very warm.

July 19 to July 23.—In camp, repairing transportation.

July 24.—Crossed Chattahoochee river with train; camped four miles from Atlanta, about one mile from railroad.

July 25 to August 3.—In camp; weather very warm; drawing forage from Vinning's Station.

August 4.—Directed by Colonel A. J. Mackay to receive and issue the full estimates of clothing, camp and garrison equipage, and quartermasters' stores to the 14th army corps.

August 5 to August 8.—Very busy issuing; supplies having been sent without invoices, and having been unloaded at the Vinning's Station without having been notified, causes me to take double care in invoicing as well as issuing same.

August 9 to 19, inclusive.—In camp; was ordered to report, by direction of General Thomas, commanding the department, to commanding officer 14th army corps, in the capacity as acting chief quartermaster 14th army corps.

August 20.—Troops moving in the morning, but return to old camp at night;

weather very fine.

August 21 to August 24 —In camp, transferring transportation to Lieutenant A. L. Coe, acting assistant quartermaster second division 14th army corps.

August 25.—Started at 7 a. m; moved eight miles to the right; weather fine.

August 26.—Started at 12½ p. m. towards the right; heavy rain, making road
very bad; camped at 6½ p. m; distance of march six and a half miles.

August 27.—Moved at daylight in southwest direction; distance of march one

mile.

August 28.—Started at daylight; progress very slow; camped at night at Red Oak Station; weather cloudy.

August 29.—In camp.

August 30.—Moved hearly direct south course to-day; march during the day seven miles.

August 31.—Moved three miles; heavy skirmishing and shelling.

September 1.-Train in camp near Jonesboro'; troops heavily engaged.

September 1 to 6, inclusive.—In camp near Jonesboro'.

September 9 to October 3 .- In camp at Atlanta.

September 7.—Started at daylight for Atlanta. September 8.—Arrive with train at Atlanta.

#### CAMPAIGN AFTER HOOD.

October 3. 1864.—Left Atlanta, Georgia, on the return after Hood. The second division 14th army corps having been ordered to the rear by the railroad on the 29th of September, I was directed by General J. C. Davis, commanding the corps, to order the trains of that division to remain at Atlanta, Georgia; camped at the railroad bridge across the Chattahoochee; distance of day's march, eight miles.

October 4.—Started at 8½ a. m.; camped at old camp, eight miles from Marietta, but having been in camp about three hours received marching orders; left again at 4 p. m., on a road leading towards Mount Zion church; went in camp at 9 p. m.; distance of day's march, nine miles; rained slight showers during the day.

October 5.—Started at daylight, on a road leading toward Acworth; weather clear, but very warm; camped one mile from Acworth; good water and grazing.

October 6 to 9.—In camp.

October 10.—Started at daylight to Allatoona Pass, five miles from Acworth; arrived there at 9 a. m.; camped at Allatoona Pass till 8 p. m.; received orders to push forward to Etowah river that night; camped on bank of Etowah; arrived at 2 a. m.

October 12.—Left camp at 7 a. m.; passed through Cartersville, Cass Station; camped at Kingston, Georgia; weather very warm; distance of day's march, sixteen miles; succeeded in drawing grain at Kingston, Georgia, for use of corps.

October 13.—Left camp, with corps train, on upper river road; road very swampy; must be impassable in rainy weather; corduroyed fully two miles of road; camped on Rome and Resaca dirt road, five miles from Rome; country rich; succeeded in getting forage from the country for the first time since leaving Atlanta, Georgia; distance of day's march, thirteen miles.

October 14.—Left camp on Rome and Resaca road; the transportation of the army being all on the road, makes it slow progress; distance of day's march,

nine miles; forage plenty; road hilly, and plenty of water.

October 15.—Left camp at daylight; passed through Calhoun Station and Resaca Station; camped two and a half miles from Resaca, on Dalton dirt road; distance of day's march, fourteen and a half miles.

October 16.—Left camp at 2½ p. m. for Resaca; ordered to make Snake Creek gap; transportation being all on the Snake Creek gap road, had to lay over till 7 p. m.; camped near Snake Creek gap; arrived in camp at 10 p. m.; distance of day's march, seven miles.

October 17.—Passed through Snake Creek gap, having left camp at 5 a.m.; camped at Ship gap; distance of day's travel, fifteen miles; day warm; forage

scarce.

October 18.—Left Ship gap, on Summerville road; weather clear; distance of day's march, twelve miles.

October 19.—Started at daylight; made ten miles; camped near Chattooga river; weather clear; crossed Chattooga river after dark.

October 20.—Started at 10 o'clock a. m.; passed through Summerville, Alabama; town deserted; camped near Tacoosa creek, bottom land, near Gailesville, Alabama; distance of day's march, fourteen miles; forage plenty.

October 20 to 29.—In camp; directed train of first division and third division 14th army corps to report at Rome, Georgia, after rations for command, with orders to remain at that point until further orders.

October 30.—Started at 4 a. m. for Rome, Georgia, on Rome and Gailesville road; weather fair; distance of day's march, twenty-six miles; road good.

October 31.—In camp at Rome, Georgia.

November 1.—Started at 11½ a. m; camped on main road from Rome to Kingston, Georgia, eight miles from Rome, near good water; day very fine.

November 2.—Started at daylight for Kingston, Georgia; camped at Kingston, Georgia; weather fine; distance of day's march, five miles.

November 3 to 8.—In camp at Kingston, Georgia.

November 8.—Left camp at daylight; passed through Cassville; camped at Cartersville; distance of day's march, sixteen miles; weather cloudy.

November 8 to 12.—In camp at Cartersville, preparing for march towards the

November 13.—Left Cartersville; destroyed bridge across Etowah river; cut loose from communication; passed through Allatoona, eix miles, Acworth, five miles; camped at Big Shanty, five miles; distance of day's march, sixteen miles; railroad destroyed effectually.

November 14.—Left camp at daylight; seven miles to Marietta, twelve miles from the Chattahoochee river; camped on the south side of Chattahoochee river;

distance of day's march, nineteen miles.

November 15.—Left camp at daylight; arrived with corps train at Atlanta, Georgia, about noon, having made with the trains of the 14th army corps, (second division 14th army corps excepted.) 245 miles since the 3d day of October, 1864. Immediately on the arrival at Atlanta, I directed the quartermaster of the 14th army corps to draw the estimates of clothing and forage required; I having forwarded a special messenger from Kingston, Georgia, to Lieutenant A. L. Coe, acting assistant quartermaster second division 14th army corps, with the estimates, and orders for Lieutenant A. L. Coe to draw the same, and have everything ready on our arrival at Atlanta. The issues were made with such despatch that twenty-four hours after our arrival the clothing had been issued to the troops, and all wagons were loaded with the necessary supply for a forward march.

#### CAMPAIGN THROUGH GEORGIA.

November 10, 1864.—Left Atlanta, Ga., at 11½ a. m.; camped near Atlanta and Augusta railroad, seventeen miles from Atlanta; weather fair; road leading to the right of Stone mountain.

November 17.—Started at daylight, road leading through Lithonia Station and Conyers; day fine; forage getting plenty; distance of day's march, fifteen miles; camped near Yellow river.

November 18—Started at daylight; passed through Covington; day very fine; forage plenty, and country well watered; soil sandy; distance of day's march, fifteen miles.

November 19.—Started at daylight; passed through Newborn or Sandtown, having left the road parallel with the railroad about 9 a.m.; camped four miles from Shady Dale; distance of day's march, seventeen miles; weather cloudy, with occasional slight rain-storms; country rich.

November 20.—Started at daylight; passed through Shady Dale; camped near Eaton factory, and about fifty bales of cotton destroyed; factory employed about sixty hands, in the manufacture of cotton cloth; good water-

power; country rich; distance of day's march, fourteen miles.

November 21.—Started at daylight; shortly rained very hard all day; country hilly; hills yellow clay mixed with sand, which, by the passage of army trains, cut up very fast; crossed several creeks at good fords; camped at night at Clopton mills; 9 p. m., very high wind, turning exceedingly cold; 4 a. m., of 22d, a light crust of ice on standing water; distance of march, eleven miles

November 22 —Started at daylight; weather very cold, with high wind; marched eight miles; camped about 2 p. m., at General Cobb's plantation; trains well closed up.

November 23.—Started at daylight; arrived at Milledgeville, the capital of Georgia, about noon; weather fine; forage and water plenty; roads sandy; distance of march, ten miles.

Digitized by Google

Norember 24—Started at noon; crossed Oconee river on bridge; country hilly; soil sandy; forage getting scarcer; camped eight miles from Milledge-ville, on Sandersville road; weather fine.

November 25.—Started at daylight; country hilly; have to go some distance off the road to procure sufficient forage for animals; distance of day's march,

twelve miles.

November 26.—Started at daylight; slight skirmishing ahead; trains are travelling very compact, with heavy flankers on both sides; weather fine; camped at Sandersville; distance of day's march, six miles; forage plenty, and near the main road.

November 27.—Started at daylight, but troops being on the same road, do not get fairly off before noon; weather fine; arrive in cump near Central

railroad after dark; distance of day's march, eight miles.

Norember 28.—Started at daylight; passed through Davisboro' Station; burned station-house, several cotton-gins, and effectually destroyed the railroad; crossed Ogeechee river and Rocky Comfort on pontoons; about two miles of very bad swamp; corduroyed through the swamp; arrive with a portion of the corps train at Louisville, Georgia; balance remains on south side of the Ogeechee river, with orders to push forward at break of day; distance of day's march, fourteen miles.

November 29.—In camp at Louisville; trains all arrive in camp.

November 30.—In camp; weather fine; forage plenty.

December 1.—Left Louisville at daylight on Waynesboro' road; day very

fine; soil sandy; distance of march, ten miles.

December 2.—Started at daylight; country getting more swampy; saw the first rice field on the campaign; weather fine; distance of march, twelve miles.

December 3.—Started at daylight for Sampson Station; crossed Buckhead creek and Rocky creek, near junction of same, on two boats, pontoons, each; bridges had been destroyed during the night previously, by some rebel cavalry, said to belong to Wheeler's command; cross three swamps; road seems to be leading around every man's plantation; distance of day's march, eleven miles; camped at Lumpton Station at 9 o'clock p. m.; slight shower; forage plenty.

December 4.—Started at 9 o'clock a. m.; passed Aubuchon church; marched

thirteen miles on Jacksonsboro' road, mostly through pine timber.

December 5—Started at daylight; leave Jacksonboro' on our left, and take the old United States river mail road; camp at Buck Creek post office; soil sandy, mostly through pine timber, and all low places swampy; have to forage some distance off the road; distance of day's march, sixteen miles.

December 6.—Started at daylight; road passed through swamp immediately after leaving camp, on United States river mail road, 2½ miles from Savannah river; distance of day's march, twenty-one miles; scouting and foraging parties find a good many valuable animals hid in the swamps; natives are astonished at the Yankees finding everything; begin to think it is useless to hide from our foragers; quartermasters of the corps are directed to load their trains as heavy as possible with forage and commissary supplies, and, if possible, to forage liberally for that purpose.

December 7.—Marched at daylight; found roads blockaded at four different places, and very swampy; camped twenty-seven miles from Savannah, Georgia, near Ebenezer creek; distance of day's march, twelve miles; rained very hard

all forenoon.

December 8.—Started at 1 p. m.; crossed two miles of swamp, then Ebenezer creek; camp near Ebenezer church; distance of day's march, three miles; twenty-four miles from Savannah, Georgia; rebel gunboat trying to shell the train, but does no damage.

December 9.—Started at daylight, through very bad swamp; cross two creeks on pontoons; camped four miles from Charleston and Savannah railroad bridge, across the Savannah; distance of march, nine miles, mostly swampy; distance from Savannah, fifteen miles; weather cloudy.

December 10 —Started at daylight; distance of march, four miles; camp near Charleston and Savannah railroad, eleven miles from Savannah, Georgia; passed

a rebel fort pierced for six guns.

December 11.—Started at 11 a. m.; left river road near seven-mile post from Savannah, Georgia, for middle ground road; camped in a swamp, between river road and middle county road; distance of day's march, five miles.

December 12.—Marched at daylight; crossed Central railroad; camped on middle ground road, near Station No. 1, on Central railroad; travelled three and a half miles: forage from the country reduced to rice and rice straw.

December 13 to December 16 .- In camp.

December 17.—Communications fairly open; received to-day the first mail from the north.

December 18 to December 21, inclusive.—In camp, drawing a small amount

ot forage from King's bridge, on the Ogeechee river.

December 22.—Entered Savannah: distance from camp. six miles: established headquarters. December 23 to December 31, inclusive, at Savannah, Georgia. During my stay at Savannah, Georgia, I had the honor of forwarding, as directed by the chief quartermaster military division of the Mississippi, Brevet Brigadjer General L. C. Easton, my official report of the campaign from Atlanta to Savannah, Georgia. To make this report complete, however, in itself, I take the liberty to recapitulate the gross gain of the quartermaster's department of the corps, and most respectfully refer, for loss and gain of the different commands of the 14th army corps, to consolidated report No. 4, herewith annexed. I would most respectfully also draw the attention of the department to the fact that the amount fed to animals during the campaign is, by far, less than the actual amount consumed. A good many animals, during the campaign, were picked up by soldiers not connected with regular authorized foraging par-A good many of these, being of a very inferior quality, were turned out as soon as the officers commanding the foraging squads got hold of them, and, in consequence, no account taken of them. In figuring the approximate amount of forage fed, I have taken the average number of animals as reported to this office, and allowed to each only the authorized ration.

Total gain in horses during campaign from Atlanta to Savannah, Georgia, 232; total gain in mules during campaign from Atlanta to Savannah, Georgia, 955; total gain in jacks during campaign from Atlanta to Savannah, Georgia, 5; total gain in ponies during campaign from Atlanta to Savannah, Georgia, 5; total amount of grain captured during same time, 1,420,000 pounds; total amount of grain fodder captured during same time, 1,025,000 pounds.

#### CAMPAIGN THROUGH THE CAROLINAS.

Having been engaged as previously reported from the entrance of the 14th army corps in Savannah, Georgia, in refitting the corps, clothing for the same being very necessary, as well as rest both for animals and men. Headquarters of the 14th army corps left Savannah, Georgia, on the 25th day of January, 1865, the troops as well as the trains having started several days before; but on account of heavy and constant rains, they were for the first time during a year's campaign mud-bound; the rain, however, having ceased, headquarters of the corps left Savannah about 11.30 a. m., January 25, 1865, on middle ground road, weather being very windy. Camped at night near Eden church; distance of day's march, twenty miles. January 26, 1865, started at 7.30 a. m. on Springfield road, being most of the distance through swamps; were under the necessity of cor-

duroying constantly; camped at dark in the midst of a swamp three miles from

Springfield; distance of day's march, ten miles.

January 27 — Marched at daylight; one mile of very bad swamp before reaching Springfield; leaving Springfield, took Sisters' ferry road; forded Turkey creek, in the immediate neighborhood of Springfield; crossed Ebenezer creek a few miles. on, on two pontoons; directly after crossing the last-mentioned creek, a swamp extending about 100 yards, which delayed the passage of the trains for several hours, then timber, with high sandy soil; camped in timber five miles from Springfield; distance of day's march, eight miles.

January 28.—Started at daylight; the road, until str king the old United States river mail road, good, then swampy; camped at Sisters' ferry; distance of day's

march, five miles.

January 28 to February 4.—In camp at Sisters' ferry, Georgia, waiting for Savannah river to recede, it being impossible to get a footing on the South Carolina shore.

February 5.—Crossed Savannah river at Sisters' ferry on pontoon bridge; kept on the north side of the Savannah to Sisters' ferry, South Carolina, distance about two miles, which was on our arrival on June 28, under water, and in consequence, to enable army trains to proceed, had to be corduroyed.

February 6 and 7.—Receiving supplies, clothing, as well as commissaries', at Sisters' ferry, South Carolina; supplies and outfits now pretty complete with

exception of stockings, of which there is great want in this corps.

Fibruary 8.—Trains of the 14th army corps on road for Brighton, South Carolina; took Hudson ferry road, which avoids Big Santee swamp, with exception of an arm of one and a half mile; corduroyed this distance; afterwards struck causeway, and road fair; distance of march, seven miles.

February 9.—Marched at daylight, on Barnwell Court House road; road good, and forage, contrary to expectation, is getting plenty; day very fine; roads

hilly; soil sandy.

February 10.—Marched at daylight; still on Barnwell Court House road; saw first white flag at Mrs. Dr. Irwin's, widow lady, claiming protection; camped near Salkehatchie Mills road, on the Savannah iron ridge; very good; forage plenty; distance of day's march, twenty eight miles.

February 11.—Crossed Salkehatchie; bad swamp for three-quarters of a mile; passed through Barnwell Court House; camped three miles on Barnwell

Court House, on Williston road; distance of day's march, six miles.

February 12.—Marched at daylight; passed with train through Williston, on Charleston and Savannah railroad; camped on south branch of Edisto river; distance of day's march, sixteen miles; weather fine; roads sandy and good.

February 13.—Crossed Edisto on bridge; then one and a half mile of bad swamp; had to cordure the whole distance; camped edge of swamp, in large corn-field.

February 14.—Left camp at 9 a. m., on Columbia road, Upper Edisto river; camped on north bank of the same; weather very cold and sleety; distance of day's march, sixteen miles; forage getting very scarce; pine lumber all the way.

February 15.—Marched at daylight; after a few miles, when in the neighborhood of eighteen miles from Columbia, South Carolina, took Lexington road; road, very sandy; country barren; forage scarce for one day's supply, although parties are scouring the country for miles on either side of the road; natives claim from five to ten bushels of corn to the acre; camp in pine timber on Red Bank creek; distance of day's march, sixteen miles.

February 16.—Started at day light; passed through Lexington, South Carolina, at uoon; camped on Twelve-mile creek; distance nine miles; weather clear;

forage scarce, but water plenty.

February 17 —Started at daylight; crossed the Saluda river on seventeen pontoons; took Columbia and Florence road; camp four miles from Spring Hill road;

distance of day's march, fifteen miles; forage to-day plenty; over 3,000 bushels of corn burned by some stragglers, against orders.

February 18.—Marched at daylight; camped one-half mile from Broad river; distance travelled, five miles; road had to be corduroyed for two miles; weather clear and fine.

February 19.—Crossed Broad river on pontoon bridge; camped three miles from Broad river, on Alston road; road for one-half mile after leaving the river very bad, swampy, then good.

February 20.—Marched at daylight; camped near Alston and Winnsboro' Cross-road; road good; soil, red clay; forage plenty; weather fine; distance of

march, five miles.

February 21.—Marched at daylight; crossed Little river on bridge; left Winnsboro' road, and took Chester Court House road; crossed Jackson creek, near Lebanon church; camped two and a half miles from Adger's Station, on South Carolina and Charlotte railroad; country rich; weather fine; distance of day's march, ten miles.

February 22.—Marched at daylight; passed through Adger's Station and White Oak station, on South Carolina and Charlotte railroad; leave the railroad at the latter point, and take the Watern dirt road; camp near Watern church; distance of march, eleven miles; weather fine, but towards evening signs of clouding up; got in camp at 2 p. m.

February 23.—Marched at daylight; crossed Watern creek on log bridge; commences to rain; camp near Rocky Mt., on Catawba river; distance of day's

march, twelve miles.

February 24.—Started at 11 o'clock a.m.; rains in torrents; crossed Catawba river with first division 14th army corps; banks on both sides very high; soil, red clay; have to corduroy and pull up all teams by run; it requires thirty-two pontoons to bridge the river; river rising very fast.

February 25—Raining very hard; have to quit passing trains; bridge is broken, and several boats swept away; forage in Catawba bottom plenty.

February 26.—Still raining; bridge not yet passable; large force at work on it. February 27.—Still raining; repairing bridge, but current so swift and strong that it is impossible to pass the train; fixing anchors of wood by cutting down large oak trees and tying, by means of fifth chains, large rocks in the point of the crotch made by the two principal branches of it.

February 28.—Bridge is safe to day; crossed transportation of the corps on the north side; still raining; mud bottomless; nothing but corduroy of the

strongest and heaviest kind will uphold the trains.

March 1.—Started at daylight; roads bottomless; soil, red clay; corduroying all day; on country by-road towards Taxaharı, South Carolina; distance of day's march, seventeen miles; still raining.

March 2.—Started at daylight; road still red clay and bottomless; camped at Taxaham, South Carolina; high winds in the evening, and appearance of

clearing up; forage plenty.

March 3.—Started at daylight; after four miles of red clay soil, which still is next to impassable, strike sandy soil; take the Lancaster and Chesterfield road, twenty miles from Lancaster; leave Lancaster and Chesterfield road, nine miles from Chesterfield; take Harley's Ferry road; camped three miles from the crossroads; the last three miles of red clay soil, requiring corduroy; distance of day's march, twenty-three miles.

March 4.—Started at daylight; after four miles of red clay soil, strike sandy road; distance of day's march, sixteen miles; rained in showers during the day; in the evening clearing up; camped near Sandsboro' ferry, on Pe Due river.

March 5 and 6.—In camp.

March 7.—Crossed the Pe Dee river on pontoon bridge of forty-two pontoons; marched fifteen miles on Fayetteville road; soil, after crossing Pe Dee river, sandy; forage plenty.

Digitized by Google

March 8.—Marched at daylight; crossed Lumber river on a bridge—bridge about 50 yards in length; camped near 34-mile post, on Fayetteville road; distance of day's march, twenty miles.

March 9.—Started at daylight; camped on 19-mile post from Fayetteville; raining all day; distance of march, fifteen miles; have to corduroy large portions

of the road.

March 10.—Marched at daylight; camped at 9-mile post from Fayetteville; distance of day's march, ten miles; still have to corduroy large portions of the road.

March 11.—Marched at daylight; captured Fayetteville, North Carolina; distance of day's march, nine miles; established corps headquarters in government building, near the old United States arsenal.

March 12 and 13.—In camp at Fayetteville, drawing commissary supplies

and a few pairs of boots and bootees for this corps.

March 14 —Crossed Cape Fear river on seventeen pontoon boats; camped

one and a half mile from the river; weather fine; evening, clouding up.

March 15.—In camp; 12 o'clock m., received orders to proceed with train on Raleigh road; road leads through a swamp, and being an old worn out corduroy, so much the worse; a heavy thunder-storm; distance of day's march, six and a half miles.

March 16.—Wait for trains of corps to close up; 1 p. m., proceed on Raleigh road to the intersection of Goldsboro' road; road very bad; have to cordure

continually; distance of day's march, five miles; forage scarce.

March 17 —Started at daylight, with the trains of the corps, on Goldsboro' road; road through, as the citizens informed me, is a continual swamp, till within the immediate neighborhood of Goldsboro'; have to corduroy every inch of two days' road; distance of march, five miles; forage scarce.

March 18.—Started at daylight; nothing but swamp; slow work to get ahead; cross Black river on a log bridge; distance of day's march, five miles; for-

age scarce.

March 20.—Started at 1 o'clock p. m.; still swamp; corduroyed constantly; distance of day's march, five miles; weather fine.

March 21.—Started at 9 o'clock a. m.; crossed south fork of Falling creek; road very bad; commenced raining about noon; distance of day's march, five miles.

March 22.—Commenced moving train across north fork of Falling creek at 2 o'clock a. m.; crossed the creek on a log bridge; two miles after crossing creek, strike upland, with sandy soil; camped at cross-roads of Coebridge and Everets-ville, and Goldsboro' and Deerfield, about 3 mile from Neuse river, and about five miles from Goldsboro', North Carolina; distance of day's march, fifteen miles; weather fine; forage plenty.

March 23.—In camp; ordered trains of the corps to Kinston for supplies;

weather fine.

March 24.—Left camp; crossed Neuse river on eight pontoons; established headquarters at Goldsboro', North Carolina. The capture of Goldsboro', North Carolina, being the close of the campaign from Savannah, Georgia, it will not be amiss at this place to give the gains of the quartermaster's department of the 14th army corps during that time. Taking into consideration the long marches through swamps, compelling often that the transportation should be harnessed the largest portion of night and day to enable it to keep up with the troops, has naturally been the cause that the percentage of animals abandoned, killed and died is larger than on the previous campaign from Atlanta to Savannah, Georgia, the same remarks will apply to the teeding of forage as have been enumerated at length on the close of my report of the Atlanta and Savannah, Georgia, campaign.

For particulars of the captures, &c., of animals during the campaign through the Carolinas, I have the honor to refer to consolidated statement marked No. 5, herewith annexed, I will only enumerate, at this time, totals, namely: Total number of horses gained from Savannah to Goldsboro', North Carolina, 361; number of mules, 806. Total amount of grain captured from Savannah to Goldsboro', North Carolina, 2,867,820 pounds; total amount of hay, 4,055 pounds. Total amount of fodder captured from Savannah to Goldsboro', North Carolina, 2,730,460 pounds.

March 25 to April 9, inclusive.—Stationed at Goldsboro', North Carolina engaged in completely fitting out the command. How necessary this was it will only need to be mentioned that this corps drew a complete suit for every enlisted man in the command, a good many of the men having really no shoes, stockings, &c., on their arrival at Goldsboro', North Carolina. I would most respectfully draw the attention of the department to the utter uselessness of sewed boots and bootees for troops on the march. From an experience of four years in the quartermaster's department, in the field, I do not hesitate to say, and give it as my firm opinion, and have no doubt that the same is shared by every quartermaster in the western army, that the same, where troops are on the march and cannot draw new ones, every two weeks, are worthless; and so well is this understood by every one in this army, that it is an impossibility to issue any sewed shoes when any peg shoes can be procured.

April 10.—Having completely fitted out, the trains were ordered to start at daylight, on the Smithfield road, about two miles from Goldsboro'; crossed Little liver on a bridge; then road for about six miles, good; thence strike swamp which, it having commenced raining during the forenoon, was soon impassable, and had to fall back on corduroying; camped at night on the crossing of the Smithfield dirt road with the Raleigh and Goldsboro' railroad; distance of

day's march, eleven miles.

April 11—Started at daylight; road through swamps all day; crossed Moccasin swamp and creek; distance of day's march, ten miles; corduroyed the whole distance; camped three miles from Smithfield; weather cloudy; forage

scarce—hardly any.

April 12—Started at daylight; road to Smithfield; three miles swamp, and exceedingly hard to corduroy it; arrived at Smithfield with the head of the corps train about 10 o'clock a. m.; received the glorious news of Lee's surrender; mass train at Smithfield for the purpose of closing up, the roads being in so bad a condition as to make it nearly impossible to run it in close order.

Two o'clock p. m.—Crossed the Neuse river on eight pontoons; take Raleigh road which is hard and in good condition; camp near Clayton Station; dis-

tance of day's march, fifteen miles.

April 13.—Started at daylight; passed through Clayton's Station; enter Raleigh, North Carolina, capital of the State, about noon; distance of day's march, fifteen miles; road hilly; red clay; weather cloudy; captured several car-loads of corn and salt; corn slightly damaged by fire.

April 14.—Left Ruleigh at 10 o'clock a. m., on Hillsboro', leaving it about seven miles from town, for Jones's Crossroad; camped at Jones's Crossroad; distance of day's march, fifteen miles; weather sultry and clouding up; roads

good; road after leaving railroad in timber.

April 15.—Started at daylight; rain pouring down, making roads impassable; took road to Holly Springs; had to corduroy every foot of the road; dis-

tance of day's march, five miles.

April 16.—Started at daylight, on Avon's Ferry road; camped with corps trains six miles from Cape Fear river; troops have possession of both banks of the river; roads fair; weather fine; distance of march, six miles; forage plenty.

April 17 to April 19, inclusive.—In camp; foraging on the country.

April 20.—Marched back to Holly Springs; distance, six miles; weather fine.

April 21 and 22.—In camp.

April 23.—General J. C. Davis ordered myself with office to Raleigh, to attend to the wants of the quartermaster's department of corps: distance, fifteen miles; road hilly; weather fine.

April 23 to April 27.—In camp: received orders to prepare for homeward

march: Johnston's surrender.

April 28 and 29.—Loading trains for homeward march.

April 30.—Leave Raleigh, North Carolina, on Hillsboro' road, to Morrisville Station, then turn to the right for Fish Dam, North Carolina; camped on south bank of Winn river; weather fine; roads good; must, however, after a few days' rain, require a good deal of corduroying before passing trains over them; distance of day's march, twenty-nine miles.

Muy 1.—Marched at daylight; crossed Neuse river—fordable; crossed Tar river, on upper ford of Oxford road-fordable, but rocky; camped at Oxford, North Carolina; weather fair; distance of day's march, twenty-two miles.

May 2.—Marched at daylight, on Boydton, Virginia, road: passed through Williamsborough: camped on Roanoke river, at Taylor's ferry: distance of march. twenty-eight miles; roads good; weather fair; have to wait for pontoon section of 20th corps to come up; river too wide for one section of the pontoon train of the left wing.

May 3.—By pontoon train delayed seven hours; cross Roanoke river at 12 o'clock m.; camp at Boydton, Virginia; distance of day's march, seven miles: weather fine; road good; thirty-three pontoons required to bridge Roanoke river.

May 4 — March at daylight on Lewiston road; weather cloudy; road, red clay; camp at Lewiston, or Lunenburg Court House; distance of march,

twenty-seven miles.

May 5.—Camp broken up, and leave at 5 o'clock a.m.; cross south branch of Nodaway creek, at the falls; also, north branch of Nodaway creek-the last has very high banks; pass through Nodaway Court House at 12 m., having made twenty miles in the forenoon; camp thirteen miles from Nodaway Court House; distance of day's march, thirty-three miles; weather very warm.

May 6.—Start from camp at 4½ a. m.; cross Black and White creek; cross the Appomattox at bridge, on nine pontoon boats; camp near Swift creek, fourteen miles from Richmond; distance of day's march, thirty miles.

May 7.—March at 41 a. m.; arrive at Manchester 9 o'clock a. m.; distance of day's march, fourteen miles, having made the trip from Raleigh, North Carolina, including a delay of seven hours at Taylor's ferry, North Carolina, on account of laying pontoon boats, in seven days and four hours; distance, as travelled by 14th army corps, one hundred and ninety miles, or an average of twenty-seven miles per day.

May 8, 9, and 10.—In camp at Manchester, Virginia, preparing for march to

Alexandria, Virginia.

May 11.—Start at daylight; cross James river; pass through Richmond; trains going out on the Mechanicsville pike; cross Chickshominy creek; camp at Hanover Court House; distance of day's march, eighteen miles; weather sultry, with appearance of thunder-storm; 9 o'clock p. m., heavy storm; rain falls in torrents.

May 12 - Marched at 7 a. m.; crossed Pamunky creek at Page's bridge; pontoons to be relaid every hour; creek rising very rapidly; cross Aquia creek and Richmond railroad, at Chesterfield Station; camp near Mount Carmel church; distance of day's march, seventeen miles; road hilly; weather fine.

May 13.—Start at 6½ o'clock a. m., on road for Raccoon ford; pass through Chilesboro' and New Market Post Office; camp at Three-cornered Handkerchief;

distance of march, seventeen miles.

May 14.—Started at 4½ a.m.; passed Steward's tavern; camped north side of Rapidan, at Racoon ford; weather fine; splendid grazing; distance of march, thirty three miles.

· Digitized by Google

May 15.—Ordered, with office, forward; leave Raccoon ford at 4½ a.m.; pass through Stevensburg; Brandy; cross Rappahannock at Beverley's ford; cump three miles from Warrenton, Virginia; distance of day's march, twenty-five miles; country very fertile.

May 16 —Start at 5½ a. m.; pass through Warrenton, New Baltimore, Buckland and Gainesville; camp one mile from Centreville, on Fairfax Court House

road: distance of day's march, twenty-five miles.

May 17.—Start at 5½ a. m.; camp, with trains, at Fairfax Court House; report from thence, by railroad, to General L. C. Easton, chief quartermaster 14th army corps.

May 18 -Started, with trains, for Alexandria; established headquarters two

miles from Alexandria; raining all day.

May 19 to May 23.—In camp, refitting men with necessary clothing and camp equipage.

May 24.—Grand review of Sherman's army at Washington city.

May 25.—Cross Potomac river, and camp two miles from Washington.

May 26 to June 14.—In camp.

June 15 to June 19.—On b. ard of cars, and transported, via Baltimore and Ohio railroad, to Parkersburg, Virginia; from thence to Louisville, by boat.

June 20 to June 30, inclusive.—At camp on Bardstown pike, two miles from

Louisville, Kentucky.

On the arrival of the 14th army corps, the trains of the same were divided as follows: Each regiment had one wagon: brigade headquarters, three: division headquarters, four teams; and corps headquarters, five teams; the balance of transportation was organized into supply, ammunition, and hospital trains. Each regimental, brigade and division headquarters team had to carry, besides the baggage, at least five days' rations of forage for the animals of their respective command. The supply and ammunition trains of the corps were in charge of the division quartermaster, and each supply train of a division divided into sections of from twenty-five to thirty teams, in charge of a comm ssioned officer detailed and held responsible for the taking care of and running of the train. These officers, having two wagon-masters to each section of their trains, were therefore, at all times, shortly acquainted with any hindrance of whatever kind it might be, as well at the head as at the rear of their train, and could therefore, under all circumstances, keep their trains closed up-in my opinion, one of the most desirable principles in running a train, when there is a large amount of transportation on the same road. I would most respectfully call the attention of the Quartermaster's department, as far as my opinion and the opinion of all the quartermasters of this corps is concerned, to the utter uselessness of portable forges for active campaigns. Having been on a constant campaign from Chattanooga, in May, 1864, to Washington city, in June, 1865, constantly compelled to use every spare minute for the purpose of repairing transportation and shoeing animals, frequently after a long day's march and after night, has proven that bellows will do better, if properly fixed up, are quicker got ready, and suitable as well for repairing a wagon-wheel or shoeing an animal. The following description of a blacksmith-shop, as attached to wing section of the second division 14th army corps train, as well as most others, will give a slight idea of what, in my opinion, I have found to work with the utmost quickness and despatch: Fix a wagon-bed on a two-horse wagon (ours were all captured) long enough at the rear so as to rest a small-sized blacksmith's bellows, with the nozzle to the rear, the round part resting on the hind axle and the nozzle extending outside of the bed; then fix a small and light frame-work above the bellows, which, when the shop is in operation, supports the lever. A wooden box, two feet square and ten inches deep filled when in operation with earth, constitutes the forge, it being transported empty on the march. The front part of the wagon is used for transporting one set of blacksmith's tools, one set of wheelwright's tools, horse and mule shoes, &c., and a small quantity of coal. The wagon to be covered, and drawn by two or four mules; the latter, on a long campaign, the best. Two blacksmiths and one wagonmaker will be found plenty to keep constantly in good order a section of from twenty-five to thirty teams.

I am, general, very respectfully, your obedient servant,
J. E. REMINGTON,
Lieut. Colonel and Chief Quartermaster 14th Army Corps.

A true copy:

JOHN V. FUREY, Cuptain and Acting Quartermaster.

J. E. REMINGTON, Captain and Acting Chief Quartermaster 14th Army Corps.

JOHN V. FUREY, Captain and A. Q. M.

No. 96.

HEADQUARTERS MILITARY DIVISION OF THE MISSISSIPPI, St. Louis, Mo., July 24, 1865.

GENERAL: In accordance with your verbal instructions given at Washington city the 27th of June last, I have the honor to enclose herewith a report of the operations of your department at Savannah and in North Carolina while supplying General Sherman's army last winter and spring. The delay which has occurred in rendering this report has been unavoidable on my part, and has been caused by the difficulty of procuring the statements of property issued from the officers who had it in charge. Several of them were on leave of absence, away from their papers, and three are out of service.

Very respectfully, your obedient servant,

L. C. EASTON.

Brevet Brigadier General, Chief Quartermaster.

Major General M. C. MEIGS,

Quartermaster General U. S. A., Washington, D. C.

Headquarters Military Division of the Mississippi, St. Louis, Mo., July 22, 1865.

GENERAL: I have the honor to submit the following report of the operations of the quartermaster's department of Major General Sherman's army from December 10, 1864, the date of its arrival before Savannah, Georgia, to May 11, 1865, when it commenced the march from Richmond, Virginia, to the north.

After the capture of Fort McAllister, December 13, supplies in very limited quantities were brought from Hilton Head to Ossabaw sound, and thence up the Ogeechee river to King's bridge, and a detail of twenty-five hundred (2,500) men from the army was immediately set to work to construct a dock upon which to unload supplies. The channel of the Ogeechee was practicable only for boats drawing seven feet or less at high tide. We had very few of that class, and all the boatmen were ignorant of the unused channel, and it was very diffi-

cult to supply the army by this river.

On the 21st of December Savannah was occupied by our army. The north channel of the river, the main and direct one, had been very thoroughly obstructed by the rebels, by sinking in it heavy cribs filled with stones and bricks. Admiral Dahlgren, after an examination of them, assured me that it was imimpracticable to remove them at that time, but learning from Major C. W. Thomas, quartermaster at Hilton Head, of a Mr. Orlando Bennett, who was employed by the government as a wrecker, and who was provided with facilities for such work, I requested him to send for Bennett, who was then down on the Florida coast. He arrived and went to work, and was eventually entirely successful, but the process of removing the obstructions was necessarily so slow that it was not completed until about the 20th of February, though a practicable passage was made by the 3d of February. Until that time we had to use the south channel, which was much smaller and shallower than the other, and very circuitous.

In this the rebels had left unobstructed a narrow passage for their own use, and through it light-draught vessels came up to the wharves at Savannah immediately after our occupation of the place. It was necessary to unload all the large vessels by lighters, at a distance below the city of from eight to twenty

miles.

I organized matters by assigning Captain George B. Cadwallader, assistant quartermaster, as chief of the depot, and in charge of water transportation;

Lieutenant L. R. Young, 35th New Jersey infantry, in charge of forage: Cantain F. C. Butze, assistant quartermaster, in charge of quartermasters' stores: Captain F. A. Seely, assistant quartermaster, in charge of clothing and equipage: Lieutenant A. B. Howard, 107th New York infantry, in charge of corrals and surplus animals turned in from the army, and assignment of buildings: Lieutenant Frederick Hope, 16th Iowa infantry, in charge of wagon transportation and repair shops; Lieutenant C. F. Matteson, 103d Illinois infantry, in charge of shops for repair of vessels; and Lieutenant T. J. Lambert, 68th Ohio infantry, in charge of railroads and all captured railroad property. Under these officers the work of the depot proceeded successfully; all the supplies that arrived were landed and distributed; all repairs needed by vessels were promptly made by the shops under Lieutenant Matteson; all the unserviceable and surplus animals of the army, numbering about 5,000, were turned into the corrals of Lieutenant Howard, and from them were made up the depot teams. We captured in the city two hundred and thirteen cars and eight locomotives. These were placed in charge of Lieutenant Lambert, who repaired and operated the Gulf railroad for a distance of ten miles from the city, and brought in over the road all the wood used by that portion of the army within the city, and what was necessary for the citizens.

The effective strength of the army was now about sixty-six thousand, (66,000.) with thirty-five thousand (3,500) animals, twenty-six hundred and ninety (2,690) wagons, and five hundred and three ambulances. The object to be accomplished by the quartermaster's department was to thoroughly refit the men, the animals, and the wagons, and to accumulate enough to load the trains with the more essential articles necessary to the long march into North Carolina, which was the plan determined on by the commanding general. Time was very valuable, for he desired to approach southern Virginia in time to co-operate in the spring campaign. As soon as I learned that a quantity of supplies had been sent by you to Pensacola, Flor da, to meet the contingency of General Sherman's army, coming to the coast at that place instead of at Savannah, I despatched a steamer with orders to the vessels containing them to come immediately to Savannah; but only two arrived in time to be of service in supplying the army before it left Sisters' ferry and Pocotaligo on the march northward. There was some delay in the arrival of supplies from the north, and the amount that could be spared from the depot at Hilton Head was very small. Forage was especially slow in arriving, not being received in sufficient quantities to supply the daily consumption until about the 10th of January, and for a week the animals suffered a great deal for want of food. In the mean time they subsisted mainly on rice-straw, which was found in the vicinity, but did not do well on that alone.

My officers worked with ability and almost unceasingly to hasten the re-supply of the army, and notwithstanding the unavoidable delay occasioned by the slow arrival of forage, shoes, stockings, stationery, wagon-grease, and other articles of less importance, the army was sufficiently supplied by the 15th of January to begin the new campaign. The want of wagon-grease I partially remedied by directing Captain Butze to take possession of and issue a quantity of tar owned by the Savannah Gas Company, which mixed with a little flour, made a tolerable substitute. The overflowing of the low country, occasioned by the heavy rains, delayed the left wing, the command of General Slocum, from crossing the Savannah river at Sisters' ferry until February 1, and the right wing, General Howard, was detained at Pocotaligo until January 29. Supplies were forwarded to both these points, in light-draught steamers, up to the last moment before the troops left, so that before starting they were nearly equipped. The principal deficiency was in stockings. A partial supply of that article arrived and was immediately forwarded to the two wings a few days before they left.

The commanding general left Savannah for the army January 22, 1865, and ordered me to remain on the coast and be prepared to supply his army whereever it might be compelled to come to the coast. Georgetown, Wilmington, and Morehead C.ty, and possibly Charleston, were mentioned as points to turn my attention to. The uncertainty of the point was very perplexing and embarrassing, and I determined to make a trip to Morehead City, looking into the harbors designated, in order to get all the information I could in tegard to the facilities, &c., for supplying an army. After making this inspection, I returned to Savannah on the 20th February, 1865, and gave orders that all vessels laden with supplies for our army, then at Hilton Head, or in the Savannah river, or which should arrive, be sent to Morehead City, except that some vessels containing forage and subsistence should be left at Hilton Head, and some should go into Cape Fear river, so as to be prepared for the possibility of the army's coming to the coast at Charleston, Georgetown, or Wilmington. Such of our supplies at Savannah as had not been taken by the army were re-laden and sent to Morehead City, leaving sufficient at Savannah for the troops at that place.

Having a good deal of faith in General Sherman's ability to reach Goldsboro I determined to commence at once preparations at Morehead City for a depot. On the 21st February I sent my chief depot officer, Captain Cadwallader, and his assistants, to Morehead City, with instructions to commence work at once. Having given instructions to Major C. W. Thomas, quartermaster, at Hilton Head, that in case General Sherman should come to the coast, either at Charleston or Georgetown, to immediately force supplies to him, (the means having been left at Hilton Head for that purpose,) I started from Savannah March 4; I touched at Wilmington; placed an officer in charge of the laden vessels arriving there, and reached Morehead City March 8. At this place there were no storehouses whatever, and a very small wharf for landing stores. I immediately applied to Major General Schofield for fifteen hundred (1,500) men for guards and working parties, who where promptly furnished.

I had brought some lumber from Savannah, and immediately started a saw-mill in the vicinity, getting out more, and bought all the lumber then in the harbor, which consisted of but a few thousand feet. I sent to New York for some carpenters and laborers, and to General Rucker at Washington for additional mechanics and a supply of felt roofing, in order to put up some temporary storehouses of the most economical kind. The work of enlarging our small wharf and of building our storehouses was pressed forward as rapidly as possible, and the repair of the railroad beyond Newbern was making good progress under Colonel W. W. Wright. For depot teams I had to take some

which were being landed for the 23d corps.

The railroad being entirely occupied in forwarding rails and other materials used by the construction corps, I shipped large quantities of stores to Newbern in light-draught steamers, through Hatteras inlet and Pamlico sound, (there being eight feet of water by that route,) and thence up the Neuse river to the bridge opposite Kinston. The 23d corps, which was being brought from Wilmington to Kinston to cover the working parties on the railroad, was supplied in

On the 23d of March General Sherman arrived at Goldsboro', where the commands of Generals Schofield and Terry joined his former army, making a force of 95,000 men, with 23,000 mules, and 10,500 horses to be supplied, the number of men and animals rapidly increasing by re-enforcements from the north. General Sherman wrote me on the same day, describing the destitution of his command, whose clothing was entirely worn out by their long and arduous march, and who were out of flour, bread, sugar and coffee. His letter closed by saying that he "mut be off again in twenty days, with wagons full, men reclad," &c. Two days later, the 25th, the railroad was completed to Goldsboro'.

and I commenced sending up subsistence and clothing, and later, quartermasters' stores. There were about sixty cars and four engines, which were used to the best advantage. Trains were loaded and unloaded at either end of the road with the greatest despatch, and no one was allowed to travel on the cars towards the army except couriers and staff officers under orders. The numerous detachments arriving marched, officers and all, to the army. I still continued to ship via Hatteras inlet, sending sail vessels containing grain to that place, whence their cargoes were taken by steamers to Newbern, loaded there into river steamers and a few barges, (which had been used by the troops of the department of North Carolina, in their former operations,) and carried to Kinston, or Neuse river bridge, to which point General Sherman's wagons had been coming for supplies since the 20th instant.

From March 29 to April 2 I was at Newbern, Kinston, and Goldsboro', and while at the latter place, by order of General Sherman, made an equitable reapportionment of the transportation of the 14th, 20th, 15th, 17th, 10th and 23d army corps, and the cavalry command, in view of the campaign which it was soon intended to begin. The transportation then consisted of 3,140 wag-

ons, and 570 ambulances.

The railroad from Wilmington to Goldsboro' was completed April 4. The rolling stock on this road consisted of a very few captured cars. Some forage

and subsistence were brought to Goldsboro' by this line.

By the 10th of April, sixteen days from the time the road was finished, and sooner than the earliest moment anticipated by General Sherman, the army was completely re-supplied and the wagons filled, and they moved from Goldsboro' that day. The following is what General Sherman says in his report, dated May 9: "Owing to a mistake in the railroad department, in sending locomotives and cars of the five-foot gauge, we were limited to the use of the few locomotives and cars of the four feet eight and a half inch gauge already in North Carolina, with such of the old stock as was captured by Major General Terry at Wilmington and on his way up to Goldsboro'; yet such judicious use was made of these, and such industry displayed in the railroad management by Generals Easton and Beckwith, and Colonel Wright and Mr. Van Dyne, that by the 10th of April our men were all re-clad, the wagons reloaded, and a fair amount of forage accumulated ahead."

The army occupied Ruleigh April 13, and the railroad was finished to that place, by the construction corps, on the 18th. Additional cars were captured there, giving us one hundred and twenty cars in all, with enough engines to move them. The army had been re-enforced, so that it now numbered 103,000 effective men, and the numbers of animals had also been much increased. were supplied satisfactorily, and stores accumulated by the railroad until April 30, when the march of the armies of Georgia and the Tennessee to Washington via Richmond commenced, the 10th and 23d corps and the cavalry being left in North Carolina. I relieved such of my depot officers as I thought would be needed in supplying General Sherman's army at Richmond and Alexandria assigning other officers in their places—and turned over the general depots in North Carolina to Colonel J. F. Boyd, chief quartermaster of Schofield's com-May 3d, I started from Morehead City for City Point, Virginia, taking with me such clothing and other supplies as were not required for the troops remaining in North Carolina, and as I thought General Sherman's army would need, not knowing whether they could be spared from the depots of the Poto-The army arrived at Manchester, Virginia, and refilled its wagons on the 8th, 9th, and 10th of May, and then recommenced the march to Alexan-

My assistants at the depots in North Carolina were as follows: At Morehead City, Captain G. B. Cadwallader, chief depot quartermaster; Lieutenant

E. R. Haight, 107th New York infantry, assistant: Captain J. D. Tredway, in charge of quartermaster stores; Captain A. Austin, in charge of railroad and water transportation: Lieutenant C. F. Matteson, 103d Illinois infantry, and Lieutenant T. J. Lambert, assistants; Captain A. S. Gear, in charge of wagon transportation and corrals; Lieutenant L. R. Young, 35th New Jersey infantry, in charge of forage; Lieutenant A. B. Howard, 107th New York infantry, in charge of coal: Captain T. F. Orner, 59th Indiana infantry, inspector, &c. At Newbern, Colonel J. T. Conkl n had general charge; Captain A. S. Kimball and Captain S. W. Hoskins received and forwarded supplies; Captain F. A. Seely received at Newbern and Morehead City all the clothing and equipage for the army; Captain R. W. Clarke was in charge of forage at Neuse River bridge: Captain Justin Hodge received and distributed all stores at Goldsboro'. and Captains A. S. Flagg and H. B. Whetsel received and distributed all stores at Raleigh during the short time the army was there. I consider all these officers entitled to high praise for the zeal, energy, and success with which the duties intrusted to them were performed, and commend especially to your favorable notice Captains Cadwallader, Tredway, and Austin for ability, energy, and industry.

Li-ts of all property issued by the depot officers at Savannah and Morehead

City are annexed hereto.

I append the journal of Captain H. M. Whittlesey, chief quartermaster 20th corps, from January 27 to March 25, which will give you a good idea of the difficulties the army had to contend with during the march from Savannah to Goldsboro'. Annexed, also, is a statement showing the number of animals and amount of forage captured by the army, with the exception of those taken by the 15th corps, whose quartermaster, Lieutenant Colonel G. L. Foot, has made no

report, although directed to do so.

In conclusion, I desire to express my appreciation of how greatly our success has been owing to you. The campaign was such that it was difficult for the army quartermasters to estimate correctly for any considerable time ahead. The changes of the points of supply were frequent, and the location of the next base very uncertain. This made it necessary at times to call on you for supplies to be furnished with the greatest despatch. Our best thanks are due for the uniformly prompt attention which all our wants received from you. I also feel greatly indebted to you for valuable suggestions and advice given me in your visits to Savannah, Morehead City, Goldsboro', and Raleigh

I have the honor to remain, very respectfully, your obedient servant, L. C. EASTON,

Brevet Brigadier General, Chief Quartermaster.

Major General M. C. MBIGS,

Quartermaster General U. S. Army, Washington, D. C.

P. S.—I have also attached to this report a list of vessels used in transport ing supplies from Savannah and Hilton Head to Cape Fear river and Morchead City. I regret that I am unable to give the cargoes of these vessels.

A statement is also attached showing the quantity of subsistence transported from the northern cities to Morehead City and points south of that, for the use

of General Sherman's army.

L. C. EASTON.

Brevet Brigadier General, Chief Quartermaster.

A true copy:

These stores were sent from the various northern cities of Boston, New York, Alexandria, Fortress Monroe, and Norfolk, and were delivered at the ports of King's Bridge, Savannah, Hilton Head, and Morehead City, during the months of December, 1864, January, February, March, April, and May, 1865.

I am, sir, very respectfully, your obedient servant,

LOGAN H. ROOTS,

Captain and Commissary of Subsistence U. S. Vol's.

Brigadier General L. C. EASTON,

Chief Q. M. Military Division of Mississippi, St. Louis, Mo.,

A true copy:

JOHN V. FUREY, Captain and Assistant Quartermaster. List of vessels and their cargoes sent from Savannah and Hilton Head to Cape Fear river and Morehead City.

ORDERED FROM HILTON HEAD AND SAVANNAH TO MOREHEAD CITY.

Barks Palermo, (535 tons,) J. M. Brookman, and John Bunyan, (597 tons;) ships Narragansett, Ashburton, (1,079 tons;) and R. C. Winthrop, brig Jeremiah; steamers Louise, Matagorda, Louisburg, Fountain, Guide, and Mary Boardman, with subsistence.

Barks Transit, (434 tons.) Hattie Morrison, (516 tons.) and brig Dragoon. (390 tons,) with clothing and equipage.

Schooner General Knox. (219 tons.) steamer Crescent, and schooner Margaret

and Lucy, (442 tons,) with quartermasters' stores.

Brig Tubal Cain, (439 tons;) schooners Nora, Mary Mankin. Arctic Kate Merrill, and brig Sarah Goodwin, with forage.

#### ORDERED FROM SAVANNAH TO CAPE FEAR MIVER.

Bark Bridgeport, with forage.

Brig D. Maloney, (248 tons,) with subsistence.

Schooners Monticello, A. C. Levitt, May, N. G. Audenreid, Rachel Miller, S. P. Adams, W. A. Irish, Antietam, Maryland, and bark J. R. Davis, with forage. .

NOTE.—The above list is somewhat defective. I had intended to give a statement of all property transported from Savannah and Hilton Head to Cape Fear river and Morehead City, but up to this time I have been disappointed in receiving from the officer in charge of that duty the statements required of him. To give an idea of the coastwise work, which was very great, I have made the above list. About 2,800,000 pounds of forage were sent to Cape Fear river, and about 10,500,000 pounds to Morehead City, from Savannah and Hilton Head. The steamers in the above list are all of light draught.

> L. C. EASTON, Brevet Brigadier General and Chief Quartermaster.

A true copy:

JOHN V. FUREY. Captain and Assistant Quartermaster.

Report of the movements of the train of the 20th army corps, on the march from Savannah, Georgia, to Goldsboro', North Carolina.-January, February, and March, 1865.

Friday, January 27.—Left camp 9.30 a. m.; arrived at Monteith 3 p. m.; distance, 11.50 miles; weather fine, frosty; roads heavy. Last Tuesday week, January 17, the 1st and 3d divisions, three batteries, corps headquarters, and regimental, brigade, and division headquarter trains left Savannah on the new campaign, crossing the islands into South Carolina; to-day the balance of the corps (2d division troops and corps train) marched from Savannah on west side of river towards Sisters' ferry. General Barnum's brigade takes charge of train. Saturday, January 28.—Left camp 7.30 a. m.; arrived in pine woods 6.30 p. m.; distance,

14.41 miles; weather fine, but very cold; roads heavy and swampy. Passed through good

works—forts, &c.—that had been built to oppose our progress to Savannah.

Sunday, January 29.—Left camp 7 a. m.; arrived at Mallett's farm, 2½ miles from Sisters' ferry, 2 p. m.; distance, 11.61 miles; weather fine, cold; roads pretty good. Passed through Springfield—nothing but chimneys standing. Came up with 14th corps, which left Savannah one day before we did. Ordered to send teams to Sisters' ferry for forage.

Monday, January 30, to Thursday, February 2.—In camp; weather fine, warm and rainy. Cavalry passing. Wednesday, February 1, our men across the river engaged in corduroying the road occasionally finding torredges.

the road, occasionally finding torpedoes.

Friday, February 3.—Left camp 6.30 p. m.; arrived at Sisters' ferry 9 p. m.; distance, 4.28 miles; weather warm and rainy; roads good. Received marching orders at half past 6 o'clock p. m.; started immediately for the ferry. Camped for the night on the bank of the

Saturday, February 4.-Left camp 2.45 p. m.; arrived across the river into South Carolina 5 p. m.; distance, 2.80 miles; weather very warm and bright; roads swampy—corduroyed.

Crossed pontoons to-day; it was quite an animated scene; some regiments, on touching the South Carolina shore, flung their colors to the breeze and struck up patriotic airs with their

bands. Gunboat Pontiac lying at upper landing. Piles of hard bread and forage on the shore. Sunday, February 5.—Left camp 6.30 a. m.; arrived at cross-roads near Steepbottom 6 p. m.; distance, 12.38 miles; weather warm, fine; roads, swamp in forenoon, good in afternoon. Crossed a swamp to-day, four or five miles long, where there was little or no timber; every inch of it had to be corduroyed. Passed through Robertsville; all of it burnt, as were all the

houses along the road. Men beginning to find forage in abundance.

Monday, February 6.—Left camp 9.30 a. m.; arrived near Beach branch 6.30 p. m.; distance, 16.47 miles; weather cloudy—rain in the afternoon; roads pretty good. Buried two men belonging to the 1st division who had been killed by the rebel cavalry—murdered, it is supposed. Food of all kinds now being brought in in profusion. More property is destroyed in this State, on our march, than was destroyed in Georgia. Passed through Lawtonsvillenothing but chimneys standing.

Tuesday, February 7.—Left camp 8.30 a. m.; arrived at Duck branch 6 p. m.; distance, 6.71 miles; weather rain all day and night; roads very muddy; teams constantly getting stalled. Crossed Duck branch, (Coasawatchie swamp,) a running stream from 18 inches to 4 feet deep, and about 400 yards wide; part of the train had to stay on the other (south) side

Wednesday, February 8.—Left camp 7.15 a.m.: arrived at Beaufort bridge 5 p.m.; distance, 13.41 miles; weather fine, cold; and dry; roads good, out of the swamps. Crossed Big swamp and Big Salkehatchie river—a terrible place to cross. Found on the east side of the river extensive rebel works, timber felled, &c. Forts pierced for four guns, commanding the road through the swamp and across the river, showed their intentions, had they found

time to get their cannon into position.

Thursday, February 9.—Left camp 7 a. m.; arrived at Blackville 5 p. m.; distance, 19.32 miles; weather cloudy and cool; roads good. Rejoined our command here.

Friday, February 10.—In camp; weather fine and cold. Resting in camp. 1st and 3d division troops destroying Charleston and Augusta railroad. Two brigades of 2d division

sent forward to Duncan's bridge, South Edisto river.

Saturday, February 11.—Left camp 7.30 a. m.; arrived at Duncan's bridge, north side of south branch of Edisto river, 11.30 p. m.; distance, 9.49 miles; weather fine and warm; roads good. This is a rich country. Forage and subsistence found in immense quantities to-day. Arrived at the river at 10 o'clock a. m., and waited till 10 o'clock p. m. before we could cross the train. The former bridge having been burnt by the enemy, we had to construct one, together with one and a half mile of corduroy, containing six small bridges. General Geary found some of Hood's old troops confronting him, who had erected works on north side of river. Cavalry train, 211 wagons, and Michigan engineers, 31 wagons, joined our corps train to-day

Sunday, February 12.—Left camp 8 a. m.; arrived at Jeffcoat's bridge, north fork of the Edisto, 4 p. m.; distance, 13 miles; weather beautiful; roads good. Arrived at the river at 4 p. m. and found the enemy on the other side prepared to dispute our passage. First cannon-firing (on our march) to-day; it was from the rebels. We lost a few men in building

the bridge, and several foragers were captured to-day.

Monday, February 13.—Left camp 1.30 p. m.; arrived at Jones's cross-roads 3 p. m.; distance, 5.93 miles; weather beautiful; roads goods. Cavalry train divided up among the divisions to day, 65 wagons being assigned to 1st division, 66 to 2d division, and 100 to 3d Crossed the river this morning; the 2d division troops skirmished across, losing a division. few men.

Tuesday, February 14.—Left camp 8 a. m.; arrived at Columbia cross-roads 11.30 a. m.; distance, 7 miles; weather cloudy—rain and sleet all night; everything covered with ice in the morning; roads good. Travelled on good roads this morning, and camped at noon. Escort six miles in front cut off from advance; Captain Benjamin Reynolds, acting assistant inspector general, 3d brigade, 1st division, captured, with his orderly, at the head of the

Wednesday, February 15.—Left camp 8.15 a. m.; arrived near Lexington Court House 3.15 p. m.; distance, 11.33 miles; weather misty-rained during the night. Skirmished with the enemy's cavalry all day. Crossed over sand-hills of considerable height. 2d division

lost a few men.

Thursday, February 16.—Left camp 8 a. m.; arrived near Columbia and Congaree river 1 p. m.; distance, 7.67 miles; weather fine; roads good. Against orders to forage on flank to-day. Pontoon train (from 14th corps) joined us.

Friday, February 17.—Left camp 9 a. m.; arrived at Saluda river 7 p. m.; distance, 6 miles; weather fine; roads good. Arrived at river at 12 o'clock m., and waited until the 14th corps and cavalry had crossed. 1st and 2d division train crossing all night.

Saturday, February 18.—Left camp 9.30 a. m.; arrived near Oakville 4.30 p. m.; distance, 9.42 miles; weather fine; roads good. We finished crossing river to-day. One division of pontoon train ordered to march with us. 15th corps occupy Columbia; we understand they found a great deal of war material, and nearly burnt the whole town.

Sunday, February 19.—Left camp 11 a. m.; arrived at Freskley's ferry 2.30 p. m.; distance

5.94 miles; weather fine; roads heavy. Disposed of all wall tents, nothing but flies being used at all headquarters. 14th corps at Broad river first, and crossing ahead of us, arrived

within a mile of river and waited until morning to cross.

Monday, February 20.-Left camp 8.15 a. m.; arrived at Owen's farm 5 p. m.; distance, 12.21 miles; weather fine; roads good. General Jackson with one division crossed river and picketed all roads. General Ward sends one brigade to picket all roads and approaches to bridge till all is crossed, and then one battery protects pontoniers in taking it up. Found

on Owen's farm 2,000 bushels of corn and 40 tons of hay. Crossed Little river to-day.

Tuesday, February 21.—Left camp 8.30 a. m.; arrived at Beaver Dam creek, near Wins-Arrived in Winsboro' at 11 20 miles; weather fine and pleasant; roads good but hilly. Arrived in Winsboro' at 11 o'clock a. m., and found the town already in possession of foragers (bummers) of the 14th and 20th corps, who had plundered it and burned part of it, all of whom, who were caught, were placed under arrest. The 14th corps arrived at town simulations where the corps arrived at town simulations are compared to the corps arrived at town simulations. taneously with ourselves. We marched through and camped on the side about four miles.

Wednesday, February 22.—Left camp 8 a. m.; arrived at Rocky Mount post office 5.30

p. m.; distance, 17.17 miles; weather cloudy; roads bad and hilly. General Sherman joined the corps to-day. Camped half mile from Watené river. One of our men belonging to corps

supply train found the bodies of two of our soldiers lying in the woods murdered.

Thursday, February 23.—Left camp 9 a. m.; arrived at Colonel Ballard's farm at 1 p. m.; distance, 5.30 miles; weather cloudy, rain during night; roads hilly. Commenced crossing Catawba river at 6 o'clock a. m. Obtaining a great many mules and horses now.

Friday, February 24.—Left camp 8.30 a.m.; arrived at Hilliard's plantation 11 a.m.; distance, 2.87 miles; weather, raining hard all day; roads very bad. 11 o'clock a.m. met 17th corps on a road intersecting ours, causing us to camp. Corduroyed every foot we came

Saturday, February 25.—In camp all day; weather showery. 3d division corduroying

road ahead.

Sunday, February 26.—Left camp 8 a. m.; arrived at Hanging Rock post office 2.30 p. m.; distance, 10.12 miles; weather fine; roads corduroyed. Marching since noon towards Camden.

Monday, February 27.—Left camp 10.15 a.m.; arrived at Hanging Rock creek 11.30 a.m.; distance, 2.36 miles; weather fine; roads very bad—hilly. Crossed Hanging Rock creek and ascended a steep, rocky, muddy hill; going into camp on north side of creek.

Tuesday, February 28.—Left camp 8 a. m.; arrived at Horton's store 2.30 p. m.; distance, 10 miles; weather, raining; roads very bad. Wagons constantly getting stalled. Captured

a perambulating bank from Camden in three wagons.

Wednesday, March 1.—Left camp 8 a. m.; arrived near Lynch's creek 2.15 p. m.; distance, 9.22 miles; weather cloudy; roads good. The 82d Illinois was sent 11 miles last night to protect Miller's bridge, which they did, running the mill alongside of it all night, making flour and meal. We crossed the bridge at noon.

Thursday, March 2.—Left camp 6.30 a. m.; arrived at Chesterfield Court House 5.30 p. m.; distance, 20.80 miles; weather misty; roads bad. The troops and head of the train marched hard all day through mud, crossing deep, rough-bottomed creeks, and taking no rest whatever. Skirmishing with the enemy commenced about two miles from town, and lasted into and through the village—two batteries in position shelling the fleeing rebels. Only corps head-quarters train got into Chesterfield, the balance of the train being 7 to 10 miles back where they camped for the night.

Friday, March 3.—In camp all day; weather fine but cloudy. The balance of the train got up to-day all right. The 1st division having been sent to Thompson's creek to save the

bridge, their train was ordered to join them some three miles off.

Saturday, March 4.—Left camp 7.30 a.m.; ærrived near Sneedsboro', North Carolina, two miles from Big Pedee river 3.30 p. m.; distance, 10.47 miles; weather, rain in morning; roads horribly muddy. There seemed to be in some places no bottom to the roads—all quicksand. Arriving at the plank-road to Cheraw at 2 o'clock, and finding the 14th corps passing we went into camp, giving them the right of road. Part of our trains to-day were in South Carolina and part in North Carolina. Obtained ten loads of lumber from mill on Thompson's creek for pontoon purposes.

Sunday, March 5.—In camp all day; weather very fine. General Williams asked per

mission to march to Cheraw and cross the Pedee there.

Monday, March 6.—Left camp 8.45 a. m.; arrived at north side of Big Pedee 6.45 p. m.; distance, 14.01 miles; weather fine; roads, plank-road to Cheraw—half mile—bad road across river. Marched on plank-road to Cheraw; at 10 o'clock a. m. heard a tremendous explosion; found on arrival at Cheraw that it was caused by powder and fixed ammunition set on fire by 15th corps soldiers, causing the death of eight persons and wounding many. All the business portion of the town burnt. The 15th corps had about finished crossing the pontoons on our arrival. (2 o'clock p. m.) We commenced crossing at 4 o'clock, and were crossing all night crossing all night.

Tuesday, March 7.—Left camp 8 a. m.; arrived at Station 103, Wilmington and Raleigh railroad, 5.30 p. m.; distance, 14.50 miles; weather beautiful; roads very good. Passed by

2,000 barrels of rosin on fire—a magnificent sight.

Wednesday, March 8 .- Left camp 8 s. m.; arrived near Lumber river 5.30 p. m.; distance, 14.66 miles; weather, rained hard all day; roads bad, nearly all corduroyed. 3d brigade, 1st division, sent four miles ahead to hold bridge across Lumber river. We met 14th corps at forks of road travelling same way as ourselves; gave them the plank-road and cut our way two miles through the woods, gaining a wretched dirt road. The rain poured in torrents all day, making the road impassable for rear of column without corduroying.

Thursday, March 9.—Left camp 6.45 a. m.; arrived at Buffalo's creek 9.30 p. m.; distance,

8.65 miles; weather, raining hard all day and night; roads corduroyed the whole distance. Crossed bridge over Lumber river; also six or seven creeks badly swollen by recent rains. Pontoon train joined us. 2d and 3d division train had to encamp on side of Lumber river,

being unable to cross till morning.

Friday; March 10.—Left camp 10.30 a. m.; arrived neat Rockfish creek 7 p. m.; distance, 13.20 miles; weather cloudy; roads corduroyed. Forage and subsistence abundant to-day: for the last week it has been very scarce, partly because all the army has been together, and partly because this is a wretched poor country. Received General Slocum's order restricting troops from taking anything but forage &c., and commanding them to destroy no property in North Carolina

Saturday, Murch 11.-Left camp 8 a. m.; arrived near Little Rockfish creek 5 p. m.; distance, 8.10 miles; weather fine; roads corduroyed. 1st and 3d division troops push ahead; 2d division and one battery protect train. We struck plank-road this evening and camped

alongside of it, corralling in a very small compass.

Sunday, March 12.—Left camp 6.30 a. m.; arrived at Fayetteville 2 p. m.; distance, 12.23 miles; weather fine—frost at night; roads, plank. Found 14th corps in possession. The two bridges that spanned Cape Fear river had been burned by the enemy; two pontoon

bridges laid. Sent mail north from here; a United States steamer arriving about the same time the rebels went out and our troops came in. We are promised some supplies.

Monday, March 13.—Left camp 3.30 p. m.; arrived four miles beyond Fayetteville, on east side Cape Fear river, 7 p. m.; distance, 5.19 miles: weather beautiful; roads good. General Sherman reviewed 20th corps, marching company front through Fayetteville. The rebels in strength ahead of us on the road. Quartermasters ordered to send wagons to river for supplies, also all transportation that can be spared to send refugees, discharged soldiers, and negroes to Wilmington; 50 men from each corps and the discharged men acting as guard; Colonel Balloch, chief commissary of subsistence, 20th army corps, furnishing our contingent

with sufficient rations. 100 sick sent to Fayetteville and shipped to Wilmington.

Tuesday, March 14.—In camp; weather fine. Two (1st and 3d) divisions unencumbered save with animunition wagons, and three batteries were shead, &c. General Geary and Sloan's battery guard train. Same order extends through the army. Train is ordered to move towards Troublefield's store.

Wednesday, March 15 .- Left camp 11.30 a. m.; arrived near South river 7.30 p. m.; distance, 11.15 miles; weather, thunder-storm; roads corduroyed. Most of the train stuck in

the mud all night.

Thursday, March 16.—Left camp 9.30 a.m.; arrived at Jackson's farm 5.30 p. m.; dis-uce, 7.29 miles; weather showery; roads corduroyed. The Michigan engineers, who were tance, 7.29 miles; weather showery; roads corduroyed. The Michigan engineers, who were sent ahead to build a bridge across South river during the night, were unable to do so until morning, on account of the enemy. The bridge being completed by 10 a. m., we commenced crossing; the enemy threatening our flanks and front, one battery was placed in position and proper disposition made of the troops to cover the trains. On getting to our camping place we found the 15th corps troops on right of road, lines formed, skirmishers out, batteries in

position, everything indicating the presence of the enemy. Our two divisions had a hard fight, driving the rebels, capturing three pieces of cannon, and a number of prisoners.

Friday, March 17.—In camp; weather delightful. Sent 24 empty wagons to the front for wounded. The train sent to Cape Fear river arrived to-day with supplies—some hard

bread, coffee, sugar, boots, and shoes.

Saturday, March 18.—Left camp 6.30 a. in.; arrived near Rainer's mill 8 p. m.; distance, 8.56 miles; weather fine; roads corduroyed. The plan adopted to-day of repairing the roads was new, and it was good; not a wagon was allowed to proceed until the road was made good; the consequence was, when they commenced drawing into camp they were all closed up, and kept continually coming in.

Sunday, Murch 19.-Left camp 6.15 a. m.; arrived at Canaan church 6 p. m.; distance, 10.50 miles; weather fine; roads corduroyed. Left wing had a severe fight to-day, the enemy suddenly falling on the 14th corps, driving it and making some captures from them; the 20th came to their relief. Corralled in small compass to-night, and extra precautions

taken to guard train.

Monday, March 20.—Left camp 4 p. m.; arrived near Falling creek 8 p. m.; distance, 4.30 miles; weather fine; roads corduroyed. General Geary started at 2 o'clock a. m. with 1st and 3d brigades for the front, Captain Sloan's battery following. All ammunition and ordnance wagons, and empty wagons for wounded, sent to front—135 wagons. At 6 o'clock a. m. ordered to move train to an adjoining field, park close; run the wagons in 20 deep, close up—10 feet between rows-getting in 600 or 700 wagons in 20-acre space by 11 o'clock a. m., and by 1 o'clock p. m. a good and efficient breastwork enclosed the train.

As soon as we were all properly cared for, orders came to pull out and march towards Golds-

Tuesday, March 21.—Left camp 6.30 a. m.; arrived at Grantham's store 3.30 p. m.; dis-Tuesday, March 21.—Left camp 6.30 a. m.; arrived at Grantham's store 3.30 p. m.; distance, 5 miles; weather, rained hard in afternoon; roads corduroyed half way. At 12 o'clock m. came upon the 24th and 25th corps marching on a road intersecting ours; managed to fall in on same road, going on it a mile and a half and camping. From 2 o'clock until 7 p. m. a furious engagement going on on our left; incessant cannonading and tremendous volleys of musketry could be distinctly heard; supposed to be 15th corps engaged. Received 200 wagon and ambulance loads of wounded to-night. Ordered to despatch all the intrenching tools and pioneers to the front. Ordered to march to-morrow six miles to the junction of the Everettsville and Goldsboro' road with the Dadfield and Goldsboro' road, and there establish a depot for supplies to be drawn from Kinston. Colonel Muidell, of 2d brigade, 2d division, to command post.

Wednesday, March 22.—Left camp 6.15 a.m.; arrived at Murphy's plantation 1.30 p.m.; distance, 10 miles; weather delightful; roads good. The country around here surpasses

anything we have yet seen in North Carolina for food and forage.

Thursday, March 23.—In camp: weather fine, but tremendous winds. Organizing per-

manent quarters.

Friday, March 24.—In camp. Received orders to move; cannot, our wagons being sent to Kinston for supplies, and to the front. Sent for 125 wagons from corps headquarters. The hospital left here to-day, crossing the upper pontoon bridge at 3 o'clock p. m., after attempting to get over all day. 17th corps slaughtering mules by hundreds on the banks of Neuse river. Wagons arrived from corps at 8 o'clock p. m. Ordered to load up and concentrate 14th, 20th, 15th, and 17th corps trains here now; intrenched in small space; four brigades and some artillery protect them in case of an attack, which is not at all improbable, as everything on the road to-day has been threatened by Butler's cavalry. In the middle of the night the brigade belonging to the 17th corps was withdrawn and sent to guard its train

on way from Kinston with supplies.

Saturday, March 25.—Left camp 8 s. m.; arrived three miles from Goldsboro' and Wilmington and Weldon railroad 11 a. m.; distance, 8.37 miles; weather fine—windy; roads excellent. Had a fine march and joined our corps. Encamped in pine woods at 11 o'clock a. m., bringing with us (the result of two days' foraging around Murphy's plantation) over 100 loads of corn, most of which is husked, and part shelled and in bags.

Total miles traveled, 456 亿.

#### Recapitulation.

We have marched  $456^{+0.0}_{-1.0}$  miles, through innumerable and seemingly impassable swamps; crossed twelve rivers, among them the Savannah, Saluda, Broad, Catawba, Great Pedee, Lumber, and Neuse, large streams requiring pontoon bridges; constructed bridges (sometimes in face of the enemy) over the smaller streams; crossed innumerable creeks, many of them, from their size, meriting the name of river; corduroyed at least three-fifths of all the road we have travelled; marching early and late, wet and dry, over swamps, sometimes in sight and sometimes sunk in the mud nearly out of sight, we averaged ten and one-third miles per day, for marching days, from Savannah, Georgia to Goldsboro, North Carolina. In all the way we have lost no property by capture, and only four wagons and five ambulances by breaking, which could not be repaired on the march.

We have taken from the country: horses, 858; mules, 1,252; corn, 2,588,902 pounds;

hay, 10,500 pounds; fodder, 2,219,001 pounds.

HENRY M. WHITTLESEY, Captain, Acting Chief Quartermaster 20th Army Corps.

HEADQUARTERS 20TH A. C., OFFICE CHIEF QUARTERMASTER, Near Goldsboru', North Carolina, March 31, 1865.

A true copy:

JOHN V. FUREY, Captain and Assistant Quartermaster.

No. 98.

OFFICE CHIEF QUARTERMASTER DEPARTMENT OF TENNESSEE, Nashville, Tennessee, August 31, 1865.

GENERAL: In compliance with General Orders No. 39, from your office, dated July 1, 1865, requiring officers on duty in the quartermaster's department to render an annual report for the fiscal year ending June 30, 1865, I have the honor to report as follows, viz:

From the 1st of July, 1864, to the 7th day of August, same year, I was continuously on duty, as chief quartermaster of the 14th corps, and was present with that command during the memorable battles of Resacca, Kingston, Kenesaw, Chattahoochee river, and during a portion of the siege of Atlanta.

On the morning of the 8th of August, being within three miles of the latternamed place, I was relieved of the chief quartermastership of that corps and ordered to report in person to the major general commanding the department of the Cumberland, for duty as chief quartermaster of the army of the Cumberland in the field, (General Orders Headquarters, August 8, 1864.)

On the same date I reported and assumed charge as directed.

I remained with the general headquarters during the remainder of the siege of Atlanta, and entered that city with it, remaining there until the 31st of October, when I proceeded with the rest of the members of the staff to Chattanooga.

Nothing worthy of note came under my notice while in Atlanta. My principal duty there consisted of providing forage and the necessary details where-

with to obtain it for the entire army.

The troops had already been well supplied with clothing, camp and garrison equipage. There was no dearth of subsistence. Forage had to be obtained from the country, owing to the crossing of the rebel General Hood over the Chattahoochee river, and the consequent severance of railroad connexion with Chattanooga, the depot of supplies.

There had been no accumulation (beyond ten days) of forage at Atlanta. The railroad had already been taxed to the utmost to supply the army on its onward march from day to day, and with this ten days' supply the break

lasted from the 1st to the 26th day of October.

While in Chattanooga the battles of Franklin and Nashville took place. Unable to reach my command, and the necessity of a chief quartermaster's presence with the army being apparent, Lieutenant Colonel W. G. Le Duc, chief quartermaster 20th corps, was appointed by the major general acting chief quartermaster in my absence.

I remained in Chattanooga, assuming general charge of the depot and assisting in providing for the wants of Major General R. S. Granger, in his attack on

Decatur, procuring transportation, &c.

On the 5th day of January I received a telegram from Major General Thomas, directing me to repair to Nashville and report to him for further service in the field. I immediately did so, arriving in Nashville on the following, 7th.

On the next day but one I proceeded with headquarters to Eastport, Missis-

sippi, arriving there on the 16th.

At this place my duties consisted of supplying the army with everything it wanted in the shape of clothing, camp and garrison equipage and forage, and the furnishing of water transportation for the 23d corps to Louisville, and the 16th army corps, General A. J. Smith's command, including 7th division cavalry corps, military division Mississippi, and artillery brigade, consisted of four divisions. The aggregate strength in commissioned officers and enlisted men was seventeen thousand three hundred and fourteen; in horses and mules, six thousand seven hundred and nine; in wagons and ambulances, four hundred and eighty-four. The embarcation began on the 5th of February, and ended on the evening of the 8th. The command was supplied with ten days' rations of forage and fifteen of subsistence. In every other respect it was also well supplied. About forty boats, some of them the finest in service on the western waters, were employed in transporting this army to New Orleans.

It was while here that the overflow of the Tennessee river, unequalled by any of former years, took place. I may state that I was on duty with the troops in the field near this river during the period of the great (although not to be compared with this) flood in the spring of 1862, by which a large amount of public property was lost. Apprehending a similar flood this spring, I immediately, on

arriving at Eastport, took steps to prevent the accumulation and exposure of public property at this extremely unprotected point. The troops and a quantity of stores had preceded me about ten days. I also proceeded at once to inspect and correct the manifest want of system and proper care of public property then existing. With the view of having the valuable stores afloat so as to enable us to remove them quickly and with economy in the event of its becoming necessary by reason of high water, and to relieve several steamers, under charter, detained at the landing with stores on board, and under orders from the major general commanding to make use of the steamers that come freighted to Eastport, to transport General Schofield's corps from Clifton to the Ohio river, I ordered on the next day, by direction of General Thomas, the large wharf-boat, known as the Crescent City, to be towed up from Paducah to Eastport. The wharf-boat arrived on the 27th following, and was immediately assigned for the storage of clothing, camp and garrison equipage, quartermasters', medical, and subsistence stores. The stores that were lying exposed on the river bank were at first put on board; afterwards those from the steamers.

Previous to my arrival at Eastport large quantities of stores not needed for the army had been received, while those actually required had not come to hand.

Notwithstanding my efforts from time to time to prevent it, large quantities of grain and other quartermasters' stores, in advance of what was required for the supply of the troops, and what had been asked for by me, kept coming to hand—hence an undue accumulation of grain at a depot, subject at any time to an overflow; and where besides, there were no means of protecting it against the

heavy rains prevalent at that season of the year.

On the 24th of February, before the river had begun to excite apprehensions for the safety of the public property that was, for want of storage room, left on the river bank, I directed Captain W. A. Warren, assistant quartermaster, to apply to Colonel R. Stewart, commanding 5th division of cavalry, military division Mississippi, and post, for a detail of men, to report immediately, and be worked in conjunction with three hundred of Captain Warren's laborers in loading the stores, day and night, on the boats and barges detained at the landing for that purpose.

The detail reported tardily, and worked as soldiers badly disciplined usually

work.

Soon the river commenced rising, but slowly. I now made requisition on other officers for a further detail of five hundred men, and the day following for another five hundred. With these details I proceeded to transport all the stores on the bank at Chickasaw, distant about two miles from Eastport, and the only near landing accessible, and above high-water mark. On account of the back-water the stores could not be taken to the high hills in the rear of Eastport. Finding that my present strength of detail was insufficient to accomplish my purpose, I applied to Brevet Major General Wilson, commanding cavalry corps military division Mississippi, whose headquarters was twelve miles distant at Gravelly Spring, for an additional one thousand men, and stated in my application the apprehension I felt for the safety of forage, unless prompt and energetic measures were taken to remove it ere the river rose to too great a height.

I have no knowledge of that application being acted upon. Every effort was made by myself and the officers on duty in the quartermaster's department

under me at Eastport to save all the property in jeopardy.

We had ample time to have removed every sack of grain and other articles of property, (that afterwards became lost,) and would have done so, I am assured, had the details of soldiers asked for reported promptly and worked industriously.

The department is greatly indebted to the foresight of Major General Thomas, in directing me to order up the wharf-boat Crescent City. Without it and its

ample means of storage, the loss of property would have been immense. The grain in best condition was removed to Chickasaw first; the worst was left to be handled last, and was lost.

After the river had risen to such a height as to submerge the grain, all attempts to remove it were abandoned. Even if we had not done so, and had succeeded in getting all or part of it away, it would have been useless for any purpose whatever.

A large portion of the corn received before my arrival and during my stay at Eastport was more or less damaged ere it left the depots on the Ohio river. I am of the opinion that it had been gathered and sacked before maturity. The sacking, too, had been improperly done.

The following statement of property lost to the government by this unpar-

alleled overflow may be relied on as nearly correct:

Twenty thousand sacks of grain; twelve unserviceable wagons; ten unserviceable and serviceable ambulances; seventy-five worn-out wagon beds; a few old tents previously occupied by hired men of the quartermaster's department. Its estimated money value is one handred thousand dollars (\$100.000.)

One hundred and forty-eight of the wagons that had been ten feet under water were recovered during my stay at the landing and shipped to Nashville. Many of the wagons and ambulances reported above as lost lodged in trees and driftwood, and could not at the time be got at. I have no doubt, however, but that subsequently upon the subsiding of the waters many of them were recovered.

At one time, about the 28th of February, the waters reached the unprece-

dented height of thirty (I think) feet above low-water mark.

On the 17th of March I applied to Brevet Major General Wilson, commanding the troops, for the convention of a board of survey to determine the exact amount of public property lost and damaged by the freshet and to fix the responsibility. Up to the time of my departure the board had not convened.

Although all the officers serving under me exerted themselves manfully to save the public property, one of them, Lieutenant Delos Allen, 119th Illinois volunteers and acting assistant quartermaster, is deserving of special notice. This young officer displayed the most untiring zeal and industry in this respect. He not only exposed himself day and night to the heavy rains that continued for days, deluging the surrounding country, but often times waded up to his middle in the water, compelling his men at the same time to follow him.

Feeling that my services as chief quartermaster of the army were no longer needed at Eastport, I left that place on the 19th following, and proceeded to report to the major general commanding at Nashville, arriving there on the 22d.

On the 2d of April, by verbal order of the major general, I went to Knox-ville, Tennessee, and while there performed my duties as chief quartermaster of the army, then in active service in that section of East Tennessee, and also assumed charge of the depot of Knoxville and the more advanced one of Greenville. Nothing worthy of note occurred while on this duty, further than I made it my special duty to see to the well providing of the army with all its necessary wants.

Active operations ending in this quarter, I returned to Nashville on the 30th of same month. The 4th army corps, which had been lying in the vicinity of Nashville for some time, now refitted and paid off, was ordered to Johnson-ville, Tennessee, to embark for New Orleans. I at once proceeded to John-

sonville to superintend the embarkation of the troops.

The corps took up its line of march for Johnsonville, by railroad, on the 15th of June. The means of transportation was limited to eight wagons and teams to every thousand men; altogether, the number of animals was thirteen hundred belonging to the command. Its brigade of artillery and wagon trains marched to the point of embarkation by land. The embarkation of the troops

having been completed by the evening of the 18th, on the following day I

returned to my station.

The organization of the army of the Cumberland ceasing to exist, I was relieved of my duties with it by Special Order No. 2, headquarters military division of Tennessee, June 25, 1865, and directed to report to Brevet Major General J. L. Donaldson, chief quartermaster of the division, for further orders. This officer then directed me to report for duty to Major General George Stoneman, commanding department of Tennessee. I immediately assumed charge as chief quartermaster of that department.

Not being accountable for public property, with the exception of, at one time, some few articles of office furniture and clothing, camp and garrison equipage, I have none to report as lost, destroyed or captured by the enemy while under my direction. For the same reason, no property captured by our army has fallen into my hands. I may except some cotton, altogether about five hundred and eighty-five bales; which, being taken possession of from time to time by Major General Wilson's forces on their march to Macon, Georgia, &c., and shipped to me at Nashville, Tennessee, was immediately (as each lot arrived) turned over to the proper officer of the United States Treasury Department. I set down ninety-five thousand dollars (95,000) as its estimated value. The cotton in question has been duly accounted for on my property returns.

Statement of quartermaster's property for the fiscal year ending June 30, 1865.

158 64 1, 672 13 Statement of property captured from the enemy, received by Colonel A. J. Mackay. assistant quartermaster, and its estimated value, during the fiscal year ending June 30, 1865.

595 bales of cotton, (estimated value \$95, 000,) captured by Major General Wilson's forces on their march southward, and shipped to me for disposition.

I am, general, very respectfully, your obedient servant,

A. J. MACKAY.

Colonel and Chief Quartermaster Department of Tennessee.

Brevet Major General M. C. Meigs,

Quartermaster General U. S. Army, Washington, D. C.

A true copy:

JOHN V. FUREY, Captain and Assistant Quartermaster.

#### No. 99.

MADISON, INDIANA, July 10, 1865.

GENERAL: In obedience to General Order No. 39; dated Quartermaster General's Office, Washington, D. C., July 1, 1865, I have the honor to make the following annual personal report. My last annual report was made at Louisville, Kentucky, December 1, 1864, for the year ending June 30, 1864. My being in the field, and not having access to my papers, prevented my sending it any sooner.

On the 1st day of July, 1864, in obedience to an order from headquarters department of the Gulf, I was at Madison, Indiana, engaged in correcting old

accounts and awaiting orders from Washington.

On the 10th of August I received notice from the Secretary of War of my appointment as colonel and chief quartermaster, department of the Tennessee. I immediately wrote to you asking instructions. On the 29th of the month I received an order from the Adjutant General's office, dated August 25, 1864, directing me to report in person to Major General O. O. Howard, commanding the department of the Tennessee, and relieve Colonel J. D. Bingham.

On the 5th of September I started for Atlanta, arriving there on the 13th, and on the 14th I reported to Major General O. O. Howard, at East Point. Colonel Bingham had started north, passing me on the way, and left Captain J. T. Conklin, assistant quartermaster, acting chief quartermaster. I was immediately placed on duty, relieving Captain Couklin, who asked and obtained leave

of absence for thirty days.

I was fully occupied to the close of that month clothing and equipping the army, clothing returned prisoners, and making changes in the personnel of the quartermaster's department, rendered necessary by the reorganization of the corps and the numerous leaves of absence granted to officers, from sickness and other causes

The enemy having broken our line of communication, General Sherman started in pursuit. Early on the morning of October 4 the department headquarters broke camp at East Point, and, moving through Atlanta, crossed the Chatta-

hoochee and went into camp near Vining's Station.

The urgency of pursuit compelled a forced march, for which the animals, having been for some time only fed with half-rations of grain and no hay, were but ill prepared. Added to this, the horrible condition of the roads, cut up in former campaigns and softened by late rains, caused the management of the

trains to be a task of difficulty. Many animals died from exhaustion and fatigue. It was estimated that in one corps (the 17th) above one hundred and fifty horses and mules were lost in that day's march. I took my station at the pontoon bridge on the Chattahoochee, and regulated the crossing of the trains, which was effected without accident. The night was dark, and it was a late hour as we wended our weary way to the encampment. Early next morning, October 6, we moved, passing through Marietta, and going into camp at Culp's farm, remained until the 8th. This period of rest was invaluable to the teams. I issued orders to the quartermasters to improve this and every opportunity for grazing the stock. We had no grain, but found good pastures. Subsequently, as the army advanced, we captured abundance of corn and fodder, and the stock improved rapidly in condition to the close of the campaign.

On the afternoon of October 8 we moved round to the north side of Kenesaw

mountain, remaining until the 10th.

At 4 o'clock a. m., October 10, we started for Kingston, passing through Big Shanty, Acworth, Alatoona, and Cartersville; made thirty-one miles, and camped four miles from Kingston.

Next day marched to the music of the guns, passing through Kingston, and

camping three miles out of Rome.

Next day started at 4 p. m. for Resaca; rode till after midnight, and camped in a field near the Gaines. Early next morning continuing the march, we passed through Calhoun, and went into camp late at night, on the banks of the Oastawoula river. Sharp fighting had been going on through the day, the enemy occupying the hill beyond Resaca in force; trains continued to arrive till midnight.

For the purpose of giving my more immediate and personal attention to the bringing up of the supply train, I at the time detached myself from the head-quarters and travelled with the trains. The rapidity and length of the marches, the necessity of giving the road to the troops and artillery, the sometimes improper interference with trains by regimental and brigade commanders, and the eager desire of each train-master to push his own train ahead regardless of his time or right of road, rendered the conduct of the train a matter of great difficulty and arduous labor to myself and the corps and division quartermasters under me. I am happy to say that our efforts were successful, and when in camp at Little river, Alabama, the general commanding expressed his surprise and gratification at the manner in which the trains had kept up with the troops.

October 15, the enemy having been forced from Snake Creek gap, I moved the trains into and through the gap, continuing the march till after midnight. The scenery, as we emerged from the dark mountain gorges into the campaign country beyond, all flooded with the light of the full-moon, was beautiful and sublime.

October 16, moved early, passing through Dirttown valley, between Johnson's and Taylor's mountains. This valley was very fertile, abounding in supplies. Halted at Subligua four hours to allow the trains of the 23d corps to pass, then moved on to Villanow. Here I received orders from headquarters to organize a train consisting of the poorest animals and wagons, to send to Chattanooga with all spare baggage, &c. The next day was spent in organizing and despatching this train.

October 18, I brought up the supply train to the Chattanooga river, near Summerville. The troops were camped in and around Summerville. Next day forded the Chattanooga river, and moving through Summerville and Alpine, went into camp near Gaylesville. Supplies were very abundant, more than the

army required being found.

October 20, we moved two miles, and were halted till afternoon. Here, in a farm-house, I found General Ransom lying at the point of death. He had followed the army in an ambulance, though urged and entreated by his friends

to stay in Marietta. Now he was quite unable to proceed, and being carried back to Rome on a litter, died on the way. He was an officer of fine promise, universally loved and admired for his amiable disposition, and his noble and indomitable spirit. He fell a sacrifice to his ardor and love for the service. In the afternoon we moved on, and passing through Gaylesville, I rejoined the camp at headquarters of the department, near Little river, Alabama. Here the pursuit of Hood's army ceased. Our army remained in camp until October 28. The interval was spent in procuring supplies of food and clothing from Rome. The army was further eliminated of all, the surplus baggage, tents, worthless teams, unserviceable stock and spare artillery. A train was sent to Chattanooga with refugees, the sick, wounded, and prisoners. Thus was the army prepared for the subsequent "march to the sea," by stripping it of all its cumbrous material.

On the 28th of October I started on the return to Atlanta. The headquarters went into camp at Cedar bluffs, but the trains continued the crossing of the Coosa river all night. I had large fires lighted on each side to light up the pontoons. General Howard staid by the bridge till near midnight. Next morning we moved on to Willow Centres; the enemy's cavalry hovered around

us all day, threatening the trains, and picking up stray foragers.

October 20, we marched to Cave springs, where we remained two days. From Cave springs, by way of Cedartown, Van Wert, crossing the Dugdown mountain, by Dallas and Powder springs, we returned to Smyrna camp ground. The weather was rainy and the roads bad, but the army moved by easy marches, and at the close of the campaign was in much better physical and moral condition than at the starting out. The colored pioneer corps of roadmen, organized by Lieutenant Colonel Fort, assistant quartermaster, and always kept at the head of his supply train, proved of incalculable benefit in the saving of mules, wagons, and time. Here at Smyrna camp ground the campaign ended.

General Howard wishing to reduce his camp, resolved to send his headquarters back to Louisville, and directed me to proceed there with Lieutenant Colonel W. T. Clark, assistant adjutant general, and establish a headquarters there. On the 7th of November I rode into Atlanta to prepare for the return north. A large amount of private baggage belonging to officers, as well as public stores, having accumulated in Atlanta, I directed Captain Kennedy, assistant quartermaster,

to take charge of it and transfer it to Nashville.

I left Atlanta on the 8th of November, reaching Louisville on the 11th. At Louisville I opened an office, wrote my last year's annual report, and sent in estimates of clothing, &c., for the army of the Tennessee. Numerous claims being presented for payment, I appointed Captain A. G. Burr, assistant quarter-

master, disbursing officer for the department.

On the 27th of December, I received orders to proceed with the headquarters to Savannah. I immediately went to New York to procure transportation. There were a large number of officers and men, and about twenty tons of freight. The steamship Cahawba was assigned me. On the 7th of January, 1865, we moved out into the river, and the next day put to sea. The passage was rough and the vessel, as I afterwards found, unseaworthy; but we arrived in safety at Beaufort, South Carolina. On reporting to General Howard, I was ordered to report to the Quartermaster General, then in Savannah. I proceeded in the steamer Crescent City, and reported accordingly. By you I was ordered to report to General Eaton, and by him to General Sherman, who placed me on his staff as chief quartermaster military division Mississippi, in the field.

General Sherman's army was now rapidly moving on its South Carolina campaign. The army of the Tennessee had gone by sea to Beaufort. The army of Georgia moved up the Savannah river, to cross at Sisters' ferry.

On the 23d of January, I proceeded with the military division headquarters,

to Beaufort, South Carolina.

January 27, marched to Pocotaligo, a distance of twenty-two miles. The road, lying through some of the worst swamps of South Carolina, had to be corduroyed nearly half the distance. We went into camp at Elliott's plantation, and remained there till the 1st of February. Here I wrote up and mailed my January reports. On the morning of the 21st we moved, travelling with the 15th corps. We marched this day twenty-three miles, going into camp at Hickory Hill Post Office. Some skirmishing occurred on the front; a private and a lieutenant being killed.

February 2.—Marched to Duck creek, ten miles; more skirmishing; several men killed on both sides; next day remained in camp awaiting the army of

Georgia to close up.

February 4.—Marched to the Salkehatchie; camped near Buford's bridge. General Howard having fought his way across at Binnaker's bridge, this strong point was abandoned without a struggle; we had, however, to rebuild the causeway across the marsh that borders the river; this causeway, two miles in length, and containing twenty-seven small bridges over the little runs of the marsh, was built between 4 o'clock in the afternoon and the following morning. Next day we moved across the river, and camped at Buford's bridge.

February 6.—Marched eleven miles; camped at Dr. Fishburn's plantation, at the crossing of the Little Salkehatchie; the enemy fought three hours and burnt the bridge; a new bridge was soon built; beyond the bridge the trains were compelled to pass through water for nearly two miles, to the depth of from two to

four feet.

February 7.—Marched into Bumbay, five miles; this was a nice, thriving town on the Charleston and Augusta railroad. The 15th corps was busy tearing up the railroad as we entered; the last train to Charleston passed about 4 o'clock that morning. In Bumbay we found an immense quantity of cotton, which was burned.

February 9.—Marched to Walker's plantation, distance ten miles; here we remained one day, while the troops were completing the destruction of the railroad.

February 11.-Marched twenty miles, crossing the Edisto; encamped at

Poplar Springs.

February 12.—Moved early on the "96" road; halted till afternoon, near the North Edisto; a severe fight took place, which ending in the rout of the foe, two pontoon bridges were thrown across, and about 6 o'clock the crossing commenced, and continued all night; I remained at the bridge till near midnight, then rode out to camp. The concentration of the army at the bridge gave me an opportunity of seeing the captured horses and mules, ridden by foragers, and it was with surprise I noted the great number already captured.

February 18.—Marched seventeen miles to Blum creek; our route lay over a sandy ridge between Caw creek and Lumber creek; the ridge being covered with a turpentine timber, which was set on fire by our soldiers; our trains were at one

time in danger of being burned.

February 14.—Marched seven miles; camped in a pine grove.

February 15.—Marched seven miles to near Congaree creek; witnessed a charge by a division on the enemy, who fled over the creek, leaving the bridge unburned; they had strong works on the opposite bank, but did not occupy them.

February 16.—Marched across a broad plain, opposite Columbia; camped near

the Saluda river.

February 17.—Crossed the Saluda and Broad river on pontoon bridges; while laying the second pontoon, word came that Columbia had surrendered to our skirmishers. I had the honor of accompanying General Sherman in his triumphal entry into the city; I was ordered by the general to hunt up valuable machinery, especially lathes, and take charge of captured property; I entered upon this duty, and found large and valuable stores. The great fire, however

destroyed most of them, to the great loss and detriment of the government. At the depot a large quantity of grain was found and secured; mills were occupied, and flour and corn meal ground for the troops and indigent citizens. When we left the city these mills were spared from the general destruction, and turned over to the citizens, with a quantity of corn, to save them from starvation. The next three days were spent in destroying public buildings, including the gas-works, depot, arsenal, &c.; in the arsenal immense quantities of ammunition were found; the latter were carried down to the river and thrown in; a pile of it unfortunately exploded, causing the death of some twenty men. Many escaped prisoners, both officers and privates, joined us here with the most extravagant demonstrations of joy. In regard to the fire in Columbia, I will say that, although its origin cannot be clearly ascertained, and our generals and officers used every exertion to subdue it, I cannot but look upon it as a just and righteous retribution upon the citizens for the unexampled malignity they have ever displayed towards the government. Here the ordinance of secession was hatched, and long before the war a northern lady teacher was tarred and feathered; a number of Germans served the same way, while the escaped prisoners all tell the same tale of villanous treatment.

February 20.-Marched out of Columbia, and proceeded up the Charlotte and

Columbia railroad ten miles; camped by a saw-mill.

February 21.—Marched fifteen miles to Winsboro'; a rebel woman set fire to her store, filled with cotton, and destroyed two or three blocks before the troops entered; the 14th corps entering first, put out the fire, and appropriated the large

amount of supplies found there.

February 22.—Marched twenty miles to Rocky Mount; camped on the Berkeley place; the roads were fair, and the country rich and plentiful in supplies; troops crossed the Cahawba river by night on a pontoon bridge five hundred and fifty feet long; we remained in camp the next day; the trains of the 20th corps crossing all day, and the cavalry all night. Heavy rains fell all day and night, which rendered the steep hills leading to and from the pontoon all but impassable.

February 25.—Crossed the Cahawba, and marched eight miles.

February 26.—Marched eight miles to Hanging Rock; remained there the next day waiting for the 14th corps to cross the Cahawba river; a freshet had broken the pontoon and caused delay. General Sherman ordered all the wagons not over by the next morning to be burned; General Jefferson C. Davis, by making great exertions, saved the train. Large numbers of valuable horses and mules were found concealed in the swamps and glens of this region, as well as caches of food and clothing.

February 28.—Marched ten miles, crossing Little Lynch creek; camped at

Widow Clyburne's house; roads quicksand, worse than any I had seen.

March 1.—Marched ten miles, crossed Big Lynch creek; camped on Brewer's farm, on the right wing; refugees from Charleston and Columbia crossed the line of march, and fifty wagons were captured.

March 2.—Made a forced march of some twenty miles to Chesterfield Court House, hoping to save the bridge over Thompson's creek, but it was burned; next day remained in Chesterfield, waiting for the 14th corps to close up.

March 4.—Moved twelve miles to Chuato; found General Blair in possession, with large captures of supplies, including corn and provisions, which were dis-

tributed to the troops.

March 6.—Moved across the Pedee river and camped two miles beyond. A terrible explosion took place on the brink of the river, where powder had been carried and thrown into the water, that shook the earth for miles around. General Howard's headquarters train was near, waiting to cross the pontoons; it stampeded to the woods, killing one teamster and breaking wagons and harness.

March 7.—Moved twelves miles and camped in a pine grove.

March 8.—Moved eleven and a half miles; roads sandy, but good; light rain. Crossed the Wilmington and Charleston railroad; entered the State of North

Carolina. Went into camp at Laurel Hill.

March 9.—Moved fourteen miles to Bethel church. Crossed the Lumber river on a pontoon; entered the Big Raft swamp. Trains could not get up by night, and the general and staff slept in the church. The supply trains were scattered along the road clear back to Laurel Hill. All the available troops were employed in making roads. Next day we remained in camp waiting for the trains to close up.

March 11.—Entered Fayetteville amid loud cheers from the 14th corps, which being the first to enter, held the place. Made the distance, twenty-six miles, by noon. Trains did not get in till night. Took up quarters in the arsenal; found several hundred bags of corn and some hay there. Remained in Fayetteville till the 14th. The public buildings were destroyed. Mills were used to grind corn and wheat for the troops. A gunboat from Wilmington arriving, brought the first direct news from the north since leaving Pocotaligo. Transports came up, bringing oats. Shoes and socks would have been more acceptable, and word was sent down to procure clothing and hard bread, sugar and coffee. The boats were sent back laden with the sick and wounded.

March 14.—Crossed Cape Fear river and camped two miles beyond. I established a landing at the river, expecting more supplies. The Benton arrived, laden with shoes, pants, and hard bread. I directed Lieutenant Colonel Fort to take the clothing and distribute equally to the 4th corps. The hard bread I turned over to Colonel Carpenter.

March 15.—Moved with the left wing fourteen miles on the Wilmington

plank road to Silver run.

March 16.—Moved five miles. Came upon the enemy in a strongly fortified position. They fought with great fury, and being driven from one line of works, fell back to another, which they held till night, when they decamped. This day, while standing with the general and staff a little behind the front, when the battle was raging furiously, a canister shot dropped in among us, sending a shower of leaden balls around. No one, however, was hurt, and the only notice taken was by moving a few rods on one side, to be out of range. The losses on each side this day must have been nearly 600.

March 17.—Moved about two miles. Built a log bridge across Black river. which was much swollen by the rains. Alfred Rhett, a rebel colonel of artil-

lery, was captured and brought to headquarters this morning.

March 18.—Marched eleven miles; roads bad and creeks high. Crossed Beaver Dam creek. Foraging very plentiful. Skirmishing in the advance all

da4

March 19.—Moved with the 17th corps on the Goldsboro' road; made fifteen miles; crossed Falling creek. Trains did not get up, being stuck in the swamps. The general and staff were indebted to General Howard and staff for supper and bed. Camped near the cross-roads leading to Cox's bridge, on the Neuse river. Heavy fighting was heard on our left all day. It was, as we learned at night, a desperate attempt of Johnston to crush the left wing by falling upon it with his whole army. All this day the woods on our left were swarming with rebel cavalry. The trains at times were severely threatened. Many small foraging parties were captured; but supplies were never so abundant.

March 20.—Moved early. The right wing moved up the Neuse river some ten miles and fell heavily on Johnston's rear. I rode with the general to the scene of conflict. The battle raged fiercely. Lines of works were taken and retaken. Thousands of our men fought through the timber and brush barefooted; but the greatest spirit of cheerfulness and resolution seemed to animate

the men. At night the balance of advantage was in our favor. The firing con-

tinued briskly all night.

March 21.—We had expected to be in Goldsboro' to-day, and there clothe the army anew. This desperate attack of Johnston's prevented it; and as this morning the fighting was renewed with great ardor, it seemed uncertain when we would get there. The general therefore directed me to proceed to Kingston and forward shoes, socks, and hard bread to the army without delay. In company with Colonel Remick, chief commissary, I proceeded to Kingston, reaching there by the afternoon of the 22d, distance fifty miles. Orders were issued to all the corps quartermasters to unload their supply trains at specified depots and send them at once to Kingston. At Kingston I found supplies already arrived by barges from Morehead City.

March 23.—Large trains from the army having reported, those of the 17th corps were loaded up and ready to start by night. Next day the trains of the 14th and 11th were got off and the 20th reported. By the 25th I had sent to the army 43,000 pairs of bootees, 21,000 pairs of socks, 28,000 shirts, 12,000 pairs of drawers, 13,000 pairs of pants, with a large quantity of other articles. In

addition to which, heavy commissary supplies were sent forward.

March 28.—General Sherman passed down on the first through train from Goldsboro' to Morehead City. I commenced sending supplies to Goldsboro' by rail; but as the amount of rolling stock was very limited I thought it best to keep the wagon train still running. I remained in Kingston until the 30th, when I went up to Goldsboro'. Captain S. W. Hoskins, assistant quartermaster, was left in charge of clothing and quartermasters' stores; Captain R. W. Clark, assistant quartermaster, in charge of forage; and Lieutenant Hibbard.

acting assistant quartermaster, in charge of railroad transportation.

April.—I entered on duty at Goldsboro' in charge of depot, regulating the railroads, the distribution of supplies, and other matters. By your direction I had a lot of machinery, with engines and boilers, &c., complete for sash, door and blind manufacturing, taken down and sent to Morehead City. Captain H. B. Whetsel, assistant quartermaster, performed this duty; and that being completed, I put him in charge of forage. Captain Justin Hodges, assistant quartermaster, was, by order of General Easton, placed in charge of clothing, camp and garrison equipage, and quartermaster's stores. The increased amount of business devolving on this office precluded that method and order so necessary to correctness in accounts; but the short period of stay rendered it impracticable to make any change. Lieutenant John McWilliams, regimental quartermaster 129th Illinois, having been detailed and reported for duty, I placed him in charge of all unserviceable and abandoned property.

April 10.—The army again took the field, headquarters military division moving with the 14th and 20th corps, skirmishing on the advance all day;

made eleven miles and camped on Raccoon and Moccasin swamps.

April 11.—Marched eleven miles to Smithfield. Found the bridge over the Neuse still burning and the enemy in sight on the opposite bank. Smithfield was a town of local importance, and boasting a court-house, jail, and stocks and whipping-post. Negroes reported that Union soldiers had been whipped at the latter; it was therefore burned. By night a pontoon bridge was completed across the Neuse river.

April 12.—Early this morning news was received of Lee's surrender. About noon we crossed the Neuse and marched to Gully Station. After supper a deputation arrived from Raleigh to confer with General Sherman about the

surrender of the city and other matters.

April 13.—Marched fourteen miles into Raleigh; headquarters were established in Governor Vance's palace. In Raleigh I found large quantities of corn and fodder. The passenger depot was burned by Wheeler's cavalry, but the machine shops, round-house, &c., saved. By direction of General Thomas, I took charge

of the railroad; I found three locomotives, some eighty or ninety box and platform cars, quantities of railroad iron and valuable bridge timber. The superintendent and foreman offering their services, I directed them to assemble all the employes of the railroad they could find and set them to work. They gladly came forward, and by the afternoon of the 14th I had sent a train to the Neuse river (where Colonel Wright was making a bridge) loaded with bridge timber and iron rails. Another locomotive was sent forward, communicating with General Kilpatrick in the advance, and bringing back cars and stores captured from the retreating foe.

April 15.—I accompanied Major McCoy to communicate with General Johnston. A letter had been sent through Kilpatrick's headquarters, the day before, by General Sherman, but from some mistake it had not been delivered. This caused some delay. After night, as we were running from Page's Station to Durham, a torpedo exploded under the tender, but did little damage. Fearing more, we returned to Page's Station, and leaving the major there. I returned

to Raleigh.

April 16.—I ran up the railroad to Durham Station, stopping for Major McCoy on the way. A message was received asking an interview between Johnston and Sherman. This was granted and arranged to take place the next day.

April 17.—I accompanied General Sherman and staff to the first conference with Johnston. A good passenger car bore us to Durham Station; thence we rode on horseback, escorted by General Kilpatrick and his body-guard.

April 18.—I went to the second interview. Returned to Raleigh by 7 p.m., and 11 p.m. despatched a special train carrying Major Hitchcock with despatches for Washington. An agent having been sent by Colonel Wright to take charge of the railroad, I turned over all pertaining to it to him. Captain H. B. Whetsel, assistant quartermaster, was placed by me in charge of railroad transportation; Captain F. C. Butze, in charge of houses and buildings; Captain A. M. Garoutte, assistant quartermaster, in charge of corrals and A quantity of light-house property being found in the capitol, I directed Captain Isenstein, assistant quartermaster, to take charge of it, have it carefully packed, and shipped to care of Captain J. D. Treadway, at Morehead City. At your request I sent a list of fourteen questions (calling for information in regard to transportation) to the corps quartermasters. From only one did I receive any reply. I found it very difficult to get reports on this campaign, the excuse being that, under orders, they had left all their desks and clerks behind at Savannah, and could not make them. One exception to this was Lieutenant Colonel G. L. Fort, chief quartermaster 15th army corps, whom I ever found an earnest, faithful, and zealous officer, ready and willing to obey orders as far as possible. His reply to these questions I append to this report. On the 20th of April trains loaded with provisions and oats commenced arriving from Morehead City. The stopping of all foraging on the country, rendered this a matter of great interest. It being decided to march through to the north, you directed me to purchase forage of the citizens on the route; and as the armies would travel on different roads, I was assigned to the duty of purchasing for the army of the Tennessee. It was your wish that no claims should be left unsettled. In order more fully to carry out your wishes, I appointed Captain A. S. Flagg, assistant quartermaster, to disburse for the 17th corps. and Captain H. B. Whetsel for the 15th. Blank receipts were printed; there signed by the disbursing officers, and distributed to the officers in charge of foraging parties, who, on taking forage, filled in the quantities, countersigued them, and gave them to the citizens, with instructions to follow the army to the camp at night, and present them to the disbursing officer for payment. ()n presentation, vouchers were made and paid. The division quartermaster took up these receipts and accounted for the forage. This plan worked well. Very few receipts were left unpaid, and those only through the neglect of the holders

to present them for payment. The disbursing officers frequently waited at camp three or four hours after the headquarters moved, to afford time for the parties to come up. I cannot leave this subject without speaking a word in praise of those two officers, Captains Flagg and Whetsel, whom I ever found

industrious, diligent, and faithful in the discharge of every duty.

April 30.—Commenced the homeward march, General Sherman and staff having gone home by sea. I found my camp, with the headquarters military division train and escort, under care of Lieutenant E. C. Homer, acting assistant quartermaster, and camped each night near General Blair's headquarters. This day we marched thirteen miles. Camped at the house of Mr. Dunn, superintendent of the Raleigh and Gaston railroad.

May 1.—Marched twenty-one miles, crossing Tar river; camped one mile be-

yond.

May 2.—Marched twenty-four miles; camped at Ridgeway Station. Found supplies more plentiful since crossing the Tar river. The citizens in general were glad to sell, but there were some exceptions in the case of wealthy planters, who refused to sell to officers for mess supplies out of their abundance of farm produce. This section of country had scarcely felt the war, and the planters were insolent, declaring their intention to hold and whip their slaves as of old. The negroes flocked to the camps, asking advice. They were not permitted to come along, but were advised to remain and wait patiently the enforcement of the law which made them free.

May 3.—Marched fourteen miles; went into camp near the Roanoke, at Robinson's ferry. The pontoons of the 15th and 17th united were too short to span this broad river; a trestle road was built out into the shallow water about one hundred feet, some pirogues and flat-boats were found and used, and so the bridge was pieced out. The entire length was sixty-four feet. Lumber was hauled from a saw-mill five miles distant.

May 4.—Moved late in the afternoon, crossed the Roanoke, and entered Vir-

ginia; marched ten miles and camped near White Plains.

May 5.—Left camp at 4.30 a. m.; crossed the Meherrin river at Pennington's

bridge; marched twenty-four miles.

May 6.—Moved at 5 a. m.; marched twenty-eight miles; crossed Nottaway and Stone rivers; struck the Boydtown plank road; passed Dinwiddie Court House, and went into camp about two miles beyond.

May 7.—Left camp at 5 a.m.; marched into Petersburg; camped at General Ewell's old headquarters; found forage there, and directed the quarter-

masters to procure supplies.

May 8.—Left Petersburg at 4 p. m.; marched eight miles and camped.

May 9.—Arrived at Manchester at 10 a. m.; camped by the mills near the pontoons. General and staff came up from City Point and joined camp.

May 11.—Broke camp at 8 a. m.; rode with the general as he reviewed the troops of the 14th passing through Richmond. March twenty miles, crossing the Chickahominy and camping near Hanover Court House; rained heavily at night.

May 12.—Remained in camp till afternoon, waiting the roads to dry. Crossed the Pamunky river on a pontoon bridge. The river was rising rapidly and flooding the bottom; delayed the trains of the 14th corps; made seven miles and camped one-half mile beyond Concord church.

May 13.—Marched seventeen miles to Childsburg.

May 14.—Marched at 4.30 a.m.; marched sixteen and a half miles; forded Po river, which swam our horses; built a log bridge across for the trains;

camped at Spottsylvania Court-House.

May 15.—Rode with the general and staff over the battle-grounds; also over Chancellorsville; camped on Marye's heights. In the evening, visited the city; it looked desolate. I found among the inhabitants an intense bitterness of

feeling and hatred of the government, with a disposition to boast of their former victories and that of opportunities yet to come.

May 18.—Marched twenty-four miles; all suffered much from the intense heat; halted at noon near Polick church; camped within six miles of Alexandria.

May 19.—Marched through Alexandria, and camped two miles beyond; found General Webster already encamped with the rest of the staff, head-quarters, property, &c., from Savannah; remained there till May 22, when the command passed through Washington and camped near the Finley hospital.

May 23 and 24.—Attended the grand review of the armies in Washington; the balance of the month was spent in closing up accounts with quartermasters about to leave.

On the 27th of May I received from General Thomas a leave of absence for thirty days, with orders to report at its close to the headquarters military division of Mississippi wherever it might be.

On the 29th of May I started for home. In the latter part of June I received orders from General Sherman to meet him at Louisville on the 4th of July, to proceed with him to the headquarters at St. Louis.

The above report is respectfully submitted.

M. C. GARBER,

Colonel and Chief Quartermaster Military Division

of the Mississippi, in the field.

Brevet Major General M. C. MRIGS, Quartermaster General, Washington, D. C.

A true copy:

JOHN V. FUREY, Captain and Assistant Quartermaster.

#### [Extract.]

INDIANAPOLIS, July 25, 1865.

DEAR SIR: I take pleasure in recalling the valuable services you rendered me and the army during our eventful march from Savannah to Goldsboro', and thence to Raleigh and Washington, and to express my great confidence in your business qualifications and ability. I hope you will enjoy health and prosperity, and live long to enjoy the peace and security you aided to establish for our common country.

I am truly your friend,

W. T. SHERMAN, Major General.

Colonel M. C. GARBER,

Quartermaster's Department.

# Assistant Quartermaster General's Office. Cincinnati, Ohio, July 18, 1865.

GENERAL: In compliance with General Orders No. 39, from your office, of July 1, 1865 I have the honor to report that from the 1st of July, 1864, to June 30, 1865, I have been on duty as assistant quartermaster general, with my headquarters in Cincinnati, Ohio. I have not personally had charge of any clothing, or other public property, the chartering or building of steamboats, construction of railways, or transportation of troops or supplies. A statement of the public moneys received and transferred during the year is herewith. The annual report called for by your General Order No. 29, July 6, 1864, was mailed on the 20th of August last.

Very respectfully, your obedient servant,

THOMAS SWORDS,

Assistant Quartermaster General.

General M. C. MBIGS,

Quartermaster General U.S.A., Washington, D.C.

OFFICE OF ARMY CLOTHING AND EQUIPAGE, New York, July 15, 1865.

GENERAL: In compliance with General Orders, No. 39 from your office, I have the honor to report, that during the fiscal year ending June 30, 1865, I was on duty in this city, in charge of the depot of army clothing and equipage, providing supplies for the army.

I respectfully submit herewith a statement of public moneys which have

come into my hands during the past year.

The duties performed by me do not make it necessary to render the other statements described in the order referred to. My assistant, Captain Darrow, will render a statement of funds and a statement of the quartermasters' property which he has been accountable for. Captain R. M. Potter will send a statement of clothing and equipage which has passed through his hands.

My last report, for the year ending June 30, 1864, was forwarded to you on the 25th of August, 1864.

I am, general, most respectfully, your obedient servant,

D. H. VINTON,

Colonel and Deputy Quartermaster General.

Major General M. C. MRIGS,

Quartermaster General U. S. A., Washington, D. C.

DEPUTY QUARTERMASTER GENERAL'S OFFICE. San Francisco, Cal., August 16, 1865.

GENERAL: In obedience to General Orders No. 39, July 1, 1865, from the Quartermaster General's office, I have the honor to enclose a report of my

money transactions for the year ending June 30, 1865.

My last annual report was forwarded October 1, 1864. My duties during the past year have been confined to this immediate station. The constant supervision of some forty-five posts, widely extended over an area of 1,500 by 600 miles, has left me no time for visiting any of the outposts in the department. Transportation of army supplies up and down the coast, up the Columbia, Colo-

rado, and other navigable rivers, upon or near which we have military posts, is furnished promptly by the different lines of steamers and sail-vessels, including our own excellent brig General Jesup. It is but necessary to say that the water transportation has been chiefly under the supervision of Major Kirkham, quartermaster, to indicate that it has been promptly and efficiently performed. and with a constant reference to all practicable economy. Our land transportation has been performed in part with our own six-mule teams and army wagons, in small part (as in the mountainous portions of the Humboldt district) by packmule trains, and upon the longer and principal routes by contract. Forage supplies in Arizona and Nevada during the past year have been very limited and the price very high. In most other portions of the late department of the Pacific they have been abundant and much more reasonable in price. At the present period forage of all kinds, except on the extreme frontiers, is one hundred per cent. lower than I ever before knew it to be in the department of the Pacific. We are sufficiently provided with all necessary quartermasters' stores. Excepting in some few articles our supply of clothing is ample to meet our wants until the receipt of our annual supply from the east in October. The exceptions can be purchased here on very favorable terms. I have been greatly aided and the government greatly benefited by the receipt of funds upon back estimates up to the 28th of February last inclusive, by which many old claims were paid off, the credit of the government better sustained, and purchases made on better terms for cash. Owing to the very considerable appreciation of "legal tenders," I have been able to pay all claims three months ahead of my received estimates, and have been able to omit my estimate for funds for the mouth of August instant. (See my letter of July 10, 1865.) In consideration of the prospect of active service among the Indians in parts of Nevada and Idaho, but especially in Arizona, I respectfully suggest the expediency of forwarding the amount of my estimates for March and April at an early date.

Respectfully submitted.

Your obedient servant.

E. B. BABBITT, Colonel and Chief Quartermaster.

Major General M. C. Meigs,

Quartermaster General U. S. A., Washington City, D. C.

STEWART VAN VLIET.
Brevet Brigadier General and Quartermaster.

A true copy:

JOHN V. FUREY.

Captain and Assistant Quartermaster.

## No. 105.

WASHINGTON, D. C., Ju'y 27, 1865.

GENERAL: At your request, I furnish you with the following data, obtained in my recent trip from Santa Fé, New Mexico, to Fort Leavenworth, Kansas.

There are two old and well-established routes from Fort Union (the main depot of supplies for the troops in New Mexico) to Fort Leavenworth, viz: the "Raton" and the "Cimarron" routes. The former passes over the Raton mountain, crossing the Pingatorie and Timpia rivers and the Arkansas river at Bent's Old Fort; then down that stream, passing Fort Lyon, Colorado Territory, forty miles below; thence ninety miles to Chotcan's island, where it unites with a branch of the Cimarron route, called Aubrey's Cut-off; thence down the river eighty miles to where the Cimarron route crosses the Arkansas river. The two routes unite at this point, known as the Cimarron crossing, and form one route to Fort Leavenworth. The grass on the Raton route is generally good and abundant, but the distance is one hundred miles further than by the Cimarron, and the road is much worse. Fort Lyon, on the Raton route, is a collection of stone buildings erected in 1860-'61 by six companies of the then first United States cavalry, under the late General Sedgwick, then lieutenant colonel of that regiment. Nothing of any consequence has been done to the buildings since he left them. They are incomplete, but habitable, and are, or were as I passed, occupied, I The animals, both believe, by three small companies of Colorado volunteers. horses and mules, of this command, were not in very good order, which was attributed to the want of grain, of which they had been without entirely for several months until a few days before I passed, when a large supply was received The grain for this post should come from the settlefrom Fort Leavenworth. ments on the Arkansas river, which commence some sixty-five miles above the post, and from those on the Hunfans and Pingatorie rivers, tributaries of the Arkansas from the south, and from which it could be hauled at certainly less

expense than from Fort Leavenworth. The crops through the section above referred to I examined closely, and they promise an abundant harvest. Hay can be had in any quantity within from three to ten miles of the post, and should not cost over fifteen or twenty dollars per ton, delivered and stacked. The quartermaster and commissary stores are in some buildings known as Bent's New Fort, about one mile below, on the river. It would, I think, be better if

the post were completed and the stores provided with storage there.

The Cimarron route branches off from the Raton at or near Fort Union in a northeasterly direction, crosses the Oeato creek, Red river, McHus, Whetstone, and Rabbit Ear creeks, Cimarron river where the Aubrey Cut-off branches in a northern direction, Sand-creek, and a sand desert of fifty or sixty miles, to the Arkansas river, which it crosses, uniting with the Raton route. The grass on the Cimarron route is as good as on the other, but the fuel and water not so plentiful; yet there is enough for passing trains. During very dry seasons the water is quite scarce, and some of it, especially at the Cimarron river, is brackish. It is the route, however, generally travelled by merchants' trains, and now that rebel raids from Arkansas and Texas are not to be feared, should be the route travelled by the government contractors, as it is nearly, if not quite, one hundred miles shorter than the Raton route, and the contract is so much per one hundred pounds per one hundred miles. The only encampment of troops on this route is at Cedar bluffs, a point near what is known as Upper Cimarron spring, about one hundred and forty miles from Fort Union, or nearly half way between that post and the Cimarron crossing, which is just three hundred miles. This encampment consists of three companies of volunteers under Colonel Christopher Carson, and is supplied from Fort Union. The command will return to Fort Union in November. A permanent camp or post should be established on this route at or near the present one of Colonel Carson's, where fuel and water can be procured in sufficient Three companies, one of cavalry and two of infantry, would suffice quantities. for the garrison.

From the Cimarron crossing, where the two routes unite, the road passes down the river about thirty miles to Fort Dodge. This post consists of a few huts made of poles set endwise in the ground and covered with dirt and tents, enclosed by a ditch and a dirt embankment, and garrisoned, I believe, by five companies of volunteers under a Major Armstrong. A few days before I passed two Indians drove off almost all the public animals from this post. These had hardly gotten the stock away before a large number of their people, estimated variously at from 500 to 5,000, showed themselves on the surrounding hills.

The grain for Fort Dodge is hauled from Forts Riley and Leavenworth. Hay is abundant in the river bottom near the post, and should not cost over twenty dollars per ton, delivered and stacked. Fuel and building material, like that used in making the huts that they now have, can, I was informed by the post quartermaster, be obtained in sufficient quantities within fifteen miles of the post on either side of the river.

From Fort Lyon to Fort Dodge, a distance of about two hundred miles, there are no troops. I am of the opinion that a four-company post, two of cavalry and two of infantry, should be established about half way between these two posts, and that if the troops were active it would protect the travel more from

the Indians than anything else that could be done.

The road passes down the river from Fort Dodge for some eight or ten miles, there divides—one part, of one hundred miles in leugth, following the river, with plenty of water; the other passing over the ridge, without water in dry seasons, cutting off some thirty miles, and uniting with the river route at Fort Larned, on Pawnee fork. Fuel on these two roads is scarce, and trains are almost entirely dependent for it on the dried excrement of buffalo and the cattle of trains, familiarly known as "buffalo chips." The grass is good.

Fort Larned is a post of four companies, some sixty-five miles by the ridge

road and one hundred miles by the river road, below Fort Dodge. It was built in 1858, '59, and '60, of logs set endwise in the ground and roofed with earth. It is on the Pawnee fork, but too far from the road, is surrounded by an abundance of fuel, water, and good grazing. Hay can be cut within a few miles of the post, at a cost, I should think, of about twenty dollars per ton, delivered. It is a proper place for a military post, and should be the depot of supplies for any troops acting against Indians on that line. The grain for this post comes from Forts Riley and Leavenworth. It can and should come from the country around Council Grove and Fort Itiley, and thus save at least transporting it one hundred miles.

At Fort Larned the road again divides, one part, a new route, by way of Fort Riley, Kansas. There are troops on this route at Fort Ellsworth, where the road crosses the Smoky Hill fork of the Kansas river, at Fort Riley and at Topeka. The other route (the old Santa Fé trail) continues down the Arkansas river some fifty miles, crosses Walnut, Cow, and Little Arkansas creeks, to Council Grove, at all of which points are troops; thence via Burlingame and Lawrence, to Fort Leavenworth. Kansas.

For any further information with regard to distance, &c., I would respectfully refer you to the accompanying journal of my last trip across the plains.

Very respectfully, your obedient servant,

J. C. McFERRAN,

Major and Quartermaster.

Brevet Najor General M. C. MRIGS,

Quartermaster General U. S. A., Washington, D. C.

WASHINGTON, D.C., October 4. 1865.

GENERAL: In obedience to verbal orders from you, I submit the following as my report of my recent trip from Santa Fé, New Mexico, to Fort Leavenworth, Kansas:

I left Santa Fé June 5, 1865; traveled twenty-five miles through pine and pinon timber, with fine water and grass, and over a fair road to Kosloski's ranche.

June 6.—Left Kosloski's at 6 a. m.; passed over the same character of country, twenty-two miles, to the town of San José; there crossed the Pecos river, a beautiful mountain stream; continued on ten miles to Bemal spring, and camped, with wood, water, and good grass; road good, as a general thing; traveled thirty-two miles.

June 7.—Left camp at 6½ a.m.; marched five miles over a bad road, well timbered and good grass, to the town of Iscolate, on a creek of the same name; twelve miles further over a good road through a wooded country to Los Vegas, on the Rio Gallenos. From this place two roads lead to Fort Union, called respectively "the long" and "the short" routes, the former being five miles longer than the latter; I traveled over the long route, a smooth prairie, and generally used, to the Rio Sapio, seventeen miles; crossed that stream and camped, having traveled that day thirty-four miles.

June 8.—Left camp at 6½ a. m.; marched one and a half mile, and crossed the Rio Moro at Watson's and Kroimg's ranche; then six miles further, and camped at Fort Union, lying over the rest of the day for a refit, escort, rations, &c.

June 9.—Left camp at 7½ a.m, travelling by the "Raton" route over a rolling prairie eighteen miles to the Rio Ocate, one of the points from which hay is procured for Fort Union; continued twelve miles further to Sweet Water creek, and camped; wood, water, and grass abundant; road bad; distance travelled, thirty miles.

June 10.—Left camp, passing over a wretchedly bad road for ten miles through the town of Rayado, crossing a stream of same name at the town; marched over a rough, broken, and hilly road twelve miles further to Maxwell's ranche, where crossed the Colorado Chiquito river; two miles further crossed the Rio Ponio, and camped on the hills one mile this side, making twenty-three miles this day. Road very bad, but wood, water and grass in plenty.

June 11.—Left camp at 6½ a. m.; marched fourteen miles over a good road to Rio Vennejo; bad crossing; twenty-three miles further brought me to the Red river, where camped; wood, water, and grass good. Marched thirty-seven miles.

June 12.—Left camp at 6½ a. m.; crossed Red river; marched ten miles, and commenced the ascent of the Raton mountains, four miles to the summit; descended three miles, struck a mountain stream and a good road, with a toll-gate on it, thirteen miles further to the town of Trinidad, Colorado Territory, on the Rio Pingatoire; crossed the stream, and passing on one mile, camped with wood, water, and grass plenty; marched thirty-one miles. Hearing that the Arkansas river was not fordable at Bent's Old Fort, the usual crossing of the Raton route, I concluded to strike directly north for a bridge near Pueblo, Colorado Territory, where I could certainly cross the river, although it was fully one hundred and forty miles out of my way.

June 13.—Left camp at 6 a. m.; moved over rolling prairie road, with fine grass and timber in spots, but no water; thirty-five miles to water-holes, and

camped.

June 14.—Left camp at 6 a.m.; passed over same class of country twenty-five miles to the Rio Huressamo, at Craig's ranche, and camped with wood, water, and grass abundant.

June 15.—Left camp at 1 p. m.; marched twelve miles; crossed the Greenhorn

creek, and camped; wood, water, and grass plenty.

June 16.—Left camp at 6 a. m; marched four miles; crossed the Rio San Carlos; marched nine miles, and crossed the Arkansas river on a common bridge, made of poles or logs laid from bank to bank, with a rude pole flooring. The river banks at this place are of solid rock, fifteen feet above high water, and the river itself is not over thirty-five feet wide, if that. From here struck down the Arkansas; marched seven miles to the town of Pueblo; two miles further passed the Fontaine que Bouche, a tributary from the north to the Arkansas; traveled ten miles further, passing fine farms of corn, wheat, &c., and camped on the river, with wood, water, and grass. Road this day good; marched thirty-two miles.

June 17.—Left camp at 6 a. m., travelling down the river forty miles, over a good road, passing many farms, and camped with wood, water, and grass.

June 18.—Left camp at 6 a. m.; marched twenty-eight miles down the Arkansas to Bent's Old Fort; continued on fourteen miles, and camped with good grass and water; wood scarce; made forty-two miles.

June 19.—Started at 6 a.m.; marched twenty-six miles down the river to Fort Lyon; camped for four hours to draw rations, shoe animals, and refit; at 3 p. m. started; marched twelve miles and camped on the river for the night.

June 20.—Left camp at 6 a.m.; continued down the Arkansas thirty-five miles, and camped; road good, grass plenty, and wood in clumps of cottonwood along

the river.

June 21.—Left camp at 6 a. m.; marched thirty-six miles to camp, following the course of the river, sometimes close to its bank, and at others passing over spurs of hills one, two, and three miles from the river; grass and water abundant, with buffalo chips for fuel.

June 22.—Left camp at 5½ a.m.; marched five miles to Choteau's island, where Aubrey's Cut-off crosses the river and joins the Raton route; marched forty miles and camped on the river; road good; grass and water good; fuel scarce, being buffalo chips.

Digitized by Google

June 23.—Left camp at 6 a. m.; marched twenty-eight miles to Fort Dodge;

thence fifteen miles to ponds of water on the ridge route, and camped.

June 24.—Left camp at 5 a. m.; marched forty-five miles, and camped near Fort Larned. From that point followed the old Santa Fé trail to Fort Leavenworth, Kansas, where I arrived July 4, 1865, just thirty days from Santa Fé, having traveled about nine hundred miles.

All of which is respectfully submitted.

J. C. McFERRAN,

Major and Quartermaster.

Brevet Major General M. C. MEIGS,

Quartermaster General U. S. A., Washington, D. C.

WASHINGTON, D. C., July 26, 1865.

GENERAL: In obedience to your verbal instructions of yesterday, and without other data than such as my memory furnishes, I proceed to give you a synopsis of my services as chief quartermaster, department of New Mexico,

from the first of October, 1862, to the present time.

On the first of October, 1862, I relieved Brevet Lieutenant Colonel James L. Donaldson, quartermaster United States army, as chief quartermaster of the department. Colonel Donaldson transferred to me a list of the estimated indebtedness of the quartermaster's department, which had accrued under him as chief quartermaster of the department of New Mexico, amounting to over four hundred and twenty-five thousand dollars. I afterwards found the indebtedness to be about one hundred thousand dollars more. The credit of the department was very low, and certified vouchers selling at a ruinous discount. Almost all the supplies at Albuquerque, a subsistence depot, and at Santa Fé, the headquarters of the department, had been destroyed by the officers in charge of them, to prevent their falling into the hands of the enemy; Fort Fauntleroy was abandoned, and many of the stores at that point were also destroyed, which, with the abandonment of Forts Fillmore and Stanton, and consequent losses of government property, left the troops in New Mexico with very limited supplies. All this occurred before I became chief quartermaster, and had been but partially remedied. By great exertions, assisted by Captain H. M. Enos, assistant quartermaster, and all my other assistants, and sustained by yourself and the department commander, most of the outstanding debts were paid off, the credit of the quartermaster's department restored, and the troops comfortably supplied.

Immediately after I became chief quartermaster, a force of six or more companies was put into the field against the Apache tribe of Indians, in and around Fort Stanton, and kept actively engaged almost all winter. These troops were well supplied, and the campaign resulted in the surrender of over four hundred out of some six or seven hundred, of which the tribe consisted, and in placing them on a reservation near Fort Sumner, one hundred and twenty miles east of Fort Stanton. The transportation of these Indians to their new home was a duty that devolved upon, and was promptly performed by, the quartermaster's department. During the continuance of the campaign, the new posts of Forts Sumner and Wingate, the latter to replace Fort Fauntleroy in the country occupied by the Navajo Indians, had to be located and commenced; the quarters at Fort Stanton and Santa Fe, which had been recklessly burned, had to be repaired; the corrals and stabling at Santa Fé, which were insufficient and miserable, had to be rebuilt almost entirely. It also became necessary to erect suitable buildings at or near Fort Union, (which the Texan invasion demonstrated as the proper point for the main supply depot,) to quarter the garrison, and properly secure the supplies for the entire department-of the subsistence and quartermaster's departments, and of clothing and equipage. This work was

promptly commenced, and much of it has been completed; the remainder is

rapidly approaching completion.

Three other, posts—Fort Whipple, in Arizona Territory, near Prescott, the seat of government of that Territory, and over three hundred and fifty miles west from Albuquerque, New Mexico; Fort Cumming, sixty miles west of the Mesilla valley, on the old Butterfield route to California from Little Rock, Arkansas; and Fort Bascom, New Mexico, on Red river, about one hundred and ten miles southeast of Fort Union—were located, commenced, and are far advanced towards completion.

In the summer of 1863, a large force was organized and put into the field against the Navajo tribe of Indians, the hereditary despoilers of the people of New Mexico for over two hundred years, who number in men, women, and children at least ten or eleven thousand souls. Captain A. B. Carev. 13th United States infantry, one of the best officers in our or any other service, consented, at my request, to act as chief quartermaster of the expedition. Under his able administration, the troops were amply supplied with every facility to carry on the campaign, even through an unprecedented hard winter, and it resulted in the surrender and transfer of over nine thousand of the tribe to a reservation over four hundred miles from their hereditary homes. This was made by and at the expense of the quartermaster's department, with mule and ox wagons, over a desert almost destitute of forage, and but little water except at a few points. 'The quartermaster's department was required, and did furnish blankets, cooking utensils, much of the subsistence, &c., for this large number of people. The grain furnished for their subsistence by the quartermaster's department was afterwards paid for at cost by the subsistence department. After their location on the reservation, they were furnished by the quartermaster's department with farming implements, animals, &c., to assist them in opening farms.

Other large and small commands were put into the field against the Comanche, Kiowa, and other hostile tribes, and all well equipped and supplied with all that pertains to the quartermaster's department, and necessary for their

efficiency.

Owing to the demand caused by the necessity of feeding corn and wheat to captured Indians on the reservation, the price of those articles increased very much, and it became necessary to reduce the grain rations to animals to six and seven pounds each per day. This resulted in the loss of a number of horses and mules, and the reduction in the efficiency of all public animals, but not to that extent as to interfere materially with the business of the department; most of the freighting from the main depot to the various posts being done under contract.

In addition to the posts mentioned above as having been located and undergoing repairs or being built, there are two others which were located this summer, and are under construction at this time, viz: Fort MacRae, about forty miles south of Fort Craig, New Mexico, six miles off the line from Santa Fé to El Paso, and on what is known as the "Jornada del Muerto," or dead man's journey, a desert in a bend of the Rio Grande, almost destitute, for eighty miles, of water; and Fort Seldon, at the other end of the "Jornada," where the road comes down to the river. Each of these posts is for quartering two companies, one of cavalry and one of infantry, and they are very important.

The grain for the various posts has usually been purchased in open market at prices approved by the chief quartermaster, and until the last two or three years in sufficient quantities, from the producers and merchants, to answer all demands. For the last three years, the drought and insects have destroyed so much grain, that corn has had to be sent out from Fort Leavenworth, Kansas. These causes, and the enprecedented rise in the Rio Grande, which has ruined

almost all the crops on its banks, have this year reduced the amount raised in New Mexico to less than was ever known before.

Hay for the use of the animals is obtained in the vicinity of the posts, and by contract, at an average cost of about forty-five dollars per ton of 2,240 pounds. Some years the crop is short, but usually sufficient can be had to last the winters.

The department of New Mexico embraced, for most of the time that I was chief quartermaster, the entire Territories of New Mexico and Arizona, and a part of northwestern Texas.

The sources of supplies for troops in the department were St. Louis, Mis-

souri, Fort Leavenworth, Kansas, and other points east of those.

From Fort Leavenworth the transportation of these supplies is by ox and mule wagons, through the Indian country, a distance of seven hundred and fifty miles to the main depot for the department at Fort Union, New Mexico. Then they are received and stored, and from thence distributed as required, by wagon transportation, to the various posts and commands. Their distribution, as well as transportation from Fort Leavenworth to the depot, Fort Union, is done by contract, awarded to the lowest responsible bidder, after due public notice; that from Fort Leavenworth to Fort Union being given out by the depot quartermaster at Fort Leavenworth, and that from Fort Union to the various posts by the chief quartermaster, department of New Mexico. This course I consider the best for the United States.

The headquarters of the department are at Santa Fé, the capital of the Territory, and comprising about 6,500 souls, mostly Mexicans. The city, like all other towns in New Mexico, is built of sun-dried bricks, or adobes, twenty inches long, ten inches wide and four inches thick, some larger and some smaller. The houses constructed of these bricks are cool in summer and warm in winter, are generally one story high, and present at a distance the appearance of a collection of brickkilns.

The above is as full a report as I can make without access to my papers, and for further details I would respectfully refer you to my previous annual report,

now in your office.

I think that the quartermaster's department in New Mexico has been as efficient and has met with fewer losses and fewer dishonest agents than in any part of the United States, from the 1st of October, 1862, to the present time; and deducting the indebtedness of my predecessor when I relieved him, and the cost of the repairs to public buildings, &c., made necessary by damage, abandonment, &c., before I became chief quartermaster, I challenge a comparison of my expenditures with those of any previous year's, confident of its being favorable. I know it will be, if the difference between gold and treasury notes and the increased price of everything consequent upon the war, is taken into consideration.

Very respectfully, your obedient servant,

J. C. McFERRAN, Major and Quartermaster.

Brevet Major General M. C. MBIGS, Quartermaster General U. S. A., Washington, D. C.

No. 106.

DEPOT QUARTERMASTER'S OFFICE, Cincinnati, Ohio, September 5, 1865.

GENERAL: In compliance with General Orders No. 39, current series, from your office, I have the honor to submit this my annual report for the fiscal year ending June 30, 1865. My last annual report was forwarded on October 1, 1864.

This report embraces the following named papers, which are herewith, viz:

Statement of public moneys for which I have been responsible during the year, marked No. 1.

Form "A," statement of quartermaster's property for which I have been responsible during the year, marked No. 2.

Abstract of contracts for clothing and equipage, made by me during the year, marked No. 3.

Statements according to forms "B," "C," "C C," "D," "E," "F," and "G," are not forwarded, because not required, from the nature of my duties during the year.

From June 30, 1864, until September 16 of that year, I had immediate charge of the clothing and equipage branch of the department at this depot. On the latter date I was relieved by Colonel W. W. McKim, quartermaster's department, having tendered my resignation as captain and assistant quarter-

master United States army some time previously.

By Special Orders No. 75, Adjutant General's office, February 15, 1865, I was assigned as chief quartermaster of this depot, with the rank of colonel, quartermaster's department, and ordered to relieve Colonel W. W. McKim, quartermaster's department, then in charge of this depot, which I did on February 22, 1865, under which order I still continue to serve. As the clothing and equipage branch constitutes the main portion of the business of the depot, such remarks and information as I can furnish in relation thereto will be submitted in connexion with the annual report called for by you in letter of August 1, 1865, which report is being prepared as speedily as possible.

Very respectfully, your obedient servant,

C. W. MOULTON, Colonel and Depot Quartermaster.

Respectfully referred to the Quartermaster General, in connexion with my annual report for the above-named year.

C. W. MOULTON, Colonel and Depot Quartermaster.
DEPARTMENT QUARTERMASTER'S OFFICE, Cincinnett, O., Sept. 5, 1865.

A true copy:

JOHN V. FUREY, Captain and Assistant Quarternaster.

No. 107.

CHIEF QUARTERMASTER'S OFF (E, St. Linis, Missouri, September 19, 1865.

GENERAL: In compliance with General Orders No. 39, Quartermaster General's office, Washington, July 1, 1865, I have the honor to call your

attention to my last annual report, forwarded to your office September 20, 1864,

and to report as follows:

During the fiscal year ending June 30, 1865, I was stationed on duty at St. Louis, Missouri, as chief quartermaster of the department of the Missouri and of the St. Louis depot. As chief quartermaster of the depot I have superintended the procurement and issue of all kinds of quartermasters' supplies required, not only for troops serving in the department of the Missouri, but for those operating in remote sections of country, and having for their bases the depots of Cairo, Memphis, Nashville, Duvall's Bluff, Little Rock, Fort Smith, Fort Leavenworth, &c., &c., which have, to a greater or less extent, been supplied from the depot under my control.

From, and previous to, the commencement of the period for which the report is required, until the 30th of November, 1864, I had, in addition to my other duties, personal charge of the procurement and issue of mules and artillery horses, wagons, ambulances, harness, &c., &c., at this depot. On that date, (November 30,) by your order, the public animals were transferred to Captain Ingham Coryell, assistant quartermaster, and the affairs pertaining to the first division of the quartermatser's department here became a separate establishment, under the control of Captain Coryell, orders affecting the same proceed-

ing direct to him from Washington.

Soon after, I transferred the wagons, ambulances, harness, &c., to Captain J. L. Woods, assistant quartermaster, who still, under my direction, has charge

of that species of property.

In the month of October, 1864, the prosecution of the campaign in this State against the rebel General Price rendered it necessary that the divisions of Generals A. J. Smith and Joseph Mower (which had been suddenly brought into this department to meet the pressing emergency then existing) should be newly outfitted and equipped at this depot, for the work before them. This was done promptly, without an hour's unnecessary delay, and the troops went forward in good time to the points where they were needed.

The several expeditions against the Indians, organized and conducted by General Sully during the period under consideration, were equipped and sup-

plied from here.

The materials required for constructing the new posts established in the Indian

country were drawn from this depot.

During the fiscal year I received and disbursed more than fifty millions of dollars of public funds, as shown by the enclosed statement, involving an immense amount of labor and responsibility, in the payment of vouchers issued at this depot, in the department of the Missouri and Arkansas, and at the several military posts on the Mississippi river as far down as Natchez, Mississippi, and in supplying with funds, for the payment of their employés, the officers serving within the scope of country above defined.

I have the honor to transmit herewith the statements required as follows:

1. Statement of quartermasters' property, Form "A;" 2. Statement of public moneys; 3. Statement of amount paid for rail, river, stage, and wagon, (other

than government wagon,) transportation, Form "C."

The other paragraphs and forms required do not come under the scope of my duties.

I am, general, very respectfully, your obedient servant,

WILLIAM MYERS,

Brevet Brigadier General and Chief Quartermaster.

Major General M. C. MBIGS, Quartermaster General U. S. A., Washington, D. C.

A true copy:

JOHN V. FUREY, Captain and Assistant Quartermaster.

Statement of quartermasters' property for the fiscal year ending June 80, 1865.

True copy:

JOHN V. FUREY. Captain and Assistant Quartermester.

No. 108.

CHIBF QUARTERMASTER'S OFFICE. Philadelphia Depot, September 28, 1865.

GENERAL: In obedience to General Order No. 39, Quartermaster General's office, current series, I have the honor to enclose herewith my annual report for the fiscal year ending June 30, 1865.

My annual report for the fiscal year ending June 30, 1864, was mailed from

Cincinnati, Ohio, November 10, 1864.

I was relieved at Boston, Massachusetts, as assistant quartermaster, by order of the Secretary of War, and turned over the funds and duties to my successor. September 1, 1864, and on the 8th idem proceeded, in accordance with said order, via Washington, D. C., to Cincinnati, Ohio, at which place I was assigned to duty as chief quartermaster of the principal depot, with the rank of colonel in the Quartermaster's department.

By verbal permission of the Secretary of War, I went from Washington to Cincinnati, via Philadelphia, for the purpose of conferring with Colonel A. J. Perry, Quartermaster's department, chief of the division of clothing and equipage, Quartermaster General's office, and at that time temporarily in charge of

the Philadelphia depot.

I arrived at Cincinnati on the evening of September 15, 1864, and assumed charge of the depot the following day, relieving Colonel Thomas Swords, assist-

ant quartermaster general United States army.

In compliance with Special Orders No. 75, Adjutant General's office, February 15, 1865. I turned over the duties, &c., devolving upon me as chief quartermaster at Cincinnati, Ohio, to Colonel C. W. Moulton, on the 23d of February, 1865, and repaired to this city, where I was ordered to relieve Colonel Herman Biggs, Quartermaster's department, in charge of the principal depot.

I arrived at Philadelphia the 26th of February, 1865, and entered upon my

duties as chief quartermaster the following day.

I respectfully submit herewith the following statements, called for by General Order No. 39:

Statement A. Quartermasters' property.

Statement B. Clothing, camp and garrison equipage.

Statement C. Amount paid on account of rail, river, stage, &c., transportation Statement CC. Amount paid on account of ocean and lake transportation.

Statement D. Troops and stores transported.

Statement DD. Troops and stores transported by ocean and lake.

Statement G. Vessels owned, chartered, &c.

NOTE.—The foregoing statements relate to the business at Boston, Massachusetts, and embrace the two months, from June 1, 1864, to August 31, 1864, while I was on duty at that station.

Statement B. Clothing, camp and garrison equipage.

Statement BB. Material.

NOTE.—These two statements relate to the clothing and equipage business at Cincinnati, Ohio, which was my especial care, in addition to my duties as chief quartermaster of the depot, and cover the period during which I was in charge at that station.

Statement A. Quartermasters' property.

Statement B. Clothing, camp and garrison equipage.

Statement BB. Material.

NOTE.—These three statements relate to the cluthing and equipage transactions at Philadelphia from the date I took charge of the Philadelphia depot to the 30th June. 1865.

A statement of public invoices, showing the amount on hand July 1, 1864, and the amount received, expended, transferred, &c., during the fiscal year ending June 30, 1865, is also enclosed.

No property called for by statements E and F, page 7, General Order No. 39,

came under my control during the year.

The particular attention of the Quartermaster General is called to the importance of substituting fire-proof storage accommodations at the Schulykill arsenal for the wooden structures now used.

There are about twenty-five wooden sheds and buildings scattered throughout the yard within the walls, and forty-two sheds in the rows adjoining the walls on the south side. '

The clothing and equipage on hand has cost the Quartermaster's department not less than twenty million dollars, and is in continual peril from fire.

Locomotives pass along the entire line of the wall on the northerly side many

times each day and night.

I have had the storage of goods rearranged, and endeavored to place the more valuable property in the brick buildings, but they are inadequate, and have been for many years, for this purpose; it is, therefore, necessary to keep large quantities of valuable property in wooden sheds having gravel and tar

The fire apparatus is kept in good order, and great care is taken to guard against incendiary or accidental fires; notwithstanding these precautions, the

risk is imminent, and causes constant anxiety.

I respectfully recommend that the irregular clothing and material on hand at the arsenal be sold or removed as soon as practicable, as it has been kept loose; and, unless sold or properly packed for shipment or permanent storage, soon will be likely to engender moths, from which damage will ensue to other property.

The importance of proper and uniform standards of clothing and equipage was alluded to in a special report of clothing and equipage transactions transmitted

to the Quartermaster General the 11th instant.

It having been reported to the Quartermaster General that the specifications for dark-blue cloth and sky-blue kersey recommended from this office in March, 1864, were an imposition; and believing that it is impracticable to conform to them, and impossible to obtain sufficient material of that strength to equip a large army, I respectfully refer to my suggestions upon that subject, and beg to add, that whenever the question is to be considered it should not be determined what standard to adopt upon limited and local information, nor until after thorough investigation and careful inquiry of the manufacturers and practical men throughout the country.

The depots at Cincinnati and at Philadelphia were reorganized by me to conform to the act of Congress of July 4, 1864, and the duties were distributed

among the officers serving with me, in accordance with that law.

I respectfully commend to the consideration of the Quartermaster General the several officers of the quartermaster's department who have served under my orders at Cincinnati and at this depot, for the energetic and faithful manner in which they have discharged the duties assigned them.

The business with which I have been intrusted, during the period covered by this report, has completely occupied my time and thoughts, and I have

endeavored to do my duty to the best of my ability.

I am, general, very respectfully, your obedient servant,

WM. W. McKIM.

Colonel and Chief Quartermaster Philadelphia Depot.

Brevet Major General M. C. MRIGS, Quartermaster General U. S. A., Washington, D. C.

A true copy:

JOHN V. FUREY, Captain and Assistant Quartermaster.

Statement of public moneys received, transferred, &c., by Colonel William W. McKim, United States army, quartermaster's department, at Boston, Mauschusetts, and the Cincinnati and Philadelphia depots, for the fiscal year ending June 30, 1865.

#### No. 109.

HEADQUARTERS MILITARY DIVISION OF THE ATLANTIC, Office of Chief Quartermaster, Philadelphia, Pa., Sept. 21, 1865.

General: I have the honor to transmit herewith a report of my transaction as chief quartermaster army of the Potomac for the fiscal year ending June 30, 1865.

Very respectfully, your obedient servant,

R. N. BATCHELDER,

Captain and Assistant Q. M., Bot. Col. U. S. Army.

Major General M. C. MEIGS,

Quartermaster General U.S. Army, Washington, D. C.

A true copy:

JOHN V. FUREY, Captain and Assistant Quartermaster.

HEADQUARTERS MILITARY DIVISION OF THE ATLANTIC,
Office of Chief Quartermaster, Philadelphia, Sept. 15, 1865.

GENERAL: In compliance with General Orders No. 39 from the Quartermaster General's office, I have the honor to submit the following report as chief quartermaster of the army of the Potomac, for the fiscal year ending June 30, 1865.

The report for the previous year of the operations of the 2d army corps, and army of the Potomac, while chief quartermaster, was transmitted on the 15th of September, 1864.

On the first of July, 1864, the army of the Potomac lay before Petersburg,

confronting the army of northern Virginia, commanded by General Lee.

The long and wearisome march from the Rapidan, the sanguinary battles of that campaign, and the continual operations before Petersburg, had produced no decisive results. On the first of July, 1864, the army of the Potomac numbered as follows: commissioned officers, 5,237; enlisted men, 109.011; private horses, 4,044; public horses, 29,564; mules, 21.171; ambulances, 755, and army wagons 3,777; being 90,685 infantry, 17,370 cavalry, and 6,194 artillery. The unit of organization for the ambulance trains was by corps; for the supply and ammunition trains by divisions. Seven wagons for supplies and three for ammunition were allowed for every one thousand men, present armed and equipped for duty, being ten days' rations and one hundred rounds of ammunition per man.

The intrenching tools, consisting of one thousand each of axes and spades and

three hundred picks, were required to be kept at corps headquarters.

The month of July was devoted by the army in strengthening the line of intrenchments from the Jerusalem plank road to the Appoint with redoubts and siege batteries. In the mean time the attention of officers of the quartermaster's department was given to the general improvement of the trains, which were held in readiness at all times for any immediate operations of the army. A large force of the construction corps was engaged in repairing the railroad from City Point. Corduroy roads were also built from the several commands to the main roads, and thence to City Point, where all supplies were obtained.

On the 26th of July the line of defence was held by the 5th and 9th corps. The 2d corps, with two divisions of cavalry, under the command of General Hancock, crossed the James river at Deep Bittom, where the enemy's works were carried, four guns and several prisoners captured; the trains belonging to the commands accompanied under cover of darkness. This demonstration on our part drew to the north side of the river a large portion of Lee's army, presenting a

favorable opportunity for exploding the mine that had been prepared by the 9th corns under one of the enemy's batteries. To this end preparations were made. General Hancock withdrawing under cover of darkness, on the night of the 29th. from the north side of the James, accompanied by his trains, on the morning of June 30, at 4 30 a. m., everything being ready, the mine was exploded, and immediately the 9th corps made an assault on the enemy's works in front. The enemy, however, rallied his troops at the point of attack, and rendered further efforts of no avail: during these operations the trains of the whole army loaded. hitched up, and awaiting events of the day.

During the month of July the 6th army corps was ordered to Washington,

and was followed by General Speridan with the first and third divisions of the

cavalry corps.

On the 14th of August the 2d corps and second division of cavalry, under the command of General Hancock, again crossed to the north side of the James, at Deep Bottom, on poutoon bridges, their trains accompanying under cover of darkness. The 5th corps was now relieved by a portion of the 9th, and for the time massed in the rear. From this position the 5th corps moved to the left, for the purpose of destroying the Weldon railroad, near Globe tavern; in this they were aided by a portion of the 9th corps. The enemy now beginning to mass his troops, the remainder of the 9th corps was sent to their aid, arriving in time to participate in repulsing the enemy. Heavy rains now set in, rendering it impossible to forward supplies by the ordinary method, recourse was had to the packmules, which were required to be kept by each division. During these operations the main trains remained loaded with the prescribed amount of supplies and ammunition in their respective parks. The 2d corps, having withdrawn from the north side of the James, moved on the 22d to the left of the line of works at Ream's Station, on the Weldon railroad, followed the next day by the second division of cavalry, and were successful in destroying several miles of railway, but on the 25th the enemy appeared in force and checked further operations; they now charged upon our troops with great fury, causing considerable loss on our side, and nine pieces of artillery fell into the enemy's hands.

Until the month of October nothing worthy of note occurred along the lines; during the intervening time the railroad was completed along our lines from City Point, thus giving ample means to provide for the wants of the army; depots were located at convenient points, and officers of this department placed in charge to promptly and properly distribute the supplies to the various commands, in order to secure system and despatch. Daily estimates of forage were required to be made upon the chief quartermaster of the army, and requisition by him was made upon the principal depots at City Point for the different stations upon the road; monthly estimates for all the stores required for the use of the army were made in the same way, thus securing such articles as were required for immediate use, and providing against any accumulation.

On the first day of October a portion of the 2d, 5th and 9th corps, and second division of cavalry, under their respective commanders, made a demonstration on the extreme left, near Poplar Springs church; hard fighting ensued, and the enemy driven from his position. On this reconnoissance the t cops took four days' rations and sixty rounds of ammunition upon the person; all the trains were loaded with six days' rations and forage to their utmost extent, hitched up, ready to move on immediate notice; the only transportation allowed with the troops was one half of the ambulances, spring-wagons, and pack-mules belonging to headquarters.

On the 27th of October another demonstration was made on the left with a view of extending our lines; portions of the 2d, 5th and 9th corps, and the second division of cavalry, moved early in the day. While the 5th and 9th corps confronted the enemy, the 2d corps and cavalry, under the command of General Hancock, crossed Hatcher's Run, on the Vaughen road; the 5th corps then moved up the streams with the view of connecting with the 2·1 corps, but were unable to do so. The enemy, taking advantage of our position, came down upon our troops with great impetuosity, but were repulsed with great loss. On the 28th all the troops returned to their former camps. During these operations the wagons containing intrenching tools, the ammunition, hospital stores, and forage that were to accompany the troops, remained packed in a secure place, waiting the developments of the demonstration at Hatcher's Run. Four days' rations and sixty rounds of ammunition were taken upon the person; one-half of the cavalry small-arm ammunition and forty rounds of infantry were taken in wagons; one-half of the ambulances, one medical and one hospital wagon to each brigade, one forage and one battery wagon to every twelve guns, and such pack-animals as were required to carry the rations of officers, accompanied the troops. The cavalry took no forage trains whatever, each cavalryman being required to carry sufficient forage to last during the operations.

The general trains of the army were loaded with the prescribed amount of sapplies and ammunition, and moved to City Point, within the fortification; all artillery animals in the enclosed works, not required, were sent to City Point, to the artillery reserve ammunition train; the depots up in the line of railroad were broken up and to meet any emergency that might arise, all the employes of the quartermaster's department belonging to the general trains, with the exception of one man to every three teams, were organized, armed and equipped for duty, and placed under competent officers. By this arrangement a brigade of 2,724 men was obtained, and such were the preparations made and precautions taken by this department during the operations of the army, that no spe-

cial guards were required for the wagon trains.

During the first week of December the 6th army corps, commanded by General Wright, returned from the Shenandoah valley, the transportation being

shipped from Alexandria to City Point, Virginia.

On the 25th of March the enemy concentrated his troops in front of the 9th corps, made a sudden and unexpected attack, and succeeded in breaking through the lines at Fort Stedman. They, however, were soon repulsed and driven back with great loss, to his intrenchments, the works retaken, and many prisoners

captured.

Preparations now commenced for the most brilliant and successful campaign of the war. The transportation of the whole army was in a perfect state of readiness—the wagons repaired, animals recuperated, and everything complete. On the 29th of March the second division of cavalry was detached from the army of the Potomac and joined the other two divisions, under General Sheridan, who was to co-operate with the army of the Potomac in its movements.

The army of the Potomac, at this time, numbered as follows:

| Arm of service. | Num                         | ber of each cl              | Average per 1,000 men. |                     |                |
|-----------------|-----------------------------|-----------------------------|------------------------|---------------------|----------------|
| Aim of service. | Men.                        | Animals.                    | Wagons.                | Animals.            | Wagons.        |
| Infantry        | 97, 921<br>6, 792<br>3, 064 | 15, 949<br>7, 439<br>2, 408 | 1,756<br>495<br>197    | 162<br>1,095<br>785 | 17<br>73<br>64 |
| Total           | 107,777                     | 25,796                      | 2, 445                 | 239                 | 22             |

The 2d and 5th corps moved from their works to the left, the 6th and 9th corps occupying their line. The troops were supplied with four days' rations and fifty rounds of ammunition upon the person, eight days' supplies for men

and animals being taken in the supply and sixty rounds per man in the ammu nition train.

The 5th corps moved westerly to the junction of the old stage and Vaughen roads, supporting the 2d corps, the latter taking the Vaughen road, crossed Hatcher's Run and communicated with the 5th corps.

The 6th and 9th corps remained in their line of works before Petersburg, the

surplus artillery being placed in their rear.

The ammunition train of the artillery reserve did not accompany the troops, but remained in port at City Point; all the sick were removed to the depot field hospital at City Point; the supply trains of the 2d and 5th corps not accompanying the troops remained, in part, near Hatcher's Run. Each corps had five four-gun batteries, one battery wagon, intrenching tools, and half the ambulances, one medical and one hospital wagon to each brigade, and one with forage for each division ammunit on train that accompanied the troops; the remaining ambulances were parked with the general trains of the 2d and 5th corps; twelve wagons with twenty rounds of ammunition per man were taken with each division.

On the 30th the trains of the 5th corps moved to the north side of Gravelly Run, the other trains moving on the Vaughan road. Heavy rains now set in and continued unceasingly for forty-eight hours, rendering the roads impassable for heavy trains and artillery—the trains of the 5th corps being fifty-six hours in making the distance of four miles. During the day the enemy made an attack upon the 5th corps, forcing them back, and then immediately turned upon the cavalry, which retired to the vicinity of Dinwiddie Court House. The 5th corps moved to the support of the cavalry, reporting to General Sheridan, and succeeded in checking the further advance of the enemy.

The ambulances of the 6th corps were used to convey the wounded of the cavalry to the railroad, from whence they were conveyed to City Point hospital.

On the morning of the 2d of April an attack was made along the front line, which was broken by the 6th corps pressing rapidly forward, cut the enemy's line in the centre, forcing a part back into Petersburg, and drove the balance up the line of the South Side railroad, where they were closely followed by the 2d corps. All the available ambulances were sent to convey the wounded to the hospitals. During the night Richmond and Petersburg were evacuated by the enemy, the 2d and 6th corps following the retreating army, giving them no time to rest or intrench. The trains, replenished with the prescribed amount of supplies, moved towards Burk's Station, on the Cox road, at such a distance as would not embarrass the movements of the troops.

On the 4th of April heavy rains set in, rendering the roads almost impassable for heavy trains; men were detailed from the several commands to cordure the

roads, and otherwise aid in moving forward.

On the 6th the enemy still continued his retreat, the 2d, 5th, and 6th corps pursuing by the Richmond and Danville railroad towards Deatonsville. At Salem creek the enemy endeavored to make a stand, but were soon driven, by the 2d corps, across the creek to the Appomattox, capturing three hundred and fifty wagons, which were burned, and about fifteen hundred prisoners. On another portion of the line the 6th corps also attacked and drove the enemy, capturing several thousand prisoners, and continued the pursuit towards Farmville. The empty supply wagons were used to convey the wounded of their respective corps to Burk's Station.

On the 7th the pursuit was still kept up with renewed vigor, the enemy abandoning and destroying wagons, caissons, and stores along the line of march. Our forces losing no time, moved to the enemy's right, left, and centre, keeping him constantly compelled to defend his trains, and on the 9th had so completely surrounded him that when the head of his column reached Appomattox Court House the cavalry and 5th corps were there to confront him. All hopes to ex-

tricate his army having fled, General Lee accepted the terms offered, and sur-

rendered all the forces known as the army of northern Virginia.

The formal surrender took place on the 10th of April. All the ordnance stores resulting from the surrender were taken possession of by the chief of ordnance at army headquarters. and were transported to Burk's Station by the quartermaster's department of the army of the Potomac. All the quartermaster's property received from the surrender was turned over to the chief quartermaster army of the James.

The reports of the chief quartermasters of the several corps of the army will

give in detail their operations during the year.

Immediately after the surrender, all the transportation of the army moved to the vicinity of Burk's Station; the 9th corps guarded a portion of the line of railroad to Petersburg until the 20th of April, when it was detached from the army of the Potomac and ordered to Washington, D. C.

On the 23d of April the 6th corps, with twelve day's marching rations and the full amount of ammunition, with a pontoon train, started for Danville, where

they arrived on the 27th.

On the 2d day of May the army of the Potomac started on its homeward march for Washington, arriving at Richmond on the 4th and 5th of May. On the 6th the whole army (save the 6th corps) passed in review at Richmond, and moved directly for Washington with the trains, by way of Hanover Court House, Fredericksburg, Fairfax Court House, arriving near Fort Albany on the 11th of May.

The 6th corps returning from Danville by the same route, arrived a few

days later.

Soon after the arrival of the army before Washington, orders were received from the War Department to muster out a large portion of its troops. Accordingly, on the 28th of June, that portion of the provisional corps commanded by

General Wright, and the army of the Potomac, ceased to exist.

I should fail doing justice to many worthy officers serving in the army of the Potomac, did I not acknowledge their signal ability on every occasion during the late campaign, and the interest and zeal they have ever manifested in the performance of the duties devolving upon them. Nor should I full to acknowledge the ready and unceasing co-operation I have received in my official position from the chief quartermaster of the armies operating against Richmond, Major General Rufus Lugalls.

Accompanying this report will be found a table showing the distances travelled daily by the army of the Potomas as "indicated by the odometer, and a statement of the amount of public money received, transferred and remaining on

hand during the fiscal year ending June 30, 1865."

Respectfully submitted.

R. N. BATCHELDER, Colonel and Chief Q. M, Army of the Potomac.

QUARTERMASTER GENERAL'S OFFICE, IVashington, D. C., Sep'ember 12, 1865.

GENERAL: Herewith I have the honor to transmit my annual report for the fiscal year ending June 30, 1865.

Very respectfully, your obedient servant,

JOHN B. HOWARD.

Brevet Colonel and Assistant Quartermaster.

Brevet Major General M. C. MRIGS,

Q. M. General U. S. A., Washington, D. C.

A true copy:

JOHN V. FUREY, Captain and A. Q. M.

QUARTERMASTER GENERAL'S OFFICE, Washington, D. C., August 1, 1865.

GENERAL: In compliance with your General Order No. 39, of July 1, 1865, calling for an annual report for the fiscal year ending June 30, 1865, I have the honor to submit the following:

My last annual report was forwarded, in accordance with your General Or-

der No. 29, of July 6, 1864, on the 26th of September, 1864.

July 1, 1864, I was acting as chief quartermaster of the cavalry corps, army of the P tomac, by virtue of General Order No. 151, War Department, dated March 23, 1864, and Special Orders No. 77, headquarters army of the Potomac, March 26, 1864.

July 1, 1864, the transportation of the corps was in camp at Old Courthouse, near Petersburg, Virginia, awaiting the return of the command which had moved to the left of the army of the Potomac for the relief of the 3d division of the corps, which had met with a severe repulse from the rebels in attempting to destroy the Weldon railroad.

July 2, in camp at the above-mentioned place, the transportation actively

employed in conveying supplies of subsistence and forage to the front.

July 3, command returned, when the transportation of the corps was moved to Jordan's Point, on the James river, where a depot was established for receiving and issuing supplies to the command, which, after many hard marches and severe fights, required rest and recuperation.

July 4, 5, 6, 7, 8, 9, and 10, quartermaster's department engaged in shipping dismounted troops and unserviceable horses to Washington, D. C., and

drawing clothing and supplies for the command.

July 11, on my application, I was relieved, by Special Orders No. 54, head-quarters armies of the United States, as acting chief quartermaster cavalry corps, and ordered to report to Major General W. F. Smith, commanding 18th

army corps, for duty as chief quartermaster of that corps.

July 14 reported, in accordance with orders, to the commanding general 18th army corps, entering on duy as chief quartermaster of the corps. My first business was to inspect the transportation and supplies, and ascertain the general condition of my department. The transportation of a portion of the corps was found in a wretched condition; animals poor, harness out of repair, and a large number of wagons unfit for service; small wagon parks were scattered over a large tract of country, and left almost exclusively under control of noncommissioned officers and citizen wagon-masters. These wagons I directed to be immediately assembled and parked by divisions, and officers of the department directed to remain in close proximity to the trains. In the corps, acting quartermasters were found performing most of the duties pertaining to the regularly appointed officers of the department, and when found incompetent were

relieved as rapidly as efficient officers could be obtained to fill their places. A portion of the troops were indifferently supplied with clothing, especially the 3d (colored) division; this deficiency arose from inefficiency on the part of the acting quartermasters of the division, and not from want of supplies at the main depot at City Poirt. When the proper system of obtaining and distributing supplies to the troops was fully understood, no difficulty was found in supplying their wants.

During the time the 18th corps lay in front of Petersburg the transportation was parked within a short distance of the rear of the troops; the position was selected from necessity and not from choice, the location of the trains being such that they were under fire of the rebel batteries; however, but small loss

of life or destruction of transportation occurred.

For the purpose of receiving and issuing supplies to the 18th army corps, a depot had been established at the terminus of the military railroad leading from City Point. At this depot a number of officers had been stationed to conduct the business of the depot. I found that a large quantity of stores, and a number of unserviceable horses had been allowed to accumulate at this place, and that there was also a large force of employés in attendance, for whom there was not sufficient work. To remedy these evils I deemed it best to break up the depot, turn in all unserviceable property, discharge or transfer employés, and relieve the officers, assigning them to active and useful service.

July 27, by Special Orders No. 204, headquarters, department of Virginia and North Carolina, I was assigned to duty as chief quartermaster army of the James. This army consisted of the 10th, 18th, and a portion of the 19th corps,

one division of cavalry, and a large engineer and medical department.

The position occupied by the army of the James was to the right of the army of the Potomac, the right resting on the James river, extending to the Appomattox, the line crossing the latter stream; the left holding position directly in front of Petersburg and connecting with the right of the 9th corps

of the army of the Potomac.

The depots for the supply of the army of the James were established at Smith's Station, on the line of the City Point railroad, at Jones's and Sherman's landing, on the James river, and Broadway and Point of Rocks landing, on the Appomattox, with the principal depot at Bermuda Hundred. By order of the chief quartermaster of armies operating against Richmond, City Point had been declared the main depot for the armies. In view of this, two of the depots of the army of the James were at once broken up, and the others reduced in size, but retained merely to supply the current requirements of the troops. During this time operations were in progress on Dutch Gap canal, an expensive work that required the employment of a large amount of material and labor. So far as the quartermaster's department was concerned, no embarrassment or delay retarded operations.

August 27, General Ord being in temporary command of the department, at my request, I was relieved as acting chief quartermaster army of the James, and directed to report to the commanding officer of the 18th army corps.

On the 29th of September the command of Major General Ord advanced across the James river at Chapins's bluff, carrying a strong line of fortifications, taking (16) sixteen guns and many prisoners, effecting a lodgement in rebel fortifications, six miles from Richmond.

October 1, I received a special order from the War Department relieving me, temporarily, from duty as chief quartermaster 18th corps, and directing me to report at St. Louis, Missouri, as a member of a board for the examination of officers of the quartermaster's department for the district comprising the departments of Missouri, Kansas, Northern, and Northwest.

In compliance with the order of the War Department, I reported October 10

at St. Louis, to the president of the board of examiners.

October 13, the board met pursuant to order, but, owing to the disturbed,

condition of affairs in Missouri, adjourned to meet at Cincinnati, Ohio.

Board met pursuant to adjournment, and proceeded with the examination of officers of the northern department, adjourning on the 5th of December, to assemble at Milwaukie, for the purpose of examining officers of the quarter-master's department on duty in the department of the northwest. Having completed their duties in this department, on the 23d of January, 1865, the board adjourned to meet at St. Louis, to continue the examination of officers of the quartermaster's department stationed in the departments of Missouri and Kansas.

The board met at St. Louis pursuant to adjournment, and proceeded with the

examination of the officers of the quartermaster's department.

February 27, 1865, I received a telegraph order from Lieutenant General Grant, relieving me from duty as a member of the board of examiners, and ordering me to report in person to Major General Ord, commanding the army of the James, for duty in the field. I reported in compliance with the order from Lieutenant General Grant, March 7, to General Ord, and was immediately

eassigned to duty as chief quartermaster of that army.

Immediately after entering on my duties as chief quartermaster of the army, I proceeded as rapidly as possible to place my department in a good condition for the opening campaign; the officers in the department co-operating most cordially with me in my efforts. All unserviceable wagons, harness, mules, cavalry and artillery horses, &c., were condemned and turned into depot; all surplus stores, public or private, were sent to the rear; the troops were supplied with the necessary clothing required for an active campaign, and the transportation of the army was reorganized to correspond precisely with the standard prescribed in orders.

On the 28th of March the armies operating against Richmond moved, the army of the James being fully supplied and equipped in every particular, so far as concerns the quartermaster's department. The movement of the trains of the army of the James was similar to the plan adopted in the army of the Potomac.

March 29, 30, 31, and April 1, transportation in camp at Humphrey's Station, drawing additional supplies, and awaiting the action of the combined armies.

April 2, transportation in camp at Patrick's Station.

April 3, broke camp at 7 a. m., the transportation following in rear of the

army, which was advancing rapidly in pursuit of the retreating rebels.

On the receipt of the news of the capture of Richmond by the general commanding the army of the James, I was directed to proceed to that city and establish a depot for the supply of the army. I immediately placed the transportation in charge of Lieutenant Colonel A. B. Lawrence, chief quartermaster of the 24th army corps, and proceeded to Richmond, in compliance with orders. On the route, instructions were given to the officers of the quartermaster's department in charge of the depots at Bermuda Hundred, Point of Rocks, Broadway landing, Jones's landing, Deep Bottom, and Varina landing, to at once break up their respective depots and transfer all the stores to the main depot I proposed establishing at Richmond.

A<sub>1</sub> ril 4, a rived in Richmond and proceeded at once to establish depots, collect abandoned and captured property, and procure data that would be of future service to the government. From this date until the final breaking up of the army of the James I remained on duty in the city of Richmond, transacting the various administrative duties pertaining to the quartermaster's depart-

ment in and around Richmond.

On the 19th of June, by order of the Secretary of War, I was directed to report at Washington for duty in the office of the Quartermaster General. On the 22d of June I was assigned to duty in the 6th division, Quartermaster General's office, and immediately entered upon the duties pertaining to that division.

I would respectfully state that (with one exception) I have been present at all battles fought by the army of the James, from the 1st of July, 1864, to the

date of the entire defeat and surrender of Lee's rebel army.

In conclusion, I would state that at the time of the entry of our troops into Richmond a portion of the city was in ruins; through the burnt district the streets were impassable, being blocked up by the smoking ruins, and the thoroughfares of the city filled with accumulations of ashes, gurbage, and rubbish: the gas and water works had ceased operations: the railroads and canal lines leading from the city could not continue running, their works having been destroyed: the various coal mines and manufactories in the vicinity of Richmond had suspended operations; the wharves were old, rotten, and almost entirely useless; in fact, every branch of industry was at a stand-still, and the city was crowded with thousands of idle and destitute. It is difficult at this time to comprehend the embarrassment of the Quartermaster's department in such a state of affairs, when naturally the department was looked to to bring order out of this confused state of things. It was, therefore, deemed just and equitable to place at work, for the benefit of the United States, these bands of wandering freedmen who were enjoying their newly-acquired liberty, and subsisting at the expense of the government. Orders were given to have warehouses fitted up for the purpose of accommodating those who were placed at work for the benefit of the government. In the course of a few days more than a thousand men were engaged in gangs of twenty-five each, under competent foremen, and placed at work removing and clearing away the ruins of the burnt district, inloading vessels, repairing wharves, collecting captured and abandoned property in the city, and storing it in warehouses. Numbers were sent into the country for the purpose of procuring and bringing into the city a large quantity of abandoned cord-wood. Others were detailed with the medical, commissary, ordnance, and engineer departments.

Considerations of economy, and the embarrassing difficulty attending the care and protection of the non-producing element among the liberated slaves, led me to recommend the course adopted with reference to the freedmen. It was folly to suppose that the former owners of the unemployed negroes had any feeling that would lead them to care for their former servants. Great suffering would have resulted to the freedmen had not the government extended to them support

and protection.

I do not propose to offer any suggestions with regard to improvements in the personnel or administration of the Quartermaster's department. In my opinion the organization of the department is as near perfect as it is possible to b come. I base this opinion and declaration on the well-known satisfaction that has been given by the Quartermaster's department in the grand operations of the last four years.

I cannot conceive of a case of failure on the part of the department if the orders that have been promulgated from the office of the Quartermaster General

are honestly and understandingly obeyed.

Herewith enclosed I have the honor to transmit statements A and B, and statement of public funds, as called for in General Orders No. 39, being the only statements coming under the scope of my duties during the past fiscal year.

Respectfully submitted:

JOHN B. HOWARD,

Brevet Colonel and Assistant Quartermaster.

Brevet Major General M. C. MBIGS, Quartermaster General U. S. Army, Washington, D. C.

#### No. 111.

### Assistant Quartermaster's Office, New Orleans, La., September 22, 1865.

GENERAL: I have the honor to transmit herewith my annual report for the year ending June 30, 1865, in compliance with General Orders No. 39, Quartermaster General's office, dated July 1, 1865.

Owing to the breaking up of the depot and changes of station consequent thereon. I have been unable to forward the report at an earlier date.

I am, sir, very respectfully, your obedient servant,

E. J. STRANG.

Brevet Lieut. Col. and Assistant Quartermaster.

Brevet Major General M. C. Muigs, Quartermaster General U. S. Army, W shington, D. C.

A true copy:

JOHN V. FUREY, Captain and Assistant Quartermaster.

Assistant Quartmaster's Office, New Orleans, La., September 22, 1865.

GENERAL: In compliance with General Orders No. 39, from your office, dated July 1, 1865. I have the honor to submit herewith my annual report for the

year ending June 30, 1865.

My last annual report was mailed on the 15th of September, 1864, and at the date of its close I was in charge of the depot of repairs and wagon transportation for the army of the Potomac, located at City Point, Virginia. By Special Orders No 78, headquarters armies of the United States, dated August 23, 1864, I was directed to report to Brigadier General Rufus Ingalls, chief quarter-

Digitized by Google

master armies operating against Richmond, and my duties increased by the addition of the army of the James, for which, with the army of the Potomac, I furnished the means of transportation, as well as the repairs of wagons, ambulances. &cc.

My duties during the year have consisted in the receipt and issue of animals, wagons, harness, &c.; the general repairs of all means of transportation, including shipping; furnishing transportation for all extra work, such as hanling guns, ammunition, &c.; for siege artillery, railroad ties and material for construction corps, lumber, logs for stockades, fuel, &c., for the depot field hospitals, medical subsistence, ordnance and quartermaster's stores, to differe t points of the army; policing purposes at the hospitals and depot, and all details where troops or temporary commands were without the necessary transportation; also the construction and repairs of the public buildings, wharves, stables, &c., at the depot. No moves of the depot were made during the year, notwithstanding at times the greater part of the employés were doing service at other points.

My force of employes at the beginning of the year numbered as follows, viz:

| Wheelwrights                               |       |
|--|-------|
| Carpenters                                 |       |
| Laborers                                   |       |
| Blacksmiths                                |       |
|  |       |
| Saddlers                                   | • • • |
| Teamsters                                  |       |
| Clerks, superintendents, wagon-masters, &c |       |
|  |       |
| Total number of man                        |       |

Together with 273 six-mule teams, 69 four-horse and mule teams, 20 two-horse teams, 31 two-horse ambulance teams; the number of animals in the corrals for receiving and issuing purposes, 351; making a total of 575 horses and 1.792 mules, or 2.367 animals.

It was found that this force of mechanical labor, and the number of teams, was totally inadequate to meet the requirements of the service. I was accordingly directed by General Ingalls to increase my force and extend the operations of my depot until I could meet and supply every want pr mptly; for this purpose I caused advertisements to be inserted in some of the authorized newspapers of the northern towns, for mechanics and teamsters, and sent agents to secure the men, and also went myself, by order of General Grant, for the same purpose. My force now increased rapidly, until there was employed at the depot, under my control, the following number, viz:

The number of animals, &c., varied according to the exigencies of the service, the average number on hand amounting to 2,095 head. The handling and care of this branch of my department required a large force of employed. Immediately after arriving at City Point, I erected shops, such as had always

been used in the field, viz: a portable frame covered with canvas, (paulins.) My force increasing, it was found necessary to enlarge these shops to the following dimensions: two wheelwright shops, 190 by 25 feet; two blacksmith shops, 190 by 25 feet; two saddler shops, 60 by 22 feet; one carpenter's shop, 80 by 22 feet. As a measure of economy, I caused these shops to be covered with boards, in place of canvas, and stockades built of logs, also covered with boards, as quarters for the employés (winter was approaching) in place of tents.

My carpenters were employed during the year in constructing and repairing wharves, storehouses, stables, stockades at the hospitals for the accommodation of patients, and barracks for the colored employes of the quartermaster's and subsistence departments, consisting of six buildings, each 100 feet long by 25

feet wide and two stories high; also a chapel, 25 feet by 50 feet.

Your attention is respectfully invited to the supplementary statement, marked "G," he rewith submitted. It will be perceived that the daily issues of animals to officers averaged 181 head, the number of animals daily shod in the black-smith shops 140 and the number of wagons and ambulances repaired daily 17. As far as possible, where wagons came to my shops for repairs, I caused "brakes" to be put on them; these brakes were not invoiced to officers, but were considered "repairs," the materials for which I expended.

In the month of March I sent seventy-five blacksmiths, with forges, tools, &c... to White House, on the Pamunky river, to shoe the animals of General Sheridan's command, returning from the raid around Richmond; and also, in the latter part of April, sent the same number of blacksmiths to Nottoway

Court House and Petersburg for the same purpose.

In connexion with my remarks here, I may add that it is my opinion that the transportation of an army operating in the field can be kept in better repair and at less expense by having a general depot for repairs than by keeping a force of mechanics attached to the different commands.

Many articles were fabricated during the year, the most important of which were the following, viz: 12 spring wagons, 21,000 pounds horse and mule shoe, 4 sets of ambulance harness, 151 wagon bodies, 1,200 water buckets,

82 office chairs.

In the latter part of February I was ordered to relieve Captain E. E. Camp, assistant quartermaster, at City Point, of all stores appertaining to means of transportation, such as horse and mule shoes, nails, hardware of all kinds, except tools, sets of harness and parts of harness, wagons, &c., &c. For the care and security of these stores I erected a temporary storehouse on the wharf assigned to my depot.

On the 1st of March, in pursuance to orders from General Ingalls, I relieved Captain J. E. Jones, assistant quartermaster, and assumed charge of the depot field hospitals, in addition to my other duties. I placed a superintendent with a clerk in charge to attend to the current business, and visited the hospi-

tals daily.

After the dispersion of the rebel army, I was ordered by General Ingalls to establish a corral at Burkesville, for the purpose of receiving surrendered property. I went personally to that place and established the corral, and placed a superintendent in charge. The following number of animals and property was received from officers of our army, but not invoiced, viz: 400 horses, 1,300 mules, 101 wagons, and 90 ambulances. The animals I sent to Jordan's, or Light-house Point, on the James river, a few miles below City Point, where I caused them to be grazed daily. They were in a wretched state from want of food when they came into my possession, but subsequently many of them were issued to our forces in excellent condition.

By virtue of an order from the Secretary of War, 1 500 animals were turned over to various officers for distribution to the poor and freedmen of the Rich-

mond and Petersburg districts.

On the 1st of May, in compliance with instructions received from General Ingalls, I commenced to reduce the preportions of the depot by discharging the bulk of my employés; and by directions of the Quartermaster General, through General Ingalls, I sold at public auction, at Petersburg, Richmond, and City Point, 1,746 horses, 993 mules, 67 wagons, and 89 ambulances, unserviceable property, at prices averaging \$25 40, \$34 13, \$9 02, and \$23 05, respectively. The residue of my property, consisting, in part, of 1,028 horses, 2,074 mules, 573 wagons, 38 ambulances, and 3,340 sets of harness, I transferred to Captain A. T. Dunton, assistant quartermaster, at City Point, and Brevet Colonel C. H. Tompkins, assistant quartermaster, at Washington, District of Columbia.

In pursuance of Special Orders No. 272, War Department, Adjutant Gener. I's office, dated June 2, 1865, I proceeded to New York, N. Y., and reported on the 12th of June to Brigadier General S. Van Vliet, chief quartermaster of the department of the east, for assignment to duty, and was by that officer temporarily placed in charge of repairs of government vessels during the absence of Captain J. R. Jennings, assistant quartermaster, which duty I was performing at the closing of this report.

The following is a statement of the public funds received and disbursed by

me during the period embraced in this report :

| On hand July 1, 1864   | <b>\$</b> 59,779 75   |
|--|-----------------------|
| Received from officers during the year                             | 594, 028 50           |
| Received from Treasury Department during the year                  |                       |
| Received from sales of property and other sources during the year. | 83, 878 95            |
| Total  | 737, 687 20           |
|  |                       |
| Expended during the year   | <b>\$</b> 643, 806 06 |
| Transferred to other officers during the year                      | 71,000 00             |
| Remaining on hand June 30, 1865                                    | 22, 881 14            |
| Total  | 737, 687 20           |
| The balance on hand is deposited as follows:                       |                       |
| Ninth National Bank, New York city                                 | \$11,040 59           |
| Bank of the Metropolis, Washington, District of Columbia           | 28 78                 |
| Treasury United States, Washington, District of Columbia           | 39 69                 |
| In my possession   | 11,772 08             |
| Total  | 22, 881 14            |
| ,  |                       |

The accompanying statements, marked respectively A and B, are all that are required, from the nature of my duties during the past year and in compliance with the General Order requiring this report.

I have the honor to be, very respectfully, your obedient servant,

E. J. STRANG,

Brevet Lieut. Col. and Assistant Quartermaster.

Brevet Major General M. C. MKIGS, Quartermaster General U. S. Army, Washington, D. C.

A true copy:

JOHN V. FUREY, Captain and Assistant Quartermaster.

A -Report of quartermaster stores received, issued, and remaining on hand during the year ending on the 30th day of June, 1865, by Brevet Lieutenant Colonel E. J. Strang, assistant quartermaster U. S. volunteers.

DEPOT QUARTERMASTER'S OFFICE, Fort Leavenworth, Kansas, September 22, 1865.

GENERAL: I have the honor to transmit herewith my annual report for the fiscal year ending June 30, 1865, accompanied by a narrative report, as required by General Orders No. 39, Quartermaster General's office, of July, 1865.

Very respectfully, your obedient servant,

J. A. POTTER, Colonel and Quartermaster.

Brevet Major General M. C. Meigs,

Quartermaster General United States Army.

A true copy:

JOHN V. FUREY, Captain and Assistant Quartermaster.

DEPOT QUARTERMASTER'S OFFICE, Fort Leavenworth, Kansas, September 15, 1865.

GENERAL: I have the honor to present herewith my annual report for the year ending on the 30th day of June, 1865. Since the date of my last annual report, mailed to the department on the 30th day of September, 1864, and up to the time of being relieved at Chicago, Illinois, my duties there were mostly of a supervising character, retaining in my hands the disbursements of transportation by rail, &c. The officers at said depot, acting under my directions, were as follows: Captain J. M. Bradshaw, assistant quartermaster, purchase of horses, mules, &c.; Captain Charles Goodman, assistant quartermaster, in charge of Camp Douglas, Camp Fry, and disbursements appertaining thereto; Captain L. W. Shepherd, assistant quartermaster, miscellaneous business; Captain J. C. Barber, assistant quartermaster, transportation on passes.

The annual reports of these officers will show the amounts and extent of their operations, and would have been sent with this, but as I was relieved early in January, 1865, and ordered to Fort Leavenworth, Kansas, they have not been sent to me. I assumed the duties of this depot, Fort Leavenworth, February 1, 1865, relieving Captain Henry C. Hodges, assistant quartermaster United States army, and on the 10th February was directed by Special Order No. 41, headquarters department of the Missouri, to assume the duties of chief quartermaster of the district of country embraced in the late department of Kansas. These duties, and those of depot quartermaster, I have continued to discharge up to the present time.

#### GENERAL REMARKS.

Upon my arrival here I found a state of affairs existing of which I had no previous conception. Major General Curtis was in command, with Captain M. H. Insley as chief quartermaster of the department, who was also the depot quartermaster at Fort Scott. For some reason all the certified accounts of the department were being paid by Captain Hodges, the depot quartermaster, instead of the chief quartermaster, to whom such payments properly belonged. Stories of immense frauds were rife, and it was with the utmost care that any fixed data could be found to determine the status of a large number of vouchers afloat, and settle upon the mode and manner of payment. Great complaints had been made that certain parties and districts had been deprived of their fair proportion of the funds sent out for the purpose of settling the indebtedness.

I adopted the rule of paying a certain percentage to all claimants, until each specified amount furnished was exhausted. This plan seemed to work equal justice to all the parties interested, and soon, by the timely remittances from Washington, the greater part of this floating indebtedness was liquidated. Many of these vouchers were informal, and issued by officers temporarily placed on duty as acting assistant quartermasters, and a just and fair discrimination has been exercised, to the best of my ability, to pay none but legitimate expenditures. The disbursements have been large, as will be seen by the statements.

The matter of transportation has been a subject of much study on my part, as all the supplies for the vast region of country from Utah, on the northern route, and Santa Fé, on the southern route, with all intermediate posts, have to

be supplied from this depot.

From all the information I have been able to collect, from observation and other sources, I am compelled to say that I think the system of contracting freight is erroneous; that the delays, damages, &c., arising from the careless mode of shipment and want of proper care, will be in a great measure avoided by using nothing but government trains. It is not a sufficient compensation to the government that the contractor is obliged to pay for the articles lost or damaged in transit, for it often happens that the articles most needed for immediate service are wanting. In scarcely any instance have any articles been missing from our own trains. Time, also being an important element in the shipment of supplies, is saved by the greater rapidity of the government trains. The contractors are only bound to get all the stores through by a certain date in the fall. No contract should be made unless it has an ample though fixed time for the delivery, dating from the day of shipment. The large accumulation of stock at this depot, teams and wagons, will enable us to send forward, at all times, stores as they may be needed. From the above and many other reasons not necessary now to relate. I am decidedly in favor of the government doing its own transportation, except in special cases. At such times the depot quartermaster can always hire trains at special rates, not exceeding the present contract rates.

From present appearances the great point of departure for trains another season will be Fort Riley, or that vicinity. The Union Pacific railroad will be completed to that point, I am assured, by May next. It will be much cheaper for the department to pay transportation direct to Fort Riley, and send across from that point to Kearney, than to ship from Leavenworth. If good progress is made in the railroad from Omaha west, that will be the route for all goods destined for the northern line of posts, via Julesburg and Halleck, while the goods for Denver, Salt Lake, and Santa Fé should go via Riley; those destined for Denver and Utah via the Butterfield route, and those for Santa Fé by the old Santa Fé trail.

The depot of Fort Leavenworth will always be of great importance as the base of distribution for the supplies for all western posts. From time to time extensive warehouses have been erected, which, although now crowded to their utmost capacity by the large overstock on hand, and the accumulation from the breaking up of other posts, will, under all ordinary circumstances, be sufficient for the department. At present we are obliged to put up temporary sheds for the extra store room needed.

Water-works have been ordered for the supply of the post and depot, and

will be erected during the winter.

A large amount of timber on that part of the government reserve east of the Missouri river will be made available for use as soon as the steam mills now ordered are put into operation. The improved farms have yielded well this year, and will be a source of profit to the department.

I cannot too strongly urge upon the department the necessity for watching

with the utmost care, and preventing by timely remonstrance all attempts on the part of scheming politicians to get the reserved lands into market for the purpose of speculation. No one not perfectly well acquainted can estimate its value. I need not extend this report, as the merits and extent of operations at Fort Leavenworth are too well known to need comment.

Respectfully submitted:

J. A. POTTER, Colonel and Quartermaster.

Brevet Major General M. C. MEIGS,

Quartermaster General United States Army.

#### No. 113.

OFFICE ASSISTANT QUARTERMASTER, Winchester, Virginia, August 15, 1865.

GENERAL: In compliance with General Order No. 39, Quartermaster General's office, dated July 1, 1865, I have the honor to submit the following personal narrative of my services since July 1, 1864, accompanied by statements

required therein.

On the 1st of July, 1864, I was on duty at City Point, Virginia, assisting Captain P. P. Pitkin, assistant quartermaster and depot quartermaster at that point. On the 11th day of July I was assigned to duty as chief quartermaster cavalry corps, army of the Potomac, by command of Lieutenant General Grant: entered immediately on duty as ordered; shipped the first and third division cavalry corps on board transports for Washington, District of Columbia, and was soon after ordered by General Sheridan, commanding, to join him at Harper's Ferry, Virginia. The order being approved by Lieutenant General Grant, I immediately proceeded to comply therewith. On my arrival at Harper's Ferry I found General Sheridan's headquarters at Winchester, Virginia. I proceeded to Winchester and reported to General Sheridan, when I was directed to report in person to General Torbert, chief of cavalry, as chief quartermaster of the cavalry middle military division; served in that capacity until the death of Colonel Tolles, chief quartermaster middle military division, which position I retained until the division was dissolved. During my service as chief quartermaster of the cavalry, the battles of the Opequan, of Winchester, and Fisher's Hill, were successfully fought; the cavalry taking a conspicuous part in all these engagements. No transportation or other public property of importance fell into the hands of the enemy. During my service as chief quartermaster of the middle military division, my attention was particularly attracted to the army of the Shenandoah, numbering from 50,000 to 60,000 men. In consequence of the Winchester and Potomac River railroad having been entirely destroyed previously, this large number of men, with some 26,000 animals, had to be supplied by teams from Martinsburg, West Virginia.

It will be seen that it was no small task to properly arrange the running of these large trains so that the army might not at any time be in need of subsistence, forage, or clothing. The large number of cavalry rendered the supply of forage a difficult task, when it is taken into consideration that the army was in

no position to be supplied by means of water transports.

The Baltimore and Ohio railroad was our only dependence, and great credit is due to the officers of the road for the manner in which supplies were forwarded, and for the promptness in complying with any demands of the commanding general relative to the movements of troops and supplies. It is also becoming in me to mention the efficiency of the chief quartermaster's department, West Virginia, in supplying the army with forage. I am also indebted to Captain James T. Wray, assistant quartermaster, then depot quartermaster at Martinsburg, for the interest manifested by him in the success of the army in the field, and for the manner in which the quartermaster's department at Martinsburg was conducted by him. His duties were arduous, but were discharged with ability and to my entire satisfaction.

Late in the month of November, 1864, the United States military railroad department succeeded in completing the railroad from Harper's Ferry to Stevenson Station, a point about five miles from Winchester, that being deemed by General Sheridan the most practicable point for the terminus of the road.

Field repair shops were here established under the immediate direction of Captain James T. Wray, assistant quartermaster, who had been ordered here from Martinsburg. These shops were calculated to keep thoroughly in repair

all the wagons and ambulances in the army, and to keep the animals well shod, so that in the spring, an active campaign being contemplated, on close inspection the transportation was found to be in as good condition as any in the field, and fit for any emergency.

It affords me great pleasure to testify to the untiring energy displayed by Mr. O. H. Dorrance, the efficient superintendent of the road; and I can safely say that no effort was left unmade by him to answer promptly the requirements of

the army, to be supplied by the road.

This road being completed, the necessity of running large trains from Martinsburg to points in the field (sometimes one hundred miles distant) was obviated. and the transportation of the army was permitted to recuperate. After the sucessful series of battles in the fall of 1864 in the Shenandoah, valley, the veteran and distinguished sixth corps was again sent to the army of the Potomac. This movement was conducted with celerity, and reflects great credit on the military railroad and Baltimore and Ohio Railroad Companies. The trains belonging to the corps, which were in splendid condition, were sent, via Frederick city, Maryland, to Washington, District of Columbia. The provisional division of the army was then transferred to the army of the James. No discredit can be attached to any one for the manner in which this movement was conducted. Later in the winter one division of the late 19th army corps was shipped en route for Savannah, Georgia, which movement was conducted with ability. That portion of the army of West Virginia, not including the cavalry, was ordered along the Baltimore and Ohio railroad in West Virginia. The army to which my immediate attention was attracted was now composed only of the cavalry three divisions, numbering about 20,000 men and animals, one division of infantry, about 10,000 men, and six batteries of artillery. The great cavalry expedition under the command of Major General Sheridan was now fitted out, and on the 27th day of February started for the army of the Potomac. All are conversant with the success which attended this expedition. The supply train of this command was sent to Washington. Soon after this expedition started, Major General Hancock being in command, four regiments of his 1st army corps were sent to this army. They were followed by troops from Ohio and Indiana—one-year volunteers, numbering some 15,300. The fall of Richmond and the surrender of the different armies of the rebellion having followed the united efforts of our commanding general, the anxiety for the success of our armies soon abated, and soon the mustering out of the troops comprising the army commenced. Every effort has been put forth since that time to curtail the expenses, and on the 30th of June, 1865, the army of the Shenandoah numbered only 15,000 men, for the most part made up of infantry from the western States, five regiments of cavalry, and five batteries of artillery.

I have been closely identified with this army since July, 1864, and it affords me great pleasure to say that I know of no officer of the quartermaster's department in this army but that has rendered me every assistance in the discharge

of my duties.

Having discharged my duties to the satisfaction of the commanding general, (as will be seen by General Sherman's letter,) I sincerely trust that the same will meet with the approval of the department.

I am, general, very respectfully, your most obedient servant,

HENRY PAGE,

Lieut. Colonel and Q. M. U. S. Volunteers.

Major General M. C. Meigs, Quartermaster General U. S. A., Washington, D. C.

#### No. 114.

MILITARY DIVISION OF THE TENNESSEE,
QUARTERMASTER'S OFFICE UNITED STATES MILITARY RAILROADS,
Nashville, Tennessee, October 18, 1865.

GENERAL: I have the honor to transmit herewith my annual report for the fiscal year ending June 30, 1865.

Very respectfully, your obedient servant,

F. J. CRILLY.

Captain and A. Q. M. U. S. A., Chief Quartermaster U. S. Mil. R. R. Military Division of the Tennessee.

Major General M. C. MBIGS,

Quartermaster General U.S. A., Washington, D. C.

A true copy;

ALEXANDER BLISS.

Brevet Colonel and Assistant Quartermaster.

## Recapitulation of papers enclosed.

1. Personal report.

Statement of quartermasters' property.

3. Statement of clothing, camp and garrison equipage.

4. Statement of public moneys.

5. Statement of amount paid for transportation by rail, river, and wagon.

6. Statement of amount paid for transportation by ocean and lake.

". Copy of a communication addressed by myself to Brevet Major General

J. L. Donaldson, chief quartermaster military division of the Tennessee, relative to expense of running military railroads in this division for the month of July, 1865.

8. Copy of an order received from Brevet Brigadier General D. C. McCallum, director and general manager United States military railroads, to furnish full

statistics of the operations of this department.

9. Statement of amounts of monthly pay-rolls of the United States military railroads, military division of the Mississippi, from November 1, 1863, to January 31, 1864, inclusive, under the direction of J. B. Anderson, general manager.

- 10. Statement of amount of vouchers audited for material furnished United States military railroads, division of the Mississippi, from November 1, 1863, to February 7, 1864, inclusive, under the direction of J. B. Anderson, general manager.
- 11. Amount of vouchers audited from February 8, 1864, to June 30, 1865, inclusive, under the direction of Brevet Brigadier General D. C. McCallum, director and general manager United States military railroads.
- 12. Report of men hired by J. B. Anderson, general manager United States military railroads, division of the Mississippi, from November 1, 1863, to Janu-
- ary 31, 1864, inclusive.
- 13. Report of men hired by Brevet Brigadier General D. C. McCallum, director and general manager United States military railroads, from February 1, 1864, to June 30, 1865, inclusive.
- 14. Statement of amounts of monthly pay-rolls of United States military rail-roads, division of the Tennessee, audited in 1864 and 1865.
- 15. Earnings of the United States military railroads, division of the Mississippi, from November 1, 1863, to December 31, 1864, inclusive.

# MILITARY DIVISION OF THE TENNESSEE, QUARTERMASTER'S OFFICE UNITED STATES MILITARY RAILROADS, Nashville, Tennessee, August 22, 1865.

GENERAL: I have the honor to report, in accordance with General Orders No. 39, Quartermaster General's office, dated Washington, D. C., July 1, 1865, as follows:

During the fiscal year ending June 30, 1865, I was on duty in New York city until October 31, as purchasing and disbursing quartermaster. On being relieved from duty there I was directed, by orders from the Adjutant General's office, to report to the commanding general and chief quartermaster military division of the Mississippi for assignment. I proceeded as far as Calhoun, Georgia, to report to General Sherman, who had just started on his march to Savannah; communication being cut off, I reported to Major General Thomas, commanding in General Sherman's absence. On the 10th of December I was directed to relieve Colonel J. C. Crane and Captain A. R. Eddy of all duties connected with the United States military railroads in the military division of the Mississippi, which duties I have performed to the present time, station being Nashville, Tennessee.

I forward herewith a statement, form A, of all the articles of quartermasters' property which have come into my possession during the year while on duty with the military railroads. The report of property purchased, &c., in New York city, will be forwarded by General S. Van Vliet, who will make an annual statement of all the quartermasters' property for the New York depot.

I also forward form B, containing statement of all articles of camp and garri-

son equipage received by me.

My statement of public money is also appended, together with the amount paid for transportation by rail, river, stage, and wagon, other than government

wagons. A statement of the amount paid for transportation by ocean and lake, form C C, is appended. The nature of my duties not requiring me to furnish transportation of any kind, I therefore make no report for form D.

My statement, as per form S, of chartered vessels, &c., will be included in the annual report of General S. Van Vliet, who will report all the vessels char-

tered at New York city.

The other reports called for I am, in consequence of the nature of my duties, unable to make. I attach a copy of order from General D. C. McCallum directing that a report be made of the operations of the quartermaster's department of the United States military railroads from the commencement of the war.

I have the honor to state that there were no records left in this office by my

predecessor, or any data from which I could furnish anything reliable.

The accompanying statements are obtained from the auditor of military rail-

roads, and contain all the information it is possible for me to furnish.

I presume the annual report of Colonel J. C. Crane will furnish the statements of the disbursements for the first half of the fiscal year. It may not be out of place here to state what are the duties of the quartermaster on duty with military railroads. The organization consists of one chief quartermaster, stationed at Nashville, with one assistant quartermaster; one assistant quartermaster stationed at Chattanooga, Tennessee, and one assistant quartermaster stationed at Memphis. Captain S. R. Hamill, assistant quartermaster, is stationed at Nashville, and is responsible for all the property on the Nashville and Chattanooga, Nashville and Northwestern, Nashville and Decatur, and on the Memphis and Charleston railroad from Decatur to Stevenson, Alabama; total number of miles, four hundred and twenty-nine. He has also charge of the general supply store at Nashville, and of the lumber yard, property, saw-mills, and means of transportation of the quartermaster's department.

The rolls of the road above mentioned are made out and certified to by the general superintendent of military railroads, and after being audited and approved by the general manager or chief engineer, in accordance with orders of the War

Department, are paid by the chief quartermaster at Nashville.

Captain W. R. Hopkins, assistant quartermaster, is stationed at Chattanooga, Tennessee, and is responsible for all the property on the Chattanooga and Knoxville, Chattanooga and Atlanta, and East Tennessee and Virginia railroads; total number of miles, three hundred and seventy-eight. Chattanooga being so remote from the auditor's office, and it being impossible for the general manager to visit there monthly, the rolls are made out and certified to by Captain Hopkins; otherwise, no vouchers could be issued to discharged employes unless the general manager or chief superintendent was present.

Captain John Parks, assistant quartermaster, is stationed at Memphis, Tennessee, and is responsible for all property on the Memphis and Charleston and Mobile and Ohio railroads, so far as operated in that part of the State, and for the property on the Memphis and Little Rock railroad. The rolls for employes of these roads are made out and paid by the quartermaster, for the same reason as at Chattanooga. The consolidated rolls, form No. 2, at both places, are, however, sent to Nashville for audit and approval of the general manager.

Stores are purchased and supplied by the quartermaster on requisition of the

general superintendent and chief engineer of the roads.

The question of property responsibility has always been the most difficult matter to arrange owing to the peculiar organization of the military railroad service. In this military division it is organized under the direction of a general superintendent, who has charge of everything relative to transportation and repairs, and a chief engineer in charge of construction. Each was independent of the other, and the quartermaster independent of both, except so far as filling requisitions for supplies and paying the employés.

The mingling of civil and military officials, without any precedent or regulation to govern anomalous cases that constantly arise, would naturally produce collisions of authority, unless all parties worked with the proper spirit, and vielded questions of rank and precedence to the more important one of emergencies of service. Fortunately this was the case except in one instance, when the bad temper of one official produced so much bad feeling and annoyance that his resignation was promptly accepted by the general manager. It will be seen, therefore, that the property, although on the returns of the quartermasters, is all in the hands of the officers of the railroad service, who are no ways responsible to him. During the period that Mr. E. L. Wentz was superintendent he completely ignored the authority of the quartermaster, and prohibited any reports being made of the loss or destruction of property. The consequence was that the officer responsible, Captain G. H. Clemens, assistant quartermaster, on being ordered to be relieved, could not find a tithe of the property his papers called for, and was so involved that a board of survey is now in session, convened by , order of Major General Thomas, to investigate the cause of his large deficiency, and fix the responsibility.

A system of reports is now instituted by which the quartermaster is kept advised of the condition of property, and affidavits are furnished for all lost or destroyed, which I believe will effect a more prompt rendition of returns than could

be previously obtained.

Owing to the nature of the service, in an enemy's country, but few accurate statistics could be kept of the number of troops or amount of freight transported. Whole corps and even armies have been frequently transported back and forth in the same week from one end of the military division to the other, on cars of every description, almost in presence of the enemy, so that it was impossible to keep any record of it.

I was directed by Brevet Major General J. L. Donaldson, chief quartermaster military division of the Tennessee, to prepare an estimate of the expenses of the road for the month of July, compared with the receipts and amount chargeable

on account of general transportation, a copy of which is appended.

I have examined this report since and believe it to be very nearly correct.

Since writing the foregoing reports all the roads operated by the United States, with the exception of the Memphis and Little Rock railroad, have been turned

over to their respective companies on the following dates, viz:

The roads are now being operated by the companies, the rolling stock being

sold to them by the United States on credit.

It will probably take until the first of January next for the different quartermasters in charge of property to close up the business and render the necessary returns.

Very respectfully, your obedient servant,

F. J. CRILLY,

Captain and A. Q. M. U. S. A., Acting Chief Q. M. U. S. Mil. R. R., Mil. Div. of the Tennessee.

Major General M. C. MBIGS, Quartermaster General U. S. A., Washington, D. C.

F. J. CRILLEY, Captain and Assistant Quartermaster U. S. A.

MILITARY DIVISION OF THE TENNESSEE, QUARTERMASTER'S OFFICE, U. S. MILITARY RAILROAD, Nashville, Tennessee, August 7, 1865.

GENERAL: In accordance with the instructions of your letter of the 2d instant, relative to expense of running military railroads in this division for the month of July, and the amount that would have to be paid to the companies if the roads were run by private parties, I have to report as follows:

#### EXPENDITURES.

| Expense in July for pay of employés | \$670,000 00<br>80,000 00<br>100,000 00 |
|-------------------------------------|---|
| Total                               | 850,000 00                              |

\_\_\_\_\_

#### RECEIPTS.

| Received as earnings of the road, from passengers and freight Value of product of rolling mill at Chattanooga, the expense of which is included on the pay-roll, being 693 tons, at \$90 | <b>\$</b> 140,563 | 76 |
|--|-------------------|----|
| per ton  | 62,370            | 70 |
| cent per mile  | 102,130           | 59 |
| amounted to  | 75,954            | 29 |
| corporations   | 468,980           | 66 |
| Total  | 850,000           | 00 |

Owing to the limited time allowed for making up of this statement, it was impossible to obtain full report of freight and passengers transported, the number given being taken from reports already in; the actual number will greatly exceed this.

The amount collected for private freight and passengers is steadily increasing, as will be seen from the following table of amounts received for the different months of this year:

| January  | \$7,500 | 00 |
|----------|---------|----|
| February | 19,320  | 00 |
| March    | 23,740  | 00 |
| April    | 26,499  | 64 |
| May      |         |    |
| June     | 83,635  | 00 |
| July     | 140,563 | 76 |

The receipts for the present month will reach two hundred and fifty thousand dollars, and can be increased to any amount that the United States will give facilities for. The month of July exhibits large items of expense for the reason that the reduction of the working force necessary for a state of war had to be done gradually, in order to gather in the tools and public property of all kinds in their possession. These reductions are still taking place at the rate of about one hundred and twenty-five per day.

A large number of expensive employes are also profitably employed in the repair of the rolling stock, so that it may be in complete order to sell. 'The benefit of this will be very large, and cannot be estimated. A large number of additional men are also engaged in watching and taking care of this rolling stock, which has now become largely surplus.

If sales were made of this to reduce the amount down to the actual necessities of the service, both public and private, it would reduce expenses immensely.

The roads run by the United States at Memphis are not included in any of the foregoing report, as the amount received for freight and passengers there is sufficient to pay the running expenses.

The expense per month, for the future, will depend upon the length of time that may elapse before some disposition is made of the rolling stock, and also upon the diminution of the number of free passes now given to refugees and destitute persons returning to their homes.

My estimate of funds for the present month calls for a half million of dollars, which, with the amount received as earnings of the road, will fully cover the expenses.

Very respectfully, your obedient servant,

F. J. CRILLY, Capt. and A. Q. M. U. S. A., Acting Chief Q. M. U. S. Mil. R. R., Mil. Div. of the Tenn.

General J. L. DONALDSON,

Chief Quartermaster Military Division of the Tennessee.

Caplain and Assistant Quartermaster U.S.A.

WAR DEPARTMENT,
OFFICE OF MIL. DIR. AND SUPT. RAILROADS U. S.,
Washington, D. C., August 14, 1865.

CAPTAIN: I enclose herewith one (1) copy of General Order No. 39, Quartermaster General's office, dated July 5, 1865, calling for an annual report from

officers of the Quartermaster's department.

This order is sent you with instructions to furnish full statistics of the operations of your department; the statistics should show all expenditures incurred by you in the construction and maintenance of United States military railroads. stating as far as possible what the expenditure was for, also the receipts derived from transportation of freight and passengers, so far as they pertain to your department.

It is desired that your report may be rendered as early as practicable, and, as the war is at a close, that it should embrace, in addition to the operations to the past year, a general review and summary for the entire period of the war.

A copy of your report should be sent to this office, in addition to the one

sent to the Quartermaster General.

Very respectfully, your obedient servant,

D. C. McCALLUM,

Brevet Brigadier General, &c.

Per H. K. COOPER, in charge.

Captain F. J. CRILLY,

Acting Chief Q. M. Mil. Railroads,

Nashville, Tennessee.

A true copy:

F. J. CRILLY. Captain and A. Q. M. U. S. A.

The above is a true abstract of records of this office.

JOHN TRENBATH,
Auditor of U. S. Military Railroads, Middle Division of Tennessee.

A true copy:

ALEXANDER BLISS,
Brevet Colonel and Assistant Quartermaster.

## No. 115.

## OFFICE OF GUNBOAT FLOTILLA, St. Louis, Missouri, September 14, 1863.

GENERAL: In accordance with General Order No. 13, I have to report as follows: I received my appointment as captain and assistant quartermaster on the 28th of September, 1861, and was ordered to report for duty to Captain A. H. Foote, United States navy, commanding gunboat flotilla on the western waters.

The flotilla was under the command of navil officers, and subject to naval rules; while at the same time its whole organization was a part of the army, and

its expenditures paid from that department.

I being the only representative of the army with the flotilla, all requirements for the service were made through me, and I performed the various duties of naval paymaster, storekeeper, and commissary, beyond the general duties of an army quartermaster. In addition I was required to audit the accounts of each acting assistant paymaster of the gunboats, involving an examination into their expenditures for a year—a duty which, under other circumstances, would belong to the Fourth Auditor.

By act of Congress of July 16, 1862, the western gunboat flotilla was transferred from the War to the Navy Department, but the final transfer was not made until September 30, 1862, and I was not relieved from duty until the 1st of December following; since which time I have been constantly engaged in settling the accounts of the flotilla, and making the necessary reports required by the War Department.

Before leaving I transferred a large amount of property to the naval authorities, estimated in the aggregate to be one million eight hundred and sixty-nine thousand five hundred and seventy-four dollars (\$1,869,574) in value, compris-

ing gunboats, tugs, transports, and captured steamers and their equipments, clothing, provisions, small stores, coal barges, naval wharf-boat, and general

quartermasters' stores.

The total amount received from the United States treasury, and other officers, in money, was two million nine hundred and twenty thousand one hundred and forty-seven dollars and twenty-four cents (\$2,920,147 24;) add to this estimated value of stores, &c., received from other officers, two hundred and twenty-six thousand three hundred and eighty-five dollars (\$226,385;) in all, three million one hundred and forty-six thousand five hundred and thirty-two dollars and twenty-four cents (\$3,146,532 24.)

There were captured at different times from the enemy five gunboats, fifteen transport steamers and five wrecks, which, including other property, amounts to four hundred and fifty thousand dollars (\$450,000,) estimated value. There has been paid, in the aggregate, for transportation of ordnance and quartermasters' stores, as follows: Express companies, twenty-five thousand three hundred and twenty-five dollars (\$25,325;) railroad companies, twenty-five thousand one hundred and eighty-one dollars (\$25,381;) river, ten thousand one hundred and eighty-seven dollars (\$10,187;) and for mileage of officers, three thousand one hundred and sixty-one dollars (\$3,161;) in all, sixty-four thousand and fifty four dollars (\$64,054.)

While under the army, the flotilla, commencing with three small, improvised, wooden gunboats, hardly able to keep the river open between St. Louis and Columbus, Kentucky, increased to ten iron-clads, eleven wooden gunboats, two large ammunition steamers, thirteen tugs, a hospital boat, with everything requisite for the sick and wounded, and a fleet of fifteen chartered and captured transports. There was also attached to the flotilla a floating blacksmith shop, and a distributing commissary steamer. Large depots of coal were kept at convenient places on the rivers, and at Cairo, Illinois, a new large and superior wharf-boat was purchased, which answered as a general depot for most of the requirements of the flotilla, including offices for the transaction of business.

While every assistance possible was extended by other branches of the government to the flotilla, yet the officers necessarily were thrown upon their own resources, and a navy had to be formed from new materials, far from what was generally considered its proper element. Officers, sailors, and gunboats had to be made to suit the exigencies of the time. How well all this was performed history will tell, and the flotilla under the army will have had a most important

bearing upon the final result of the rebellion.

I would refer to the reduction of Forts Henry and Donelson, the evacuation of Columbus, Kentucky, Island No. 10, Fort Pillow, and the destruction of the rebel fleet off Memphis; in addition, the important part taken by the flotilla in the sanguinary fight at Belmont, and the great battle of Shiloh. League after league of the great Mississippi was opened to commerce, until the name of a gunboat became a terror to the rebels.

For a more detailed account in relation to the above, I would refer you to the accompanying papers, comprising a "Tabular list of gunboats, transport steamers, and wrecks, captured from the enemy," "Names, tonnage, and earnings of steamboats chartered and employed," and "Statement of cash received and disbursed, on what account, together with balance remaining on hand June 30,

1863."

All of which is respectfully submitted.

Very respectfully, your obedient servant

GEO. D. WISE

Captain and Assistant Quartermaster, with Gunboat Flotilla. Brigadier General M. U. Meigs,

Quartermaster General U. S. A., Washington, D. C.

56 W

### No. 116.

# CHIEF QUARTERMASTER'S OFFICE, DEP'T OF NORTH CAROLINA, Wilmington, March 11, 1865.

CAPTAIN: In compliance with orders received from Major General Terry, commanding at Wilmington, you will take the tug Davidson, and such men and machines as you require, and, as soon as the guard reports, you will proceed up the Cape Fear river, as far as possible with safety to the tug and men, ascertaining as nearly as possible the amount of obstructions in the river, clearing the river of such obstructions, communicating with General Sherman's scouts, if possible. Seventy-five men will be detailed as guard, with arms and three days' rations, with sufficient officers to command them

You can send out scouts on the banks of the river at such places as may be necessary to protect the boat.

<sup>\*</sup> Reclaimed by the owners.
† Recaptured by the rebels and destroyed.

<sup>.</sup> Taken at Cairo.

If necessary, I will send the "Christopher," to return with such information as you may obtain from the scouts, contrabands, and all persons that can give you information of service to the commanding general.

You will be cautious in your movements, and go as far as possible.

Respectfully, &c.,

GEO. S. DODGE.

Brevet Brigadier General and C. Q. M.

Captain Andrew Ainsworth,

Captain of the Port.

A true copy:

GEO. D. WISE. Colonel.

FORTRESS MONBOE, VIRGINIA, October 29, 1865.

SIR: I have the honor to submit the following report in regard to opening

communication with General Sherman, made at your request:

On the 11th of March, 1865, I received orders from Brigadier General George S. Dodge, (a copy of which I enclose;) I also received verbal orders to procure a launch from the Navy Department; also, two swivel guns, and the necessary ammunition; also, a construction party to accompany me to clear obstructions.

I also made arrangements to have a torpedo ready to blow up the rebel steamer Chickamauga, if I found her lying across the channel, so as to obstruct the passage of the river.

We received orders from Major General Terry to proceed punctually at 2.30

p. m., which order was promptly obeyed.

We were informed that the United States steamer Eolus, Commander Young

commanding, would immediately follow.

Nothing worthy of note occurred until some sixteen (16) miles from Wilmington, North Carolina, (the highest point attained by the naval vessels.) After passing that point, large numbers of colored men, women, and children flocked to the banks of the river, and appeared wild with delight at our appearance, and wished to come on board, and followed us along the banks of the river for miles, offering us fish, &c.; but we did not deem it policy to receive them on board, not knowing what might transpire as we advanced.

After proceeding some miles further, we found a plantation on fire, on which place there were large lots of cotton and naval stores being consumed by the devouring element. The only persons to be seen were a few colored people, and a white man and a colored boy in a boat, endeavoring to escape through the swamp, whom we arrested and took on board. It by this time having become dark, and seeing no signs of the United States steamer Eolus, we deter-

mined to push forward with all despatch possible.

On arriving at the point where the Chickamauga was sunk, we found her

lying on the left bank of the river, with ample room to pass.

Some few miles above this point was a chain stretched across the river, which we were fortunate enough to pass safely over; and it is our belief that the said chain was let down by the negroes in the vicinity. Above this place many trees had been felled, so as to throw them across the stream, but the tide had fortunately swept them clear of the channel.

Proceeding, we came to a point called Indian Mills, where we found a battery covering the chain. It had been reported that said battery was garrisoned by confederate troops. After consultation with Captain Rifle, (commanding a

detachment of the 13th Indiana regiment, composed of sharpshooters,) we came to the conclusion, if fired upon, to land the troops, and endeavor to take the battery by an assault; but, as we were not molested, we proceeded on our

WAV.

Nothing further of interest occurred until we arrived in the vicinity of Elizabethtown, where we perceived large fires upon the banks of the river. On our arriving off the town we found it in a general conflagration, also boats in the river completely enveloped in flames as well. The heat from the flames was intense, and the dense clouds of smoke made it almost an impossibility to preceed; but still we pushed forward, and managed to get safely through.

Proceeding some ten (10) miles further, we met a mass of burning timber floating down the river, which our colored pilots informed us were portions of the bridge which crossed the river at Fayetteville. By the skill of said pilots we evaded the burning mass, with the loss of one boat which was towing astern.

After proceeding some few miles further, bodies of cavalry were seen along the right bank of the river, which immediately galloped away.

From this point the banks of the river were strongly picketed.

Previous orders had been given to extinguish all lights, and for all to retain silence on board.

A white mist occasionally enveloped the boat, our only marks then to steer

by being the branches of the trees along the banks.

On arriving about twelve (12) miles below Fayetteville, the confederates opened fire upon us, which was promptly returned by the troops on board, as well as from the guns on board the launch under the command of Mr. Pool, in charge of the obstruction party. Fortunately, no one was hurt on board, although a number of shots struck the pilot-house. This fire was kept up at intervals for several miles.

At 6 a. m. we arrived at our destination. On our arrival we found the place occupied by the troops of General Sherman's command, and sharp skirmishing with the enemy across the river. We proceeded immediately to General Sherman's headquarters, and reported March 12, at 7 a. m. The general was much pleased to see us, and congratulated us upon our safe arrival.

We received orders from him to remain at Fayetteville until dusk of the evening, as he wished to send down a bearer of despatches, also mails and pas-

sengers.

At the time appointed we immediately started for Wilmington, North Caro-

lina

After leaving Fayetteville, and proceeding some miles on our way, we met 'the United States steamer Eolus, with whom we held communication, and then proceeded on our way, arriving at Wilmington at daybreak, March 13, 1865.

I am, sir, very respectfully, your obedient servant,

ANDREW AINSWORTH,

Captain of the Port, Quartermaster's Department.

Colonel WILLIAM L. JAMES,

Chief Quartermaster, Department of Virginia.

#### No. 117.

Headquarters Department of Washington, Office of Chief Quartermaster, Washington, D. C., September 9, 1865.

GENERAL: In compliance with General Order No. 39, of July 1, from your office, I have the honor to submit the following report of the duties performed by me, together with statement of my money and property responsibility duing the fiscal year ending June 30, 1865.

An annual report for the year ending June 30, 1864, was transmitted by me

to your office about September 15, last.

On the first day of July, 1864, I reported to Brigadier General Francis Bar low, commanding first division 2d army corps, and at once entered upon the discharge of the duties as quartermaster of the division, which at that time was in the immediate front of Petersburg, the right of the division resting near the Jerusalem plank road, and joined on the left by the second division of the corps. No movements of the troops or trains transpired, excepting change of the latter from point to point, to improve the parking ground, until July 27, at which date the 2d corps was withdrawn from its position, and moved to the north side of the James river, crossing the Appomattox and James rivers by pontoon bridges, accompanied by a part of the general supply train.

While the corps remained at Deep Bottom, it engaged in several skirmishes with the enemy, but without serious loss, and returned with trains to former po-

sition on the 3d of August.

Another movement of the corps to the north side of the James river was commenced on the 13th of the same month, the troops embarking in steamers at City Point, and landing at Deep Bottom on the night of the 14th, while the ammunition and about one-half of the supply trains were sent under cover of the darkness across the Appomattox and James rivers by pontoon bridges, and halted on the south side of the latter river, opposite Deep Bottom, the remainder of the corps trains moving into park near City Point.

A number of unimportant engagements with the enemy again occurred during the stay of the corps; which, with transportation, recrossed the James and Appomattox rivers by pontoon bridges on the night of the 22d, and resumed its former position, the park of the corps train being established near Birney's

Station, on the Military railroad.

On the 23d a movement against the enemy's right was made by the first and second divisions of the corps, the troops marching out the Jerusalem plank road.

Heavy rain-storms having occurred prior to and during this movement, the roads were made almost impassable for wagons, and rations for the men and forage for officers' horses had to be transported by pack mules—a slow and

troublesome method, but accomplished successfully.

On the 24th the two divisions pushed on to Keam's Station, (taking with them the ambulance and part of ammunition trains,) on the Weldon and Petersburg railroad, driving the pickets of the enemy before them, and having effectually destroyed the railroad for a number of miles north to the point held by the 5th corps, proceeded to strengthen their position at the station by erecting earthworks, &c., and continued the destruction south towards Strong creek.

On the 25th the enemy in large force attacked the command and a serious battle ensued, attended with severe loss of men on both sides, and resulting in the withdrawal, during the night, of the troops of the 2d corps from the railroad. The transportation was brought back in safety. Troops went into camp on the 26.h, with the remainder of corps, on the Jerusalem plank road, near Petersburg, the trains being parked in the vicinity.

During the interim from this date until the latter part of October, the first division second corps remained in about the same relative position before Pe-

tersburg.

On September 23 a raiding party of the enemy moved around the left flank of the army and succeeded in capturing and carrying off a large number of cattle belonging to the subsistence department, and for a few days serious apprehension was felt as to the safety of the trains, which were accordingly moved at the time nearer to the troops, but subsequently changed from time to time, as the condition of the parking ground or the supply of water demanded.

Preparation having been made for some days previous, on the morning of October 25 a general movement of the troops to the left commenced, the trains

of the army, excepting ambulances and ammunition wagons, being moved, for safety, inside of the intrenchments at City Point.

The defence of the main works in front of Petersburg, from the plank road to the Appomattox river, was intrusted to the first division 2d army corps.

While the trains remained at City Point, the teamsters and other employes of the quartermaster's department were armed and held in readiness for any sudden attack that might be made on the base of supplies.

The operations of the army on the left comprised a series of engagements with the enemy tending towards and materially assisting the accomplishment of the plan of our great military chieftain of grasping the communications of the rebels.

On the 28th the troops of the army engaged in this movement returned to their former positions, and the trains rejoined them.

On the 28th a telegram from the Adjutant General's office, War Department, was received by me, directing that I should at once repair to this city and report to the commanding general, department of Washington, and assume the duties to which I had been assigned on the 24th of that month.

On the morning of the 30th I transferred my property to the officer appointed to relieve me, and leaving from City Point, arrived in this city on the 31st. On the following day I reported to General Augur, and was assigned as chief quartermaster, department of Washington, in which capacity I was acting at

the close of the fiscal year ending June 30, 1865.

Upon assuming the duties of my position, the subject of greatest importance to be considered at the time, and demanding immediate attention, was that of providing the supply of wood for the inclement season then commenced. The available quantity on hand was inadequate for the wants, and the arrangements already made in part contemplated the supply by river; but knowing the uncertainty attending water transportation during the winter, and realizing the absolute necessity of obtaining a regular supply through a reliable channel, I at once took steps to provide for the same by cutting along the railroads in Virginia. The cutting was confined as far as possible to the lands of disloyal persons, but landmarks being almost entirely obliterated in that part of Virginia, in some instances wood was taken from the lands of loyal people. An account was kept at this office (as nearly accurate as possible without survey of land) of all wood taken, so as to facilitate a settlement when ownership and loyalty should be established.

The work of cutting being rapidly and steadily pushed forward insured an abundant stock for issue. From three hundred and fifty to four hundred cords were daily brought by railroad to Alexandria, Virginia, and this city, thereby affording an ample allowance for the troops and hospitals in both cities, as well as for the garrisons in the forts comprised in the second, third, and fourth brigades, of DeRussey's division, south of the Potomac. The supply for the garrisons of the forts in Harden's division, north of the Potomac, the commands at Great Falls, Poolesville, Chapel Point, and other detached posts, and also for prison camp and general hospital at Point Lookout, was provided by purchase in the vicinities at reasonable prices.

Under instructions from your office I furnished up to the close of the fiscal year, to Captain J. G. C. Lee, assistant quartermaster, at Alexandria, Virginia, fifteen thousand six hundred and sixteen cords; to Captain J. M. Moore, assistant quartermaster, four thousand and five cords; and also sold to Captain J. M. Brown, by order of the Secretary of War, nine hundred and twenty-three cords for issue to destitute colored people in this city.

During the month of January the 23d army corps arrived at this point and remained about four weeks. Quarters were provided for as many of the men as possible at the new freedmen's hospital, at the barracks at Camp Relief and Camp Stoneman, and elsewhere, but the bulk of the command was encamped on

the grounds near Camp Stoneman, the tents for the purpose being drawn by me

from the depot and returned when the troops moved.

This corps during its stay, the 1st corps (General Hancock's) while in this vicinity, the army of Potomac, and the army of General Sherman when concentrated here, were all amply provided with wood by me, and together consumed about ten thousand cords.

It is estimated that a larger quantity of wood was on hand in my possession at the close of the fiscal year than will be required in this department for a number of months, the same having been provided mostly by the operations of the last winter and early spring, with a view to the quantities needed in coming winter, based on the requirements of the past; but the work of transporting to Alexandria and this city was in rapid progress, the wood being properly piled and protected at these points, and ready for any purpose designated.

During the past winter necessary repairs and some additions were made to the barracks at the forts throughout the chain of fortifications, but the same

were as limited as the health and comfort of the troops would allow.

Temporary sheds and stables for protection of animals were erected about the 1st of December on the line of the first separate brigade, embracing the fortified points from Fairfax Station to Prospect Hill, while the troops of the command constructed log and stockade quarters, which were covered with lumber.

By the direction of the Secretary of War, through Major General Auger, the erection of a building for detailed clerks and messengers belonging to department of Washington on duty in this city was commenced about the 20th of

February and completed April 15.

This structure is situated on the corner of Twenty-second and I streets, contains accommodation for two hundred men, and it was considered would pay for its cost in about one year, by the saving to the government of the commutation of fuel, quarters, and rations heretofore allowed to that class of men.

On the night of April 1 the frame structure used as public offices pertaining to headquarters department of Washington, adjoining the brick building corner of Fifteenth-and a-half street and Pennsylvania avenue, was entirely con-

sumed by fire, including part of the furniture.

By direction of the major general commanding, another building, to replace the one destroyed, and intended for same purpose, was commenced about April 10 and finished May 20, without expense to the Quartermaster's department; the cost of material and labor in its construction being paid from the fund in the possession of the Provost Marshal General, defences north of the Potomac.

It having been determined by the proper authorities to retain only a portion of the forts and batteries in this vicinity, the work of removing the guns and other material belonging to the engineer department from the works designated to be abandoned was begun about the 29th day of June.

The order from the War Department (paragraph 5, Special Order 315, War

Department, Adjutant General's office, June 17) directed that—

"The ground occupied by the defences to be abandoned will be restored to the proprietors of loyal character, endeavors being first made to liquidate all claims for occupation and damage of every kind, by transferring to them the right and title to the buildings and fixtures of timber on the bomb-proofs, magazines and stockades erected thereon. In the event that such an arrangement is not made to liquidate the claims in full, the buildings will be torn down and material transported to and used for construction of permanent defences elsewhere, or sold, as may be found most advantageous.

"A sufficient guard will be meantime kept to protect the property from fire

and injury."

The preliminary examination and investigation necessary to understandingly

carry out such instructions was delegated to me by the major general commanding, and the preparation of complete data as to the ownership of the property, loyalty of claimants, and damages sustained by the use of their property in such manner, was in course of completion June 30, the barracks and buildings at the abandoned posts being meanwhile placed under protection of proper guard.

During the winter and spring temporary repairs were made to the Aqueduct and Long bridges, rendered necessary by the frequent passage over the same

by government teams.

The furnishing of transportation by rail and river does not rest in this office, but the necessary orders have been issued upon the depot officers for transportation from and to various points during the year for upwards of 80,000 men and officers, comprising regiments, detachments, and individual cases; also for 2,522 horses, 276 refugees, 5,680 rebel deserters, 603 paroled prisoners, and 1,437 released prisoners.

The land transportation (wagons and teams) in my possession has consisted of from 500 to 600 teams, mostly of mules, which have been used in hauling from woodlands to the shipping points on the railroads and river, and also in

delivering supplies to the various forts and posts.

The animals used have generally been of good condition, although many of the mules received during the winter and early spring were too young and feeble to properly bear the hard labor necessary in hauling from the woods and over the rough and miry roads; but when the armies had concentrated at this point, and turned over to the depot their wagons and teams, a much better class of animals was substituted in their stead, and the close of the fiscal year found this department in possession of transportation animals hardened by service, trained in use, healthy, and fully able to perform the required labor.

I offer no suggestions as to improvements in the pattern of the army wagons and harness, as I consider the class now in use to be simple in arrangement,

durable for service, and well adapted for field purposes.

The supply of hay furnished by the depot at times during the winter being limited on account of the closing of the river, it became absolutely necessary for the sustenance of the animals of the cavalry commands on the upper and lower Potomac, and first separate brigade in Virginia, as well as for transportation animals in my possession engaged on woodlands, to purchase (and in some cases make seizures of) hay in the vicinities. By such means a sufficient (but not full) ration was obtained, and paid for at prices ranging from twenty (20) dollars to thirty-two (32) dollars per ton.

The clothing, camp and garrison equipage drawn from the depot has uniformly been of good quality and manufacture, and has been furnished in quantities and

of a variety amply sufficient for the health and comfort of the troops.

The disbursements made by me during the fiscal year have been of a miscellaneous nature, including the purchase of fuel, forage, and stationery, payment of court-martial expenses, postage, mileage to officers, commutation of fuel and quarters, extra-duty pay to enlisted men, rentals, hire of employés, apprehension of deserters, &c., which responsibility, together with the property charge and the administrative duty required, has marked this office as one of an almost multifarious character.

The following statement exhibits the amount of moneys on hand July 1, 1864, received and disbursed during the year and remaining on hand June 30, 1865, and annexed will be found statements (A and B) of quartermasters' property and clothing, camp and garrison equipage for the fiscal year, and also statement (E) of property captured by the enemy.

Other of the statements specified in your General Order No. 29 are not re-

quired in my report.

To the Quartermaster General of the army and his assistants my warmest thanks are tendered for the valuable instruction and advice imparted.

I am, general, very respectfully, your obedient servant,

M. I. LUDINGTON,

Colonel and Chief Q. M., Department of Washington.

Brevet Major General M. C. MEIGS,

Quartermaster General U.S. Army.

A true copy:

JOHN V, FUREY,

Captain and Assistant Quartermaster,

Statement of public moneys received and disbursed during the fiscal year ending June 30, 1865, by Colonel M. I. Ludington, chief quartermaster, department of Washington.

| On hand July 1, 1864   | <b>\$</b> 17<br>13, <b>4</b> 85 |    |
|--|---------------------------------|----|
| Received from Treasury Department during the year Received from sales of property and other sources during the | 1, 136, 800                     |    |
| year   | 14, 301                         | 55 |
| Total  | 1, 164, 604                     |    |
| Expended during the year   | \$916, 426<br>231, 221          | 98 |
| Remaining on hand June 30, 1865  | 16, 955                         | 77 |
| Total  | 1, 164, 604                     | 46 |
| This balance is deposited as follows:  |                                 |    |
| In United States treasury, Washington, D. C  | <b>\$13, 354</b>                | 42 |
| In National Bank of Metropolis, Washington, D. C   | 3, 601                          | 35 |
| •  | 16, 955                         | 77 |

I certify that the above statement is correct.

M. I. LUDINGTON,

Colonel and Chief Q. M., Department of Washington,
